Medical Scissors

One-Point & One-Blunt Scissors

Stainless steel scissors with one blunt tip and one pointed tip. Overall length is 14.5 cm.

39 13 60	Scissors, one-point & one-blunt, Stainless steel	Pr.

Surgical Scissors

Made of stainless steel with both ends blunt for use in an operation. Overall length is 16 cm.

39 13 61	Scissors, surgical, stainless steel	Pr.

Bandage Scissors

Designed specially to cut bandage without scratching the skin beneath. Stainless steel. Overall length 16 cm.

39 13 62	Scissors, bandage, stainless steel	Pr.

Skin Closures
(Butterfly Closures)

A sterile, waterproof bandage for forming skin closures on superficial lacerations. The bandage has non-adhering film on the center section to prevent the bandage from sticking to the wound. 100 large closures (7 cm x 1.3 cm) in a packet.

39 13 66	Skin closure, 7 x 1.3 cm 100's	Pkt

Sphygmomanometers

Mercury filled blood pressure monitor. Measurement range of 0 - 300 mmHg. Enclosed in a hard plastic case.

39 13 68	Sphygmomanometer, mercury	Set

Digital Sphygmomanometers

Compact and lightweight, battery operated sphygmomanometer. Power source is two R6P (UM-3 • AA) batteries. The measuring range is 0 – 300 mmHg. The unit is furnished with batteries and is enclosed in a soft leather case.

39 13 69	Sphygmomanometer, digital	Set

Splints

Common Splint Sets

Wooden splints suitable for straight setting most fractures. 3 different sizes in a set.

39 13 73	Common splint set, wooden, 3's	Set

Metal Splint Sets

Metal made frames with a sponge pad suitable for setting fractured limbs and hands. One set contains 3 different sized splints.

39 13 74	Metal splint set, 3's	Set

Serrated Splints Gooch Type

A sheet of wooden splints.
Size: 0.9 x 1 mtr.

39 13 75	Serrated splint of Gooch type 0.9 x 1 mtr	Sht

Wooden Thigh Splints

Designed to set a fractured femur.

39 13 76	Splint, thigh, wooden	Pc.

Thomas Splints

Suitable for splinting injuries of the foot. Metal pipe frame with a cushioned support ring.

39 13 77	Splint, Thomas	Pc.

Emergency Air Splints

Made of double-walled transparent vinyl plastic, comfortably shapes itself to the contour of the limb and applies uniform pressure to injured arm or leg. Completely washable and reusable, and can be sterilized by gas or cold solution.

Available in several types:
Hand & Arm:
Hand & Wrist Splint/Half Arm Splint/Full Arm Splint

Foot & Leg:
Foot & Ankle Splint/Half Leg Splint/Full Leg Splint

39 13 78 **79**	Emergency Air Splint inflatable, Arm Assorted 6's Leg Assorted 6's	Set

Sputum Pots

Made of waxed cardboard with a twist on lid.

Marine Automated External Defibrillator (AED) LIFEFORCE

Lifeforce is the world's first and only specialist marine Type Approved automated external defibrillator (AED).

Sudden cardiac arrest (SCA) is the world's biggest killer, killing over 3 million people worldwide every year. The only proven way to treat SCA is by delivering an electric shock to the heart to restore a normal heart rhythm. Lifeforce has been designed to be used by non-medically trained crew, with clear verbal and visual instructions and bright, oversized buttons, for the quick, safe and portable delivery of a shock to the heart. Lifeforce automatically detects when a shock is required, ensuring that a shock is only delivered when required.

Lifeforce has been Type Approved by Germanischer Lloyd (GL) and tested to prove its reliability in accordance with electromagnetic compatibility, humidity, pressure, radio frequency interference, saline mist, temperature and vibration. Lifeforce is manufactured under ISO 13485:2003, cleared by the FDA and CE marked to the Medical Devices Directive 93/42/EEC and supported by a 5 year warranty.

39 15 01	Marine automated external defibrillator "LIFEFORCE"	Set

MOLYSLIP®

Molyslip WRL® ...extreme wire rope lubrication

Molyslip WRL® is a premium-performance lubricant, specifically designed for protecting and maintaining steel wire ropes. The scientists at **Molyslip®** have meticulously formulated **WRL®** from high-quality base oil and an advanced additive system – a combination that delivers outstanding protection against wear and corrosion.

WRL® is the ideal choice for all your wire rope applications, giving unbeatable protection against a wide range of weather conditions and stressful, high-load applications such as construction, ports, oilfields and mining.

- **Forms a low-friction barrier protecting wires and strands from wear – extending the life of your ropes**
- **Excellent corrosion resistance protects ropes operating in wet and adverse weather conditions**
- **Highly adhesive, tenacious film extends maintenance intervals – reducing your costs**
- **Low-temperature flexibility prevents flaking and cracking**

Outstanding performance ...in the extreme

MOLYSLIP®

Copaslip® prevents seizing and wear, giving quick and easy breakout of threads, gaskets and packings, even after long exposure to extremes of temperature, corrosive conditions and surface pressures.

- **Does not harden or soften under extremes of temperature and operating conditions**
- **Operating temperature range from -40 °C to +1100 °C**
- **Prevents metal-to-metal contact, delivering increased reliability and extended component life – reducing costs**
- **Gives permanent protection against rust and corrosion**

GET THE CODE
MSG Data Licence

The Marine Stores Guide (MSG) Data Licence brings all that the MSG catalogue has to offer right to your computer screen.

The Marine Stores Guide is the world's leading reference code within the maritime industry. The MSG Data licence provides a universal coding system to facilitate communication between crew, owner and supplier, making the specification and supply of goods simple quick and effective.

With the latest and most complete version of the data now available, there's no better time than now to start using the unique six digit code in your IT system.

The digital directory lists approximately 50,000 products provided by suppliers and manufacturers from around the world. Regular updates are included as part of the licence.

Kerosene
(Paraffin Oil)

Regular kerosene for use with stoves, torches, or as a paint thinner or cleaning agent for machinery parts or tools. Supplied in containers of 4 or 18 ltr, or in 200 ltr drums.

45 01 06	Kerosene, 4 ltr	Can
07	" 18 ltr	"
08	" 200 ltr	Drum

Diesel Oil
(Gas Oil/Light Engine Oil)

A light engine oil or gas oil for use in diesel engines, generators, or for cleaning machinery and parts.

45 01 11	Diesel oil, 4 ltr	Can
12	" 18 ltr	"
13	" 200 ltr	Drum

Cutting Oil

Quality special purpose oil that cools, speeds metal removal, produces smooth, clean threads, and prevents chips from welding to dies. Will not become rancid and is excellent for drilling, turning, and other cutting operations. Can be used to prolong the life of handtools or power tools.

Non-water soluble type for finishing will be supplied unless specified otherwise. Water soluble oil is also available upon request.

45 01 15	Cutting oil, spray, 350 ml	Can
16	Cutting oil, non-water soluble, 4 ltr	"
17	Cutting oil, non-water soluble, 18 ltr	"

Penetrating Oil

1. A rapid penetrating and rust solvent for removing rusty nuts and for piping repair jobs.
2. A practical, all-purpose oil used as an additive to engine lubricating oil and fuel.
3. For use in wire cable treatment.

45 01 21	Penetrating oil 4 ltr	Can
22	" 18 ltr	"

White Spirit
(White Gasoline)

Commonly known as white gasoline, used as a high quality paint thinner. Furnished in containers of 4 ltr, 18 ltr, or 200 ltr large drums.

45 01 26	White spirit 4 ltr	Can
27	" 18 ltr	"
28	" 200 ltr	Drum

Rust Preventives

For preventing parts, machinery, or tanks from rusting. Displaces and seals out moisture with a dry transparent coating. Products from a variety of global manufacturers are listed in the order table below. To order, **select the code number for Rust Preventives and indicate the brand you require separately.**

CODE	Brand	Product	Unit

Hydraulic Fluid

Suitable for use as a lubricant for high speed hydraulic tool machines. Oils of viscosity grade 5 – 10 are known as spindle oils which resist emulsion, sludge formation, oxidation, and foaming. When ordering from the table below, select a code for the grade of oil which you require. Along with the code number, please specify the brand which you require.

Hydraulic Fluids -–Viscosity mm^2/s at 40°C

Refrigerating Machine Oil

Oil for the lubrication of bearings and crankshaft of the compressor setup for cargo refrigeration systems. These lubricants have the correct viscosity, film strength and stability, both chemical and thermal for the operating conditions. The oils are compatible with refrigerants. Straight mineral elements with additives to prevent foaming and inhibit against chemical action with refrigerants and

system metals. When ordering, **select a code number for the appropriate grade of oil and indicate the brand you require.**

Low Temperature Grease

Antifreeze grease suitable for ball and roller bearings and especially sealed bearings for use in very low temperatures. Supplied in 16 kgs cans. Please specify the maker and the product name which you require.

45 03 21	Grease, low temperature 16 kgs	Can

Cup Grease

A thick grease used for the lubrication of couplings, shafts, and gears which operate at low speed revolution. This product is not recommended for use with high load gears or in high temperature environments. Supplied in 2.5 or 16 kgs cans with a spring shaft dispenser.

45 03 31	Grease, cup, 2.5 kgs	Can
32	" 16 kgs	"

Bearing Grease

Smooth, non-fibrous grease with high oil content to assure lubrication and smooth starting and running torque. Suitable for general service and has a high resistance to moisture. Furnished in 2.5 and 16 kgs cans.

45 03 36	Grease, bearing, 2.5 kgs	Can
37	" 16 kgs	"

Wire Rope Grease

A non-gumming, anticorrosive petroleum lubricant which will penetrate inside of wire rope to prevent corrosion from fresh water, salt water, and other elements.

45 03 41	Grease, wire rope, 16 kgs	Can

Biodegradable Products (EAL)

Compliance of US EPA Vessel General Permit 2013

U.S. Environmental Protection Agency (EPA) signed the Vessel General Permit (VGP), with an effective date of 19th December, 2013. The permit covers vessels that are being used as a means of transportation in inland waters and within the 3 nautical mile territorial sea (Except recreational vessels).

VGP 2013 requires that all vessels must use environmentally acceptable lubricants (EALs) in all oil-to-sea interfaces (stern tubes, thrusters, controllable pitch propeller, rudder stocks and pintle bearing), unless technically infeasible.

VGP 2013 defines EALs as lubricants that are "biodegradable" and "minimally-toxic" and are "not bioaccumulative."

Appendix A– Definitions

"Biodegradable" means the following for purposes of the VGP:

- Regarding environmentally acceptable lubricants and greases, biodegradable means lubricant formulations that contain at least 90% (w/w (weight in weight concentration)) or grease formulations that contain at least 75% (w/w) of a constituent substance or constituent substances (only stated substances present above 0.10% shall be assessed) that each demonstrate either the removal of at least 70 percent of dissolved organic carbon, production of at least 60 percent of the theoretical carbon dioxide, or consumption of at least 60 percent of the theoretical oxygen demand within 28 days. Acceptable test methods include: Organization for Economic Co-operation and Development Test Guidelines 301 A-F, 306, and 310, ASTM 5864, ASTM D-7373, OCSPP Harmonized Guideline 835.3110, and International Organization for Standardization 14593:1999. For lubricant formulations, the 10% (w/w) of the formulation that need not meet the above biodegradability requirements, up to 5% (w/w) may be nonbiodegradable (but not bioaccumulative) while the remainder must be inherently biodegradable. For grease formulations, the 25% (w/w) of the formulation that need not meet the above biodegradability requirement, the constituent substances may be either inherently biodegradable or non-biodegradable, but may not be bioaccumulative. Acceptable test methods to demonstrate inherent biodegradability include: OECD Test Guidelines 302C (>70% biodegradation after 28 days) or OECD Test Guidelines 301 A-F (>20% but <60% biodegradation after 28 days).
- Regarding cleaning products, biodegradable means products that demonstrate either the removal of at least 70 percent of dissolved organic carbon, production of at least 60 percent of the theoretical carbon dioxide, or consumption of at least 60 percent of the theoretical

oxygen demand within 28 days. Acceptable test methods include: Organization for Economic Co-operation and Development Test Guidelines 301 A-F, 306, and 310, and International Organization for Standardization 14593:1999.

Biodegradable Multi-Purpose Grease

Heavy duty and multi-purpose grease containing proprietary EP additive to combat against seizing, galling of bearings and rust. It protects bearings wear through outstanding film strength under severe conditions of shock loading. Resists water wash-out from bearings under the most arduous conditions and provides long service life through high oxidation resistance.

NLGI Grade: 2, EAL and EPA / VGP Compliance product.

45 01 60	Multi-Purpose Grease, Biodegradable, 450 grm per can(24 cans per carton)	C/T

Biodegradable Wire Rope Grease

A wire rope conditioner & lubricant that exhibits excellent lubrication and anti-corrosion properties. Specially developed as environmentally friendly biodegradable grease as VGP compliance, minimally toxic and non-bioaccumulative. It is used whenever protection against rust and/or lubrication is needed: Wire ropes, Crane wires, Winches, Mooring wires, Lifeboat-davits falls, Derricks, Open gears shackles, Backsprings, Tankcover-screws, Hoists, Lashings, Hatch-cover wheels, Valves, Bearings, Screws & bolts, etc.

Unit Per Can

Environmentally Acceptable Lubricants (EAL)

High performance, specially developed rapidly biodegradable lubricants for use in all oil-to-sea interferences such as stern tubes, thrusters and rudder systems, pitch propeller etc. There are many brand of EAL available as VGP compliance, but adoption of EAL will depend on the approval by each machinery manufactures.

Please make sure to specify the EAL brand which is accepted by machinery maker when ordering.

Unit Per Ltr

CODE	Description	Application
45 03 45	Stern Tube Oil	For Stern Tube Seal
48	Wire Rope Oil	For mooring wire, deck crane wire, cables, drive and conveyor chains
49	Hydraulic Oil	For hydraulic systems, bow thrusters and rudder systems, winches and hydraulic pitch adjusters
50	Gear Oil	For gear boxes, roller bearings and slide bearings

Graphite Grease

A grease with the adhesive consistency particularly suitable for use on machine gears and bearings which are exposed to weather elements or high temperatures. This grease is also effective for lubricating and preserving wire rope.

45 03 46	Grease, graphite 2.5 kgs	Can
47	" 16 kgs	"

Asphalt Compounds

Asphalt often used as a protective, waterproof coating on deck. When dry this asphalt has a non-slip, glossy black surface. Supplied in 18 kgs cans.

45 03 51	Asphalt compound, 18 kgs	Can

Coal Tar

Used as a protective coating on deck for the prevention of rust and for the waterproofing of pipes and other fixtures. Supplied in 16 kgs cans.

45 03 56	Coal tar, 16 kgs	Can

Pitch

Black bituminous putty which bonds to any material surface, wood, metal, brick, concrete, glass, etc. Contained in 18 kgs square cans.

45 03 61	Pitch, 18 kgs	Can

Tallow

A grease derived from cow fat which has a thick consistency. Used for lubricating, wire rigging, etc.

Ferryl Anticorrosive Grease

The Ferryl anticorrosive product range relies on chemical properties for the best possible results in rust prevention and lubrication. The special rust-inhibitors in the Ferryl greases, oils and coatings enable long-lasting rust protection at a low cost.

Ferryl 202 Standard Anticorrosive Grease features excellent penetration and lubrication, a high melting point, and special adhesive properties due to its rubberised binders and semi-drying film, such that the grease is resistant to high winds and seawater. The grease is excellent for all running gear and wires, crane wires, mooring wires, lifeboat falls, back springs, inside bearings on hatch cover wheels, valves, shackles, spring wire, screws, and bolts.

The Ferryl product range is provided in the order table below.

CODE	Product No./Unit	Application
45 04 01	Ferryl 101 Anticorrosive Oil 25 ltr/drum	Rust-protection and lubrication of wire ropes. Oil with enhanced penetration into wire. Specially designed for cold-climate use and fast-moving wires. Can be mixed with Ferryl 202 Standard Anticorrosive Grease.
45 04 02	Ferryl 103 Anticorrosive Drying Oil 25 ltr/drum	Drying oil. Forms water resistance film for short or long-term rust protection of metal (spare parts, machine parts, chains, propeller shafts).
45 04 03	Ferryl 202 Standard Anticorrosive Grease 25 kgs/drum	Rust-protection and lubrication of wire ropes. Properties: penetration into wire, high melting point (70°C), rust inhibition, adhesion (binds to wire), semi-drying film, lubrication. For use in all climates.
45 04 04	Ferryl 202 S Anticorrosive Grease 25 kgs/drum	Rust-protection and lubrication of wire ropes. Properties: penetration into wire, high melting point (80°C), rust inhibition, adhesion (binds to wire), semi-drying film, lubrication. For use in all climates.
45 04 05	Ferryl 202 White Anticorrosive Grease 30 kgs/drum	Rust-protection and lubrication of wire ropes. White in colour. Properties: penetration into wire, high melting point (100°C), rust inhibition, adhesion (binds to wire), semi-drying film, lubrication. For use in all climates.
45 04 06	Ferryl 202 Aluminium Anticorrosive Grease 30 kgs/drum	Rust-protection and lubrication of hatchcover rails, crane rails, container lashings, tank cover screws & bolts. Aluminium-coloured, non-cracking 'grease paint' with excellent coverage and sea-water resistance.
45 04 11	Ferryl 400R Anticorrosive White Coating 12 kgs/drum (See sec 25)	One-component product applied like paint. Flexible, non-cracking plastic-like coating. Used on non-rotating wires, standing rigging, rubber insulated electrical cables and (hydraulic) hoses.
45 04 12	Ferryl 401 Anticorrosive Transparent Coating 1 kgs/tin (See Sec 25)	One-component product applied like paint. Flexible, non-cracking, plastic-like coating. For preservation of metals' original colour (steel, brass, bronze, copper). Also used as a wood varnish.
45 04 13	Ferryl 404 Dilution & Cleaning Liquid 10 ltr/drum (See Sec 25)	Solvent for cleaning and dilution of the Ferryl coatings. Used as a general thinner.
45 04 17	Ferryl 502 Anticorrosive Fluorescent Coating 1 kgs/tin (See Sec 25)	One-component product applied like paint. Fluorescent orange-red colour. Flexible, non-cracking, plastic-like coating. Used for safety applications. (life-saving equipment, warnings, bridge, low beams / steps).
45 04 15	Ferryl 505 Anticorrosive Fluorescent Coating 1 kgs/tin (See Sec 25)	One-component product applied like paint. Fluorescent yellow colour. Flexible, non-cracking, plastic-like coating. Used for high visibility marking applications (stairs, walkways, zone markings).
45 04 19	Ferryl Armacit Pipe Sealant 150 grm/tube (See Sec 81)	Paste-like packing that dries hard for permanent sealing of threaded pipes and flanges. Resistant to oil, petrol, most gases. Temperature and pressure-resistant.
45 04 20	Ferryl Rustoil Penetrating Oil 450 ml/spray can	Pre-treatment of wire ropes: penetrates into core of wires to remove rust and moisture. Releases rust and hardened grease/oil from bolts, flanges, machine parts.
22	10 ltr/drum	
45 04 23	Ferrycid Rustremover 25 ltr/drum (See Sec 55)	Efficient removal of light and heavy rust on steel, cleaning of (wooden) decks, rust stain removal on painted surfaces, removal of limescale and cement.

(to be continued)

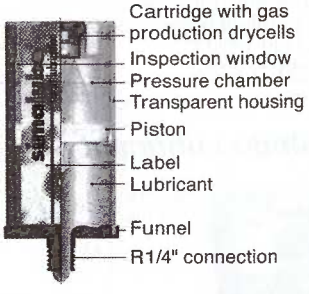
(to be continued)

CODE	Product No./Unit	Application
45 04 24	Ferryl Cleaning Fluid Oil & Grease Remover 25 ltr/drum (See Sec 55)	Water-soluble, emulsifying, solvent-based degreaser. Removes light and heavy deposits of oil and grease on decks, engine parts, oil preheaters, tools.
45 04 26 32	Ferryl Fermaid Alkaline Cleaning Liquid 25 ltr/drum 1 ltr/bottle (See Sec 55)	Alkaline cleaning liquid concentrate for general cleaning and light degreasing of decks, containers / chambers, refrigerators, fishing vessels.
45 04 28 27	Ferryl Electroclean 450 ml/spray can 25 ltr/drum (See Sec 55)	Safe cleaning liquid with a high flash point and quick evaporation for cleaning of electrical equipment and machine parts.
45 04 29	Ferryl Cabin Clean General Cleaning Liquid 25 ltr/drum (See Sec 55)	Cleaning liquid concentrate for general cleaning of cabins, mess rooms, bathrooms, sanitary installations.
45 04 30 31	Ferryl Air refreshment Bad Odour Neutraliser 500 ml/spray bottle 25 ltr/drum (See Sec 55)	Chemically neutralises bacteria in the air, removing bad odour, leaving fresh scent. For cabins, bathrooms, cargo holds, freezers, fishing vessels.

Name of Mfr.: Ferryl Sales Limited.

Automatic Grease and Oil Dispensers

These lube points are provided a consistent delivery of lubricant reliably and automatically, 24 hours a day for up to one full year, by activating with a simple twist of the dispensing dial on the top of the lubricator, and can be altered of any time. The lubricant level can be monitored through the inspection window. Available with a wide range of standard greases and oils and delivers lubricant reliably throughout a temperature range of -20 to +55°C (-4 to +131°F). Environmentally friendly as it does not contain any toxic liquids, batteries, motors, or gears. When exhausted, it can either be recycled through standard recycling channels, or fitted with a new gas generating cartridge, easily refilled and put back into service. Can be filled as well as refilled by using a standard barrel pump that is typically used to fill grease guns.



The dispensing period is variable and can be easily adjusted (1-12 months)

45	AL-T 1000		1 kgs/Tin

Name of Mfr. : Weicon GmbH & Co. KG

Molybdenum Disulfide Lubricant Products

Recommended for the lubrication of machinery parts during assembly.

For operational applications involving low speed at a heavy load capacity more MoS_2 is required than for light load operations at high speed. MoS_2 is also an effective lubricant for machinery operating at high or low temperatures. Many examples for use are available. MoS_2 is also quite effective as a lubricant restoring material for overheated machines.

To meet various applications and conditions, various types of products are available. The most common oil, grease, and aerosol products are listed below. When ordering, please specify the item and container size required.

Unit Per Can

CODE	Item	Size	Application
Anti-Seize paste for Metal			
45 04 51	Moly Paste 500 No. 2	500 grm	An anti-seize paste formulated with a high concentration of molybdenum disulfide (MoS_2). Positioned as the standard product in the series.
52		16 kgs	
Durable Grease			
45 04 61	Molyspeed Grease No. 2	2.5 kgs	A Bentone grease formulated with molybdenum disulfide (MoS_2) that has excellent wear resistance and anti-seize properties. Can withstand momentary exposure to high temperature up to 230°C.
62		16 kgs	
45 04 63	Molytone Grease No. 2	2.5 kgs	A variant of Moly Speed Grease formulated with a high concentration of molybdenum disulfide (MoS_2). It excels in wear resistance.
64		16 kgs	
45 04 65	Moly PS Grease No. 2	2.5 kgs	A Benton grease with a further enhanced anti-seize property over Moly Speed Grease, made possible by the addition of an extreme pressure agent.
66		16 kgs	
Heat Resistant Grease			
45 04 71	Molytherm No. 2	2.5 kgs	An inorganic grease formulated with a high concentration of molybdenum disulfide (MoS_2) that has excellent wear resistance and anti-seize properties. Its excellent heat resistance enables it to tolerate momentary exposure to high temperature up to 290°C.
72		16 kgs	
45 04 73	Hi-Moly Grease	2.5 kgs	An inorganic grease formulated with molybdenum disulfide (MoS_2) and grafite. Switches to solid film lubrication at high temperature courtesy of its low-residue synthetic base oil.
74		15 kgs	

(to be continued)

Unit Per Can

CODE	Item	Size	Application
Lithium Soap Greases for Heavy Load			
45 04 81	Moly LG Grease No. 2	2.5 kgs	A lithium soap grease formulated with a high concentration of molybdenum sulfide (MoS_2). Has exceptional wear resistance and anti-seizure properties. Ideal for heavy-duty bearings, sliding parts and gears.
82		16 kgs	
83	Cartridge Moly LG Grease No. 2	400 g/tube	
Open Gear Grease			
45 04 86	Moly Gear Compound 900	2.5 kgs	Gear compounds containing molybdenum disulfide (MoS_2). Produce a semi-dry film with superior lubricity under heavy loads.
87		16 kgs	
Wire Rope Grease			
45 04 89	Moly Rope Dresser No. 0	2.5 kgs	A Bentone grease containing molybdenum disulfide (MoS_2). Capable of penetrating deep into a wire rope to reduce inter-wire friction and prevent eccentric deformation and corrosion. Hardening and breaking off under low temperature conditions also reduced.
90		16 kgs	
Open Gear Grease Spray			
45 04 88	Moly Gear 1500 Spray	420 m/tin	Ideal for open gears. Produces a semi-dry film excellent in shear stability with regard to tooth faces.
Wire Rope Grease Spray			
45 04 91	Moly Rope Spray	420 ml/tin	Designed for wire ropes. Reduces wear and prevents eccentric deformation and corrosion by penetrating deep into inter-wire spaces.

Name of Mfr. Sumico

Molykote Products

To lubricate and prevent the seizing of machine parts during repair or reassembly. Product types for a variety of applications are listed below. When ordering, please specify the product type and the container size required.

Unit Per Can

CODE	Type	Contents per Can	Description
Powder			
45 05 01	Z	1 kgs	Can be used as run-in aid, in press-fittings, in heavy loads and slow speeds applications
02		5 kgs	
04	Micro size	0.5 kgs	
05		2 kgs	
Paste			
45 05 11	G-n	0.5 kgs	Can be used at assembly, for sliding parts under high loads at low speeds, as a screw lubricant, and in metal working.
12		1 kgs	
13		5 kgs	
45 05 14	G-Rapid Spray	330 ml (aerosol)	Multi-purpose molybdenum disulfide spray lubricant for fretting corrosion prevention, seizure prevention and run-in protection.
45 05 15	U	0.5 kgs	Can be used at assembly, for sliding parts under high loads at low speeds, as a screw lubricant, and in metal working.
16		2 kgs	
17		6 kgs	
45 05 18	M-77	0.5 kgs	Suitable for lubrication points with low to moderate loads and low speeds which are subjected to water and extreme temperatures(400°C)
19		2 kgs	
45 05 20	1000	300 ml (Aerosol)	Suitable for bolted joints that are subjected to high temperatures up to 650°C (1,202°F) and to corrosive effects.
21		1 kgs	
22		5 kgs	
45 05 23	P-37	500 grn	Lubricant paste for screws, nuts and bolts that are subjected to extremely high temperatures (1,400°C)
24		1 kgs	
25		25 kgs	
Grease			
45 05 26	BR-2 Plus	1 kgs	Used on roller bearings, plain bearings, sliding guides, roller guides, ball-and-socket joints, splined shafts and threaded spindles.
27		16 kgs	
45 05 51	111 Compound	150 grm	Seal grease for vacuum and pressure systems, transformer gasket and equipment enclosures and Rubber and plastic O-rings, gaskets and seals.
53		5 kgs	
45 05 54	6169	1 kgs	Grease for use in valve seals, valves and other components from low temperatures to high temperatures, in corrosive, solvent, liquefied natural gasses, high vacuum, etc.
55		20 kgs	
45 05 56	HP-870	100 grm	Fluorinated grease for harsh condition, high temperatures, corrosive, solvent, liquefied natural gasses, high vacuum, etc.
57		1 kgs	
58		10 kgs	
59		25 kgs

Unit Per Can

CODE	Type	Contents per Can	Description
Lubricant			
45 05 31	Supergliss	300 ml (Aerosol)	Quick penetration even in areas difficult to access, loosens rusted screw connections as well as other components, thus facilitating disassembly.
45 05 34	M	1 ltr	Lubricant for Gears–Gears at slow speeds and extreme pressures, Oil-lubricated plane bearings.
35		4 ltr	
45 05 36	M-30	1 ltr	Black dispersion of solid lubricant for chains and rollers.
Lubricant Film			
45 05 41	M-8800	360 ml (Aerosol)	Air-curing dry film lubricant for metal/metal combinations with slow to medium fast movements and high loads. It also prevents sticking rubber parts.
42		1 ltr	
43		4 ltr	
45 05 44	D 321R	223 ml (Aerosol)	Air-curing dry film lubricant for metal/metal combinations with slow to medium fast movements and high loads and the running-in of highly stressed gear wheel.
45		1 ltr	
46		4 ltr	
45 05 47	106	1 ltr	Dry lubrication for highly stressed friction combinations with low speeds or oscillating operation.
48		4 ltr	

Tanks Compounds

A protective coating. No. 1 is for interior surfaces of pressure steam tanks including boilers, economizers, calorifiers, turbines and hot water tanks of temperature above 100°C (212°F). No. 3 is for wet surfaces of a temperature below 50°C (125°F) or for dry, hot surfaces up to a temperature of 200°C (400°F).

45 05 61	Apexior compound	No. 1 1 gal	Can
62	"	No. 3 1 gal	"

MolySlip Anti-Seize Compounds

Copaslip

A high-performance compound specifically formulated to protect fasteners from seizure induced by extremes of temperature, pressure and corrosion. The semi-synthetic base fluid is reinforced with anti-oxidants, corrosion inhibitors and ultra-pure copper particles to provide outstanding protection to threads and components.

CODE	Contents	Unit
45 05 65	400 ml (Aerosol)	Tin
66	500 grm	"
64	5 kgs	Keg

Molyslip AS 40

Anti-scuffing and assembly paste is a high performance lubricant containing molybdenum disulphide (MoS_2) and graphite, formed into a soft paste.

CODE	Contents	Unit
45 05 94	500 grm	Tin
95	5 kgs	Keg

Alumslip

A high temperature anti-seize compound formulated to protect fasteners from seizure induced by extremes of temperature, pressure and corrosion. The mineral oil base fluid contains micronized particles of metal and non-metal fillers to provide excellent lubrication and protection to threads and components.

CODE	Contents	Unit
45 05 93	500 grm	Tin
97	5 kgs	Keg

Molyslip Products

CODE	Type	Contents	Application	Unit
45 05 68	ARVINA MB2.	450 g	A mineral oil based, non-melting organo-modified clay thickened grease designed to lubricate bearings operating in variety of extreme conditions.	Tin
60		4.5 kgs		Keg
45 05 69	ARVINA OG0	500 g	Heavy duty lubrication for extreme conditions. Tough, adhesive tenacity, won't be thrown off by gears or scraped off by motion.	Tin
70		4.5 kgs		Keg
45 05 71	ARVINA HL2	450 g	A premium quality, heavy duty grease designed for the lubrication of ball, roller and plain bearings operating in arduous conditions.	Tin
72		4.5 kgs		Keg
45 05 73	Liquid Grease L.Q.G.	400 ml (Aerosol)	Liquid grease for spraying into inaccessible places, it will not drain away like an oil. Will remain in place for months reducing friction and preventing metal to metal vibration and squeaking.	Tin
74		5 ltr		Tin

(to be continued)

CODE	Type	Contents	Application	Unit
45 05 75	Dry Moly Spray	400 ml (Aerosol)	Molybdenum disulphide dry film lubricant. For lubrication in situations where oil or grease are not acceptable. Good for preassembly treatment.	Tin
45 05 77	Combat	400 ml (Aerosol)	Multi purpose lubricating spray with water displacing, penetrating and anti rust protective film properties.	Tin
45 05 78	WRL-C5	400 ml (Aerosol)	Semi-fluid grease with Moly and graphite. Ideal for wire ropes and chains. Highly water repellent and tenacious – will not fling off.	Tin
79		4.5 kgs		Tin
80		18 kgs		Drm

SAF-T-EZE Anti-Seize Products

Compounded from fine metallic particles and graphite in a heat resistant lubricant. For ultimate protection to over 2,000°F use to speed assembly and prevent cold welding or carbon fusion as well as rust and other corrosion.

Unit Per Tin

CODE	No./Name	Applications	Contents
45 06 61	Regular Anti-Seize SL-16	Service to 2,000°F. Produced from copper, aluminium and graphite in grease. Resists corrosion and galvanic attack even in the presence of salt water.	16 oz /Can
45 06 62	Regular Anti-Seize SBT-8		8 oz /Can (Brush Top)
45 06 65	Nickel Anti-Seize SL-16N	Service to 2,600°F. Compounded from nickel, aluminium and graphite in a heat resistant lubricant. Recommended when very different metals are used together. Works well on stainless steel.	16 oz /Can
45 06 66	Nickel Anti-Seize SBT-8N		8 oz /Can (Brush Top)
45 06 71	Moly-Grade M-16	Service to 650°F. Compounded with molybdenum disulphide for extreme pressure applications. Prevents wear or galling on gears or splines operating under high load at low speed. Withstands pressures to 0.5 million psi.	16 oz /Can
45 06 72	Moly-Grade MBT-8		8 oz /Can (Brush Top)

Name of Mfr.: SAF-T-LOK Corporation

Anti-Seize Lubricants

Loctite® LB8150 (Silver Grade Anti-Seize 767)

Heavy-duty, temperature-resistant, petroleum-based lubricant compound fortified with graphite and metallic flake.

Inert, will not evaporate or harden in extreme cold or heat. For use in assemblies up to 1,600°C (871°F).

CODE	Contents	Unit
45 06 81	454 grm	Can
88	210 grm	Brush Top

Loctite® LB771 (Nickel Anti-Seize)

Copper-free.
Recommended for stainless steel and other metal fitting.
For preventing corrosion, seizing, and galling in harsh, chemical environments, and temperatures to 2,400°F (1,315°C).

CODE	Contents	Unit
45 06 82	454 grm	Can

Copper Anti-Seize Lubricant
Loctite® C5-A® LB8007/8008

Exclusive formula suspends copper and graphite in a high quality grease. Protects metal parts from rust, corrosion, galling, and seizing at temperatures to 982°C (1,800°F). Tested to MIL-PRF-907E. Copper colour is available.
Typically applications include original equipment and maintenance, and equipment associated with petroleum chemicals, steel mills, power plants, marine and foundries.

Heavy Duty Anti-Seize
Loctite® LB8009

Excellent lubricity. Metal-free formulation provides outstanding lubrication to all metals including stainless steel, aluminium, and soft metals up to 1,315°C (2,400°F). Typical applications of this product includes bolts, screws, studs, pipe joints, nuts, plugs, bushings, metal bending, mechanical packings, etc. Black colour is available.

Unit Per Can

CODE	Contents	Colour
45 06 91	1.2 lb brush-top can	Black
92	2.3 lb	

Marine Grade Anti-Seize
Loctite® LB8023

Metal-free formulation to protect assemblies exposed directly or indirectly to fresh or salt water. Loctite® Marine Grade Anti-Seize works especially well in high humidity conditions. It has excellent lubricity, superior water-washout and water spray resistance and prevents galvanic corrosion. Protects in temperatures from -29 to 1,315°C (-20 to 2,400°F). Typical applications are bolts, screws, studs, pipe joints, nuts, shafts, bushings, splines, chains, and cables in marine applications, dressing for water pump gaskets and flanges, pulp and papermills, water and waste water treatment plants.

Unit Per Can

CODE	Contents	Colour
45 06 93	8 oz	Black
94	16 oz/454 grm	

Freeze & Release
Loctite® LB8040

Releases rusted, corroded and seized components by the shock-freezing effect; wicks directly into the rust by capillary action; released parts remain lubricated and protected from corrosion.

CODE	Contents	Unit
45 07 07	400 ml	Can

Five Way Spray
Loctite® LB8201

General Purpose Lubricant.
For light lubrication of metals; cleans parts, displaces moisture and prevents corrosion.

CODE	Contents	Unit
45 07 08	400 ml	Can

Multi-Purpose Maintain Lube
Loctite® ML-11™

Oil base spray, provide lubrication, cleaning and rust prevention for protecting metal surface. Expel, eliminate and prevent water and moisture of various electrical devices. Penetrate smoothly to deep inside area for lubrication and rust prevention. Help the devices operate smoothly by reducing preparatory motion or noise.

Unit Per Can

CODE	Contents	Colour
45 07 09	360 ml	Clear/Straw

Biodegradable Anti-Seize Compound

Bio-based high temperature and EP grease. This grease is fortified with additives that provide excellent lubricating properties, stability and anti-wear capabilities. It is non-gumming, no-petroleum based grease. It has no drop point, so it will not run out of threads when heated. It sticks to the metal threads and lets joints in pipe or nuts on bolts or studs make up less torque.

NLGI Grade: 1, an EAL and EPA/VGP Compliance product.

45 06 73	Anti-Seize Compound, Biodegradable 450 grm per can (24 cans per carton)	C/T

Aerosol Products

A wide range of CRC products are available according to their applications, i.e. lubricating, penetrating, demoisturizing, anticorrosion, degreasing, rust removing, electrical cleaning, etc.

The most common items are listed below. These aerosol products do not emit harmful fluorocarbons and are ozone safe. Liquid types are also available upon request.

For further detailed information or instructions for use, please write or ask local supplier for catalogues before ordering.

Unit Per Tin

CODE	Name	Contents	Description
For Mechanical use			
45 05 81	3-36	500 ml	Rust and corrosion preventive. Penetrating and Moisture-off.
82	5-56 Power Spray	400 ml	Removing rust and corrosion, lubricant and penetrating.
83	Brakleen	500 ml	Broken parts cleaner.
84	6-66	300 ml	Moisture-off, penetrating and lubricating.
86	Seal Coat	11 oz	Rust preventing.
87	Zinc-IT	13 oz	Cold galvanize rust protector.
For Electrical Use			
45 05 91	2-26	500 ml	Moisture-off corrosion preventing, lubricating and penetrating.
92	Lectra Clean II	500 ml	Electric motor and equipment cleaner.
Cleaners for Precision Use			
45 09 01	Contact Cleaner	14 oz	Solvent cleaner for light contaminants on electric or electronic parts. Compatible with most plastics.
02	N.F. Precision Cleaner	300 ml	Non-flammable solvent cleaner for light contaminants on electrical or electronic parts.
Cleaners for Heavy Duty			
45 09 05	ECO Complex Blue	750 ml	Non-flammable, slow drying water based cleaner for heavy contaminants in food grade areas.
Anti Corrosion Products for Inhibition			
45 09 11	SP 350	250 ml	Long-term corrosion inhibitor indoor protection up to 2 years.
Anti Corrosion Products for Coatings			
45 09 15	Zinc	500 ml	Cathodic protection, even for damaged galvanized parts. Zinc-based coating with excellent adhesion to metal surfaces.
16	Urethane Coating	11 oz	Protective, urethane based varnish for electronic components.
17	Cold Galvanise	400 ml	High zinc content anti-corrosion paint that offers true cathodic protection to ISO 1461:1999.
45 09 18	Bright, Cold Galvanise	400 ml	Repair for hot-dipped galvanise steel: weathers naturally for 'invisible' repairs.
19	Galvanise Zinc Rich	400 ml	High temperature, very fast drying, 'hammered' steel finish silver paint.
Lubricants for Processing			
45 09 21	Supercut II	300 ml	Low viscous cutting liquid for normal, metal-cutting operations.
Lubricants for Oils			
45 09 26	Industrial Silicone	10 oz	Synthetic lubricating oil, suitable for plastic drives and applications at high temperatures.
Welding Products			
45 09 31	Crick 110	500 ml	Solvent cleaner to prepare the surface for examination.
32	Crick 120	500 ml	Penetrating colorant to mark the cracks and failures.
33	Crick 130	500 ml	Developer to make the marked cracks and failures visible.
Anti-corrosion Products			
45 09 35	Rust Remover	250 ml	Removes corrosion and/or rust from metals.

Name of Mfr. : CRC Industries

(to be continued)

Fault Detection Freezers for Electronics

Use on electronic circuits to identify intermittent faulty components. Non-flammable, F-Gas compliant, low GWP.

45 09 22	Freezer, fault detection for electronics, Freezer/2,400 ml	Tin

Name of Mfr.: CRC Industries (Ambersil)

Remark: F-Gas regulation

Article 13(3) Refrigeration Service Bans:

From 1 January 2020, the use of fluorinated greenhouse gases with a GWP of 2,500 or more, to service or maintain refrigeration equipment with a charge size of 40 tonnes of CO_2 equivalent (CO_2e) or more, shall be prohibited.

This paragraph shall not apply to:

- military equipment, or
- equipment intended for applications designed to cool products to temperatures below –50°C
- until 1.1.2030: reclaimed or recycled f-gases providing they have been labelled in accordance with Article 12. Recycled gases may only be used by the undertaking which carried out the recovery ... or the undertaking for which the recovery was carried out.
- refrigeration equipment for which received an exemption has been (Quoted from "Guide to updated EU f-gas regulation (517/2014)", published by the Linde Group)

Engine Igniters

Diesel engine aerosol igniter. Insures quick engine starts at low temperatures and reduces wear on the engine, starter, and battery. Also serves as a rust inhibitor and lubricant.

45 05 96	Engine Ignitor Aerosol 300 cc	Tin

Krylon Industrial Sprays

Unit per Tin

CODE	No./Name	Applications	Contents
Coatings			
45 06 01	No. 1304 Ignition Sealer	Seals all electrical connection for quick sure starts.	13 oz
02	No. 1307 Battery Protector	Effectively seals battery terminals, cables, and ignition systems.	13 oz
03	No. 1330 Belt Dressing	Provides belt gripping action. Extends belt life, and reduces machinery down time.	13 oz
04	No. 7004 Insulating Varnish	Use on re-wound motor windings, starter windings, armatures, coils, switch board parts, etc.	13 oz
Lubricants			
45 06 06	No. 1322 Open Gear Lubricant	Constant lubrication at extreme pressure. Forms a continuous film of lubrication under all loads and speed.	13 oz
07	No. 1325 All-purpose Silicone Spray	Penetrates deeply and eliminates sticking, and annoying squeaks caused by friction.	10 oz
08	No. 1332 Let-go	Penetrates deeply to free rusted and corroded parts fast. Excellent for loosening "rust frozen" nuts, bolts, etc.	13 oz
09	No. 1347 Industrial Strength Spray	Lubricates, reduces friction and stops squeaks. Used to penetrate, lubricate and free nuts and bolts, etc.	11 oz
10	No. 1349 Silicone Tube	Used as a release agent, lubricant, and parting agent on metal, plastic, rubber, wood, leather, etc.	10 oz
Cleaners			
45 06 16	No. 1323 Cleaner and Degreaser	Penetrates and dissolves engine oil, grease and grime. Excellent cleaner for all types of engines.	13 oz
17	No. 1326 Contact & Cleaner Lubricating Spray	Solvent action loosens and dissolves dirt and gummy deposits.	16 oz
18	No. 1327 Electric Motor Cleaner	Instantly penetrates, dissolves and cleans greases, oil and dirt from motors, generators, fans, etc.	16 oz
19	No. 1333 Tuner & Contact Cleaner Lubricant Spray	For contacts, switches, relays. Provides a long-lasting, non-drying film which lubricates the surface and protects against corrosion.	16 oz
20	No. 1336 Battery Cleaner	Cuts through and dissolves power-robbing acid corrosion to clean battery terminals, cable connectors, and frames.	15 oz
45 06 21	No. 1351 Electronic Contact Cleaner & Lubricant Spray	Solvent action dissolves oily deposits on switches and other electrical contacts.	10 oz
22	No. 1352 Brake Cleaner	Dissolves and flushes away brake fluid, oil, grease and dirt from brake linings, disc brake pads, etc.	16 oz

(to be continued)

Spanjaard Products

The Spanjaard range of marine products covers the entire spectrum from navy or merchant navy to leisure craft.

Unit per Tin/Can

CODE	No./Name	Applications	Contents
45 06 45	Cold Zinc Galvanising Spray	A zinc rich touch-up paint for galvanised steel. Contains >95% purity zinc. Forms a flexible, non-cracking, non-chipping coat that protects surfaces even in acidic atmospheres. Especially useful when galvanised coating has been disturbed.	400 ml /Spray
45 06 31	Spark Multi-Purpose (Non-flammable)	NON-FLAMMABLE multi-purpose lubricant for use directly onto live electrical circuits or where fire hazard or explosive conditions exist.	500 grm /Spray
45 06 32	Spark (Non-flammable)	A lubricating, penetrating, water displacing & rust preventative oil.	300 ml /Spray
45 06 34	Copper Compound (Anti-seize)	Extreme temperature anti-seize and anti-corrosion compound up to 1,100°C. Permits firmer tightening and easier loosening of threaded connections. For stainless steel use Spanjaard Chrome or Nickel Compound.	100 grm /Tube
33			400 ml /Spray
35			500 grm /Tin
45 07 10			500 grm /Brush Top Tin
45 06 30	Flaw & Crack Detector System	Set of 3 products for detecting cracks and flaws on the surfaces of metals. No. 1 Cleaner, No. 2 Penetrant and No. 3 Developer.	350 ml Spray × 3/Set

(to be continued)

Unit per Tin/Can

CODE	No./Name	Applications	Contents
45 06 46	"G" Gearbox & Differential Lubricant Supplement	A wear-reducing, mineral oil based supplement, containing MoS_2 for all types of gears. It reduces friction and gear face wear. Gives excellent performance in gearboxes, steering boxes, differentials & transmissions (non-automatic).	100 ml/ Tube
47			5 ltr/Tin
48			20 ltr /Drum
45 06 49	Lectro Kleen	A most sophisticated electrical contact cleaner. Fast drying leaving no residue. Will not attack plastics. For use on computers, PC Boards, relays, switches, electro-mechanical devices, TV, transceivers, connectors, radar and navigational equipment.	200 ml /Spray
50			400 ml /Spray
45 07 11	Lectro Kleen Non-flammable	A most sophisticated NON-FLAMMABLE electrical contact cleaner for use where fire hazard or explosive conditions exist. Check compatibility with plastics before use. High di-electric strength. Electronics: computers, PC boards, relays. Electrical: switches, electro-mechanical devices. Telecoms: TV, transceivers, connectors. Radar, navigational equipment.	430 grm /spray
45 06 53	MPG (Multi-Purpose Grease) (Premium Grade) Non-melt Grease	A non-melting anti-friction grease containing a high percentage of MoS_2. Excellent water-resistance properties. High load carrying capacity.	500 grm /Tin
54			5 kgs /Tin
55			15 kgs /Keg
45 06 41	Open Gear & Wire Rope Spray	Aerosol for lubrication of smaller open gears and wire ropes. Economical, high performance, adhesive lubricant. Contains MoS_2.. Highly water-resistant.	350 ml /Spray
45 06 43	Open Gear Lubricant 1279	A black water-resistant, heavy duty, tacky lubricant with extreme pressure, low friction and anti-corrosion properties. Contains MoS_2.. For use on open gears including winch open gears & wire ropes in marine conditions.	15 kgs /Keg
45 06 44	Wire Rope Dressing 1345	High quality Wire Rope Dressing containing specific anti-fretting and anti-corrosion additives. Tacky semi-synthetic lubricant specially developed for wire ropes in marine and industrial equipment. Excellent water-resistance performance.	15 kgs /Keg

(to be continued)

45 06 56	Rapid Kleen	A high quality solvent based heavy duty industrial aerosol cleaner & degreaser. Cleans metal parts, glass and ceramics. Flushes away oils and grease, removes dust & surface contaminants. Very fast drying and leaves no residue.	400 ml /Spray
45 06 57	Spatter Release #640 (Non-Silicone)	Prevents adherence of weld spatter on MIG nozzle. Suitable for MIG, MAG & CO_2 welding operations. Also prevents adherence around the weld zone allowing any spatter to be brushed away easily.	400 ml /Spray
45 06 58	WR Bearing Grease	A red coloured high quality, extremely tacky, extreme pressure grease with extremely high adhesion properties. For water (hot or cold) under high pressure & steam conditions.	400 grm/ Cartridge
59			15 kgs /Keg
45 07 12	Chrome Compound (Anti-Seize)	Anti-seize, anti-corrosion compound – ultra high temperature. Prevents seizing, galling and corrosion up to 1,500°C. Suitable for use on all steels including austenitic/ stainless steels.	350 ml /Spray
13			500 grm /Tin
14			500 grm /Brush Top Tin
45 07 15	Silicone Paste	Pure non-drying silicone lubricant. Non-conductive, water-resistant, colourless and non-staining. NSF H1 approved. Suitable for refrigerator door seals, swimming pool rubbers and seals, plastic gears and mechanisms.	100 grm /Tube
16			500 grm /Tin
45 07 17	Tool Joint Lubricant	A non-melt extreme pressure thread lubricant containing high percentages of graphite and MoS_2. Suitable for drill rods, other threads and joints to prevent seizing and galling and to facilitate 'breakout' of the drill rods after drilling is completed	15 kgs /Keg
45 07 18	"E" Engine Oil Supplement	Wear reducing supplement for internal combustion engines. Contains MoS_2, which remains effective under extreme heat and pressure. Reduces friction and associated wear of piston rings, cylinders and valves. Makes no significant alteration to the characteristics of the oil to which it is added.	250 ml /Btl
19			250 ml /Tin

Multi-Purpose Lubricants

These lubricants will stop squeaks, displace moisture, penetrate and prevent corrosion. Specify product name and type when ordering.

WD-40

Boeshield T-9

Three Bond 1801B

Unit Per Tin

CODE	Product	Contents	Type
45 07 02	WD-40	360 ml	Spray
03	Boeshield T-9	4 oz	"
04	Boeshield T-9	12 oz	"
05	Threebond 1801B	180 ml	"

Valvoline "Tectyl" Rust Preventives

The most common types of Valvoline products are shown below. For a further variety of products and detailed information, please write or call your local distributor.

Unit Per Tin/Can

CODE	Product	Cont.	Description
45 07 21	506	420 ml (Aerosol)	For machinery, tools, dies, tubing, stampings, structures, vehicles, overseas and domestic shipment, storage, etc. Excellent low temperature flexibility.
22		18 ltr	
23	511M	18 ltr	Soluble in most lubricating oil. Need not be removed prior to engine component installation. Polar-chemical water desplacer. Self healing film. Packaging preservative for overseas shipment of parts.
24	810	18 ltr	Soluble in most lubricating oil. Coating compatible with most non-potable water systems. Actively displaces water and soluble coolants. Anti-spatter compound in welding.

"Biral" Aerosol Lubricants

From among various types of Biral products, the two most common types are listed below with their respective specifications.

VG-HT Type

Penetrates deeply into difficult to access parts and sets into a grease type consistency which is very water repellent.

PO Type

An effective rust remover which serves as a lubricant and also prevents against further corrosion. It has exceptional penetrating qualities reaching all parts of the machine, leaving behind a thin, rust preventing film.

Unit Per Tin

CODE	Product	Cont.	Type	Major use
45 07 31	VG-HT	480 grm	Visco grease high temperature	For chains, sliding surfaces, gear wheels, transmissions, hoists, hinges, wire lubrication for ships, offshore equipment, etc. From –20 to 270°C
32		5 ltr		
33	PO	40 grm	Penetrating Oil	For rusted screws, etc.
34		5 ltr		

Weicon Spray Products

High quality spray products for maintenance and repair.

Unit Per Tin

CODE	Name/ Contents	Applications
Cleaning		
45 08 01	Cleaner Spray S 500 ml	Degreases and cleans all metals, glass, ceramics and most plastics. This spray is recommended for the pre-treatment of surfaces in applications with other Weicon products where greasy or oily layers would reduce their effectiveness.
45 08 02	Sealant and Adhesive Remover 400 ml	Quickly and easily removes residues of hardened sealants and adhesives as well as lacquers and paints, even from vertical surfaces. New formulation – free of dichloromethane.
45 08 03	Stainless Steel Care spray 400 ml	Antistatic cleaning and preserving care agent for mat and glossy stainless steel surfaces indoor and outdoor.
45 08 04	Multi-Foam 400 ml	The powerful foam cleaner for metals, plastics, lacquered surfaces, glass, tiles, textiles, carpets and upholstery.
45 08 05	Compressed Air Spray 400 ml	An allround problem solver. It removes dust and fluff quickly and reliably from sensitive surfaces and parts which are not easily accessible.
45 08 06	Visor Cleaner 200 ml	Visor cleaner is the ideal product for the cleaning and care of sensitive plastic and glass surfaces, e.g. visors, safety goggles, welding face shields, protection caps safety glass, etc.
45 08 07	Screen-Cleaner 200 ml	The ideal product for the cleaning and care even of sensitive plastic and glass surfaces. Removes dirt, dust, grease, and nicotine and cleans carefully without leaving residues.

(to be continued)

Unit Per Tin

CODE	Name/ Contents	Applications
45 08 08	Electro Contact Cleaner 400 ml	Cleaning and degreasing of electrotechnical or mechanical parts, like e.g. electric machines, measuring instruments, balances, switches or sensors. Also ideal for all electric connections, contacts, relays and switchboard plants.
45 08 09	Parts and Assembly Cleaner 500 ml	Cleaner with especially long working time, especially for coarse, oily and greasy soiling as well as for cleaning bigger areas. Due to the high flash point, it corresponds to the VbF Classification A III.
Protection		
45 08 11	Zinc Spray 400 ml	Long term cathodic corrosion protection (< 550 hours salt-spray test acc. to DIN 53167 and DIN 50021) for all metal surface. For priming and touching up hot galvanized parts.
45 08 12	Zinc Spray "Bright Grade" 400 ml	Long term corrosion protection, matches the colour of hot galvanized surfaces, temperature resistant up to 300°C. Very good resistance to salt and water.
45 08 10	Zinc-Alu-Spray 400 ml	Anti corrosion protection, tone approaching hot galvanizing.
45 08 13	Stainless Steel Spray 400 ml	Corrosion and weathering-resistant surface coating, abrasion resistant, heat up to 300°C.
45 08 14	Aluminium Spray A-100 400 ml	Aluminium pigments of a purity of < > 99.5% offer excellent corrosion protection, temperature resistant up to 800°C, abrasion resistant.
45 08 15	Corro-Protection Spray 400 ml	Due to transparent protective film corrosion protection of metal parts for indoor storage. Rust-proofing of tools and precisions parts. TUV approved.
45 08 16	Fitting Spray 200 ml	Fitting spray is a maintenance and care agent with good adhering properties for all movable parts at windows, doors, gates, etc. The transparent product is free of silicones, resins, acids and solvents.
45 08 17	Metal-Fluid 400 ml	Highly-effective product for indoor care, protection and cleaning of mat and polished metal surfaces e.g. stainless steel etc.
18	500 ml	
Rust Loosener		
45 08 21	W-44T 400 ml	Multifunctions Spray: Loosens seized threads, displaces moisture, eliminates squeaky and creaky noises, cleans dirty metal surfaces, and protects and preserves tools.
45 08 22	Rust-Shock 400 ml	The "Chemical Wrench" frees up rusted threads within seconds by its unique dual-action: chill effect and capillary effect.
45 08 23	Rust Loosener and Contact Spray 400 ml	With 6-fold function: an indispensable aid in all repair, maintenance and servicing jobs.

(to be continued)

45 08 20	Rust Converter 400 ml	For the effective neutralisation of rust on rusty cast iron and steel surfaces. Protects from corrosion and is suitable for internal and external use. Based on epoxy resin and forms a metallic-organic iron complex with the rust layer.
Lubricating		
45 08 25	Pneuma-Lub 400 ml	Lubricant for pneumatic equipment, high content of PTFE makes it a multi-purpose product for lubrication, corrosion protection, cleaning, water displacing and conservation. Temperature resistant from –50v (-58°F) up to +210°C (+410°F).
45 08 26	Top-Lub 400 ml	Long-term lubrication for power transmitting bolts, hinges, guides, bearings, joints and couplings. With high adhering properties and good resistance to centrifugation. Excellent creeping properties.
45 08 27	PTFE-Spray 400 ml	Dry, clean and grease-free PTFE-based lubricant with excellent sliding properties.
45 08 28	Silicone Spray 400 ml	Sliding and release agent for efficient production and maintenance. Temperature resistant from –50°C (-58°F) up to +250°C (+482°F).
45 08 29	Chain and Rope Lube Spray 400 ml	Synthetical chain- and rope Lube spray: high pressure-resistance, temperature resistance from -4°C up to +200°C, with excellent adhering and creeping properties, transparent.
45 08 30	AT 44 400 ml	For use in all sectors of industry and workshops. By its special formula, the product combines effectiveness in corrosion prevention, cleaning, water displacement and lubrication.
45 08 31	Bio Fluid Spray 500 ml	Free of resins and acids, water-white, high purity mineral oil, especially developed for the use in the food, pharmaceutical and cosmetic industries.
45 08 32	Anti-Friction Spray MoS_2 400 ml	Anti-Friction Spray MoS_2 forms a dust-, dirt- and water-rejecting separation layer with very good resistance to oils, grease and many chemicals. The product can be applied on almost all metals, plastic and wood surfaces.
45 08 33	Spray-on Grease, White 400 ml	All-purpose sprayable grease for highly stressed parts. Contains special wear reduction and corrosion-inhibiting additives.
45 08 34	Universal Spray-on Grease with MoS_2 400 ml	Strong-bonding and high pressure resistant long-life grease with MoS_2. Friction and wear are reduced for a long time.
45 08 35	Adhering Grease – extra strong – 400 ml	Special lubricant and corrosion protection, also for underwater applications. Effective protection against aggressive liquids (e.g. salt water, sewage water) in maritime environments and in wet plants.

(to be continued)

Unit Per Tin

CODE	Name/ Contents	Applications
Hand Protection		
45 08 36	Hand Protective Foam 200 ml	The "invisible glove" prevents the penetration of soilings in the skin's pores.
Technical Sprays		
45 08 41	Leak Detection Spray 400 ml	Non-flammable compound used for fast, convenient and reliable location of even the smallest leaks in pressurized pipes or tanks. Approved for use in gas pipelines (DIN/DVGW Approval NG-5170AO0666).
45 08 42	Welding Protection Spray 400 ml	Prevents the adhesion of weld spatter to gas nozzles and workplaces without affecting the quality of the weld seam. - Silicone-free -.
45 08 43	Contact Spray 400 ml	Dispels moisture from electrical contacts, prevents leakage current and voltage loss and keeps contacts, fuses, cable connections, etc. free of oxidation and sulphide deposits.
45 08 44	Crack Testing Agent Set	System for the non-destructive material inspection using a dye penetrant procedure. The system consists of three technical sprays: Crack Testing Agent Cleaner, Penetrant and a Developer. Suitable for metals, plastics, ceramics, glass, etc.

Name of Mfr. : Weicon GmbH & Co. KG

Anti-Seize Products

High-performance assembly pastes and sprays. Used as corrosion protection and high-performance assembly paste for statically high-stressed screw connections and assembly parts as well as for slowly rotating installations in the high temperature range. Anti-Seize Assembly-Paste, reliable protection against corrosion, seizing and cold welding.

Anti-Seize

Copper Paste

A protecting, separating and lubricating agent for highly stressed parts, used as assembly lubricant for threaded joints and sliding surfaces of all kinds. The strongly adhering paste consists of special additives and a combination of solid lubricants made of graphite and copper particles. This ensures low friction values in threaded joints and excellent separating characteristics. Copper Paste provides an efficient lubricating and separating layer on plug-in tools, wear bushings and threaded, plugged-in or bayonet joints of all kinds, thus protecting the functional surfaces from corrosion and seizing. Temperature resistant from -20°C (-4°F) up to +1,100°C (+2,012°F).

Triton-Leo Products

Q20 displaces moisture, stops rust in its tracks, protects and lubricates all household appliances and industrial machinery. It has a scientifically advanced technical formula, it is ozone friendly and it does not contain flammable propellant gases by using carbon dioxide as the propellant gas in the aerosol which is 100% safe for consumers and our environment.

CODE	Name	Application	Contents
45 08 51 **52**	Moisture Repellant, Q20	For protecting and removing moisture from wet ignition systems on cars, trucks, motorbikes, marine engines and electric motors.	300 grms /Aerosol 5 ltr/Drum

(to be continued)

CODE	Name	Application	Contents
45 08 53	Penetrating Oil, Q10	A quick acting, penetrating rust solvent and release agent for rusted or seized nuts, bolts, pipe fittings etc.	400 grms /Aerosol
54			500 ml /Bottle
45 08 55	Antibacterial Hand Cleaner, Q4-45	A fast-acting hand cleaner that removes oil, grease, wet paint, printing ink and bitumen. A high content of Lanolin which protects the skin and prevents dry hands. Can be used with or without water.	500 grm/Tin
56			1 kgs/Tin
57			4.5 kgs/Tin
45 08 58	Rust Remover, Q12	A non-abrasive solvent blended rust remover that dissolves rust, prevents recurring corrosion and prepares the surface for repainting	200 ml /Bottle
45 08 59	Silicone Q8	A high quality silicone spray that waterproofs and insulates electrical components, protects rubber and plastic components, inhibits rust and corrosion and is anti static lubricant.	400 grms /Aerosol
45 08 61	Multi Purpose Oil, Q-in-One	A high-tech general purpose lubricant for all household and special industrial applications.	100 ml /Bottle
45 08 62	Graphite-Based Penetrating Oil, Q5	A graphite based quick acting penetrating and release agent for rusted nuts, bolts, pipes, fittings etc.	150 grms /Aerosol
45 08 63	Gasket Sealant Hylomar	A non-setting gasket and jointing compound that is resistant to water, coolant, gases, oils, fuel and chemicals. Wide operating temperature from -40°C to 250°C.	100 grms /Tube
64			350 grms /Cartridge

Name of Mfr. : Triton Leo (Pty) Ltd.

Silicone Grease/Compounds

Has superior conductivity and is an effective lubricant in a wide temperature range. Can be applied to most materials, including plastic resin. As a wide variety of products are available, please specify the application of the product and the size of the container required from the code table below.

	CODE	Application	Cont.	Major Usage
Grease	**45 07 51**	Low Temperature (-70 – 160°C)	100 grms/tin	Lubricating of bearings, motor gears and measuring tools.
	52		200 grms/tube	
	53		1 kgs/can	
	54		4 kgs/can	
	45 07 56	Normal Temperature (-40 – 180°C)	100 grm/tin	Lubricating of bearings, and fan motors.
	57		200 grms/tube	
	58		1 kgs/can	
	59		4 kgs/can	
	45 07 61	High Temperature (-20 – 250°C)	100 grms/tin	Lubricating of motors, pumps and valve gears of steam turbines.
	62		200 grms/tube	
	63		1 kgs/can	
	64		4 kgs/can	

(to be continued)

Compound	**45 07 65**	General Electric Insulation	200 grms/tube	Insulation for electric contacts, terminals and cables.
	66		1 kgs/can	
	67		4 kgs/can	
	45 07 71	General Radiation	1 kgs/can	Radiation from electric & electronic equipment.
	72		5 kgs/can	
	73		15 kgs/can	

Heat Resistant Pipe Dressing

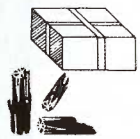
Possessing high resistance against both high & low temperature. Surface-drying type and anticorrosion coating agent. It is particularly suitable for dressing hydraulic and steam lines, windlasses and deck winch cylinders, etc.

Specifications

Outward Appearance	Caramel color, with homogenous soft texture
Cone Penetration	310 - 340 mm
Specific Gravity	0.940
Film Type	Semi-transparent and rubbery
Drying Time	Dries in 48 hours (Surface dry)
Ideal Film Thickness	3 mm - 4 mm
Coverage	0.5m²/kg at 2 mm thick
Contents	16 kgs/can

45 07 91	Heat resistant pipe dressing, 16 kgs	Can

Charcoal



For broiling meat or barbecuing. Furnished in 6 kgs bags.

45 10 01	Charcoal, broilling meat, 6 kgs	Bag

Miscellaneous Oil

Oil, Colza (Rape-seed) Oil:

An oil produced by the expression of rape seed. It is used as a lubricant, illuminant and in small quantities in the heat treatment (quenching) of steel.

Oil, Fish:

An oil produced by cooking or pressing the bodies of fish, principally the menhaden (moss bunker or pogy fish). It is used in the manufacture of low-grade paints, slushing decks, in the preparation of lubricant compounds such as are used for sluicing down rigging and hawsers, for tempering steel, as a leather dressing, and in the treatment of oil skins, it has a very disagreeable odor.

Oil, Linseed, Boiled:

Made by heating the raw oil (obtained from the flax plant) to a temperature of from 300° to 500°F or by adding about 2% oxide of lead or oxide of manganese, or both, which produces the same effect as boiling. Paint made with boiled oil requires about 24 hours to dry hard.

Oil, Linseed, Raw:

Pressed from the seed of the flax plant and used chiefly on surfaces exposed to the weather. It requires about five times longer to dry than boiled linseed oil. However, the addition of driers greatly reduces the time required.

Oil, Storm:

A vegetable or animal oil used to spread on the sea in heavy weather to reduce the breaking crests of the waves. Animal and vegetable oils have better spreading qualities than mineral oil, in the order named, as follows : Soapsuds, sperm, rape seed (colza), linseed, petroleum.

Responsible Supply Chain Management

Time to ACT.

IMPA ACT: Improving CSR and RSCM in the International Shipping and Marine Industry

IMPA ACT is an initiative of the International Marine Purchasing Association (IMPA) that encourages ship owners, ship operators, and ship suppliers to demonstrate a tangible commitment to responsible supply chain management (RSCM) and corporate social responsibility (CSR).

At the core of the IMPA ACT Initiative is the Supplier Code of Conduct, a set of social, environmental and economic principles that are based on internationally endorsed UN minimum expectations for businesses and represent current best practice. Those participating in the IMPA ACT Initiative commit to working towards alignment with the Supplier Code of Conduct over time, both internally and within their supply chains.

The two main ways in which ship owners, ship operators, and ship suppliers participate in IMPA ACT:

1. By becoming an IMPA ACT Supporter for free, or
2. By becoming an IMPA ACT Member and gaining access to the full range of resources, guidance, and database.

IMPA ACT also offers tailored trainings on RSCM and CSR on an ongoing basis and provides consulting on RSCM policy, strategy and implementation for the shipping and marine industry.

IMPA ACT Supporter Benefits

As a first step, you may wish to demonstrate your support for the IMPA ACT Supplier Code of Conduct online for free. Your logo will be included in the IMPA ACT Supporters section and you will receive regular updates from the IMPA ACT community.

IMPA ACT Member Benefits

IMPA ACT Membership is an affordable solution that allows shipping professionals to become aligned with internationally endorsed corporate governance principles, CSR and RSCM at their own pace. IMPA ACT Membership takes the guesswork out of RSCM and corporate social responsibility (CSR).

IMPA ACT Members gain access to pragmatic advice, draft content and resources, case studies, as well as step-by-step guides to assist the development of a RSCM and CSR strategy. The online IMPA ACT Members section also allows IMPA ACT Members to identify suppliers that are engaging in the IMPA ACT RSCM process and track the performance of their suppliers. The database allows IMPA ACT Members to share the effort of engaging with suppliers by avoiding overlaps.

Security Seals

Security seals are designed to protect your property and merchandise, providing wide range of application from sealing document trays and safe deposit boxes to securing medical cabinets and roll cages to help counter tampering, smuggling and espionage. Once a security seal is opened, it would depict obvious evidence of tampering. Moulded in high grade polypropylene. The strap end is simply inserted toward the head and then pulled to desired tightness, and to remove merely use hand pressure or a simple tool.

Pulltight Series

These seals are available in a variety of lengths and are offered on a mat of 10 for easy distribution.

Unit Per Pkt

Blank Recordable CDs (Blank Compact Discs)

A type of optical disc capable of storing large amounts of data up to 650MB or 700 MB. CD-ROMs are once stamped, CD-ROMs are particularly well-suited to information that requires large storage capacity such as colour graphics, sound, etc.

CODE	Capacity	Unit	CODE	Capacity	Unit
47 26 71	650 MB	Pc.	47 26 20	700 MB	Pc.
72		10's/pkt	24		10's/pkt
73		100's/pkt	25		100's/pkt

CD-Rewritable Discs

You can treat the CD-RW disc as the optical disc just like a hard disc, writing data onto it multiple times though CD-R.

CODE	Capacity	Unit	CODE	Capacity	Unit
47 26 74	650 MB	Pc.	47 26 29	700 MB	Pc.
75		5's/pkt	30		5's/pkt
76		10's/pkt	34		10's/pkt

USB Memory Sticks

A flash memory data storage device integrated with a USB (universal serial bus) connector allowing them to be connected directly to a port on a personal computer. Typically the data is removable and rewritable. Also available with security lock system on request.

Unit Per Pc

CODE	Data Capacity	CODE	Data Capacity
47 26 83	2 GB	47 28 70	32 GB
84	4 GB	71	64 GB
89	8 GB	72	128 GB
90	16 GB	73	256 GB

Blank DVD-R and DVD-RW

An extremely large capacity digital versatile disc for storage video movies. Typically storage capacity is 4.7 GB per disc. DVD-R is for recording only, and DVD-RW is for rewritable.

Unit Per Pkt

CODE	Q'ty/Pkt	CODE	Q'ty/Pkt

Data Form Files

Blue coloured hardboard covers with a standing, pin type binder which will hold a stack of paper up to 28 mm thick. Please specify the size required and the data form size to be used with the file.

Unit Per Pc.

CODE	Size mm	Applicable Form	No. of Pins
47 26 81	304 × 237 × 39	9" × 11"	18
82	405 × 285 × 39	15" × 11"	22

Cassette Ribbons for Computer Printer

There are various types of cassette ribbons for computer printers available. Please specify the manufacturer's name and the model number of the computer printer currently in use when ordering.

47 26 85	Cassette ribbon for computer printer, with manufacturer's name, model No., etc.	Pc.

Personal Computers and Ancillary Equipment

There are various types of models available from manufacturers around the world. It is important to have a precise idea of what type of operation system, like a Windows, Macintosh, you require based upon what capabilities are needed for the work done.

Please consult with a sales engineer or refer to product brochures for necessary details about system components and their functions. Ask about the compatibility of the software you are currently using or plan to use with the system which you have in mind.

Please specify the Operation System, manufacturer's name, model number components, etc. when ordering.

How to order : Computer, personal,

1) DESK TOP or NOTEBOOK
2) OPERATION SYSTEM (Windows or Macintosh),
3) CLOCK SPEED of CPU (MHz)
4) HARD DISC VOLUME (GB),
5) CAPACITY OF RAM (MB RAM)
6) SIZE of LCD DISPLAY
7) ANCILLARY DISC DRIVER (CD Driver, DVD Driver, etc)

Scanners

A device which can read text or images printed on paper and translate the information into a file the computer can use such as jpg, tif, or bmp. The images stored in a file, can be displayed on a screen, and manipulated by program. There are two types of scanning method : Automatic document fed for loose sheets of paper or flatbed suitable for bound documents.

For further information, please contact to your local distributers.

How to order: CODE

Scanner, VOLTAGE, TYPE of SCANNING METHOD, PAPER CAPACITY, ETC.

Unit Per Set

CODE	Scan Size	Voltage	Scanning Method
47 22 05	A-4	AC 110V	Flatbed
47 22 07		AC 220V	
47 22 01	A-3	AC 110V	Automatic document fed and flatbed
47 22 03		AC 220V	

LCD Projectors

An LCD projector is a type of video projector for displaying video, images or computer data on a screen or other flat surface. There are various manufacturers and models, and please ask to your local dealers about the brochure and further details.

How to order: CODE

LCD projector, MANUFACTURER'S NAME, MODEL, RESOLUTION (Pixels), BRIGHTNESS (Lumens), PICTURE SIZE (Inch), POWER SOURCE (Voltage), etc.

Unit Per Pc.

CODE	Voltage	CODE	Voltage
47 22 11	AC 100V	**47 22 12**	AC 220V

Laser Pointers

A pen style laser spotlight emitter suitable for pointing and highlighting text or images on the presentation screen.

47 22 13	Laser pointer	Pc.

Jiffy Bags for FD/CD

Craft paper envelope lined with air bubble pack sheet for mailing floppy disc, compact disc, etc.

Unit Per Pc.

CODE	Size W x H	Application
47 27 71	120 x 180 mm	Cassette tape, Micro floppy
72	165 x 220 mm	Compact disc, Mini floppy
73	165 x 270 mm	Video cassette tape

Canned Air Dusters

Ideal for use on keyboards, laptops, printers, PCBs and photographic equipment to remove dust, dirt and microscopic debris. It's ozone safe.

47 27 75	Air duster, canned, 10 oz	Can

Air Dusters
Non-flammable

Non-flammable duster for electronics. A high pressure, inert, liquefied gas that safely removes dust and loose debris with a powerful 'air' jet. Helps prevent electronic component errors or downtime

Unit Per Tin

CODE	Name	Contents	Description
47 27 79	Air Duster/2	400 ml	Powerful, non-flammable, F-Gas compliant, low GWP, duster for electronics & optics.
80	Invertible Air Duster/2	200 ml	Same as above, but invertible.

Name of Mfr. : CRC Industries (Ambersil)

Ancillary Equipment
Mouse and Mouse Pads

A pointing device for computer. Movement will be detected by Optical or LED tracking, and available in Wired or Wireless type.

Unit Per Pc.

CODE	Type		Interface
47 27 81	DOS/V	Wired	PS/2 & serial mouth

Modem
(Modulator-demodulator)

Data transmitting device which converts data between analogue form and digital form over telephone lines via computer. The specifications shown in the table are just for your reference purpose and there are various models with performances. When ordering please specify required power source voltage.

Please refer to your local dealer about further details.

Unit Per Set

CODE		47 28 31
Data Transfer Rate	Transmission	33,600 bps
	Reception	56,000 bps
Size		W160 x D130 x H36mm
Weight		300 grm

Note: Please specify power source voltage when ordering.

Hard Disc Drive

Hard Disc Drive (HDD) is a device for data storage, used for storing and retrieving the digital information. Available in desktop and portable HDD and both connecting with Computer via USB Cable for data transfer.

Desktop Type

Portable Type

When ordering, please specify the following point
- Version of Computer OS (Windows or MAC OS).
- OS Language.
- Type of USB Cable (2.0 or 3.0).
- Power Source (110 or 220).

Unit Per Pc.

CODE	Capacity	CODE	Capacity

84	2 TB	**90**	2 TB
85	3 TB		
86	4 TB		

Router
Wired/Wireless

Router is a device to provide access to the Computer Network or Internet.

It can function in connecting your computer with LAN Cable (Wired Router) or via radio wave (Wireless).

Wireless Router needs to be matched with the PC/Equipment wireless standards you want to connect. Check your PC/equipment before you order.

International Standards for Wireless Local Area Network:
- IEEE802.11b
- IEEE802.11g
- IEEE802.11a
- IEEE802.11n

When ordering, please specify following points;
- Data Transfer Speed (Mbps).
- International standard for Wireless LAN to be connected to.
- OS language (ex: English OS, Japanese OS, etc).
- Power Source(110V or 220V).

Unit Per Pc.

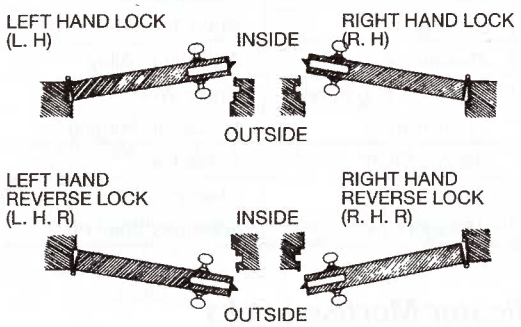
Hardware

These standard hardware products are selected from numerous kinds of interior hardware and fittings installed in ships. Chosen for their superior quality, design and easy installation, these hardware products are standardized and their value is well recognized overseas. These products are manufactured under the most careful observation of materials and process.

In order to assure the prompt, correct delivery of your requirements, please indicate the code, model number as well as the dimensions required.

"How To Determine the Hand of a Door"

Determining the correct kind of lock in relation to the directional swing of the door.



The hand of a door (left hand/right hand) is always determined as observed from the outside of the door. The outside is the weather side of an entrance door or the passage side of a room door. The outside of a communicating door is the side from which the hinges are not visible when the door is closed.

When ordering, please specify whether a left or right hand lock is required.

Door Lever Handles & Knobs

The models hereinafter described have been designed with two types of lever handles as well as 3 types of knobs. Please note that Fin Style Levers and Tulip Style Knobs are usually furnished respectively unless specified otherwise.

Fin Style | Horn Style | Tulip Style | Oval Style | Round Style

GET THE CODE
MSG Data Licence

The Marine Stores Guide (MSG) Data Licence brings all that the MSG catalogue has to offer right to your computer screen.

The Marine Stores Guide is the world's leading reference code within the maritime industry. The MSG Data licence provides a universal coding system to facilitate communication between crew, owner and supplier, making the specification and supply of goods simple quick and effective

With the latest and most complete version of the data now available, there's no better time than now to start using the unique six digit code in your IT system

The digital directory lists approximately 50,000 products provided by suppliers and manufacturers from around the world. Regular updates are included as part of the licence

Plastic Tiles (P-Tile)

An excellent floor tile made of semi-hard vinyl chloride resin. Easy to maintain and has a long product life.

Many sizes and colours are available according to manufacturer's specifications. The standard size is 2 mm thick, 304.8 mm (12") square. 3 mm thick, 303 mm square tiles are also available upon request.

51 11 01	Tile, plastic, 2 × 304.8 × 304.8 mm	Pc.

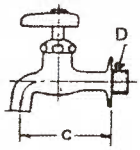
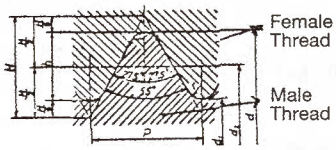
Faucet Fitting Threads

The Faucet Fitting Thread marked "D" conforms to Japanese Standard Faucet Thread JIS-B2061. The details of which are as follows:





Threads Details

Nominal Size		Thread per 25.4 mm	Pitch	Standard Size mm		
				d	d2	d1
13	1/2	14	1.8143	20.955	19.793	18.631
20	3/4	14	1.8143	26.441	25.279	24.117
25	1	11	2.3091	33.249	31.770	30.291

Above threads are equal to the Parallel Pipe Threads (PF) where pressure tight joints are not made on the threads.

The equivalent Standards of the threads are listed below.

Standards		Nominal Size		
JAPAN	JIS-B2061	13	20	25
		1/2	3/4	1
	JIS-B0202	G1/2	G3/4	G1
		PF1/2	PF3/4	PF1
UK	BS2779	G1/2	G3/4	G1
ISO	ISO228/1	G1/2	G3/4	G1

Faucets are made of bronze casting and are chrome plated. The maximum working pressure is 7.5 kgf/cm² [0.74 MPa] for water.

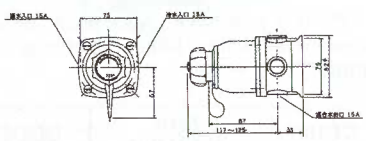
Thermostatic Mixing Valves
Model Rada 722M

Thermostatic mixing valves for use with hot and cold fresh water, fitted on shower baths on board ships as anti-scalding mixing valves.



53 03 91	Thermostatic mixing valve Rada 722M	Set

Model	Rada 722M
Type	Exposed type with Inlet & Outlet Union Elbow
Feature	The temperature of the shower water can be varied by the person using the shower over a range of temperatures between a cold water temperature and a temperature of 35°C to 40°C.
Working Pressure	Minimum 0.3 kgf/cm² - Maximum 8.5 kgf/cm²

Name of Mfr.: Kohler Mira Ltd.

Emergency Drench Showers/ Eye Washes

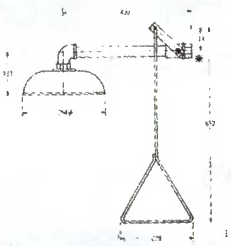
Designed for washing off accidentally splashed acid or chemicals over human's body by clean water. Available three types of systems ; Drench shower for the whole body, Eye wash for the eyes and Combination for both units. Pipe and fittings are galvanized steel pipe protected with yellow coating. Please specify the details of the connection to ships water supply.

Drench Shower:

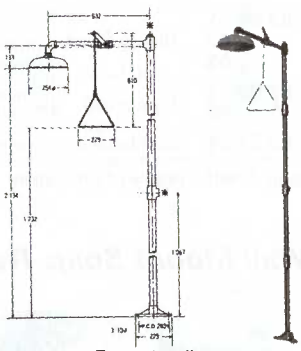
Shower head is 10" diameter and made from yellow impact-resistant plastic. It supplies torrential shower as soon as the pull-rod with triangular handle is operated. Water flow : 20 GPM at 30 PSI. Pipe and fittings are 1" for vertical and horizontal type and 1-1/4" for Free-standing type. 1" IPS female vertical or horizontal water supply and 1-1/4" IPS female of water supply for Free-standing type. Free-standing type is designed for locations where wall-mounted are impractical, and 8' ceiling height is standard. Other ceiling height requirements must be specified and special ordered.

Horizontal Supply

Vertical Supply



Horizontal Supply

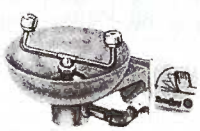


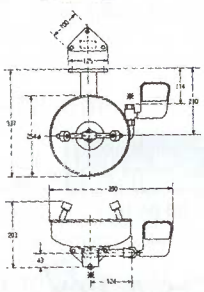
Free-standing

Eye Wash:

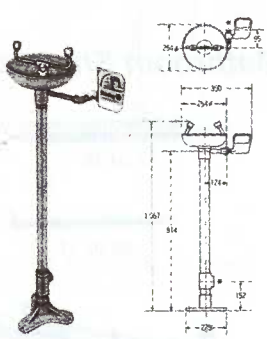
Eye wash bowl is 10" diameter and made from yellow impact-resistant plastic. It supplies gentle stream water by operating high visible yellow PVC push handle. Water flow: 4 GPM at 30 PSI. The wall bracket provided is heavy-gauge aluminium with three clearance holes for wall mounting.

Stand type is designed for locations where wall mounted are impractical.





Wall Mounted Type



Stand Type

Combination:

Combined of Drench shower and Eye wash in free-standing unit designed for locations where wall-mounted are impractical. Shower head and eye wash bowl has same 10" diameter yellow impact-resistant plastic. Water flow is 20 GPM at 30 PSI for shower head and 4 GPM at 30 PSI for eye wash. Pipe and fittings are 1-1/4" galvanized steel pipe protected yellow coating. 1-1/4" water supply and 8' ceiling height is standard. Other ceiling height requirements must be specified and special ordered.

All Purpose Liquid Cleaner with Ammonia

Tough institutional cleaner which works on all washable surfaces including linoleum, tile, walls, woodwork, venetian blinds, porcelain and appliances. Contains a dirt and grease removal agent called "ammonial".

Dilute at a ratio of 1/4 cup of cleaner to a gallon of water and you get a powerful cleaning solution that doesn't need to be rinsed or wiped dry.

For windows or mirrors, use 1 teaspoon of cleaner per gallon of water and wipe dry. For spots, stubborn stains or tough jobs, use at full strength and rinse afterwards. Mild on the hands and non-flammable.

Warning!

Do not use in combination with chlorine.

Unit Per C/T

Waterless Hand Cleaner

Dissolves grease, paint, ink, grime, dirt, tar and difficult to clean substances. Smooth, gelatin, waterless hand cleaner for engineers.

55 02 71	Hand cleaner, waterless, "YUNISOL-T", 1 kg	Tin

Vaseline

(Soft Paraffin)

Moistens dry skin and protects it from chapping. Applied to the hands after working with paint, paint thinner, or any other substance which dries out the hands or causes chapping. Supplied in 500 grm jars.

55 02 76	Vaseline, 500 grm	Jar

Barrier Cream

Used for the same purpose as vaseline but this cream is applied before work and washed off afterwards.

55 02 78	Barrier cream 300 grm	Jar

Hand Cleaning Wipes

Tough extra large wipe combined with powerful liquid heavy duty hand cleanser, containing moisture to leave skin feeling conditioned after use. Can be used in and around the workshop or away from the workplace - no water required.

The wipes act quickly and effectively leaving no residue and a pleasant after smell on the skin.

**** Red Box (for workshop wipes)***

Suitable for removing oil, grease and grime. Liquid is a blend of cosmetic quality non-ionic and anionic cleaners, refined aliphatic dibasic esters, moisturisers, preservatives and water.

**** Black Box (for paintshop wipes)***

Suitable for removing synthetic, 2 pack and cellulose paints (base coats and lacquers), body fillers, adhesives and sealants, plus most other refinishing soilings.

**** Tough Wipes***
(Anti-bacterial protection)

The textured surface acts like a scrub to remove ingrained grime, whilst the active ingredients lift off a wide variety of soiling easily. The smooth side locks in dirt and prevents re-transfer. Tough Wipes also include anti-pathogen agents to combat Weils Disease, common germs and viruses, as well as 'super-bugs'. Removes: grease, oil, silicone, paints, sealants, inks, adhesives.

Unit Per Can/Pkt.

Insecticide Powder

Effective for the control of flies, fly larvae, mosquitoes, mosquito larvae, cockroaches, fleas, bedbugs and house-ticks.

Application is made by dusting over the places where harmful insects are liable to breed.

55 06 27	Insecticide powder, 500 grm	Btl

Rat Poison

Improved rat poison that kills rats when they feed upon it. Supplied in 125 grm packets with 12 packets in a case.

55 06 30	Rat poison, 125 grm	Pkt

Self-Heating Cockroach Fumigator

Begins working when the lid is removed to fumigate insects effectively.

Features:

1. Heats up when in contact with air and disperses an effective vapor.
2. Kills all exposed insects: cockroaches, house ticks, bedbugs, fleas, flies, mosquitoes, gnats, etc.
3. Flashing effect - infected insects will die after being flushed out from where they hide and breed.
4. Easy to use - just remove the cap.
5. Safe pyrethrin chemical used.
6. Applications: cabin, galley, store rooms, etc.

Instructions for use:

1. Open cabinets, doors and drawers in the area to be treated.
2. Close doors and windows and shut off all fans and air conditioning.
3. Place the canister in the center of the room.
4. Exit after opening the lid and keep the area closed for 1 - 3 hours.

Unit Per Pc.

Drinking Water Disinfectant

Hadex

A safe, effective and easily applied product, especially intended for disinfecting drinking water in tanks and pipelines. Also keeps the drinking water in good condition.

A liquid product which mixes quickly and easily with water for immediate use. Hadex starts disinfecting immediately, and the water is ready for consumption after a short period of only 30 minutes.

Hadex treatment is based on the tried and tested use of chlorine in the preparation and final treatment of drinking water with long shelf life at least one year under normal conditions (Temperature = 25 deg. C).

Hadex has been tested and approved by a number of maritime authorities, such as ; the Dutch Ministry of Health (CTB registration No.9574 N), the Dutch Directorate General for Shipping and Maritime Affairs – Shipping Inspection Division NSI (NL), DOT (UK), NMD (Norway), GL (Germany) and NATO.

There are three standard dosages for drinking water treatment in most situations.

- Suitable for standard Hadex proportional dosing installations for single flow through drinking water systems.
- Automatic dosing installations for drinking circulation water systems.
- 30ml, dropper bottles for the individual users such as travelers.

Available in 1, 2.5, 10 and 25 litre polythene containers. Non inflammable or explosive.

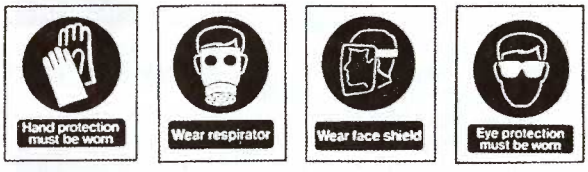
Attention!

The industrial chemicals and cleaning agents in this section have been provided with information about their chemical properties and any hazards which may be involved with their use. Discretion and care must always be taken in reading the instructions for the proper storage and use of chemical products. To avoid careless injury, always wear protective clothing, gloves, face shield, or respirator when indicated so in the chemicals instructions.



Sewage Sanitary Disinfectant

(Chlorinated Isocyanurate Tablet)

The Chlorinated Isocyanurate has excellent characteristics and advantages compared with conventional inorganic chlorine compounds.

It is a tablet formulated from chlorinated isocyanuric acid with good chemical stability for algae control, effluent treatment, and disinfection of septic tanks. Available Chlorine is 65%, and packed in special made strong carton drums.

CODE	Weight	Contents	Unit
55 06 76	10 kg	15 grm/tablet × 20 tab/pkt × 33 pkt	C/T
77	15 kg	15 grm/tablet x 1,000 tab	"

IMPORTANT!

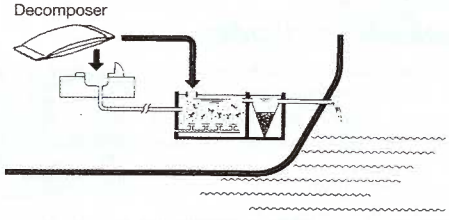
Direction for Storage and Handling

Chlorinated Isocyanurate (C.I.) tablets are strong oxidizing agents, which release chlorine on contact with water. Care should be exercised, therefore, in their storage; all C.I. tablets should be stored under cool dry conditions. They should be stored away from water, moisture, ammonium compounds, amines, oil, grease, any easily oxidizable matter, strong acids, alkalis, and sources of heat. No sweepings or waste should be put into bins, as accidental contamination with easily oxidizable matter could cause ignition and fire.

Decomposers for Ship Digestion Tank Activated Microbial Preparation

1) For the maintenance of sewage devices, the regular application of decomposer stabilizes effluent qualities and prevents the treatment equipment from malfunctioning.
   * Standard Application
   60 g / 1 person / 1 day, every 10 days
2) For seeding at the initial start of new plants or as treatment measures after drawing off sludge. Addition to the decomposer will shorten the lag period of decomposition of the activated biological masses and increase the rate of purification. Use of micro-organisms: at the beginning of use decomposer must be added.
   * Standard Application
   15 – 25 g / 1 person / 1 day, every 10 days
3) Early recovery from accidents (foul smell, bad effluent). In the case where the device is deteriorated due to a change in the quality of flushing water or the tank environment, decomposer assures early recovery of performance and stable operation of the device.
   * Standard Application
   15 – 50 g / 1 person / 1 day, every 5 – 10 days

Apply the appropriate amount of decomposer into a toilet bowl and flush 2 – 3 times.



55 06 80	Activated microbial preparation decomposes 10 kgs	C/T

Drinking Distilled Water Additives

A distilled water additive for drinking water. By applying this additive, well balanced essentials to maintain human health are composed and distilled water is turned into uninjurious water.

1. Add this additive at the ratio of 100 g (100 ppm) to 1 ton of drinking water.
2. Inject a previously dissolved 2 - 3% solution into the drinking water tank.

Example:

In case of drinking water of 5 tons. Take 20 ltr of drinking water in a dissolving container (Bucket or any other similar containers) of exclusive use and dissolve 500 g of additives in it, and then feed it into the drinking water tank.

Physical Properties

Appearance	Water color and granular product
pH (1% solution)	7.0 ± 0.5
Special gravity (1% solution)	1.008 ± 0.05

55 06 84	Distilled water additive for drinking water 10 kgs	C/T

Distilled Water

Pure, distilled water for refilling batteries or accumulators. Supplied in 500 cc or 20 ltr plastic containers.

55 06 88	Distilled water, 500 cc	Btl
89	" 20 ltr	"

Acetone, CH_3COCH_3

(Dimethylketone)

A colourless, volatile liquid with a sweetish odor. **This chemical is flammable and presents a dangerous fire risk.** Used as a paint, varnish, and lacquer solvent or as a spinning solvent to clean and dry parts of precision equipment.

55 08 01	Acetone 500 ml	Btl
02	Acetone 14 kgs	Can

Activated Alumina

A highly porous, granular form of aluminium oxide having preferential adsorptive capacity for moisture and odor contained in gases and some liquids. When saturated, it can be regenerated by heat. The cycle of adsorption and

reactivation can be repeated many times. Used as a catalyst or carrier in chromatography, and in water purification.

55 08 06	Alumina activated,	500 grm	Btl
07	"	15 kgs	Can
08	"	160 kgs	Drm

Activated Carbon
(Activated Charcoal/Coconut)

An amorphous form of carbon characterized by high adsorptivity for many gases, vapors, and colloidal solids.

Used for water and air purification, solvent recovery, waste treatment, removal of sulfur oxide from stack gases and "clean" rooms as a deodorant, and for air conditioning.

55 08 12	Activated carbon 15 kgs	Bag

Aluminium Oxide, Al_2O_3

Non flammable, white powder, balls or lumps of various mesh. Used for absorbing gases and water vapors.

Industrially used for the manufacture of abrasives, electrical insulators, catalyst and catalyst supports.

55 08 15	Aluminium oxide	500 grm	Btl
16	"	20 kgs	C/T

Ammonium Chloride

White crystals, cool saline smell, somewhat hygroscopic. Soluble in water and glycerol. Used for dry batteries, dyeing and painting, soldering flux, fertilizer, electroplating, washing powder, etc.

55 08 20	Ammonium chloride	500 grm	Btl
21	"	25 kgs	Bag

Ammonia Solution

For general cleaning and chemical purposes.

55 08 25	Ammonia solution,	500 grm	Btl
26	"	18 kgs	"

Barium Chloride, $Bacl_2 \cdot 2H_2C$

Colourless flat crystals. Soluble in water. **Toxic by ingestion.** Used as a chemical reagent, lubrication oil additive, boiler compound, textile dyeing, pigments, etc.

55 08 30	Barium chloride,	500 grm	Btl
31	"	25 kgs	Bag

Benzene, C_6H_6

A colourless to light yellow, mobile, nonpolar liquid of highly retractive nature; aromatic odor; vapors burn with a smoky flame. **Flammable, dangerous fire risk.** Used in the manufacture of ethylbenzene (for styrene monomer); dodecylbenzene (for detergents) maleic anhydride, benzene sulfonic acid, as a solvent.

55 08 34	Benzene 500 cc	Btl

Benzine - Ligroin

A saturated, volatile fraction of petroleum boiling in the range of 60 – 100 °C. There is a special grade of ligroin known as petroleum benzine.

Highly flammable, dangerous fire risk. Toxic by ingestion and inhalation. Used as a solvent for resins, paints, varnishes, etc.

55 08 36	Benzine, 500 cc	Btl

Calcium Chloride, $CaCl_2$ or $CaCl_2 \cdot H_2O$

White, deliquescent crystals, granules, lumps or flakes. Used for de-icing and dust control for thawing refrigeration brines, and as a drying and desiccating agent.

55 08 40	Calcium chloride, flake 25 kgs	Bag

Calcium Hypochlorite Solution
(Bleaching Liquor)

Used to whiten textile or paper by chemical action. Also the agent itself.

Bleaching agents include hydrogen peroxide (the most common), sodium hypochlorite, sodium peroxide, sodium chlorite, etc.

55 08 44	Bleaching liquor 30 kgs	Can

Calcium Hypochlorite, $Ca(OCl)_2$

A white, solid, crystalline oxidizing material. **Hazard: Toxic by ingestion, skin contact, and inhalation. Dangerous fire risk when in contact with organic materials.**

Used as an algicide, bactericide, deodorant, portable water purifier, and disinfectant for swimming pools, etc.

55 08 47	Calcium hypochlorite	500 grm	Btl
48	"	20 kgs	Bag

Calcium Hydroxide , $Ca(OH)_2$
(Slaked Lime or Lime Powder)

Soft, white crystalline powder with an alkaline, slightly bitter taste.

Used for mortar, cements, white wash, soil conditioner, drying hold, and cleaning.

55 08 50	Calcium hydroxide, 20 kgs	Bag

Carbon Tetrachloride, CCl_4

Colourless liquid, vapor 5.3 times heavier than air. **Hazard: Toxic by ingestion, inhalation, and skin absorption.**

Use: As a refrigerant, metal degreaser, agricultural fumigant, solvent, or for chlorinating organic compounds.

55 08 60	Carbon tetrachloride	500 grm	Btl
61	"	25 kgs	Can

Industrial Castor Oil

Pale yellow or almost colourless, transparent, viscid liquid with a taint, mild odor.

Use: Plasticizer in lacquers and nitrocellulose, polyurethane coatings, elastomers and adhesives, surface acting agents, industrial lubricants, electrical insulating compounds, etc.

55 08 65	Industrial castor oil,	500 grm	Btl
66	"	17 kgs	Can

Caustic Soda, NaOH

Sodium Hydroxide

White deliquescent solid, chiefly in the form of beads or pellets.

Hazard: Corrosive to tissue in the presence of moisture. Strong irritant to tissue (eyes, skin, mucous membrane).

Used as a detergent.

55 08 70	Caustic soda, flake	225 grm	Btl
71	"	500 grm	Can
72	"	15 kgs	"
73	"	25 kgs	Bag
55 08 75	Caustic soda, block	5 kgs	Can
76	"	10 kgs	"
77	"	20 kgs	"

Soda Ash

Grayish white powder or lumps containing up to 99 % sodium carbonate. Soluble in water, non combustible, non toxic.

Used for soap and detergents, water treatment, cleaning preparation, etc.

55 08 80	Soda ash, 25 kgs	Bag

Common Crystal Soda, $Na_2CO_3 \cdot H_2O$

Sodium Carbonate

White, odorless, small crystals or crystalline powder. Used for cleaning and as a boiler compound. Also used for the pH control of water and for cleaning and bleeding textiles.

55 08 83	Crystal soda	20 kgs	Bag
84	"	25 kgs	"

Chlorothene NU

(Motor Clean)

Dow chemical product name for a series of chlorinated organic solvents. Used for cold cleansing metal parts as an industrial solvent. **Avoid prolonged inhalation of the vapor or repeated contact with the skin.**

55 08 86	Chlorothene NU, 24 kgs	Can

Denatured Alcohol

A mixture or 95 % ethyl alcohol and 5 % water with an additive for denaturing. Unfit for use as a beverage.

Hazard: Flammable, dangerous fire risk. May be toxic by ingestion.

Used as a solvent, antifreeze, brake fluid, or fuel.

55 08 90	Denatured alcohol,	500 grm	Btl
91	"	14 kgs	Can
92	"	200 ltr	Drum

Methanol CH_3OH

(Methyl Alcohol, Wood Alcohol)

Clear, colourless, mobile, highly polar liquid.

Hazard: Flammable, dangerous fire risk. Toxic by ingestion (causes blindness).

Used as an antifreeze, solvent for nitrocellulose, chemical synthesis, fuel for utility plants, etc.

55 08 95	Methanol	500 ml	Btl
96	"	14 kgs	Can
97	"	160 kgs	Drum

Dimethyl Sulfoxide, $(CH_3)_2SO$

Colourless, hygroscopic liquid.

Hazard: Readily penetrates skin and other tissues. Combustible.

Used for industrial cleaners, paint stripping, and in hydraulic fluids.

55 09 01	Dimethyl sulfoxide 500 ml	Btl

Dolomites, $CaMg(Co_3)_2$

A carbonate of calcium and magnesium. Non-combustible.

Used as a refractory for furnaces, in the manufacture of magnesium compounds and magnesium metals, etc.

55 09 04	Dolomite, 30 kgs	Bag

Ethylene Glycol, CH_2OHCH_2OH

Clear, colourless, syrupy liquid which lowers the freezing point of water. Odorless and soluble in water, alcohol and acetone.

Hazard: Toxic by ingestion and inhalation.

Used as a coolant and antifreeze, asphalt emulsion paint, heat transfer agent, brake fluid solvent, or foam stabilizer.

55 09 07	Ethylene glycol	500 ml	Btl
08	"	20 kgs	Can

Ferrous Sulfate, $FeSO_4 \cdot 7H_2O$

Greenish or yellow-brown crystals or granules. Odorless and soluble in water. Extracted from nickel steel or waste sulfuric acid of oxide titanium.

Mainly used for corrosion control of the seawater side of a condenser or for water and sewage treatment.

55 09 11	Ferrous sulfate 25 kgs	Bag

Glycerine, $C_3H_5(OH)_3$

Clear, colourless, odorless, syrupy liquid. Combustible and has low toxicity. Used as a solvent and as a binder for cements and mixes. Also used in special soap, lubricants, softeners, hydraulic fluid, the antifreeze mixture for emergency generators and lifeboat diesel engines.

55 09 14	Glycerine,	500 grm	Btl
15	"	5 kgs	Can
16	"	22 kgs	"

Hydrochloric Acid

A colourless or slightly yellow, fuming, pungent liquid. **A strong, highly corrosive acid which is highly toxic by ingestion and inhalation and is a strong irritant to the eyes and skin.**

Used for the removal of boiler scale, for picking and metal cleaning, industrial acidizing, general cleaning, and as a laboratory reagent.

55 09 20	Hydrochloric acid,	500 grm	Btl
21	"	23 kgs	"
22	"	18 kgs	"

Hydrochloric Acid Solution

Contains 18 ltr in a bottle.

55 09 24	Hydrochloric acid solution, 18 ltr	Btl

Hydrogen Peroxide, H_2O_2

Concentrated solutions are highly toxic and very strong irritants.

Hazard: Dangerous fire and explosion risk, strong oxidizing agent.

Use: Bleaching and deodorizing of textiles, wood, pulp, hair, fur, etc. Also used as an antiseptic or in refining and cleaning metals. Sometimes used as a substitute for chlorine in water and sewage treatment.

55 09 27	Hydrogen peroxide, 20 kgs	Btl

Magnesium Oxide, MgO

White powder, slightly soluble in water, soluble in acids and ammonium salt solutions. Non combustible.

Toxic if the fumes are inhaled.

Used for refractories, especially for steel furnace linings, electrical insulation, removal of sulfur dioxide from stack gases, etc.

55 09 30 31	Magnesium oxide 500 grm " 15 kgs	Btl Bag

Mercury, Hg

Silvery, extremely heavy liquid. **Highly toxic by skin absorption and inhalation of fumes and vapors.**

Used in thermometers and barometers, draft indicators, tank gauges for registration purpose, and in some gyro compasses as a ballistic pendulum. Also used in mercury vapor lamps, arc lamps, and boilers.

55 09 34	Mercury, 500 grm	Btl

Nitric Acid

Transparent, colourless or yellowish corrosive liquid. A strong oxidizing agent that will attack almost all metals.

Hazard: Dangerous fire risk in contact with organic materials. Highly toxic by inhalation, corrosive to the skin and mucous membranes.

Use: Organic synthesis (dyes, drugs, explosives, cellulose nitrate, nitrate salts), photoengraving, etching steel.

55 09 37 38	Nitric acid 500 grm " 25 kgs	Btl "

Oxalic Acid, $HOOCCOOH{\cdot}2H_2O$

Transparent, colourless crystals.

Hazard: Toxic by inhalation and ingestion, strong irritant.

Uses: General metal and equipment cleaning, purifying agent and intermediate for many compounds.

55 09 41 42	Oxalic acid 500 grm " 25 kgs	Btl Bag

Potassium Bichromate, $K_2Cr_2O_7$

Bright, yellowish - red, transparent crystals, bitter, metallic taste.

Hazard: Toxic by ingestion and inhalation. Dangerous fire risk in contact with organic materials. Strong oxidizing agent.

Use: Analytical reagent; brass pickling compositions; electroplating; chrome glues and adhesives, depolarizer in dry cell batteries.

55 09 45	Potassium bichromate, 25 kgs	Can

Potassium Chromate, K_2CrO_4

Yellow crystals, soluble in water.

Hazard: Toxic by ingestion and inhalation.

Use: Reagent in analytical chemistry, aniline black, chromate pigments.

55 09 47 48	Potassium chromate, 500 grm " 20 kgs	Btl Can

Silica Gel

A regenerate adsorbent consisting of amorphous silica. Non-combustible.

Use: Dehumidifying and dehydrating agent, air conditioning, drying of compressed air and other gases, and liquids such as refrigerants and oils containing water in suspension.

55 09 51 52	Silica gel 500 grm " 12.5 kgs	Can

Sodium Bicarbonate, $NaHCO_3$

White powder or crystalline lumps; cooling slightly alkaline taste; soluble in water.

Use: Manufacture of rubber, gold and platinum plating, fire extinguishers, cleaning preparations, lab reagent, antacid, etc.

55 09 55 56	Sodium bicarbonate, 500 grm " 25 kgs	Pkt Bag

Sodium Borate or Borax, $Na_2B_4O_7$

Safe and efficient, white, free flowing crystal cleaner for general cleaning, and washing painted, varnished, and enameled surfaces, kitchen cabinets, refrigerators, etc. Also used in soldering flux.

55 09 58	Sodium borate, 500 grm	Pkt

Sodium Hypochlorite, $NaOCl{\cdot}5H_2O$

Unstable in air unless mixed with sodium hydroxide.

Strong oxidizing agent, usually stored and used in solution, disagreeable, sweetish odor and pale greenish colour. Soluble in cold water.

Hazard: Fire risk in contact with organic materials. Toxic by ingestion, strong irritant to tissue.

Use: Bleaching paper, pulp, textiles, etc. Water purification, fungicide, reagent, germicide.

55 09 60	Sodium hypochlorite 20 kgs	Btl

Sodium Phosphate, Tribasic, $Na_3PO_4 \cdot 12H_2O$

Colourless crystals, soluble in water. Non flammable.

Use: Water softeners, boiler water compounds, detergent, metal cleaner, paint removers, industrial cleaners.

55 09 63	Sodium phosphate, tribasic, 25 kgs	Bag

Sodium Silicate or Water Glasses

Non combustible, non toxic, so called water glass, soluble glass or liquid glass. For mixing with soap, anti-fire agents, cement hardener, and water softener, etc.

55 09 66	Sodium silicate,	500 grm	Btl
67	"	25 kgs	Can

Sulfamic Acid, $HOSO_2NH_2$

White crystalline solid, non volatile, non hygroscopic. Soluble in water and odorless. **Toxic by ingestion.**

Use: Metal and ceramic cleaning, amine sulfamates, pH control, hard-water scale removal, electroplating.

55 09 70	Sulfamic acid	500 grm	Btl
71	"	25 kgs	Bag

Sulphuric Acid, H_2SO_4

Strongly corrosive, dense, oily liquid. Very reactive, dissolves most metals; concentrated acid oxidizes, dehydrates, or sulfonates most organic compounds.

Hazard: Strong irritant to tissue. Use great caution in mixing with water because of heat evolution that causes explosive spattering. Always add the acid to the water, never the reverse.

Use: An alkylation catalyst, electroplating baths, iron and steel, lab reagent, non ferrous metallurgy.

55 09 74	Sulphuric acid	500 grm	Btl
75	"	35 kgs	"
76	"	20 kgs	"

Sulphuric Acid Dilution

Gravity 1 : 1.24 acid for use in a lead type battery.

55 09 78	Sulphuric acid dilution	500 grm	Btl
79	"	30 kgs	"
80	"	20 kgs	"

Toluene, $C_6H_5CH_3$

Colourless liquid, benzene-like odor. Soluble in alcohol, benzene, and ether; insoluble in water.

Hazard: Flammable, dangerous fire risk, toxic by ingestion, inhalation, and skin absorption.

Use: Aviation gasoline and high octane blending stock. Also used as a solvent for paints and coating diluent, and thinner for nitrocellulose lacquers.

55 09 81	Toluene	18 ltr	Can
82	"	200 ltr	Drum

Trichloroethylene, $CHCl:CCl_2$

Stable, low boiling, colourless, photoreactive liquid.

Non flammable, **toxic by inhalation.**

Use: Metal degreasing, solvent dyeing, dry cleaning; refrigerant and heat - exchange liquid; fumigant; cleaning and drying electronic parts, diluent in paints and adhesives.

55 09 85	Trichloroethylene,	500 grm	Btl
86	"	25 kgs	Can

Zinc Chloride, $ZnCl_2$

White granular deliquescent crystals or crystalline powder. Severe irritant to skin and tissue. Used as a dehydrating and condensing agent in organic synthesis: fire proofing and preserving wood: soldering fluxes, electroplating, antiseptic and deodorant preparations.

55 09 90	Zinc chloride,	500 grm	Btl
91	"	25 kgs	Bag

Neutralizer for Ballast Water Chemical Treatment Systems

Sodium Sulfite, Anhydrous - Na2SO3
Sodium Metabisulfite, Anhydrous - Na2O5
Sodium Thiosulfate Pentahydrate - Na2S2O3 5H2O
Sodium Thiosulfate, Anhydrous - Na2S2O3

Since September 2017, International Convention for the Control and Management of Ship's Ballast Water and Sediments has been issued and required neutralizer for ballast water treatment equipment. Under this treaty, all vessels are required for applicable management for ballast water due to avoid damage against marine environment. When de-ballasting it is effect to make harmless by injection of neutralizer in ballast water. Each neutralizer is usually available in 25 kgs/bag.

CODE	Description	**/Cl2 1ppm~10,000t
55 09 96	Sodium Sulfite, Anhydrous	17.8 kgs
97	Sodium Metabisulfite, Anhydrous	13.4 kgs
98	Sodium Thiosulfate Pentahydrate	8.7 kgs
99	Sodium Thiosulfate, Anhydrous	5.5 kgs

**Amount of neutralizer required to neutralize Chlorine. This is theoretical quantity by calculation and may differ from the amount actually requires.

Marine Chemicals

Chemical products for marine engine maintenance, tank cleaning, fuel additives, water treatment, etc. There are many of these products; only popular items are listed below with their common name.

We have provided the marine chemicals comparison table with brand names from major chemical manufacturers over the world.

When it is necessary to use any appointed brand, please specify the manufacturer's name and brand name with the code number.

How to order : CODE

DESCRIPTION, LTR, MANUFACTURER'S NAME and BRAND (Can or Drm)

Unit Per Can or Drm.

CODE	Description	Application	Ltr/Can
55 10 01	Degreaser	General degreaser for machine & parts, and various cargo tanks	18
55 10 02			200
55 10 05	Air intercooler cleaner	Cleaning of air inter-cooler of main engine & generator	18
55 10 06			200
55 10 11	Water soluble degreaser	General purpose degreaser for machinery, parts, or hand cleaning purposes.	18
55 10 12			200

(to be continued)

Unit Per Can or Drm.

CODE	Description	Application	Ltr/Can
55 10 16	Alkaline cleaner	Powdered alkaline cleaner for animal or vegetable oil tanks and painted surfaces of walls or floors	18
55 10 17			200
55 10 21	Electric motor cleaner	Electric motor cleaner for electric motor, parts and appliances	18
55 10 22			200
55 10 26	Carbon solvent for oil carbon	Carbon solvent for oil carbon, and for cleaning of strainer, piston & F.O.burner	18
55 10 27			200
55 10 31	Carbon solvent for hard carbon	Carbon solvent for hard carbon, and cleaning of strainer, piston & F.O.burner	18
55 10 36	Cleaning cooling system-Neutrality	Cleaner for main engine cooling system	18
55 10 37	Cleaning cooling system-Alkalinity		18
55 10 41	Tank cleaner for fuel oil tank	Fuel oil & cargo oil tank cleaner	18
55 10 42			200
55 10 46	Fuel oil additive for sludge dispersion & water separation	Dispersion of sludge component & water separation in fuel oil	18
55 10 47			200
55 10 51	Fuel oil additive for sludge dispersion	Prevention of sludge formation	18
55 10 52			200
55 10 56	Fuel oil additive combustion catalytic type	Prevention of high temperature corrosion, ash sticking, and soot & smoke	18
55 10 57			200
55 10 61	Fuel oil additive combustion catalytic type, concentrated	Prevention of corrosion, carbon & ash deposition, soot fire & smoke	18
55 10 62			200
55 10 63	Fuel oil additive lubricity improver	For gas oil and diesel oil	18
55 10 64	Fuel oil additive anti-mold sterilizer	For diesel oil	18
55 10 65	Fuel oil additive cold oil improver	For marine gas oil (MGO) and marine diesel oil (MDO)	18
55 10 66	Emulsion breaker	For heavy oil & fuel oil, and as sludge breaker of fuel oil tank	18
55 10 67			200
55 10 71	Demulsifying accelerator	Anti-emulsifier and emulsion breaker for recycling purifier water	18
55 10 76	Oil spill clean up agent	Emulsion/dispersion type	18
55 10 77			200
55 10 81	Rust remover	For heat exchanger, evaporator, boiler, removes mill scale & red rust	18
55 10 82	Scale remover		18
55 10 88	Cement & lime remover	Diluted with water, for cargo hold cleaning	18
55 10 89	Cargo hold cleaning agent	Heavy duty alkaline cleaner for petroleum coke	18

(to be continued)

Unit Per Can or Drm.

CODE	Description	Application	Ltr/Can
55 10 86	Cooling water treatment	Corrosion inhibitor for the fresh water cooling system of the internal combustion engine	18
55 10 95			200
55 10 90	Disinfectant for cooling water	For contamination in the cooling water	10
55 10 91	Boiler water treatment	Boiler water treatment for low pressure service	18
55 10 92	Evaporator treatment	Prevention of scale deposition in high and low-pressure evaporators	18
55 10 93	Purifier detergent	For cleaning the purifier	18
55 10 94	Marine organism adhesion inhibitor	For preventing marine organism in sea water system	25

HOCNF & CEFAS

Offshore Cleaning Chemicals

For Offshore Cleaning Chemicals for offshore use, approved by OSPAR Guidelines for Completing **the Harmonised Offshore Chemical Notification Format (HOCNF) & The Centre for Environment, Fisheries and Aquaculture Science (CEFAS).**

Unit Per Can or Drm.

CODE	Product	Content	Description
55 15 05 06	Unitor Cleaning CHP	200 ltr 1,000 ltr	A water-based rig cleaner specially designed to provide efficient cleaning and optimum environmental and handling properties. It contains unique environmentally adapted surfactants, pH regulating additives and corrosion inhibitors allowing removal of oil spills, sludge, oil and water based mud, dirt and grime from all surfaces included painted.
55 15 07 08	Unitor Cleaning CHP 50%	200 ltr 1,000 ltr	
55 15 09 10	Unitor Cleaning CHP RTU	200 ltr 1,000 ltr	
55 15 28	Unitor Scaleclean EX	25 kgs	An environmental adapted and highly effective rust and carbonate remover designed for use in production equipment, boiler, evaporators, etc.
55 15 29	Unitor Cleanphase CB	25 ltr	A degreaser for removing oil, wax, sludge and mud. It is based on a low toxic solvent and emulsifier that eaily split after settling. The product is ideal for cleaning especially tough contamination from drilling, well operations and other activities leaving hydrocarbon-based residues.
55 15 30	Unitor Electrosol Plus	25 ltr	A highly concentrated solvent based product for cleaning and degreasing electrical equipment. It provides rapid penetration, quick clean-up and does not attack insulation.

(to be continued)

Unit Per Can or Drm

CODE	Product	Content	Description
55 15 54	Unitor Scaleclean DL	25 ltr	Rust and carbonate remover containing an acid and wetting gents. It is designed for use in production equipment, boilers, evaporators, etc.
55 15 55 56	Unitor Uniclean	25 ltr 200 ltr	An advanced micro-emulsion cleaner, which combines the properties of a water and solvent based cleaners. Due to its unique properties, it ensures safe handling while in use and also reducing hazards related to covering and hosing the material to be removed. The specially selected surfactants allow maximum penetration of oil and grease while hazards are kept at a minimum. This ensures the product to safely react and remove oil, grease, dirt, sludge and grime. The special surfactants will effectively keep the removed contamination in water solution while being flushed to the drain.

Biodegradable Marine Descaler "Rydlyme Marine®"

An innovative biodegradable descaler designed for the marine industry to improve the performance of vital water systems by safely dissolving deposits, such as Water Scale/ Calcium, Rust, Lime Scale, Barnacles, Zebra Mussels, and Tiger Shells. Applications will be Boilers, Condensers, Keel Coolers, Tube Bundles, Bow Thrusters, Engine Cooling Systems, Heat Exchangers, Air Conditioning, Main and Aux Sea Water Systems and more. Rydlyme Marine can be used for any material except for some metals such as galvanized/zinc, magnesium and some aluminium. 100% biodegradable, non-toxic and non-hazardous. Unlike other chemical descalers and traditional harsh acids, this can be safely handled by personnel and you can even hold it in your bare hand without injury.

Name of Mfr. : Apex Engineering Products Corporation

Biodegradable Degreaser

A waterbased, quick separating degreaser. Most effective and economical and being fully biodegradable it will not harm marine life. To be effective many types of substances, such as grease, fat, oil, soot, dirt, tar, etc.

Unit Per Can

55 15 01 02	Multi Purpose, 25 ltr Multi Purpose, 205 ltr	55 15 03 04	Heavy Duty, 35 ltr Heavy Duty, 185 ltr

Maintenance Cleaner and Degreaser Loctite®

Developed for the toughest cleaning jobs in industrial environments. The broad product range comprises high-tech solutions for removing paint from surfaces (graffiti), cleaning hands, floors, commercial vehicles, boats, awnings, tanks, pipes and many other applications.

Unit Per Can

CODE	Type	Size	Memo.	Characteristics
55 15 13 14	7012	5 ltr 20 ltr	Best for painted surface washing	General cleaner and degreaser for heavy contaminants; cleaning of all metal mechanical parts, synthetical substances, rubber and painted surfaces; solvent-free; can be applied by spraying, dipping and manually; application concentration: 10 to 500 grm/ltr.
55 15 15 16	7013	5 ltr 20 ltr	Best for general parts washing	General cleaner for removal of all kind of contaminants; solvent-free; use undiluted, just apply a sufficient amount of product using the brush or hand shower; application concentration: ready-to-use.
55 15 17 18	7018	5 ltr 20 ltr	Best for high pressure washing applications	High pressure cleaner for removal of dirt, oil and grease from washable surfaces; solvent-free, biodegradable; to be applied using spray equipment or foam generating machine; application concentration: 5 to 500 grm/ltr.
55 15 11 19	7840	750 ml 5 ltr	–	Natural Blue; universal cleaner for removal of dirt, oil and grease from washable surfaces such as engine parts, ovens, exhaust hoods, drilling rigs; to be used manually or with cleaning equipment; solvent-free and biodegradable; pine-scented, non-flammable and non-toxic; contains no ODCs.
55 15 20 21	7860	5 ltr 20 ltr	–	Low Foam Floor Cleaner for daily cleaning of sensitive floor materials; ideal to be used in floor cleaning equipment and also suitable for manual application; solvent-free; application concentration: 25 to 100 grm/ltr.
55 15 22 23	7861	5 ltr 20 ltr	–	Heavy-duty Floor Cleaner for concrete floors; applicable with high-pressure and steam equipment; solvent-free; application concentration: 50 to 200 grm/ltr.

Name of Mfr. : Henkel

Cleaner and Degreaser Henkel BONDERITE®

The products selected in this table provide the right solution for practically any cleaning or degreasing task you might encounter on board.

Unit Per Can

CODE	Product Name	Size	Application	Product Details
55 15 31	BONDERITE Grato Marine Shine Shampoo	5 kgs	Alkaline deck shampoo	Shampoo for general maintenance cleaning with brightening effect. Application concentration: 2 - 5%.
55 15 32	BONDERITE Grato Marine Acid	1 ltr	Acid cleaner for deck and flash rust removal	Removal of flash rust and acid teak deck shampoo. Application concentration: 10 - 50%.
55 15 33	BONDERITE Grato Marine Cleaner	1 ltr	Concentrated cleaning product for difficult cleaning operations	For all deep cleaning, cleaning and renovation of all rubber and plastic parts, leather seats, life boats etc. pH neutral - safe in use. Application concentration: 10 - 100%.
55 15 34	BONDERITE Grato Marine Glass Cleaner	1 ltr	Glass and plastic cleaner	Residue-free removal of grease, nicotine, insects, etc. Suitable for all glass and plastic surfaces. Ready to use wipe on - wipe off cleaner in 1 ltr bottle with trigger.
55 15 35	BONDERITE Grato Marine Polish	1 kgs	Cleaning and renovation polish	Ready to use polish for stainless steel and aluminium. Shining, UV and salt water resistant finish.
55 15 36 37	BONDERITE Grato 3000	20 kgs 200 kgs	One for all high concentrated alkaline cleaner degreaser	Allround degreaser for efficient removal of grease, fats, light flash rust, etc. To be used on all kind or surfaces of machines, parts, painted surfaces or glass. Application concentration: from 1 - 30%, depending on the soiling degree.

(to be continued)

Unit Per Can

CODE	Product Name	Size	Application	Product Details
55 15 38	BONDERITE Grato 3100	26 kgs	Light alkaline high concentrated allround cleaner degreaser	For general cleaning / degreasing operations on more sensitive surfaces (e.g. aluminium). To be used on all kind of surfaces from machines, parts, painted surfaces, glass, etc. Application concentration: 1 - 30%, from 15 °C and beyond, depending on the soiling degree.
55 15 39	BONDERITE Grato ACD 1166	26 kgs	Acid cleaner for lime and oxide removal	For removal of mineral soilings and weak greasy pollutions. Phosphoric acid free. Application concentration: 3 - 30% at 20 - 40°C.
55 15 40	BONDERITE Grato 1166	15 kgs	Phosphoric acid cleaner with detergents	For removal of corrosion of all metals. Removes fats and salts. Spot cleaner after cleaning fats and fatty acids. Safe on painted surfaces and odorless. Application concentration: 1 - 30% at 20 - 80 °C.
55 15 41 42	BONDERITE A	20 kgs 210 kgs	Neutral soap	For general neutral cleaning of all surfaces and applications; not corrosive nor toxic; well foaming; IMO approval. Application concentration: 1 - 20% at 20 - 40 °C.
55 15 43	BONDERITE Glin Floor	10.5 kgs	Mild low foaming floor cleaner	For daily cleaning of all kind of floors. Leaves protection layer. Ideal for use in floor cleaning machines. Application concentration: 5 - 10% at room temperature.

INTERNATIONAL MARINE PURCHASING ASSOCIATION

Unit Per Can

CODE	Product Name	Size	Application	Product Details
55 15 44	BONDERITE® Glin	25 kgs	Mild alkaline universal degreaser	Universal, liquid cleaner for the cleaning of work shops and machines. Nicely perfumed. Ideal for manual application. High demulsifying properties. Safe solvent, phosphate and alkali free product. Application concentration: 5 - 30% at room temperature.
55 15 45	BONDERITE® Glin G 5	10x1.4 kgs	Renovation paste	Ready to use special paste to remove mineral deposits and oily contamination of all surfaces. Abrasive action but without scratching the surface. To be used at room temperature.
55 15 46	BONDERITE® Grato 12	31 kgs	Light alkaline degreaser	Concentrate for high pressure cleaning of engines and machinery parts. High demulsifying properties. Contains rust protection agent. Application concentration: 5 - 30 % at room temperature up to 40°C.
55 15 47	BONDERITE® Grato 80	35 kgs	Alkaline high pressure and steam jet cleaner	High concentrated degreaser for heavy duty operations. Usable on steel and colored metals. Contains inhibitor for use on aluminium. Application concentration: 5 - 20% at room temperature up to 80°C.
55 15 48	BONDERITE® Solvclean 106	24 kgs	Emulgator free cold cleaner	Solvent based cleaner for removal of oil contaminations. Usable manually or in steam jet cleaner. Application concentration: 20 - 100%.

(to be continued)

Unit Per Can

CODE	Product Name	Size	Application	Product Details
55 15 49	BONDERITE® X	7.5 kgs	Universal cleaning powder	Fast soluble powder for all general cleaning/ degreasing tasks (e.g. floors, deck, machines, cloths, etc.); IMO approval. Application concentration: 50 - 100 grm/ltr.
55 15 50	BONDERITE® X Liquid	10 kgs	Alkaline water based cleaner	Removes vegetable, mineral and animal grease and oils. Can be used on all surfaces (steel, aluminium, painted, etc.); good demulsifying properties. Application concentration: 3 - 20% from room temperature up to 80°C, depending on soil degree.
55 15 51	Novaclean N	36 kgs	Neutral deruster	Neutral deruster & descaler for ferrous and non ferrous metals in spray and immersion processes. Replaces acid or strong alkaline products. Application concentration: 10 - 20% at 20 - 60°C.
55 15 52	Turco VK 5	21 kgs	Liquid silicate free alkaline cleaner	Heavy duty cleaner for high performance degreasing and removal of combustion residues and animal and vegetable fats. Application concentration: 1 - 20% at room temperature.
55 15 53	Turco Plaudit 3752	18 kgs	Multi purpose light alkaline cleaner	Removes shop soils, road grime, greases and lube oils from concrete floors, transportation equipment, construction equipment, drilling equipment and specialized parts. Phosphate and solvent free. Application concentration: 2 - 10% at room temperature.

Green Degreaser 68

A non-ionic water-based highly concentrated blend of biobased cleaning compounds with anti-static effect, good tolerance to hard or soft water, good anti-redepositing capacity and deep cleaning chemistry. It is an environmentally safe cleaner, degreaser, solvent, lubricant and specialty chemical product that derived from renewable, bio-degradable resources for a broad range of industrial application.

It is effective to remove tough-to-clean substances such as oil, grease, dirt and accumulated industrial stains on heavy equipment, tools/parts and machinery. Obtained the "Green Label" from the Singapore Environment Council. Uses and Applications;

A super active alkaline-based colloidal cleaning compound that is particularly effective in heavy-duty applications for general cleaning. It is safe on all surfaces when used as directed. As a concentrate, it is particularly economical in that it can be mixed with water to the desired strength that will adequately perform the cleaning task. It is an effective cleaner in the following categories : All purpose cleaning / degreasing for industrial cleaner, Bilge cleaner, marine cleaner and metal processing for maritime, Oil spills for oil dispersing.

Technical Cleaning Liquids

Unit Per Pc.

CODE	Product	Content	Description
55 15 64 **65** **66**	Surface Cleaner	5 ltr 10 ltr 30 ltr	Surface Cleaner is used for cleaning and degreasing surfaces to be joined or sealed with WEICON adhesives and sealants.
55 15 71 **72** **73**	Cleaner S	5 ltr 10 ltr 30 ltr	Removes all oily and greasy soilings even gummy lubricants, without leaving residues. Cleans all metals, ceramics, glass and most plastics.
55 15 67 **68** **69**	Plastic-Cleaner	5 ltr 10 ltr 30 ltr	Plastic Cleaner cleans and degreases plastics and is ideal for pre-treating surfaces when bonding sensitive plastics, rubbers or lacquered materials.
55 15 70 **80** **81**	Brake Cleaner	5 ltr 10 ltr 30 ltr	Universal cleaner, especially for the automotive industry (brakes, clutches, gear boxes, etc.). Evaporates without leaving residues.
55 15 82 **83** **84**	Electro Contact Cleaner	5 ltr 10 ltr 30 ltr	Cleaning and degreasing of electrotechnical or mechanical parts, like e. g. electric machines, measuring instruments, balances, switches or sensors. Also ideal for all electric connections, contacts, relays and switchboard plants.

(to be continued)

Unit Per Pc.

CODE	Product	Content	Description
55 15 85 **86** **87**	Citrus Cleaner	5 ltr 10 ltr 30 ltr	Cleaner and degreaser on the basis of citrus essences. Removes quickly adhesive residues, oils, greases, resin, tar, lubricants, rubber residues as well as residues of lead, felt and ball pens.
55 15 74 **75** **76**	Parts and Assembly Cleaner	5 ltr 10 ltr 30 ltr	Cleaner with especially long working time, especially for coarse, oily and greasy soiling as well as for cleaning bigger areas. Due to the high flash point, it corresponds to the VbF Classification A III.
55 15 88 **89** **90**	Sealant and Adhesive Remover	5 ltr 10 ltr 30 ltr	Removes residues of hardened sealants and adhesives as well as lacquers and paints.
55 15 77 **78** **79**	Workshop-Cleaner	5 ltr 10 ltr 30 ltr	Workshop Cleaner cleans and degreases all metals, plastics, rubbers, glass, ceramics and wood. Free of solvents and phosphates. Bio-degradable.
55 15 91 **92** **93** **94** **95**	Metal-Fluid	100 ml 500 ml 5 ltr 10 ltr 30 ltr	Highly-effective product for indoor care, protection and cleaning of mat and polished metal surfaces, e. g. Stainless steel, aluminium, chrome, nonferrous heavy metal etc.
55 15 96 **97** **98**	Silicone	5 ltr 10 ltr 30 ltr	Ideal sliding and release agent which prevents the build-up of adhesive residues and prevents products from sticking to conveyor belts, chutes and slideways.
55 15 99 **55 16 00** **21**	AT-44	5 ltr 10 ltr 30 ltr	Allround spray with PTFE for corrosion prevention, cleaning, lubrication, preservation and water displacement.
55 16 22 **23** **24**	W 44 T®	5 ltr 10 ltr 30 ltr	Allround problem solver: loosens rust, displaces moisture, eliminates squeaky noises, cleans metal surfaces, protects and preserves tools.
55 16 25 **26** **27**	Rust Loosener	5 ltr 10 ltr 30 ltr	With 6-fold function: loosens rust, displaces water, ensures contact, protects against corrosion, lubricates sliding surfaces and preserves metals.
55 16 28 **29** **30**	Bio Welding Protection	5 ltr 10 ltr 30 ltr	Prevents adhesion of weld spatter to welding nozzles and to surfaces adjacent to the weld without affecting the welding seam itself. Biodegradable - silicone free.
55 16 31 **32** **33**	Leak Detector	5 ltr 10 ltr 30 ltr	Non flammable compound used for fast, convenient and reliable location of even the smallest leaks approved for use in gas pipelines (DIN/ DVGW Approval NG-5170AO0666).

Ferryl Marine Chemicals

A range of high-quality maintenance chemicals designed for marine use. For cabin, deck and engine departments.

Unit Per Drm/Btl./Can

CODE	Product No./Unit	Application
45 04 23	Ferrycid Rustremover 25 ltr/drum	Efficient removal of light and heavy rust on steel, cleaning of (wooden) decks, rust stain removal on painted surfaces, removal of limescale and cement.
45 04 24	Ferryl Cleaning Fluid Oil & Grease Remover 25 ltr/drum	Water-soluble, emulsifying, solvent-based degreaser. Removes light and heavy deposits of oil and grease on decks, engine parts, oil preheaters, tools.
45 04 26 **32**	Ferryl Fermaid Alkaline Cleaning Liquid 25 ltr/drum 1 ltr/bottle	Alkaline cleaning liquid concentrate for general cleaning and light degreasing of decks, containers / chambers, refrigerators, fishing vessels.
45 04 28 **27**	Ferryl Electroclean 450 ml/spray can 25 ltr/drum	Safe cleaning liquid with a high flash point and quick evaporation for cleaning of electrical equipment and machine parts.
45 04 29	Ferryl Cabin Clean General Cleaning Liquid 25 ltr/drum	Cleaning liquid concentrate for general cleaning of cabins, mess rooms, bathrooms, sanitary installations.
45 04 30 **31**	Ferryl Airrefreshment Bad Odour Neutraliser 500 ml/spray bottle 25 ltr/drum	Chemically neutralises bacteria in the air, removing bad odour, leaving fresh scent. For cabins, bathrooms, cargo holds, freezers, fishing vessels.

Name of Mfr. : Ferryl Sales Limited.

Hold Cleaning Solutions

Hold Barrier (Prior to loading)

For best protection of the cargo hold bulkheads. It is a unique blend of natural ingredients and film stability improvers, which can be easily applied by ship's crew prior to loading. It effectively prevents residue adhesion, stains and footprints of cargoes adhering to the surfaces of cargo holds and/or causing corrosion and are difficult to clean.
Benefits;

- More effective than limewash and much easier to remove.
- Protects metal against corrosive cargo and paint against cargo penetration.
- Prevents the deterioration of cargo hold condition.
- Not harmful to cargoes, coatings and the environment.

Unit Per Can

CODE	Description	Weight per Can	Remarks
55 16 01	Hold Barrier (#507001)	210 ltr	-
55 16 02	Hold Barrier XR (#507002)	210 ltr	Extra resistant formulation for extra demanding cargoes.
55 16 03	Hold Barrier Concentrate (#507004)	210 ltr	Concentrated form of Hold Barrier and Hold Barrier XR.

Name of Mfr.: Chemo Marine Chemicals

Hold Cleaning Solutions (After discharging)

Cost effective, non-flammable, water based, heavy duty cleaners containing special surfactants, detergents and builders, for effectively removing all types of cargo stains and residues, after cargo discharge, while minimizing coating discolouration.

Application Table

Cargo	Product Name	Cleaning Procedure
Coal	Holdbrite XF	Remove all residues from the cargo hold. Pre-wash the cargo hold with sea or fresh water and let it dry. Apply the product. Use suitable spraying equipment and dosages varying from 5 to 20% in fresh water, depending on the contamination. Allow solution to penetrate soil for 10-60 minutes and then wash off thoroughly with high pressure water, preferably hot. Always wash off before chemicals dry on the surface. Products may be used undiluted for hand cleaning.
Pet coke	Pet Coke Remover	
Sulphur	Holdbrite XF	
Concentrates/ Specific ore residues	Holdbrite XF	
Miscellaneous feedstock	Holdbrite XF	
Cement/ Cement clinkers	Cement Remover Super	Remove all residues from the cargo hold. Pre-wash the cargo hold with sea or fresh water and let it dry. Apply the product. Use suitable spraying equipment and dosages varying from 10 to 50% in fresh water, depending on the contamination. Allow solution to penetrate soil for 10-30 minutes and then wash off thoroughly with high pressure water, preferably cold. Always wash off before chemicals dry on the surface.
Baxite/Iron ore/Iron ore pellets	Bauxite Remover	
Limestone/ Rust stains	Lime Out	

Unit Per Can

CODE	Product's Name	Weight per Can	Remarks
55 16 11 **12**	Holdbrite XF #501202	25 ltr 210 ltr	Heavy duty alkaline cleaner with extra foaming effect
55 16 13 **14**	Pet Coke Remover #502012	25 ltr 210 ltr	Effective liquid product for pet coke removal
55 16 15 **16**	Cement Remover Super #502405	25 ltr 210 ltr	Powerful cement cleaner.
55 16 17 **18**	Chemo Bauxide Remover #502415	25 ltr 210 ltr	Liquid acid for the effective removal of bauxite residues.
55 16 19 **20**	Lime Out #502417	25 ltr 210 ltr	Effective removal of limestone

NITTO KOHKI

Nitto Kohki's professional

POWER TOOLS, MACHINE TOOLS &

See Section 59

Pneumatic Jet Chisels
- For quick and efficient removal of weld slag, rust, paint and other accumulated materials

Model **AJC-16** CE
Model **JT-20** CE
Model **JC-16** CE
Model **JEX-24** CE
Model **JEX-28** CE
Model **JEX-2800A** CE

Original Needles for Jet Chisels

Electric Jet Chisels
- For use with electric power source

Model **EJC-32A** CE 115 / 230 V AC

Pneumatic Chipping Hammers
- For hammering, chipping and sheet metal work.

Model **A-300** CE

Pneumatic Flux Chippers
- For scaling and chipping rust and cleaning metal surfaces

Model **CH-24** CE

Pneumatic Long Handle Scrapers
- For scraping and derusting with long reach

Model **S-250**
Model **S-500**
Model **S-1000**
Non - CE

Pneumatic Hand Drills
- For light and medium duty drilling

Model **ADR-65** CE
Model **ADR-100** CE

Pneumatic Hacksaws
- For cutting metal sheets

Model **SSW-110** CE

Pneumatic Belt Sanders
- For sanding and grinding in narrow spaces, recessed corners and curved surfaces

Model **B-10CL** CE
Model **B-20CL** CE
Model **B-30CL** CE

Pneumatic Angle Grinders
- For heavy-duty grinding

Model **MG-40** CE
Model **MYG-70** CE

Pneumatic Die Grinders
- For deburring and precision grinding

Model **L-25B** CE

Pneumatic Bevelers
- For PSPC requirements on surface preparation of steel material prior to coating

Model **CBR-03** CE

Pneumatic Auto Files
- For efficient filing with less operator fatigue

Model **SH-100A** CE

Pneumatic Orbital Sanders
- For finishing work of various materials

Model **FS-50A** CE
Model **FS-100C** CE

QUICK CONNECT COUPLINGS
that are useful on and off the ship

Portable Magnetic Base Drill Machine "Atra Ace" series
- For drilling holes speedily on metal plates

See Section 59

Manual drill feeding type

Cordless
Model **CLA-2720** CE 230 V AC (Battery charger)

With cord
Model **LO-3550** CE 230 V AC
Model **WOJ-3200** CE 115 / 230 V AC
Model **AO-5575A** CE 230 V AC

Automatic drill feeding type
With cord
Model **WA-3500** CE 115 / 230 V AC
Model **WA-5000** CE 115 / 230 V AC

HI-BROACH
High speed steel cutters for Atra Ace series
- For drilling holes speedily on metal plates

JETBROACH
Tungsten carbide tip cutters for Atra Ace series
- For drilling holes speedily on metal plates

See Section 35

Quick-Connect Couplers
- For All Purposes

BC TAECHANG IND.CORP.

It's All about Cleaning & Blasting

Explosion Proof type Available!!

"NEW" COMBO PUMP 202

- Pressure : 1100 ~ 1500 bar / Flow : 8 liter/min
** 2000 bar model will be available soon !!!
- Dump Trigger Gun with Self Rotary Nozzle

BEST SOLUTION for ship's maintenance surface preparation / rust removing

"NEW" VULCAN HOLD CLEANING PUMP with cleaning stand & nozzle

Specially desgined for cargo hold cleaning
- Max flow : 400 liter/min at 19 bar
- connecting to ship's hydrant line
- 25HP 440V 60Hz motor driven

Powerful cleaning to 25mtr high possible!!

Ultimate solution for Cargo Hold Cleaning

ATEX Certified Cold Cutting Professional Air Saws

MADE IN BRITAIN

PL905

Fast cutting, powerful, reliable, low vibration.
For Steel pipes and sections, conduit, cable, rusty bolts and GRP up to 50mm thick

CL75

Powerful, low vibration, reliable.
Cutting heavy steel sections up to 150mm dia
Hand held or Clamp mounted

- Air Consumption less than 5.75 Cfm
- Use with Cengar high quality shatterproof blades
- Other Saws for cutting all types of metal and composites available on request.

IMPA online Education

Dedicated Marine Purchasing and Supply education programme

Education remains a key priority for IMPA and the association has **introduced the most comprehensive education programme in its history.** The intention is that IMPA's online course will provide procurement and supply chain management professionals with the credibility and status that other professional disciplines enjoy.

Each course has been designed to be taken over a 12 month period and entirely on-line. IMPA members receive a discount on course fees.

Created by the industry for the industry

The first of its kind and available to all – 100% online!

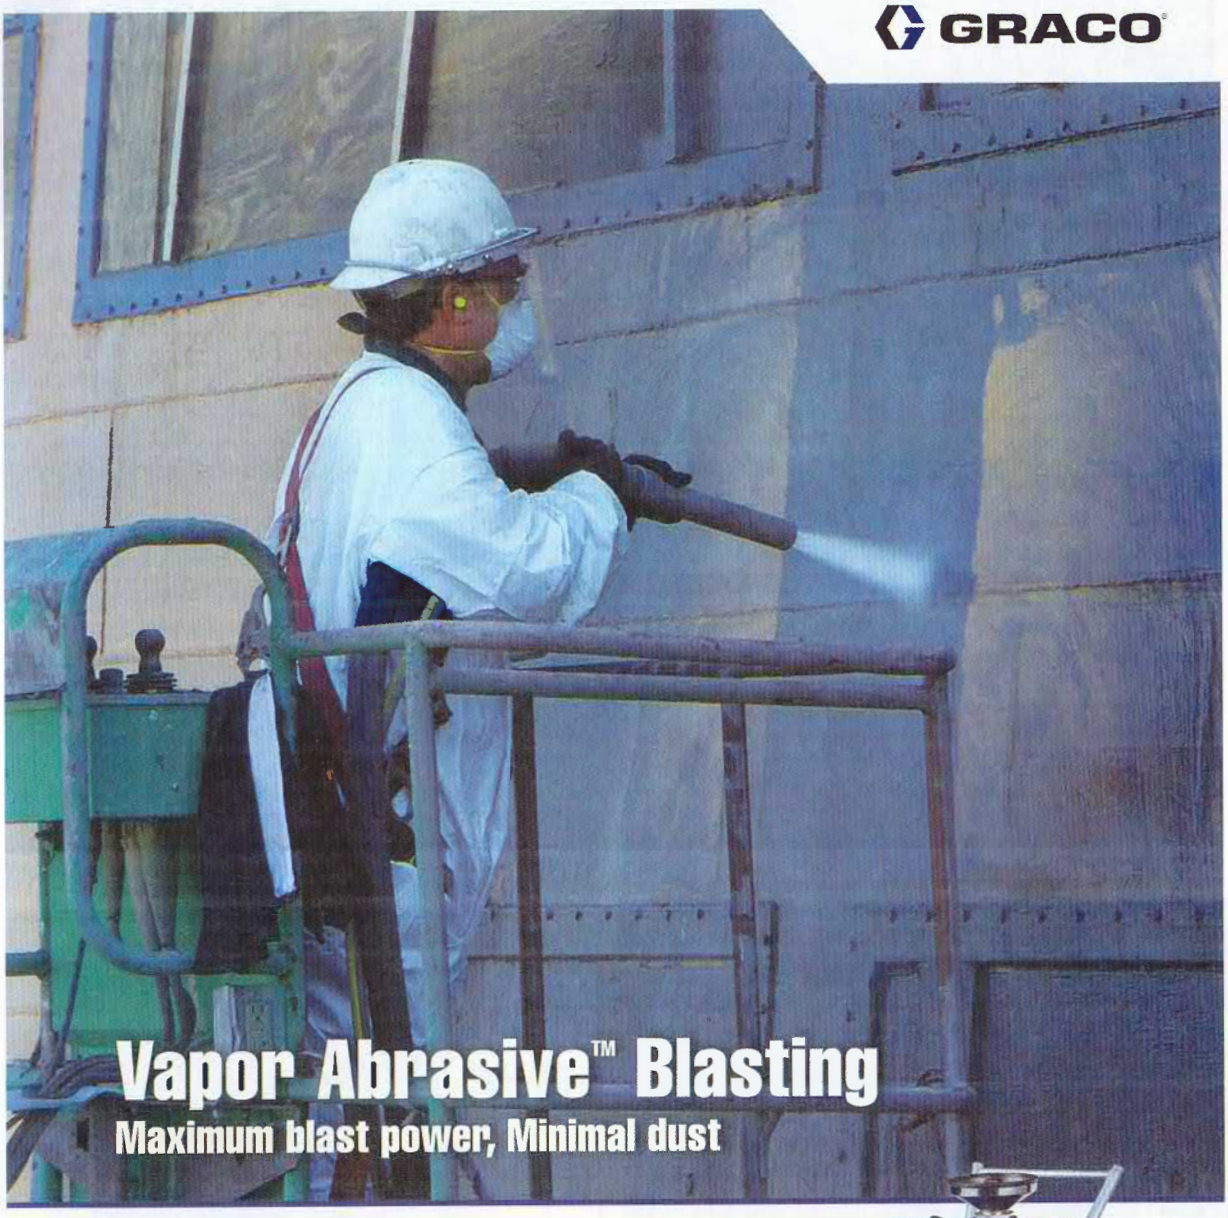
GRACO



Vapor Abrasive™ Blasting

Maximum blast power, Minimal dust

ECOQUIP™ 2

- Same performance as dry blasting with 92% less dust
- Optimizes air, water and media ratio – resulting in a fine mist with a powerful blast
- Uses less water than traditional water-based wet blasting
- Designed for years of safe and solid maintenance

1. Pneumatic Hand Tools

Pneumatic Impact Wrenches

Pneumatic power impact wrenches deliver extremely high power to fasten and loosen bolts or nuts for quick assembling and disassembling jobs.

The square drive size and capacity at which different types of handles are provided differ from manufacturer to manufacturer as shown in the pneumatic tools comparison table on page 59-7. Choose the most suitable model for the 13 mm to 76 mm sized bolt capacity. The specifications listed here are for your reference. If you wish to order impact wrenches from a specific manufacturer, please refer to the comparison table listing major international manufacturers and product model numbers on page 59-7.

Recommended air pressure is 0.59 MPa(6 kgf/cm²). Air hose nipple is furnished, but sockets and air hoses are sold separately.

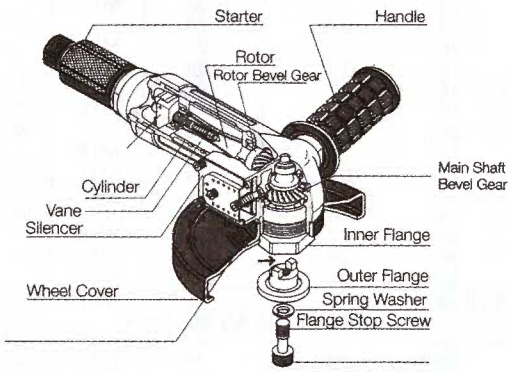
Pneumatic Angle Grinders



A pneumatic angle (vertical) grinder has a speed rating suitable for sanding, rust removal, rough grinding and cutting applications.

A wide variety of models from various manufacturers is available. The specifications listed here are for your reference. If you wish to order Angle Grinders from a specific manufacturer, please refer to the comparison table listing major international manufacturers and product model numbers on page 59-8.

Recommended air pressure is 0.59 MPa (6 kgf / cm²). Air hose nipple and tools for wheel mounting are furnished as standard accessories. However, grinding wheels, sanding discs and wire brushes are extra.

Magno Rollers

for Rustibus Angle De-Scaler

Magno Rollers are a magnetised wheelbase for the Rustibus 30 series. They use a powerful magnet to support the entire Rustibus hand tool which makes them perfect for use on angled steel surfaces. It will enhance safety and operator comfort, and it will reduce operator strain in any working position.

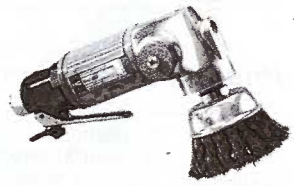
Pneumatic Derusting Brushes

For removing rust; used in machine building, mould making and container construction, in steel construction and ship building as well as in foundries.

Model MAG-9000®



Quality

A sturdy, durable, slim and compact tool for derusting works, even in places that are difficult to reach.

Safety

Optimized speed for brushing applications.

Efficiency

Fatigue-free working thanks to excellent weight-power ratio and the motor's vibration-free support. The standardized chuck (available as M14 collet chuck) accepts all standard brushes. Fast and efficient brush maintenance thanks to compact built-in units.

Part No.	426.5351	606.5303	612.5305

Note : SF1 and SF3 spares are compatible with SF11 deck scaler.
Name of Mfr. : Trelawny SPT Ltd.

Scaling Piston Hammers

5 Piston Hammer

Can be equipped with pistons in hardened steel, spark proof bronze or tungsten carbide.

5 Piston Hammer

Spare Piston

Specification

Model	819-0
Scaling Width	95 mm
Strikes per Min.	6,500
Feeding Pressure	5 bar
Air Consumption	900 ltr/min.
Air Inlet Connector	1/2"
Air Hose	13 mm
Weight	3.8 kgs

Name of Mfr. : I.CO. s.r.l.

CODE	Description	Model	Unit
59 03 95	Scaling piston hammer, pneumatic, 5 piston	819-0	Set
96	Spare piston for 5 piston scaling hammer	819-2	Pc.

Comparison Table of Pneumatic Tools

Products from a few manufacturers are listed below and the next two pages for your reference. If there is any question as to what model is most suitable, please ask for further information or brochures from the local manufacturer when ordering.

In the table below, the products for each manufacturer are listed vertically according to the (square drive size, wheel diameter, drill capacity, number of pistons, etc) which are listed in the left hand column.

When ordering: Impact wrenches

1. Select the square drive size required : 12.7 mm
2. Select a manufacturer from one of the columns to the right : Atlascopco
3. List the representative code for that size : 59 01 01
4. List the model number of the tool from that manufacturer : LMS 28HR – 13

2. Deck Scalers

Deck Scalers

For use in removing scales and surface paint from the ships deck. The scaler has a handle, allowing the operator to stand during use, relieving fatigue and protecting the eyes from dust and chipped metal or scale. Various types of scaling operation machines are available.

Required air pressure is 0.59 MPa (6 kgf/cm²).

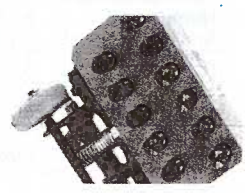
Deck Scalers

Trelawny Scaleforce

Eleven Multi-Head Scaler



Large area corrosion control for all duties on-board ship and off-shore platforms. De-scaling / de-rusting, removal of paint and marine growth on all steel work. Removal of floor coatings paint / epoxy etc.

Features and benefits

- Unique Vibro-lo vibration damping system
- Wear resistant Tungsten carbide-tipped cutter-heads (59 03 98)
- Spark resistant Beryllium Copper head available (59 03 99)
- Quick change replaceable scaling heads
- Dust Shroud available
- Spares compatible with Trelawny SF1 & SF3 handheld models

Scaling Machines
Rustibus Model 2000

Designed to de-scale and power brush decks on ships and rigs without time consuming and costly ways. The use and fast replacement of specially prepared chain links is the key to this quick and efficient surface treatment. To remove and gather dust, scales and debris, it can be connected to an ejector.

Chain Drums for Scaling Machine

Rustibus 400

A disposable chain drum for one-time-use for Rustibus 400 scaling machine. It doesn't require any spares replacement.

59 12 34	Chain drum for scaling machine, Rustibus 400, part no.040-0156	Pc.

Scaling Machines

Rustibus Model 1200 Air

For de-scaling medium / large surfaces such as main deck, hatch covers, tank tops, etc. It can easily be transported around the vessel. The only consumable part is the disposable chain drum which are made for one-time-use only and do not require any spares replacement. Simply use them until they are destroyed and then replace the entire drum with a new one. One chain drum set normally lasts for approx. 200 – 225 m², all depending on the use and surface conditions.

Unit Per Set

CODE	**59 12 33**
Model	Rustibus 1200 Air
Capacity / Hour	18 m² / 194 ft²
Working Track	120 mm (5")
Drum RPM	1,850
Blow / min.	80,000
Air Consumption	3.6 m³/min. (127 CFM)
Work Pressure	6 – 8 bar (87 – 116 psi)
Hose	19 mm (3/4")
Power	4 hp / 2.98 kw
Motor RPM	1,900
Size	L 950 x W 470 x H 900 mm
Weight	47 kgs
Accessories	Lubricator and filter are supplied
Mfr's Name	Dalseide Shipping Services

Remark : A water nozzle system is fitted to air driven models to reduce spark generation.

Explosion-proof Deck Scalers

Rustibus EX Series

Specially designed and produced for use on tankers, gas carriers, oil tankers, FPSOs, rigs and platforms, or in on shore oil and gas refineries. In fact anywhere that you need to do maintenance on steel, in a potentially explosive atmosphere. After thorough and intensive testing, the machines received the final stamp of approval by DNV (Det Norske Veritas). Certified by DNV to meet EX/ATEX 94/9/EC directive.

Rust Removal Machines

Designed for efficient removal of rust, paint and old covering from large surfaces. It's easy to control by the operator, thus improving quality and quantity of work. According to the need, there are many different types of completely interchangeable tools that can be applied to the standard drum. It's also possible to apply steel-wire, brass or nylon brushes etc. Please specify the "tension" when ordering.

Electric Multi-Purpose Surface Machines

Fitted with heavy duty grinder, direct-on-line starter and safety lever switch. They are designed in easy manoeuvre, lightweight, reduce long hours fatigue by squatting and the safety switch for cutting off power supply in case of emergency. Can use for grinding, cutting, removing light and heavy rusts, surface profile and polishing. They are good for corners, hard to reach areas and uneven surface as tools are fitted in front. It can use Velcro sanding disc pad with different grits.

Rust Removal and Surface Cleaning Machines

Mammut IV

Rust removal machines for removing rust, paint or slag on big-sized surfaces in corrosion protection, ship building, machine building and shipyards.

Quality
Perfect for removing heavy rust, rust on plates and light rust. Sturdy support rollers ensure perfect and quiet working conditions.

Safety
Two-hand operation ensures a controlled, steady working position. Durable spray protection prevents removed material from flying around.

Efficiency
Quickly removes rust from large surface areas with little effort. Working up to the edge with the optional available edge grinder RR45.

Electric Scaling Machines

A rugged but lightweight electric scaling machine for continuous heavy duty use. An ideal unit for derusting and descaling jobs. Portable, fitted with wheels.

Furnishable for use with a 110 volt or 220 volt AC power supply.

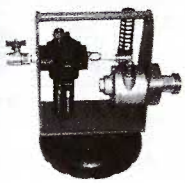
De-Scaling Machines

Original Trident Neptune Machine from Trelawny - Electric or Air Model

Electric



Air

Features and Benefits

- 25% lighter than other models
- Compact – easy to use

Machines supplied with electric motor on skid base with 3 mtr cable to overload protection on motor. OR machines supplied with air motor on swivel base.

All machines supplied with

- 3,000 rpm electric motor, skid mounted,
- 3 metres cable
- Flexible shaft, 3 mm (9") x 16 mm (5/8") diameter
- Heavy duty leaf scaling head
- 6-cutter scaling head
- 6" diameter power brush
- Spanner set
- Hand guard

Handheld Deck Scalers

Aurand

For removing paint, rust and adhesives from iron, steel, brick, concrete and asphalt. A cutting teeth bite right through tough accumulations on any hard surface, and quickly peels off buildup paint, rust and scale. Adjustable depth shoe that the operator sets to limit the impact of the cutters. This not only protects the surface being cleaned but also insures uniform cleaning action and prevent excessive wear on the cutters.

Cast aluminium housings that offer the user a tough, durable tool that is still lightweight and easy to handle. Separate handle, safety guard, cutter bundles, motor housing, and front head assembly to make repair or replacement easier and less expensive.

Pneumatic Model:
Feature rotary type air motors, free from toggles, pistons or reciprocating parts to eliminate vibration. Tool operate on 70 to 100 p.s.i. air pressure.

Electrical Model:
Available in 115 and 230 volt models with AC/DC universal motors. 15 feet of three-conductor cable included.

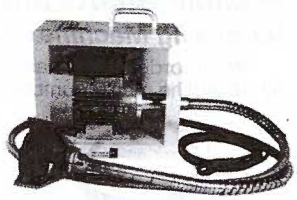
Rust Removal and Surface Cleaning Machines

Record



Rust removal machines for medium size surfaces, removing rust films and rust on plates, cleaning concrete and stone, removing slag and paint. Delivery includes : Motor with flexible shaft, connection, motor base, carrying handle, shaft protective case, switch, grease for flexible shaft, assembly tool, and 3 mtr cable (without plug).

Quality
The splash-proof, sturdy special motor is especially suited for rough operating conditions. Sturdy support spirals prevent the ends of the flexible shaft from bending. The open carrying handle with a rotary circuit breaker and cable or a TG coupling in the compressed air version allows the user to move around more freely.

Safety
The flexible shaft with a core diameter of 15 mm is designed for high speeds. The motor base prevents the tool from unintended tipping. It comes with four attachment holes for increased safety. The standard delivery package includes a light-weight protective case made of cast aluminium.

Efficiency
Alternative connections are available for various attachments so that the user can use the right tool required for a specific application. Hand pieces are available as 5/8" external thread and M14.

Name of Mfr. : Trelawny SPT Ltd.

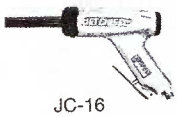
Pneumatic Jet Chisels

For chiseling or smoothing welds, castings and other materials. Never skip a blow, cleans and descales all jobs fast. Jet chisel needles adjust to the contour of any surface automatically.

The chisel can reach into corners, curvatures, and uneven surfaces, making it a tool no shop should be without. Thanks to the unprecedented original air operated needle return mechanism, no springs to break, no irregular power and the advantage of low air consumption. A normal short hose and quick coupler are attached as standard accessories.



JC-16

JT-20

JEX-24

JEX-66 (JEX-28)

AJC-16

JEX-2800A

Application

JC-16 : For light duty

JT-20 : For general duty

JEX-24 : For all purposes

JEX-66 : For heavy duty (JEX-28)

AJC-16 : Slim and light weight

JEX-2800A : Powerful and low vibration. Built-in shock absorbing system minimizes operator fatigue. No special tools are required for needle replacement.

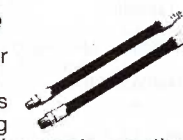
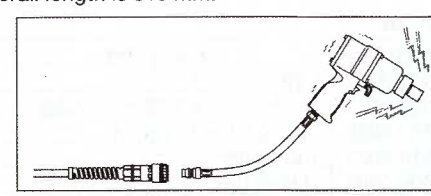
Anti-Vibration Plug Hose



Plug set with rubber hose for vibrating and impact pneumatic tools.

Stabilizes coupling life and prevents wear caused by vibration by absorbing strong shocks from vibration tools and prevents unnoticed flow restriction due to couplings wear from vibration.

Overall length is 310 mm.



Unit Per Pc.

30 series : 30SH, 30SM, 30SF
40 series : 40SH, 40SM, 40SF

Pneumatic Needle Scalers
Trelawny

Also known as Needle Guns and De-rusting/De-scaling pistols for removing rust, corrosion and heavy scale from all metal surfaces - needles adjust to surface contours to descale all irregular surfaces. All tools can be converted into chisel scalers for maximum versatility - two tools in one.

Pneumatic Needle / Chisel Scalers Rustibus 20

This hand held, pneumatic de-scaling machine is ideal for use on those awkward hard to reach corners, pipe joints and those few other areas that the other scaling tools have difficulty reaching. Equipped with a 18 cm (7") Flat chisel and fitted with 13 cm (5") needles. Two machines in one.

Unit Per Set

CODE	59 05 28
Model	Rustibus 20
Stroke	2.85 cm (1-1/8")
BPM	4,600
Air Consumption	339.8 Cu.Ltr/min (12 CFM)
Bore	2.54 cm (1")
Inlet	0.635 NPT (1/4" NPT)
Min Hose Size	0.79 cmb (5/16")
Length	43 cm w/13 cm needles (17" w/5" needles) 48 cm w/18 cm needles (19" w/7" needles)
Weight	2.9 kgs (6.4 lbs)

Name of Mfr. : Dalseide Shipping Services

Vacuum Systems for Scaler

Rustibus 20

Available for the Rustibus 20 Needle / Chisel descaler has a flexible nose piece that allows the user to get into every corner. This vacuum system also allows the tool to exhaust into the vacuum stream. Requires only 87 CFM / 2.5 M^3 vacuum flow and 90 psi / 6.2 bar operating pressure.

N.B. To use this vacuum system, your Rustibus 20 needs to be fitted with 18 cm (7") needles. Includes : vacuum attachment, connection hoses and clamps.

59 05 29	Vacuum system, Rustibus 20, item no. 020-00VT for needle/chisel scaler	Set

Pneumatic Flux Chippers

For scaling and chipping rust and cleaning metal surfaces.

Unit Per Set

CODE	59 05 31
Model	CH-24
Stroke Speed	4,000/min
Rated Air Pressure	0.6 MPa (6 kgf/cm^2)

Hand-Held Deck Scalers

For removing paint, rust & coatings from steel, stone and concrete surfaces. Hardened steel star and beam cutters breakdown stubborn coatings or tungsten tipped 'C' flaps remove surface materials to a bright steel finish by way of 'captive blasting', leaving up to a 100 micron profile. Used in conjunction with Trelawny Vacuums, hazardous and nuisance dust can be removed quickly and efficiently at source. 2" (50 mm) & 4" (100 mm) wide tools, electric and pneumatic versions enable a wide variety of substrates to be cleaned at high productivity.

Pneumatic Rattling Needle Chisels

Equipment suitable for chipping rust, old paints, welding, casting scales and various fouling from irregular, angular or bent surfaces. Each needle is independent from the other, thus permitting a perfect adherence to all irregular surfaces, with guarantee of very accurate cleaning. Due to the possibility of using spark proof needles, the machine is suitable for use in environments with risk of explosion.

59 24 30		850-27E	Nail punch: suitable to punch flat head nails against the plate to obtain better tightness.
59 24 31		850-27D	Rammer: suitable to caulk plates.
59 24 32		850-27F	Wails: suitable for rivetting.

Pneumatic Pipe Scalers

Designed for de-scaling and cleaning outer pipe surfaces – 360 degrees in one operation. Simple to operate and no extra tools or skilled labour are required. The cleaning process is executed when rotating hammers with a cemented carbide unit attached, is hammering and scraping off the paint and corrosion. The centrifugal power is the driveforce to the cleaning process of the carbide units. Made of stainless steel and aluminium. Rustibus pipe series is produced to order.

4. Pneumatic Saws

Pneumatic Hacksaws

Light duty air operated hand hacksaw. Maximum cutting capacity is up to 3 mm thickness of steel plate. Special hacksaw blade is to be used.

Unit Per Set

CODE	59 05 71
Model	SSW-110
Stroke Speed (No Load)	7,000 min^{-1}
Stroke Length	11 mm
Cutting Capacity	Max. plate thickness 3 mm (for mild steel SS400)
Rated Air Pressure	0.6 MPa (6 kgf/cm^2)
Air Consumption (No load)	0.29 m^3/min
Weight	0.62 kgs
Standard Accessories	- 2 pcs Hacksaw blade 32 teeth - 1pc 3 mm Hex Socket Screw Key - 1pc Bushing R 1/4 x NPT 1/4

Name of Mfr.: Nitto Kohki Co.,Ltd.

Spare Blades for Pneumatic Hacksaw

Sold by 10 pieces per package.

Unit Per Pkt

Explosion-Proof Air Saws

A unique and most ideal all-purpose pneumatic hacksaw. Its reciprocating blade is designed to cut any sawable material of any shape.

ITI-45

Its automatic lubricating system will not produce either heat or sparks on the blade and material to be cut.

This safety saw can be used even in places where flammables are prohibited such as tankers, chemical plants, and petroleum refineries. This pneumatic saw is rust-proof and water-proof. Thus it can also be used for under water work.

Unit Per Set

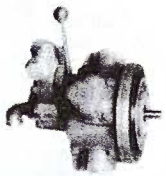
		Upper Diam	Height
59 06 11	10	260	335
12	20	360	350

7. Air Motors

Air Motors



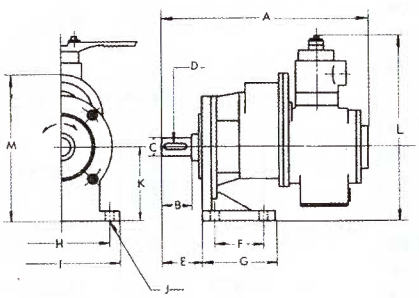
This air motor is free from explosion because it is equipped with a non-spark mechanism. It has a wide range of applications where an electric motor can not be used because of severe working conditions such as high temperature, high humidity, or problems with sparking.

Required air pressure for this motor is 0.59 MPa (6 kgf/cm²).

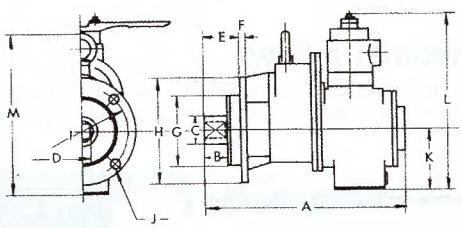
How to order : 59 - 06 - 20

Air motor, with the following specifications:

1) Mounting system	Base type (Horizontal) Flange type (Vertical)
2) Shaft connecting system	Key type Socket type
3) Operation system	Manual operation Remote operation
4) Load torque	kg-m
5) Free speed	R.P.M.
6) Maximum power	P.S.
7) Application	For opening and closing hatches. For lifting and lowering life boats or ladders.



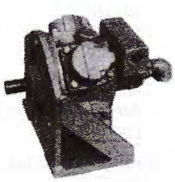
Mounting System : Base Type
Shaft Connecting System : Key Type



Mounting System : Flange Type
Shaft Connecting System : Socket Type

Air Motors

PADIA PISTON MOTOR (DM)



This is the most popular Radial Piston type air motor. The quality of this motor is high torque and low speed. So it may use with compact reducer and in low noise area. Generally, used for air hoists and air winches. The method of air motor operation is direct pipe connecting. The way of motor mounting are base mount or flange mount. And the optional accessories can be available as air brake, reduction gear, pneumatic equipment etc.

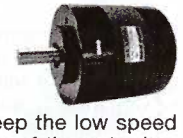
VANE MOTOR (VA) – One Way Rotation



A compact and light-weight motors by the high quality machining and finishing. It is the most popular model and it is used to various fields widely. The motor speed is middle and high range. The unique system makes to keep the low speed torque and high starting torque. In case of the extra low speed or the extra high torque, the optional reducer can be available. The way of motor mounting are base mount, flange mount or face mount, and it can be applied to various site requirement.

GEAR TURBINE MOTOR (AGM)

The construction of this motor is the same as gear pump. Because of no sliding parts inside, it rotates without friction heat-up. This motor is equipped on the speed governor, and the rotating speed is always fixed against the alternation of the driving load. The way of motor control is handle type, and remote type is available by optional request.

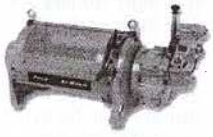
8. Air Winches

Air Winches



Simple, rugged, reliable source of enormous lifting, lowering and tensioning with variable speed control for precise load handling for their weight. Air winches are well-suited for applications in hot, cold, dusty, dirty, explosive and wet conditions. They pose no electric shock hazard, require no special enclosures, and there are no high pressure hydraulic lines to leak. Air winches are easy to service, maintain, and repair. The most common models are described below for your reference. Please ask for further information and brochures of various manufacturers and models available from local suppliers when required. Wire rope is to be ordered separately.

Guidance to choose the correct utility winch for your applications ;
1. How much is to be lifted, pulled, or tensioned?
2. How fast is the load to be moved (if at all)?
3. How much wire rope is needed?

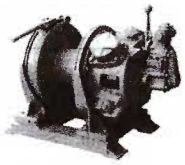
Air Winches



This is the multi-purpose air winch and it is attached standard radial piston type air motor, and control valve. The handling of this winch can be easily and safety. DNV-GL's type approved.

- Easy operation [control Lever only] and safe mechanism [Brake] are designed.
- Compact light weight can be moved quickly from one location to another.
- Dusty environment is acceptable for use.
- No sparks are generated.
- No damage with overheat occurs even for overload.
- Continuous operation at full capacity is available.
- Drum diameter is large enough to prolong life of rope.

Guidance to choose the correct utility winch for your applications;
1. How much is to be lifted, pulled, or tensioned?
2. How fast is the load to be moved (if at all)?
3. How much wire rope is needed?

9. Sand Blasters

Portable Sand Blasters

Abrasive Recycle Type

Lightweight, portable abrasive blasting tool with an integral abrasive recovery system. During blasting, the sand is continuously recycled, while dust and other debris is collected in a slip-on dust filter.

This item is effective for conserving the amount of abrasive necessary for large jobs.

Specifications

Model	Required Air Pressure kgf/cm²	Air Hose Size	Abrasive Capacity kgs	Weight kgs

Pneumatic Sand Blasters

Removes rust, scale, corrosion and paint, etc.

For use on metal, plastic, concrete, brick and glass. Has a compressed air sandjet with a compact and large volume tank which is suitable for continuous operation.

Cleans any hard surface quickly and leaves it in an ideal condition for repainting without further preparation.

Vapor Abrasive Blast Equipment

EcoQuip 2

Used for coating repair, coating removal, steel surface preparation and anti-fouling removal, and designed to accept any media heavier than water and has a blast rating of up to 12 bar (175 PSI).

Vapor Abrasive blasting is similar to dry blasting, except that the blast media is moistened prior to impacting the surface and creates up to 92% less dust than traditional dry blasting. Because dust is minimized, less containment may be required and media clean-up time can be reduced. The EcoQuip2 blasters use less water than slurry or other water-based blasting technologies, so no pools of water are left behind, and less need to worry about toxic runoff. The end result is a cleaner, more effectively contained process. The EcoQuip2 blasting units are designed for years of safe and solid onboard maintenance.

Determining the pressure setting for your application

1.8 - 3.8 Bar (25-55 psi)
Cleaning Soft Metals, Wood, Aluminium, Efflorescence Removal, Graffiti Removal, Parts Cleaning

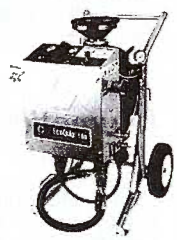
3.9 - 6.2 Bar (56 - 90 psi)
Line Stripe Removal, Pitted Paint Removal, Rust Removal

6.2 - 8.3 Bar (91 - 120 psi)
Steel Surface Prep and Coating Removal

8.3 - 12 Bar (121-175 psi)
White Metal Blast to Near White Metal Blast, Removal of Layered Coatings and Polyurea Removal

EcoQuip 2 EQp

A portable, powerful machine with 55 ltr water capacity, weight is only 99.8 kgs at empty. It can blast for up to 90 minutes between refills, works well with coarse, fine or non-destructive media. Low water usage, less mess - Only uses 1/2 to 1 qt./min. of water. Fast removal rates compared to other cleaning methods - Blast pressures up 150 psi (10 bar).



Unit Per Set

CODE	Description	Item No.
59 08 16	EQp 1/2" x 15 m (50 ft) blast hose, #4 nozzle	278861

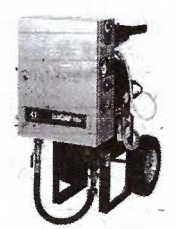
Name of Mfr. : Graco

EcoQuip 2 EQm

A compact, fully portable entry-level unit. The built-in hand truck with over-sized wheels makes the EQm easy to move around. Mobile units have a coated enclosure and water inlet regulator for the hose connection.

*Packages include 15 m (50 ft) blast hose with electric or pneumatic blast controls (machine accepts either type of hose), #7 standard nozzle and tool kit.



Unit Per Set

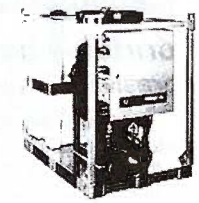
EcoQuip 2 EQs

A high production, entry-level skid unit. Designed to tackle most typical blasting applications. The EQs is built according to extremely strict standards and can be stacked safely on a platform or a ship deck. Standard models have a coated crash frame and enclosure.



*Packages include 15 m (50 ft) blast hose with electric or pneumatic blast controls (machine accepts either type of hose), #8 HP nozzle and tool kit.

10. Tank Cleaning Machines

Tank Cleaning Machines

Equipped with a unique, self start, hydraulic turbine which cleans effectively using the least amount of water. These machines are capable of rotating 360° horizontally and vertically to reach any tank surface.

The movement of the nozzle can be programmed to make a controlled pass suitable to the areas of the tank being cleaned. The gear box is enclosed with the bearings fully lubricated to preserve the long life of the workings. The gears are built into the lower part of the body for easy inspection and replacement.

Tank cleaning machines are available from a variety of manufacturers internationally. Because models, gearbox design, and wash patterns differ, it is advisable to ask your supplier or local dealer for detailed information about each machine and its features. A few of the major manufacturers are listed below as a reference. When ordering, select a representative code for the nozzle size you require and specify the name of the manufacturer from whom you wish to order.

Tank Cleaning Hose

The hoses are made of a suitable rubber specially compounded for attaining high durability. There is no elongation or expansion of the outer diameter when pressure is exerted on the inside of the hose. Stainless wires (two spiral wires) are incorporated for discharging any static electricity. They are lightweight and have excellent flexibility.

Hoses are available from a variety of manufacturers internationally. Hoses from a few of the major manufacturers are listed below as a reference. When ordering, select a representative code for the size of the hose required and specify the name of the manufacturer from whom you wish to order.

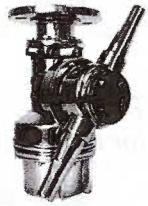
Tank Washing Machines, Twin Nozzle VP Major & VP Minor, Stainless Steel

The VP Major & VP Minor are pre-programmed twin nozzle tank washing machines available in 316 Stainless Steel.

Both use an orbital progressive intensity wash pattern to meet IMO Annex II pre-wash requirement standard. Automatic 'slip-clutch' to prevent accidental damage in use. Simple to service, with use of hi-performance long life gears, and fully Type Approved by Class Societies worldwide. Ancillary equipment available i.e. rigid hoses, adaptors, hose saddle, lifting tripod and downtubes.

VP Major



Suitable for use on both medium and large crude oil, chemical and product tankers, and can be supplied as a fixed or portable application.

Key Features

* Nozzle sizes range from 12 mm to 18 mm (18 mm Fixed machines only).
* Offered with 'media lubricated' drive.
* Alternative flange (up to 180 mm diameter) and fixings available.

Technical Specification

Wash Pattern: pre-programmable rotary 360°
Operating Pressure: Maximum 12 kg/cm² (190 psi)
Operating Temperature: Maximum 95°C (203°F)
Installation: Portable 2" NST male thread, Fixed Flanged Std DIN 50 NP16
Weight: Portable 19.5 kgs (43 lbs), Fixed Flanged 21 kgs (46 lbs)
Minimum Deck Opening : Φ 245 mm (9.6 inches)

Unit Per Set

65	2 × 18 mm	57	64	70	23	25	26	49	46	44

Name of Mfr. : Victor Marine Ltd.

VP Minor

Suitable for use on both small and medium crude oil, chemical and product tankers, and can be supplied as a fixed or portable application.

The VP Minor is also available as a "sealed for life" machine which has been specifically designed to operate with aggressive / abrasive types of drive media. The "sealed for life machines" are also the perfect choice when considering the cleaning of mud / slop tanks: this is due to the nature of the sealed gearbox design.

Key Features

* Nozzle sizes range from 7 mm to 11 mm (portable or flanged);
* Offered with either "sealed for life" (mud machine) or "media lubricated" drive to ensure no cargo contamination;
* Alternative flange (up to 160 mm diameter) and fixings available:
* Sealed unit available for use in corrosive mud tanks;

Technical Specification

Wash Pattern: Pre-programmable rotary 360°
Operating Pressure: Maximum 12 kg/cm² (190 psi)
Operating Temperature: Maximum 95°C (203°F)
Installation: Portable 1½" BSP male thread, Fixed Flanged Std DIN 40 NP10
Weight: Portable 8.2 kgs (18.1 lbs), Fixed Flanged 10.2. kgs (22.5 lbs)
Minimum Deck Opening : Φ 200 mm (8.0 inches)

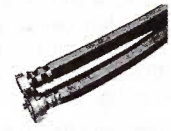
Tank Cleaning Hose & Accessories for VP Major and VP Minor



Used for delivery of sea water, detergent solutions and for cleaning fuel and oil tanks, road tankers and ships' tanks. Made from superior quality Neoprene with Styrene Butadine Rubber (SBR) liner and cover. Reinforced with multiple rayon braids for long life. Anti-scuff cover, weather and ozone resistant, with anti-friction lining. Earthed with two stainless steel braided wires, spirally wound, embedded in hose wall and connected to couplings. All hoses continuity tested (to under 6 Ohms per/mtr) and certified prior to dispatch.

Tankwash Hose (Black/Yellow with Logo) for VP Major Twin Nozzle Tank Washing Machine

2" (50 mm) nominal bore. Standard lengths are 10, 15, 25, 30, 40 and 50 metres. Fitted with standard 2½" NST (7.5 TPI) BW couplings. Couplings : Bronze swivel couplings. Clamp bands for safety. Fully earthed. Other connections are available upon request including Stainless Steel.

Unit Per Lgh.

Weight	28 kgs	

Name of Mfr.: Dasic Marine Ltd.

Tank Cleaning Hose
for Jetstream Tank Cleaning Machine

Manufactured with a fully woven polyester reinforcement and completely encapsulated with a thermoplastic elastomer (polyurethane), the hose provides high pressure capabilities together with excellent resistance to attack by fuels, chemicals, abrasion, weathering and ozone/u.v..

Two low resistance stainless steel bonding wires are incorporated against the build up of static electricity. Standard hose length will be available up to 30mtr. Please specify length when ordering. Also available in 50mm diameter.

Unit Per Mtr.

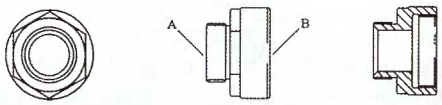
Ancillary Tankwashing Equipment
for Jetstream Tank Cleaning Machine

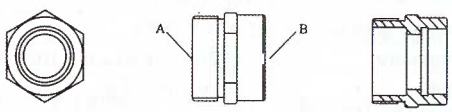
Hot Water Line Adaptors

Made of high quality cast gunmetal and to provide connection between a tankwashing hose and a ship's connection.



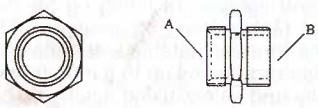
Machine Adaptors

Made of high quality cast gunmetal and to provide connection between a tankwashing machine and tankwashing hose.

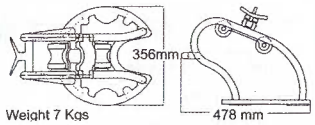


Double Ended Adaptors

Made of high quality cast gunmetal and to provide connection between tankwashing hoses to extend their workable length.

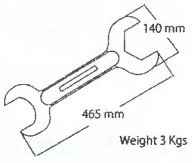


Hose Saddles



Designed to ensure a smooth passage through the deck opening for the supply hose during a tankcleaning operation. The hose will be guided over two sets of rollers and allowing it to gently curve in through the deck opening removing any risk of kinking or abrasion to the hose.

Hose Spanners



Made of cast gunmetal for ensuring a secure fitting when attaching hoses to tankwashing machines or adaptors.

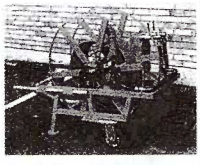
Automatic Hose Reels
for Junior Jetstream Tank Cleaning Machine



Water powered hose reel capable of stowing up to 35 mtrs of tankcleaning hose. The tankcleaning machine will be connected to the supply hose which is coiled on the drum and a feed hose connects the hoist to the ships' tankcleaning line.

Unit Per Set

CODE	59 21 41
Model	Hydra Hoist 700
Drive Media	Water Turbine
Operating Pressure	5 - 12 bar (50 - 125 psi)
Inlet Connection	2.5" x 7.5 tpi (2.5" ANF) male
Capacity	35 mtr (115 ft) x 38 mm (1.5 ins) rigid wall tankcleaning hose
Lifting Speed	6 mtr/min. (20 ft/min.) at 10 bar (Average)
Lowering Speed	3 mtr/min. (10 ft/min.) at 10 bar (Average)
Stowage area of unit	0.83 m^2 (9 ft^2)
Dimensions	L1,220 x W680 x H1,109 mm
Weight	140 kgs (308 lbs)

Name of Mfr.: Dasic Marine Ltd.

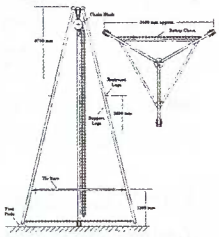
Jet-Lift Tripod
for Junior Jetstream Tank Cleaning Machine

Robust and lightweight lifting rig for the removal and installation of tankwashing equipment. The stable base formed by the three adjustable feet coupled with the unit's height enables drop pipes up to 5 mtrs long to be raised or lowered easily and safely, using a fail-safe chain block and endless chain. Easily handled and erected and because the legs are constructed from tubular aluminium the framework offers a high strength/weight ratio. The feet automatically adjust to accommodate deck cambers, and are fitted with rubber seating pads for firm grip. Important : It is essential to keep all safety chains and retaining pins in position, as directed, at all times.

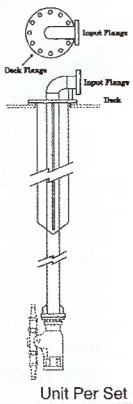
Unit Per Set

CODE	59 21 51
Model	Jet-Lift Tripod
Max. Load	500 kgs
Lifting Head	6.5 mtrs
Weight	70 kgs
Chain & Shackle Working Limit	1.5 tonnes in straight tension

Name of Mfr.: Dasic Marine Ltd.



Free Standing Unit
for Junior Jetstream Tank Cleaning Machine



The unit offers a fixed installation facility for crude oil washing machines. Basically a fixed downpipe, stiffened for strength and rigidity, to which a flanged tank washing machine can be mounted at various depths below the deck level. The materials conform to BS 4360 grade 43A steel for the flanges and stiffening webs, and APL 5L tube for the downpipe. The deck flange is to suit a standard deck opening.

Unit Per Set

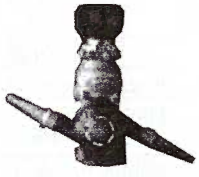
Name of Mfr.: Dasic Marine Ltd.

Tank Cleaning Machines
Butterworth K / SK / SSK Series Machine



They are used portably for water washing, or fixed-in-place crude oil washing of small and medium size tanks and for cleaning hard-to-reach surfaces in large tanks.

They can operate in any position by the Full-sphere with 360° coverage washing pattern.

K Machines

Features rotating twin nozzles and a wash head revolving in panes 90° apart. Small, low-cost and weighing less than 28 kilograms (62 pounds), the K machine has a cleaning range of 10 meters (33 feet) and fluid capacity up to 32 cubic meters (377 cubic feet) per hour. Wash cycle times range from 50 to 23 minutes for inlet pressures of 3.5 to 12 kilograms per square centimeter (50 to 175 psi).

SK and SSK Machines

The SK and SSK machines both weight 30 kilograms (66 pounds) and are identical except for the SSK's larger nozzle and great capacity. The SSK (only used for fixed-in place installations) has a maximum capacity of 75 cubic meters per hour and a cleaning range of 25 meters (82 feet).

The SK has a maximum capacity of 53 cubic meters per hour and a cleaning range of 21 meters (69 feet). The wash cycle times for both units run from 17 to 32 minutes with inlet pressure of 5.25 to 12 kilograms per square centimeter (75 to 175 psi).

Tank Cleaning Machines
Butterworth LT & LT-FT

An automated portable or fixed-in-place tank cleaning machine provides 360° impact indexed coverage for the cleaning of the inside of tanks of Chemical and Product Tankers. A highly versatile machine and is applicable in most all types of tanks for process, storage, and transportation. Tank capacities range from 500 – 150,000 gallons (2 – 570 m^3) for one machine per tank and larger tanks where multiple machines are installed.

LT machine creates a pattern matrix similar to a ball of twine, and a complete pattern is established when 65 axial revolutions of the body have been completed. During the process of this pattern build out, 4 cycles are established with each cycle increasing the density of the pattern matrix.

Specification

Pressure Range	0 – 300 PSI (21 Bar)
Jet Length Radius	0 – 58' (17.68 mtr)
Inlet Connection Type	1-1/2" NPT (F), 1-1/2" BSP (F)
Minimum Tank Operating Requirement	5.613" (142.56 mm)
Material	316 Stainless steel / CD4-MCU Duplex S/S
Weight	15 lbs (6.8 kgs)

Pneumatic Vacuum Cleaners "BLOVAC CLEANER"

A compact and lightweight industrial vacuum cleaner which works on compressed air. Capable of cleaning off water, oil, and bottom sludge as well as dust and metal chippings. It will even vacuum explosive materials as long as the machine is properly grounded from electrical current. Made of a unique design permitting the use of an ordinary pail can with an outside diameter of 300 mm to collect the dust and waste. Furnished with a pail can, 2 meters of oil resistant hose, and an oil stopper which automatically stops suction when the receiver becomes full.

12. High Pressure Cleaners

High Pressure Cleaners

High performance, excellent ergonomics, low noise levels and easy servicing make this an efficient pressure washer. For more efficient cleaning with reduced chemical consumption the unit can be fed with hot water up to 60 - 85 degrees. HPC 54/1 ideal for 3-4 hours and HPC 67/1 for 6-7 hours continuously operations.

Air-Operated Pressure Washers

Hydra-Clean

High Pressure Washer which can be used safe in hazardous locations. Efficient cleaning with water, detergent or chemical solutions. Supports multiple guns. Designed to use with cold or hot water up to 200°F (93°C). Includes everything needed to use with open-head universal drums. Fits most pressure, flow and material requirements. Available with an accumulator and chemical injector.

High Pressure Cleaners

Air Powered Heavy Duty

Designed for heavy duty use in hazardous areas where combustible gases and liquids may be present, ensuring safety and effective cleaning. It is ideal for removing stubborn dirt, stains and other debris.

Non corrosive materials are used in pump, fittings and pipes.

Unit Per Set

CODE	59 08 51
Model	C-200AIR
Power Consumption	9.0 HP (6.6 KW)
Motor Speed	1,500 r.p.m.
Working Pressure	200 bar (2,900 psi)
Flow Capacity	15.0 ltr/min.
Max. Air Consumption	150 m3 /hour (330 Cf/min)
Dimensions	L850 x W550 x H900 mm
Weight	70 kgs

Name of Mfr. : Nilfisk Pte Ltd - Den-Sin Division

Electric Powered

Designed for general purpose cleaning tasks in multiple industries. These high pressure cleaners are used for daily cleaning of machinery, vehicles, and buildings, for the removal of stubborn dirt, stains and other debris from multiple surfaces. Available 3 types of power supply, AC110V, AC220V or AC440V. All pump materials, fittings and pipes in contact with water are non-corrosive.

Gasoline Pressure Washers

G-Force II

The G-Force II pressure washers provide you with enough power and performance to tackle even the most challenging of cleaning and preparation jobs. Surface preparation, cleaning agent, horizontal cleaning, etc. Easy loading and maneuverability – thanks to its compact, durable, lightweight design.

13. Hold Cleaning Guns

Hold Cleaning Guns

For cleaning of bulk carrier holds by a high pressure water stream. A strong stream of water can be projected a distance of up to 25 mtrs for the removal of any loose rust, flaking paint, or cargo residue. Supplied complete with a tripod stand, the lightweight design is ideal for a one-man operation. Please specify type and size of water hose coupling to be connected, when ordering.

Hold Cleaners

Trelawny Hydraflex

Specifically designed for hold cleaning on bulk carriers and cargo vessels of all sizes. Operated by a combination of water and compressed air, the gun throws a solid, tightly compressed jet of water of up to 30 mtr (100 ft).

Features and Benefits

- Stainless steel construction
- Compact design
- Low maintenance

Hold Cleaning Gun

Maxi-Gun

It consists of a uniquely designed series of air and water nozzles with 2 special swivel units in the vertical and horizontal planes. It is designed to give the highest and strongest solid water jet possible up to about 80 meters with a water pressure of 11 kgf/cm². It can be easily operated by one man using the normal service mains available on most Bulk carriers and OBO type vessels.

It requires a water pressure of 4 kgf/cm² or more and air pressures of 6 to 8 kgf/cm² and can simply be connected to the normal water-on-deck line and the service air line. For the toughest cleaning jobs, a water pressure of 11 kgf/cm² will enable the Maxi-Gun to reach a jet length of about 80 meters, but even at 7 kgf/cm² the reach is about 60 meters.

For safety, the Maxi-Gun incorporates 3 easily mounted water ballast tanks. These form a weighted, self-supporting stand for the nozzle and swivel units. With the ballast tanks full one man can easily and safely operate the equipment from a standing position, controlling jet direction and cleaning pattern from the nozzle handle.

Unit Per Set

CODE	59 07 45
Recommended Air Pressure	6 - 8 kg/cm²
Minimum Air Supply	3 - 5 m³/min.
Estimated Water Consumption	20 - 100 m³/hr.

Size L x W x H mm	Pump Unit : 1,300 x 650 x 1,500 Stand : 900 x 500 x 1,200.

Name of Mfr. : BC Taechang Corp.

Cargo Hold Application Set

For applying all kinds of protective coatings, as well as for the application of chemical solutions for cleaning of cargo holds. Suitable for all kinds of chemicals (acids, alkaline, solvent, polymer, chlorine base). The lightweight telescopic applicator lance, made by Carbon Fiber, Glass Fiber, allows for reaching up to 20m height, with a bare pole weight of less than 4 kg. An air-operated double diaphragm pump made by GFR + PP (Glass Fiber + Polypropylene) material is also included, as well as an 50 m delivery hose roll and a 5 m suction hose.

Unit Per Set

Telescopic Lance	35 ft	42 ft	42 ft	57 ft
Others	165 ft (50 m) Delivery hose, 16.5 ft (5 m) Suction hose, 2 pieces Spray nozzles, 1-unit Lance holder with belt, 3 pieces Respirator mask, 3 pairs Protective goggles, Instruction Videos, Manual, Specifications.			

Name of Mfr.. Chemo Marine Chemicals

Application Set Repair kit

Consists of: Spray nozzles, Spraying head, Hose connectors set, Tap connector and Extension joint.

59 07 97	Repair kit for cargo hold application set, Chemo marine	Set

14. Air Line Filters

Air Line Filters

Designed for cleaning of compressed air and draining water drips.

The standard filtration is 5 μW and the maximum working pressure is 9.9 kgf/cm². The maximum working temperature is 60 C. The filter case is made of a polycarbonate material and reinforced by a guard. A bracket and auto drain are also available on request.

Unit Per Pc

Mobile Air Filter Lubricators

Rustibus Air Pro

Designed for easy use and operation. The counter balance system makes the filter-lubricator unit remain ideally positioned as the operator moves around while working. A regulator is used to maintain the pressure at a level suitable for the equipment in use.

It can be used with any pneumatic hand tool, giving a safe, more flexible and efficient working position.

Unit Per Set

CODE	59 08 45
Model	Air-Pro
Air Pressure	6 – 8 bar
Dimensions L x H x W	300 x 400 x 300 mm
Weight	5.8 kgs
Name of Mfr.	Dalseide Shipping Services

In-Line Lubricators

Heavy duty in-line lubricators to be installed 1.5 – 2 meters from the tool. Designed for use with tools that are in use too far away from the compressor to be lubricated but a permanently mounted unit. This units can be used on everything from an air scribe to a paving breaker.

Technical features:
- Meter valve for adjusting oil flow.
- Slight disk in housing for visual oil inspection.
- Heavy duty and robust.
- Repair kits available.

Unit Per Pc.

15. Air Distributors

Four-Way Air Distributor

Constructed of carbon steel pipe. Permits the simultaneous connection of 4 pneumatic tools at to a single air line while maintaining constant feed pressure. Equipped with carrying handle, support skids, and safety valve pressure gauge. Air inlet and outlets are fitted with bronze ball valves and variable universal couplers. Maximum pressure : 10 bar (140 psi), Unit weight : 17 kgs.

59 08 91	Distributor, air, 4-way	Set

Name of mfr : Skatool Marine

Tank Style Air Manifolds

Keep your work site uncluttered by having only one hose going to the work area. Both sizes can be used in tandem to provide as many outlets as needed. With ASME approved tanks and POP-OFF safety valves; pressure gauge and brass draining valve to vent droplets, both models meet OSHA guidelines.

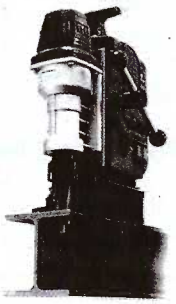
Portable Magnetic Base Drill Machines

A portable drilling machine with a magnet base, geared to drilling mild steel (or equivalent) , using one-touch type "JETBROACH" or "HI-BROACH" cutter. The machine will be mounted on the workpiece to be drilled with the magnet securely fastening the machine onto the workpiece while drilling takes place. Pilot pins and broach cutters are sold separately.

Cordless Type and Cord type are available

Model CLA-2720 - Cordless Type



Suitable for high or narrow or hard to access areas, thanks to its characteristic of cordless and compact body. Designed to use Jetbroach and Hi-broach annular cutters.

Highly sensitive sensors are equipped for detecting side slip and inclination for safety drilling work. The high luminance LED lamp will give you a warning of the battery level and the load on the motor. Hole cutting capacity : 12 to 27 mm hole diameter.

Model WOJ-3200 - Cord Type

Designed to use Jetbroach cutters or twist drill. Loosening the pillar clamp allows the complete frame to be lifted up to a maximum of 60 mm for specific drilling. The use of Jet-broach cutters require the frame to be at the lowest position, while twist bit drilling required the appropriate amount of elevation to be adjusted for safe operation. The pillar clamp is required to be tightened before drilling safely. Feed handles can be positioned on the right or left hand side for ease of drilling and mounting in confined spaces.
Note: Always engage the magnet before adjusting the body height.

Electric Bench Grinders

For sharpening tools and other appliances.

According to safety measures, the grinding must be fitted with a wheel cover and must be firmly secured to a bench stand. Provided with permanently self lubricating ball bearings. Furnished for use with a 110 volt power supply or 220 volt power supply.

The specifications listed here are for your reference. If you wish to order Bench Grinders from a specific manufacturer, please refer to the comparison table listing major international manufacturers and product model numbers on page 59-62.

Specifications

Wheel Size mm	Motor	No Load Speed R.P.M.	Weight kgs
150 x 16 x 12.7	300 W	3,600	16
205 x 19 x 15.88	600 W	3,600	28

Electric Nibblers

For free hand cutting or cutting by template of all types of heavy sheet metal plates, light alloys, and plastic panel without damaging the material. Can also be used on curved surfaces. Furnished for use with a 110 volt or 220 volt power supply. For further detailed data on the complete line of the nibbler, ask your local distributor.

The specifications listed here are for your reference. If you wish to order Nibblers from a specific manufacturer, please refer to the comparison table listing major international manufacturers and product model numbers on page 59-63.

Specifications

Comparison Table of Electric Tools

Various manufacturers and brands are available from around the world. A few products from different manufacturers are listed here for your reference. Please ask for further information with brochures of various models from manufacturers when ordering.

The standard power source voltage differs according to the model and manufacturer. Please acknowledge that it will require several days for rewinding motor coils to convert the power source voltage when the required voltage is not available in standard.

When ordering : Electric drills

1. Select the drilling capacity required : 6.5 mm for steel
2. Select a manufacturer from one of the columns to the right: Black & Decker
3. List the representative code for that size : 59 10 01
4. List the model number of the tool for the manufacturer : 1046
5. Specify required power source voltage to be used : AC 110 volt

17. Chain Hoists

Electric Chain Hoists

A wide range of models from different manufacturers are available. The rugged dynamic body will provide maximum protection for moving exceedingly heavy loads.

Push-button control responds immediately. Both the top and bottom hooks can turn in all directions.

Furnished for 110 volt or 220 volt single phase power supply.

For further detailed information about the electrical chain hoist, ask your local distributor.

Pneumatic Chain Hoists

Designed to be used in various fields; has the following features.

* Compact and lightweight (lighter than a hand-operated chain block)
* Speed control: Operator can control the chain speed freely as he likes by a pilot control system.
* Automatic lubrication by a built-in lubricator keeps the hoist free from motor troubles.
* Safe: No mechanical brake. Self-locking worm gear provides automatic and positive braking. Holds loads securely when the motor is not operating. No motor burn-out, can be overloaded, even repeatedly stalled, without damage to any parts of the chain block. Over-load will only stop the operation of the air motor.
* No shock hazard: Controlled and powered completely by air.
* Explosion-proof type
* Required air pressure is 0.59 MPa (6 kgf/cm^2).

High Speed Pneumatic Chain Hoists

TCS Series

Designed to be the fastest speed in this lift capacity class, and have following features.

* Compact and lightweight with aluminium housing.
* Maximum speed limit is independently adjustable on both lifting and lowering.
* Excellent inching on both lifting and lowering movement .
* Unique design of the valve prevents air leakage and malfunction caused by rust when not in operation.
* Over travelling limit system.
* Self Cooling Design.
* Operating air pressure is 0.6 MPa (6kgf/cm²).

Each capacity model has 3 different types of controllers.

P : Pendant type
PE : Pendant + Emergency Button type
C : Cord Type

TMH Series - 3 & 6 ton capacity

Fastest Lifting Speed in this lifting capacity, operating pressure is 0.4 to 0.6MPa.

High efficient 3 step planet gear and original heat reducing structure provides high class durability. Pin mount type of upper hook is for easy maintenance and convention to trolley hoist. Smallest headroom clearance in this capacity class.

18. Ventilations/Fans

Electric Portable Ventilation Fans

Highly efficient and portable. Used to ventilate hot air and harmful gases from a tank or work area, and supply fresh air and oxygen. The ideal bell-mouth type casing is highly efficient, creates little noise and is easy to install in an air duct. Related air ducts are sold separately.

Portable Air Movers

Lightweight, portable compressed air (or steam) operated flow amplifiers suitable for ventilating crawl areas and confined spaces. Made of single piece cast aluminium inlet housing. Ideal for use in hazardous atmospheres because of no moving parts - important for ventilating hazardous areas - zero maintenance. Typical applications include: diluting or exhausting fumes from tanks, cargo holds, etc. Can be used with or without flexible duct.

Unit Per Set

Venturi Type Air Movers

Used wherever there is a need to disperse and remove fumes or move air into confined spaces.

- Fast, efficient and economic way to ventilate.
- No moving parts. Means minimal maintenance.
- Operates on compressed air or steam.

Technical Specifications based on Standard European Measurements.

Jet Fan Air Movers

For use wherever there is compressed air available. Designed for ventilation of confined areas, tanks, any place with a need to disperse and remove fumes. This unit is reversible so can become an exhauster within minutes. No air motor required.

Technical Features:

- Rated operating pressure 2.75 bar – 7.58 bar
- Heat treated to T6 Aircraft Aluminium Spec.
- Six guide vanes to eliminate turbulence.
- Four blades, precision balanced propeller.

Electric Portable Ventilation Fans

Designed for use in work environments where non-sparking equipment is an absolute requirement. Hazardous location electric motors meets NEC Class 1, Division 1, Group D; Class II, Division 1, Groups E, F, G ratings.

Junction Box

All housings and main components are molded of special conductive polymers for safe dissipation of static charges.

Deck Mount Blowers

"Marine Venturi Air Mover"

Lightweight, rugged and versatile ship-board ventilator for degassing or fresh air supply.

* Delivers 4,870 cfm (8,274 m³/h) operating with 100 psig compressed air.
* Spark resistant, corrosion resistant powder coated aluminium construction. Ideal for hazardous locations.

* Weight on 32 lbs (15 kgs).
* Mates with 122 (320 mm) Butterworth deck openings in either supply or exhaust set-up.
* Built-in flange on outlet end accepts 12" flexible duct.

Air Driven Gas Freeing Fans

A high performance air driven fan constructed from Stainless Steel. These non-sparking (ATEX approved) fans can achieve deep penetration and operate at low pressures. Highly efficient air motors minimize air consumption, supply or extract mode by simple reversal of air supply, and can be supplied for horizontal mounting. High air flow throughput and high static pressure. Integral 'Direct In-Line' drive no gearbox to maintain or fail.

Ancillary equipment is also available (rigid hoses, ducting, fittings, adaptors, transportation trolley) on request.

Class Approved for use in hazardous areas.

VP650A

VP950AS

VP650A

Made of 316 Stainless Steel, designed to be lightweight and therefore extremely portable. Suitable for use on all types of vessels, particularly oil, gas, product, chemical, handysize, SR and LPG vessels.

Water Driven Gas Freeing Fans

VP700W / VP1000W / VP1500W

High performance 316 stainless steel axial flow water driven fans. These non-sparking fans offered as either high or medium throughout, can achieve deep tank penetration. Suitable for all types of crude oil, chemical, product, handysize, SR LPG, Suezmax, UL/VLCC, LR2, LR1, MR and gas tankers for fast and complete gas freeing. ATEX approved.

VP1400W

Suitable for use on all types of vessels (oil, product, chemical, suezmax, UL/VLCC, LPG). The VP1400 is specially designed for low pressure systems and large deck openings whilst still maintaining the high static and flow rate for fast and efficient gas freeing. ATEX approved.

VP800W / VP1350W

Non-sparking fans offered as either medium or high flow, can achieve deep penetration suitable for all types of Oil, Gas, Panamax, Aframax, Suezmax, UL/VLCC, and LPG tankers. ATEX approved.

Key Features

* Designed and class approved for use in hazardous areas.
* Supply or extract mode by simple reversal.
* Integral 'Direct In-Line' drive, no gearbox to maintain or fail.
* Alternative deck flanges and fan connections available;
* Ancillary equipment available (layflat hoses, ducting, fittings, adaptors, transport trolley).

Water Driven Turbine Fans

Designed for high performance ventilation of gas from large enclosed areas or other tank openings. Works effectively providing penetration deep into the tank for complete ventilation. Made of a non-spark construction with a line impeller and integral water motor that are coated against corrosion.

Inlet/outlet water hoses are sold separately.

How to order : CODE

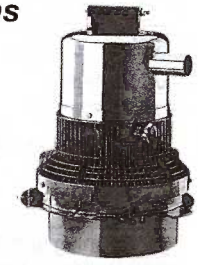
Portable Gas Freeing Fans

Jetfan Series



Jetfan 65

For small to mid tonnage vessels. Totally portable and capable of being used in virtually any location, making it ideally suited to vessels with severely restricted space.

To be used not only for general tank gas freeing but also the ventilation of confined spaces such as cofferdams and double bottoms for inspection and repair work. The air flow can be changed from penetration to extraction in a simple operation.

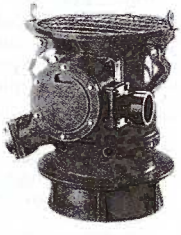
Available in three drive mediums, compressed air, stream or hydraulic.

Unit Per Set

CODE	**59 14 51**	**59 14 52**	**59 14 59**
Model	Jetfan 65		
Drive Medium	Compressed Air	Steam	Hydraulic
Supply Connection	Claw type	1" BSP	As required
Discharge Connection	2" Plain tube	2" BSP	As required
Deck Opening	318 mm		
Size Height x Width	523 x 394 mm		
Weight	17 kgs		

Name of Mfr. : Dasic Marine Ltd.

Jetfan 70



For 'mid' range vessels as a penetration fan. Ideally suited to the environment and can be easily manoeuvred and positioned by one man, a particular advantage on smaller tonnage where deck space is limited. Can choose from water or compressed air as the drive medium. A hand transport trolley is also available.

Unit Per Set

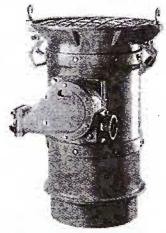
Deck Opening	Standard 318 mm stud bolt deck opening	
Size Height x Width	520 x 436 mm	
Weight	25 kgs	

Name of Mfr. : Dasic Marine Ltd.

Jetfan 125



Most efficient deep penetration or extraction gas freeing fan. Has been used successfully on vessels of up to 550,000dwt tonnes, drastically reducing time spent on gas freeing operations.

To change from penetration to extraction is a one man operation and can take barely 10 minutes to perform. There is a choice of water, compressed air or steam as the driven medium.

A handy transport trolley is also available.

Gas Freeing Fan Trolley

Fan Trolley manufactured in a lightweight tubular construction, this trolley is available to ease the transportation of fans in restricted areas. Complete with durable wheels and a fan retaining strap for added protection. Also available in 316 stainless steel.

59 14 60	Trolley for gas freeing fan	Pc.

Air Ducting for Gas Freeing Fan

Heavy duty, anti-static, flame resistant spiral wound PVC coated, flexible fabric ducting. Produced in standard 300/400 mm diameter nominal bore or special purpose diameters and lengths. These ducts are suitable for both supply and exhaust mode operation and fitted with deck flange to suit 318/400 mm deck opening. Specially designed for marine "hazardous areas". Outlet ducts are available in many sizes ex-stock. Also available as a detachable option.

Electric Blowers / Exhausters

Portable blower / exhauster with turbine blades to deliver a constant source of clean air in even the most difficult to ventilate conditions. These rugged industrial blowers have corrosion and chemical resistant ABS (Acrylonitrile Butadiene Styrene copolymer) housings, cast aluminium turbine fan blades and heavy duty cycle switched motors.

Anti-static intrinsically safe models are recommended for use in hazardous atmospheres containing explosive and combustible gases and vapors.

Air Driven Blowers

These air driven blowers are engineered specifically for hazardous work environments where intrinsically safe equipment is absolutely required. The anti-static, glass-reinforced ABS (Acrylonitrile Butadiene Styrene copolymer) housing is corrosion and chemical resistant. Complete with filter, motor lubricator, exhaust muffler, air control valve and static grounding cord. Motor exhausts outside of duct; compressed air not in air stream.

Portable Electric Industrial Fan Heaters

Used for warming up the cold areas and rooms. They can be also used as drying wet surfaces and atmospheres. Fitted with fan blades that can blow hot air out a few meters away. Heater includes; Overheat protection, Adjustable thermostat control, Cool blows thermostat control (fan blades), Carrying handle and mounting foot and can be wall mounted by own's fabrication. CE certified.

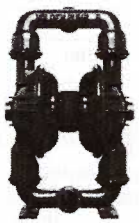
19. Pumps/Ejectors

Pneumatic Diaphragm Pumps

Metal range with Plo-flo air valve system (Formerly known as the M series, T series)



An air operated diaphragm pump designed for simplicity in operation and maintenance.

Safe for use in explosive environments.

The Metal pump lines provides the durability, chemical resistance, abrasion resistance, and temperature range required for a variety of process and waste applications.

The standard material combination is composed of aluminium casing and neoprene diaphragm, balls and valve seat for general purpose non aggressive applications such as in oil and petroleum based fluids. Cast iron, 316 stainless steel and hastelloy casing materials are available as well.

Wilden pump features:

- Ease of operation
- Variable speed
- Variable pressure
- Dead head capability
- Plastic Center Block
- Lube-free operation
- Intrinsically safe
- Ability to pass solids
- Ability to run dry
- No dynamic seals
- No-stalling unbalanced spool

Casing		
S	Stainless steel casing.	
W	Cast iron casing.	Unavailable for P.025, P1 & P2 series.
H	Hastelloy casing.	Standard with PTFE elastomers.
Diaphragms		
WFS	Diaphragm : Wil-Flex (Light chemicals) Low cost alternative to Teflon in acidic and caustic applications. Has long flex life and handle abrasives well.	
TF	Diaphragm : PTFE material for aggressive chemicals. Excellent in acidic & caustic applications with long flex life and handles abrasives well.	
VTS	Diaphragm : Viton. Good flex life at extremely high temperature. Handle aggressive fluids such as acids & chlorinated hydrocarbons well.	
BNS	Diaphragm : Buna-N for oil & petroleum based fluids.	

Example:
59 16 02 W/WFS P4 pump with cast iron casing & Wil-Flex diaphragms, balls, and valve seats.

Plastic range with Proflo air valve system

Plastic pump lines provides the durability, chemical resistance, abrasion resistance, and temperature range required for a variety of process and waste applications.

The standard material combination is composed of polypropylene casing and Teflon diaphragm balls and valve seat. PTFE diaphragm are extremely suitable for aggressive chemicals. Excellent in acidic & caustic applications with long flex life and handles abrasives well.

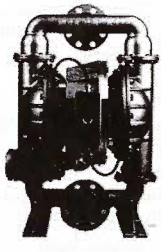
High Pressure Double Diaphragm Pump



The introduction of the H800 expands Wilden's application range to include head pressures up to 250 psig. Wilden's patent pending high pressure technology yields a 250 psig discharge pressure designed for solid laden slurries. Capable of generating 250 psig with only 85 psig air supply.

Standard material composes of stainless steel casing with PTFE backed diaphragm. Suitable for boosting air line pressure over long distances.

Plo-flow SHIFT air valve system

Wilden Pro-Flo Shift Air Distribution System (ADS) is energy-efficient type model and achieves up to 60% savings in air consumption. It delivers more yield per SCFM versus competitive AODD pumps, has fewer operating parts, meaning less downtime and simplified maintenance. Available in a single point exhaust option (for submersible applications), and has drop-in configuration capacity (compatible with M,T, and P models).

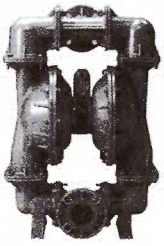
Air Operated

Double Diaphragm Pumps



Versa-Matic® pumps deliver non-stalling, non-icing, lubrication free on / off reliability. Available with patented longer-life diaphragm designs and the exclusive Elima-Matic® air valve system. The products are designed with ease of maintenance in mind, for reduced downtime. They are available in a wide array of materials, construction choices, and porting options to handle virtually any requirement.

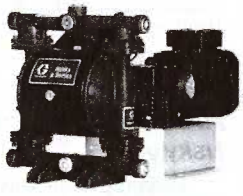
Electric Operated Double Diaphragm Pumps



The electric operated double diaphragm pump uses a new technology that allows the pump to stall under pressure preventing failures from clogged lines or closed valves. The energy efficient electric drive reduces energy consumption up to 5x compared to traditional air operated diaphragm pumps. Seal-less diaphragm pump design eliminates leaking and failures due to run-dry pump conditions.

Pneumatic Sump Pumps

This pump is used both in the naval and in the civil sector, and on the ships for removal of salt water mixed with petrol.

Highly resistant centrifugal pump, built in nodular cast iron or bronze (sparkless version) and has a remarkable shock resistance. The engine is sealed to avoid water leakage or penetration of sand or other particles. The impeller is in bronze and the transmission shafts are sleeved in bushings and special bearings. Equipped with lifting handle and suction filter.

Accessories : Connections and pipes for air and water – Air filters and nebulizer – Mufflers conforming to EEC Regulations.

Portable Pumps

Battery Powered

A battery-powered pump operates using any 12-volt car or truck battery. It comes equipped with cables and battery clips. Extremely portable, the pump weights only 33 pounds (15kg) and can fit through openings as small as 10" (25cm). Electrically safe and whisper quiet.

Suitable for all of onsite dewatering needs such as ditches, manholes, and caissons. The pump is available with an optional handy carrying case for convenient safe storage. Furnished with remote waterproof controller integrated into the pump cable for simple safe operation. The pump is submersible by the watertight o-ring seals

Pneumatic Drum Pumps

Capable of pumping and discharging water, oil and bottom sludge. And also any explosive material can be sucked when the pump is properly grounded. No oil mist is produced and the pumping and discharge action is very speedy (about 2 minutes for 200 ltrs of water). Available in three types.

Furnished with 3 mtrs of oil-resistant hose and 300 mm of discharge nozzle.

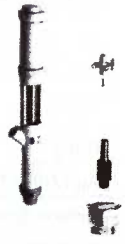
Pneumatic Piston Pumps



Ideal for delivering fuel to oil burners as well as to take out water or oil from drums or other containers.

Furnished air valve cock and air hose nipple, however, the related drum joint and pipe for the drum can be sold separately.

Specifications

Capacity ltr / min	Piston Dia	Overall Length	Weight kgs
40 - 60	50 mm	608 mm	4.6

59 16 61	Pneumatic piston pump complete w/drum joint & pipe for drum can	Set
59 16 62	Piston pump only	Pc.
59 16 63	Drum joint and pipe for drum can	Set

Pneumatic Portable Transfer Pumps

Suitable for rapid transfer of oil, acid, and solvent fluids (in the stainless steel version). Strongly built, it has the motor body in light ally. Available in turbine or piston version.

Turbine Type

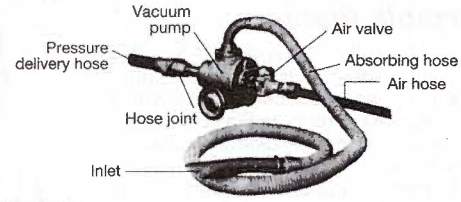
Vacuum Pumps Suction & Pressure System

Using high pressure compressed air this vacuum/boiler pump creates strong suction and diffusion power for all types of materials. Best used for vacuuming or displacing dust, grit, sand, water, oil, paint, etc. A suction hose 50 mmø x 4 mtr and a suction nozzle are furnished as standard accessories.



Specifications

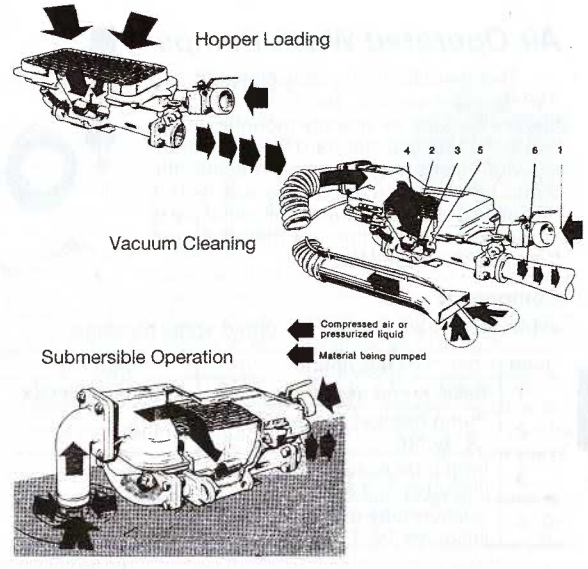
Air Pressure		5 -7 kgf/cm²
Vacuum Pressure		4.5 Hg (Mercury) 6,100 m/mAq (Water)
Capacity of Transfering		2,100 kgs/hour (Steel grit)
Dimensions		W300 x L750 x H450 mm
Weight		21 kgs
Hose	Suction	50 mm ø x 4 mtr
	Dispersion	50 mm ø x 20 mtr
Usual accessories included in set		Suction hose 50 mm ø x 4 mtr - 1 pc Suction nozzle - 1pc

59 16 71	Vacuum Pump, suction and pressure system, 2,100 kgs/hour	Set

Mucking Pumps

A portable jet pump, made of cast aluminium, that solves problems encountered in removing sludge, scale, solids, abrasive materials and concentrated slurries by moving the materials with forced pressure. Also suitable for removal and/or recovery of spent sand blasting abrasive from tank.

A stainless steel strainer will prevent particles of up to 38 mm in size from passing through the pump. It's light weight and small size (305 x 406 mm) allow it to pass through openings as well. Suction and discharge hoses are sold separately.

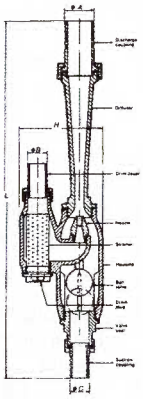


Production Capacity	Max. Transport Distance		Weight kgs
	Horizontal	Vertical	
5 ton/hour	153 mtr	305 mtr	31

59 16 72	Mucking pump, production capacity up to 5 ton/hour	Set

Name of Mfr. : IPEC Advanced System Inc.

Portable Ejectors



Portable ejectors have been found to be indispensable on bulk carriers, lube-oil tankers and chemical carriers where it is essential to empty tanks completely.

It is also extremely useful on all other types of ships for mopping up the last few barrels of liquid from tanks, holds, cofferdams or other compartments when stripping is required.

These ejectors are powered either by water or by the liquid which is being pumped. Normally made of bronze with a stainless steel nozzle. One standard nozzle and an extra nozzle for lower driving pressure are attached as standard accessories.

Air Operated Wash Pumps

Designed for heavy duty cleaning with detergents, caustics, and dilute acid type cleaners. May be directly mounted in the two inch bung of a standard 55 gallon drum or, when using the mounting bracket, the pump can be mounted on the wall or in a 55 gallon open head drum. All metal parts in the pumping section are manufactured from 316 stainless steel.

Component

4-1/4" High pressure wall-mounted spray package

Item	Description	Part No.
1	Basic pump assembly	AF0409C8XXXXX

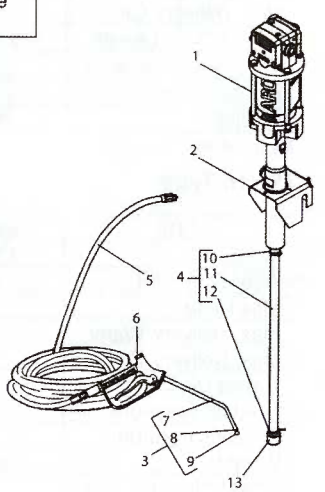
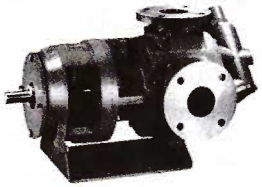
Fluid Pressure Range	0 – 1,500 p.s.i. (0 – 103 bar)
Displacement in³ per Cycle	11.0 (0.18 ltr)
Cycle per Gallon	21 (5.5 ltr)
Maximum Delivery / Min.	3.9 gallons (14.8 ltr)
Name of Mfr.	Ingersoll-Rand

#WP0409C8XXXXXXXX is assembled with the following components ; (4-1/4" High pressure wall-mounted spray package)

#AF0409C8XXXXX : Pump	#641523 : Control handle
#61113 : Wall bracket	#61133 : Spray wand
#61139-1 : 55 gallon suction tube assembly	#TP6250-18 : Spray tip
#622427-40 : Material hose (40 feet)	



Internal Gear Pumps



Internal gear pumps will handle high viscosity, hot or abrasive fluids, or a combination of all these. Built to extend seal life, improve reliability and prevent leaks by utilizing an internal seal chamber vent and oversized shaft diameters that minimize shaft detection. Back pull-out design provides ease of maintenance. Viscosities to 1,000,000 ssu (220,000 cst).

When order please specify the required seal type selecting from the following applications, in addition to suitable pump capacity.

Application of Seals ;

Tuffseal cartridge lip seals	: for viscous liquids
Hard face seals	: for abrasive or tacky fluids
High pressure cartridge seals	: for handling high system pressure
Double cartridge seals	: for containing potentially hazardous liquids
High temperature seals	: for handling liquids such as hot oil

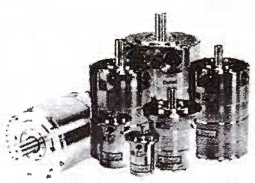
Axial Piston Pumps



The simple construction of the axial piston pump with fewer parts allows highly reliable operation with long service intervals and easy maintenance. The axial piston pumps are positive displacement pumps with axial pistons that move a fixed amount of water in each cycle. Flow is proportional to the number of input shaft revolutions (rpm). Unlike centrifugal pumps, they produce the same flow at a given speed no matter what the discharge pressure.

Oil lubricants are replaced with the pumped medium, water, so there is no contamination risk from the pump.

Efficient design and all-stainless steel construction ensure exceptionally long life. Service is easy, and can be carried out on-site due to the simple design and few parts. Service intervals of 8,000 hours can be expected.

All parts are made of high corrosion resistant materials e.g. Duplex (EN1.4462/UNS S31803/SAF 2205) and Super Duplex (EN1.4410/UNS S32750/SAF 2207) stainless steel and carbon reinforced PEEK (Poly Ether Ether Keton).

End Suction Bare Shaft Pumps

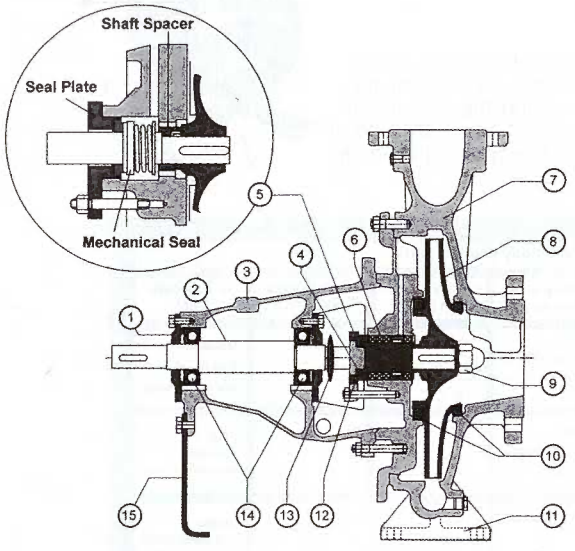
Volute casing centrifugal end suction pump with Back Pull-Out (BPO) feature, main dimensions and performance according to EN 733/DIN24255 standards.

Type	End Suction centrifugal, Black Pull-Out (BPO)
Design	EN733/DIN24255
Flange	DIN2332 PN 10RF
Direction of Rotation	Clockwise as viewed from the drive side
Material :	
Casing	Cast iron, Ductile iron, Bronze and Stainless steel
Impeller	Cast iron, Ductile iron, Bronze and Stainless steel
Shaft	SS420, optional AISI304 & AISI316
Shaft Seal	Mechanical seal and Gland packing
Operating Range :	
Flow Rate (Q)	Up to 1,100 m³/h
Head (H)	up to 150 m
Speed	1,450 – 2,900 rpm (50 Hz) 1,750 – 3,600 rpm (60 Hz)
Operating Temp.	-10 °C to 105 °C standard, optional 140 °C
Operating Pressure	10 bar standard; optional 16 bar

Range of Application:

EUROFLO pumps can be used for the following services in the Commercial, Residential, Agricultural, Industrial, Process, Petroleum and Food & Beverage industries.

Water treatment & supply, Sea water transfer, Fire fighting & protection, Bilging & ballasting, Pressure boosting, Air conditioning, Cooling towers, Refrigeration, Plumbing, Circulating, Transfer, Irrigation, Drainage



Parts ;

No.	Name	No.	Name
1	Bearing cover (Shaft end)	8	Impeller
		9	Impeller nut
2	Shaft	10	Casing wear rings
3	Bearing housing	11	Front foot support
4	Shaft protection sleeve (with Gland packing only)	12	Seal plate
		13	Slinger
5	Mechanical seal	14	Ball bearings (Deep groove)
6	Gland packing (option)		
7	Volute casing	15	Rear foot support

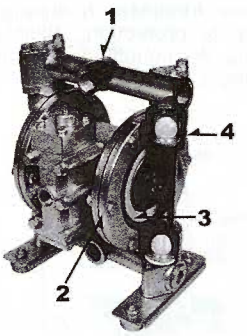
Double Diaphragm Pumps Series



Basic Model Variations

- Eight sizes of pumps
- Six types of wetted parts as a main body
- Seven types of materials for a diaphragm

Total of 150 or more basic models are provided as a result of combination of the size, wetted part type and diaphragm material type. In addition, the DP-F series for semiconductor manufacturing process and the non-metal pump series all composed of basic components made of resin are added to the conventional models to allow you to transfer various types of solutions and/or handle the various use conditions.

Material of a diaphragm ball valve sheet	Material of the main body (wetted part)						
	A: Aluminium alloy (ADC12)	F: Cast iron (FC250/S45C)	S: Stainless (SCS14/SUS316)	P: Polypropylene (PPG) * See Note.	T: Fluorocarbon resin (PTFE)	V: Polyvinylidene-fluoride (PVDF)	D: Polyacetal (POM)
C: Chloroprene rubber (CR)	Glost Bilge wastewater	Argil agent Ferrite slurry Activated sludge Sewage water	Ammonia water Calcium hydroxide	Ferrous chloride Glost			Methanol Sodium sulfate Ammonium sulfate
N: Nitrile-butadiene rubber (NBR)	Lubricant Kerosene Wax Cutting oil		L.P.G. Ethyl chloride Sodium peroxide	Whisky Sodium silicate Methanol			Ethanol Methanol Ammonium nitrate
H: Thermoplastic elastomer polyester (TPEE)	Lubricant, heavy oil Break oil Naphtha , kerosene Mold lubricant						Ethanol Ammonium chloride Calcium chloride
E: Ethylene propylene (EPDM)	Acetone aqueous solution		Coal slurry CMP	Sulfuric acid (less than 20 %)			Acetaldehyde Butyl nitrile Chromium acid
S: Thermoplastic elastomer polyolefin (TPO)	Acetone bilge wastewater						Acetone Ammonia water Butyl acetate
V: Fluorine contained rubber (FKM)	Ethanol Xylene Jet fuel		Methylene chloride Lactic acid Trichloroethylene	Ethanol Tetrachlorethylene			Copper sulfate (II) Sodium sulfate Barium sulfate
T: Fluorocarbon resin (PTFE)	Latex Paint Ink		Sulfuric acid (98 %) Nitric acid (less than 25%) MEK Acetone	Plating solution Developer Benzene Hydrogen peroxide	Fluorine, nitric acid, hydrochloric acid, sulfuric acid, chromium acid, aqua regals, CMP	Sodium hypochrolite	Ammonium sulfate Barium sulfate Dimethyl ether

yamada Classification of the model names

- To allow you to select our pump easily, model names of our diaphragm pumps are classified as shown below according to the combination of its "diameter," "material of the main body" and "material of the diaphragm."
- When you are to use a pump at 70℃ or higher, the material of the switching mechanism and other parts has to be changed. Contact us for details.

NDP- □ **B** □ □

4 Valve type
- B: Ball valve
- F: Flat valve (NDP-5, NDP-15)

1 Pump size (Bore diameter)

1. Socket Wrenches

These strong socket wrench sets are forged from chrome-vanadium steel, a special alloy chrome plated steel. These sets are very useful for engineers, mechanics and electricians.

Socket Wrench Set Summary

CODE	Drive mm	No. of Socket	Size	No. of Tools	TONE

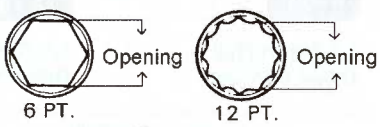
Socket Wrenches



These socket wrenches are made of a special chromed alloy steel. The socket walls are made thin to make it easier to fit to bolts or nuts that are set in narrow, difficult to reach spots. The nominal sizes of the sockets are determined by the socket opening, not the bolt size.

When ordering, please indicate the size of the square drive opening at the back of the socket: 6.35 mm (1/4"), 9.5 mm (3/8"), 12.7 mm (1/2"), 19.0 mm (3/4"), 25.4 mm (1"). Also specify the number of points in the socket and the size of the opening. The following illustrations show how to measure the opening of the socket sizes properly.

Careful When Ordering !

American and Metric wrench sizes are taken across the flats of the bolt head, British Standard size is taken from the outside diameter of threads.

Deep Socket Wrenches

Deep sockets made of a special alloy steel. The socket walls are made thin for easy access to nuts and bolts set in narrow spots. The nominal size of the socket is determined by measuring the opening of the socket, not the bolt size. Only supplied in a 12.7 mm sized square drive attachment. 12 point sockets and sockets in metric sizes are available. A hole is located at the top of the socket for use with a cross bar.

Ratchet Handles
for Socket Wrenches

6.35 mm (1/4")-25.4mm (1")

Drop forged from selected steel with 24 teeth in the ratcheting-gear instead of the usual 16 to 20. Turning shift lever reverses action instantly.

Stud Remover Wrenches
Roller Type

This roller type stud bolt remover can be used for bolts of 8 – 19 mm. If used in connection with a 12.7 mm (1/2") square drive ratchet wrench, the work can be carried out more quickly and easily.

61 04 86	Wrench stud remover 1/2 sq. drive for bolt size 8-19 mm	Pc.

Power Wrenches

Best for loosening tight bolts and nuts without effort. Even stubborn (frozen-jammed-corroded) bolts and nuts loosen in an easy and quick way. Tightens in the same easy way.

Features
- Power input is increased up to 4 times.
- Hand operated.
- Compact design for work in close quarters.

Advantages
- No air or electric power is required.
- Portable, can be used anyplace.
- Easy to operate.
- Can be used with 25.4 mm drive sockets from any manufacturer.

12 Point & Spud End Wrenches

60° Offset

Adapted for heavy industrial and automotive work where unusual leverage is necessary. The 12 point box head insures a firm hold on the nut and it is offset to give maximum clearance. The long sturdy tapered handle provides ample strength and leverage, and can be easily inserted into bolt holes to bring them into line. Drop forged from selected alloy steel, heat-treated.

Unit Per Pc.

Internal Pipe Wrenches
"Pipe Buster"

Reduces pipe assembly and disassembly time by 80%. A self-locking, reversible, internal pipe wrench can

be used with ratchets, extensions and impact/air wrenches. Suitable for installing or removing pipes located in tight spots, extremely hot and rusted tight. It won't create busted knuckles, broken pipes or ruined walls, and won't scar chromed pipe, can't damage threads and can remove the most stubborn nipples.

Unit Per Pc.

3. Torque Tools/Torque Wrenches

Torque Tools / Torque Wrenches

A device which shows the force of torque with which a screw or nut is being tightened. It allows one to set screws exactly at a predetermined torque without any effort.

A wide range of models from different manufacturers are available. The most common models are listed below.

Direct Reading Beam Type

For quality control inspection and production. Pivotted handle concentrates load position. For use with a socket wrench.

How to order : CODE

Torque wrench, direct reading beam type, CAPACITY (MINIMUM to MAXIMUM) N.m - cm

Unit Per Pc.

Preset Type

Suitable for high efficiency mass production. By presetting the wrench you can tighten bolts to a desired torque every time. To operate, you first pull the handle until it clicks to the set position. Then you tighten the bolt until the resistance of the wrench stops. When you release the wrench, it is automatically set for the next operation. No need to refer to a dial or meter during use allowing you to increase work speed substantially. For use with a socket wrench.

Length	175 mm	200 mm

Long Nose Straight Pliers

Designed with a thin and pointed nose for precision work in close quarters.

Unit Per Pr.

CODE	61 16 16	61 16 17
Length	160 mm	200 mm

Plier Wrenches
Plastic Coated Handle

Plier and wrench in a single tool. Excellent for gripping, holding, pressing and bending workpieces. Fast adjustment directly on the workpiece by pushing a button, and no unintentional shift of the gripping jaws and no slipping of the joint. The action of the jaws allows screwed connections to be tightened and released quickly using the ratchet principle.

Unit Per Pr.

Flat Nose Pliers
Insulated Plastic Body

Made of plastic material, fibreglass-reinforced, handles with soft plastic zone. Fully insulating to reduce risk of short circuit up to AC 1,000V and DC 1,500V. Insulation standard : IEC 60900 DIN EN 60900. Length : 180 mm.

61 16 61	Pliers, flat nose, insulated, plastic body, length 180 mm	Pr.

Ref. : Knipex Model #98 62 01

Side Cutting Pliers with Spring
Plastic Covered Handle

A side cutting plier with a built-in spring to open the jaws easily when pressure on the handle is relaxed.

Useful tool for electricians.

Unit Per Pr

CODE	61 16 66	61 16 67	61 16 68
Length	150 mm	175 mm	200 mm

Side Cutting & Reamer Pliers
Plastic Covered Handle

This tool combines the qualities of a side cutting plier with a reaming blade for lead, conduit or vinyl tubes.

Unit Per Pr

CODE	61 16 71	61 16 72	61 16 73
Length	150 mm	175 mm	200 mm

Mini Combination Pliers
Plastic Covered Handle

Jaw opening springs, full polished head. Induction hardened cutting edges, slip resistant PVC handle. Material: Hardened and tempered CrV steel.

61 16 75	Pliers, combination, mini, plastic covered handle, 115 mm	Pr.

Round Nose Pliers
Plastic Covered Handle

Designed for quick wiring jobs and detailed wiring where a small round tipped wire is essential. Made from a special alloy steel.

Unit Per Pr.

CODE	61 16 81	61 16 82
Length	125 mm	150 mm

Mini Long Round Nose Pliers
Plastic Covered Handle

Jaw opening springs, full polished head. Induction hardened cutting edges, slip resistant PVC handle, flat-square jaws for gripping and forming. Material: Hardened and tempered CrV steel.

61 16 84	Pliers, round nose, mini long, plastic covered handle, 115 mm	Pr.

Long Needle Nose Pliers

Plastic Covered Handle

With a long, half-round, tempered nose for very fine work in assembling electric apparatus, etc.

Unit Per Pr.

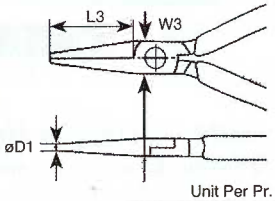
CODE	61 16 86	61 16 87
Length	125 mm	150 mm

Insulated Round Nose Pliers

Resistance up to 1,000 Volts

Conformed to IEC 60900 / DIN EN 60900

For forming wire loops by precision ground, short, round jaws. Made of special tool steel, oil-hardened and tempered.



Unit Per Pr.

61 17 09	Pliers, flat nose, mini long, plastic covered handle, 115 mm	Pr.

Diagonal Cutting Pliers

Plastic Covered Handle

Sharp, hardened edges with narrow jaws enable you to cut wires inside tight places.

Unit Per Pr.

CODE	Length	CODE	Length
61 17 10 11	100 mm 125 mm	61 17 12	150 mm

Heavy Duty Diagonal Cutting Pliers

Plastic Covered Handle

A tool to cut heavy wire with little effort. Made from high quality alloy steel.

Unit Per Pr.

CODE	61 17 16	61 17 17	61 17 18
Length	125 mm	150 mm	175 mm

Mini Diagonal Cutting Pliers

Plastic Covered Handle

Jaw opening springs, full polished head. Induction hardened cutting edges, slip resistant PVC handle. Designed to cut wire with ease. Material: Hardened and tempered CrV steel.

61 17 21	Pliers, diagonal cutting, mini, plastic covered handle, 115 mm	Pr

Insulated Diagonal Strippers

Resistance up to 1,000 Volts
Conformed to IEC 60900 / DIN EN 60900

The essential plier for electrical installation work, and furnished with precision stripping holes for single (solid) conductors of 1.5 and 2.5 mm². Induction hardened precision blades for soft wire up to 4.0 mm diam., cutting edge hardness approx. 60 HRC. Made of high grade special tool steel, oil-hardened and tempered.

Unit Per Pr.

Cable Shoe Pliers

A tool for pressing cable shoes on electric cables of sizes 1.25, 2.0, 5.5 and 8 mm sq. An essential tool for radio repairers and electricians. Length 250 mm.

61 17 30	Pliers, cable shoe 1.25 mm - 8 mm/sq.	Pr.

Cable Shoe Clamping Tool Kits

Specially designed for marine use. A steel kit with a clamping pliers and 1,000 cable shoes of 10 different sizes.

61 17 32	Cable shoe and its clamping tool kit	Set

Crimping Pliers

with Changer Magazine

Just one tool for the most common crimping applications. Made of chrome vanadium electric steel in special quality, oil-hardened. Crimping dies changed quickly and easily without any additional tool. Length : 250 mm.

Five interchangeable dies in round magazine :

- for non-insulated open plug type connectors (plug width 4.8 + 6.3 mm) from 0.5 - 6 mm².
- for insulated terminals, plug connectors and butt connectors from 0.5 - 6 mm².
- for insulated and non-insulated end sleeves (ferrules) from 0.25 - 6 mm².
- for insulated and non-insulated end sleeves (ferrules) with 10 / 16 / 25 mm².
- for non-insulated crimp terminals. Tube and compression cable lugs in accordance with DIN 46234 and DIN 46235 and non-insulated crimp, butt and press connectors in accordance with DIN 46341 and DIN 46267.

61 17 33	Pliers, crimping, with changer magazine, length 250 mm	Set

Ref. : Knipex Model No. 97 33 02

Hydraulic Cable Shoe Pliers

For non-insulated terminals. The following four sizes are available. Please specify the size required when ordering.

Wire Rope Cutters

Designed specially for cutting wire ropes. The cutting edges pass each other for complete shear action resulting in a clean, sharp cut. A notched jaw holds the wires in place while cutting and minimizes the crushing and deformation of the wires.

Cable Cutters

Same as the above cutters but the insulated handle type is tested to withstand 1,000 volts.

Insulated Handle

61 19 31	Cutter, cable 535 mm, cutting capacity 20 mm dia. handle insulated	Pr.
32	Spare jaw for insulated cable cutter, 535 mm	Pc.

Non-Insulated Handle

61 19 33	Cutter, cable 535 mm, cutting capacity 20 mm dua. handle non-insulated	Pr.
34	Spare jaw for non-insulated cable cutter, 535 mm	Pc.

Ratchet Type Cable Cutters

Insulated Handle

For cutting copper and aluminium single conductors as well as multiple stranded cables. Insulated with multi-component grips to withstand up to 1,000 Volts. Two-stage, three-stage ratchet-drive with high leverage enables easy cutting in one-hand and two-hand operation. *Not suitable for cutting steel and wire ropes.

Two-Stage Ratchet Drive

MCM : Thousands of circular mils, same as kcmil.
Ref. : Knipex Model No. 95 36 250 / 95 36 280 / 95 36 320

Portable Midget Cutters

A portable tool for cutting spring wire of a diameter of up to 4 mm. The jaws are riveted to the handle so they are not replaceable. The handles are knurled and covered in plastic. These cutters are easy to handle as they weigh only 300 grms and are of a length of only 200 mm.

61 19 36	Cutter, midget portable 200 mm	Pr.

Rod Cutters

A heavy duty, improved bench type rod and bolt cutter. The handle end is covered by rubber to avoid slipping during use. Capable of cutting rods and bolts of a diameter of up to 16 mm.

Spark Testing Screwdriver Sets

In Vinyl Sheath

For spark testing of low voltage:
100 - 220V - AC 100 - 350V - DC
6 various interchangeable bits

61 24 16	Screwdriver, spark testing, Low-voltage 6's	Set

For spark testing of high voltage:
2,500 - 15,000V - AC
6 various interchangeable bits

61 24 17	Screwdriver, spark testing, High-voltage 6's	Set

Automatic Screwdrivers with Ratchet

These screwdrivers work by pushing the handle downward and causing a crank drive inside the ratchet shaft to spin the blade. When the handle is released, the blade extends to its original position. By repeatedly pushing the handle you can set loose screws quickly with a very simple operation. When not in use the interchangeable bits can be stored inside of the handle. The gear blade can be set to rotate in either direction by changing the ratchet gear allowing you to remove screws as well as insert them.

Unit Per Set

Steel blade, hardened and tempered. Blade fastened securely to the handle.

61 34 16	Saw, compass, blade length 210 mm	Pc.

Saw Setters

For use on setting saw teeth.

61 34 22	Setter saw Japanese type	Pc.

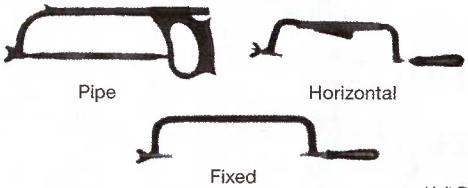
Tiny Hacksaw Frames

Designed for cutting sheet metal, thin tubing or heavy wires in close quarters. Frames are made of bright finished nickel spring wire. Handle depth is 50 mm and the blades are 150 mm x 6 mm.

CODE	Description	Unit
61 34 23	Tiny hack saw frame with 12 blades	Set
24	Tiny hack saw frame with one blade	"
25	Tiny hack saw blades	Doz

Hacksaw Frames

The frames are available in solid type or pipe type. Made of nickel plated steel and polished or buff finished.



Unit Per Pc.

CODE	Type	For Blade Length
61 34 26	Pipe	Adjustable to blades from 250 mm to 300 mm
27	Horizontal	
28	Fixed	Fixed only for 300 mm

Hacksaw Blades

Carbon Steel ..... Recommended for general use by engineers, mechanics, electricians, plumbers and maintenance men.

Tungsten Alloy Steel ..... Resist breakage, longer wearing and give satisfaction where fast, dependable results are essential.

High Speed Steel ..... Heat resistant and suitable for cutting tough alloy steel.

Choose the right blades for the right works.

14 Teeth Per 25.4 mm..... For cutting soft solid steel, iron, rails, brass, bronze, copper and aluminium.

18 Teeth Per 25.4 mm ..... For cutting tool steels, iron pipes and light angle iron.

24 Teeth Per 25.4 mm..... For cutting drill rods, medium sheet metal, tubing and solid brass.

32 Teeth Per 25.4 mm ..... For cutting thin sheet metal and thin wall tubing.

Tools & Parts Cabinets

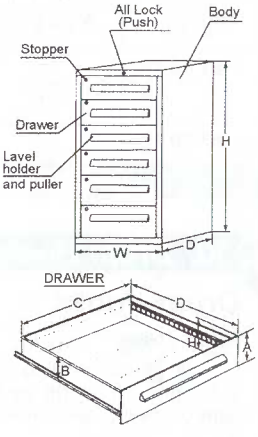
Designed, engineered and built to industrial standards to withstand continuous and rugged service. Suitable for use in marine storage systems. As a wide range of fabrications of models are possible, please ask or write for catalogues before ordering.

Master Tools & Parts Cabinets

The system cabinet consists of 4 standard body sizes and 5 standard drawer sizes, and by their combination, adjusting the drawer rail position, many types of cabinets can be fabricated.

Storing capacity is up to 1,000 kgs. Comes equipped with a device to prevent the cabinet from moving when the ship is pitching and rolling.

The standard sizes of the bodies and drawers are as follows.



Cabinet Body

28. Drum Opening Spanners / Drum Cocks

Drum Opening Spanners

Malleable Steel

A tool designed for opening drums, plugs and caps in an easier, quicker and safer way.

61 40 01	Spanner, drum opening	Pc.

Drum Cocks

for 1-1/2 & 2 inch

Drum cock has inversive fittings, one of a 1-1/2" thread size and the other of a 2" thread size. Will fit to all kinds of drums and can safely hold oil, gasoline, kerosene, alcohol, light varnishes, clear lacquers, and solvents of all kinds.

61 40 04	Cock, drum oil, adjustable 1-1/2 & 2 inch	Pc.

29. Drum Pumps

Rotary Hand Pumps

Economical and durable barrel and refueling pump unit complete with spout, suction pipe and bung attachment. Most often used for dispensing light to medium grade cutting and lubricating oils, solvents, and fuels.

61 40 06	Rotary hand pump 3/4 inch	Pc.
61 40 07	" 1 "	"

Plastic Hand Pumps

A plastic, manual, suction pump; used for all purpose light pumping or dispensing work. Overall length 540 mm.

61 40 10	Pump, hand, plastic	Pc.

Plastic Hand Pumps for Drum

Same as above but of a larger size. Overall length is 1,200 mm.

61 40 11	Pump, hand plastic for drum	Pc.

Wing Pumps, Hand Operated

This semi-rotary pump will produce a steady stream of liquid. A double blade impeller assures a high pumping rate with greater efficiency. To be installed between pipes.

Unit Per Pc.

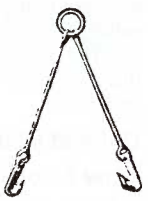
30. Drum Hooks / Lifting Clamps

Drum Hooks

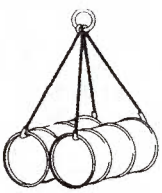
For 1 Drum



Designed for lifting drum barrels with a hanging drum rib by hooks. Hooks with wire or chain can be made to order if required.

61 40 25	Drum hook, chain, for one drum	Set

For 2 Drums



Quadruple chain sling with master link & drum hooks for lifting two drum barrels simultaneously.

61 40 26	Drum hook, chain, for 2 drums	Set

Clamps

Drum Clamp

Designed to accommodate a large variety of drums with or without the lids removed. Drums can be lifted from a horizontal or vertical position and can also be reversed.

Max. Jaw Opening mm	Capacity Tons	Weight Kgs
18	0.5	2

61 40 28	Clamp, drum, capacity 0.5 ton	Pc.

Steel Plate Clamp

Suitable for use in the vertical lifting of steel plates. Please specify the model type required based upon the size of the jaw opening and the lifting capacity of the clamp.

Unit Per Pc.

31. Hose Bands / Pipe Clamps

Hose Bands

An extremely flexible one piece hose band that gives perfect circumference contact even on irregular surfaces. Made from galvanized steel and stainless steel sealed by gear drive principle, this heavy duty clamp will assure a leak proof seal. When ordering, please indicate the outside diameter of the corresponding hose.

Banding Clamps & Tools

These products have a wide range of applications for hose and pipe fastening and are used in almost all industries. Tensioning tools, band, buckles, performed clamps, hose couplings, mounting brackets, accessories and spare parts offer a universal and economical fastening system. The products will connect, clamp, fasten, secure and fix hose, pipe, cables, signs, boards, etc.

Straub Couplings

A very useful clamp for connecting pipes easily and quickly without using pipe fittings or doing welding work. Designed for use with casing, rubber sleeve, bolt nut and washers. A grip type and flexible type are available.

Grip Type

Flex Type

Main Material	Stainless Steel SUS 316, 304 & Galvanized	
Rubber Sleevs	EPDM	For Seawater, Air, Inert Gas, etc.
	NBR	For Oil, Organic Gas
Working Pressure	Up to 16 kgs/cm²	

EPDM denotes Ethylene Propylene Diene Rubber

NBR denotes Acrylonitrile-butadiene Rubber

Rapid Response Clamps

The fastest and easiest way to temporarily repair pipe leaks and bursts. Taking less than 60 seconds to install by one operator and featuring a fully self contained design, which does not require the use of tools. Made from marine-grade stainless steel and featuring an innovative patented design, the system features a choice of three grades of material in the lip-seal, making it suitable for water, potable water, steam, gas and most chemicals/petroleum liquids.

It fits pipe sizes ranging from 1.5" - 36" (DN38 mm - DN930 mm) and is available in four clamp widths, with each covering a wide range of diameters. It is a reusable repair clamp and can be applied to pressurized pipes up to 20 bar. Clamps are all ABS approved.

Fire Resistant Couplings Teekay Axilock-FP

The Teekay Axilock-FP represents the ultimate in high security fire protected mechanical pipe couplings. With its unique internal fire sleeve and double casing design, it is plain to see why this coupling is the primary pipe connection of choice in the marine and naval market sectors. The Axilock-FP has been tested to military standards for shock and fire resistance and is fully compliant with current IACS regulations, including ISO19921/19922 fire testing and ISO1182 non-combustibility testing.

- Available in two types for material selection, Type I(AISI 304) and Type IV(AISI 316L). Type approved by all the major marine classification bodies so please specify the ship classification when ordering.

Material Specification

	Type I	Type IV
Casing	AISI 304/DIN 1.4301	AISI 316L/DIN 1.4301
Fasteners	Alloy Steel, PTFE Coated	AISI 316 / 316L
Gasket	EPDM (NBR is available on request)	
Working Pressure	16 Bar	

How to order : CODE

Pipe coupling, TEEKAY Axilock-FP, Fire Resistant, NOMINAL SIZE, MATERIAL (Type I or Type IV), GASKET (EPDM or NBR), and SPECIFY THE SHIP'S CLASSIFICATION

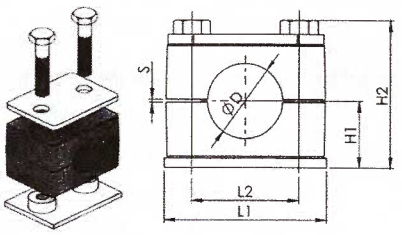
Tube Clamps

Tube clamps help prevent the loosening of joints and welds by reducing noise, absorbing shock and dampening vibration. In addition to preventing vibration transmission, they provide solid support that eases the stress caused by unequal movements in tubing installations. Clamp kits for each series include: clamp body, weld plate, cover plate and bolts.

Clamps are available in metric and imperial sizes. Hardware available in Metric or UNC Thread, as well as steel or stainless steel.

Standard Series (According to DIN 3015/1)

For average load and moderate vibration installations. Ideal for mobile equipment, machine tools and instrumentation plumbing applications.



Materials

Clamp body : Polypropylene
Cover plates : Galvanized steel (ST-37)
Screws/Bolts : Galvanized steel (ST-37)
Weld plates : Phosphated steel (ST-37)
"Kits are also available with Stainless steel hardware."

Unit Per Pc.

32. Carborundom Paste

Grinding & Lapping Compound
(Valve Compounds)

For precision lapping, fitting, surfacing, polishing and other general use in machine shops. Universally used for grinding valves. Supplied in 450 grm tin. Please specify grit number when ordering.

Unit Per Tin

CODE	Grade	Grit #	Applications
61 42 01	Micro Fine	3000	Precision lapping and high profile polishing to mirror finishing of metal parts.

61 42 17		36	

Nozzle Lapping Paste

High grade Silicon Carbide abrasive paste for nozzle lapping. Supplied in 60 grm/tin. Please specify grit number when ordering.

Unit Per Tin

CODE	Grade	Grit
61 42 21	Fine	1200
61 42 22	Medium	1000
61 42 23	Coarse	800

Name of Mfr.: Skatool Marine

Blue Paste - Prussian Blue

For lapping of bearings, high pressure valves, etc. Improved type on red lead for prevision lapping work. A jelly-like paste made of super corpuscular dyes furnished in tubes.

61 41 96	Blue paste, 120 grm/tube	Tub

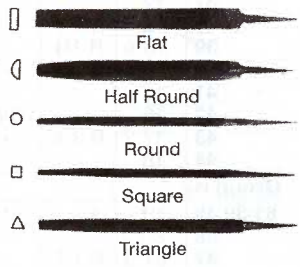
Tapping Paste

Used for precision tapping and fitting. It is also a very useful paste for cutting marks, using tapes, drills, reamers, etc.

61 41 98	Tapping paste 1 kg	Tin

33. Files

Machinist Files



The illustration right shows the types of files commonly available. These files have double cut teeth as is most common for use under heavier pressure where a fine finish is not required. Single cut files for smoother finishes are also available upon request. Specify from the following tables the type of file required based upon the type of work to be done and the material being used.

How to order : CODE

File, SHAPE, TYPE of CUT, LENGTH

Flat Files - Double Cut

Used by engineers for all kinds of works.

Unit Per Pc.

CODE	Cut	Length mm	CODE	Cut	Length mm

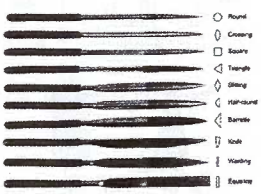
Electroplated Diamond Needle File Set



The electroplated diamond needle file set is used by metal workers for precise filing on stone, metal, glass and sculptures. They are also ideal for delicate filing, shaping and creating inside cuts. Files are electroplated uniformly using 150# ~ 240# diamond grit onto high grade steel. Different 10 file shapes included in these sets offer a variety of use for different applications : Equaling, Half-round, Triangle, Square, Round, Warding, Crossing, Knife, Barrette and Slitting. Size : 4 x 160 mm.

*Grit No. 120 is recommended for general sanding.

Carborundum Oil Stones

Carborundum oil stone :

For carpenters and engineers. May be used dry or with oil or water. Sufficiently porous to assure a good grinding or cutting action in combination with wax or oil.

Combination stone :

A combination of two grit sizes. One side coarse for very dull tools, the other one with a fine grit for clean edging work. May be used wet or dry.

Unit Per Pc.

CODE	No.	Dimensions mm
61 47 85	3	100 x 25 x 13

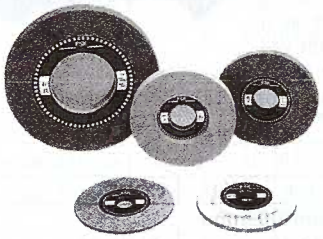
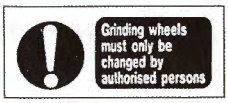
94	15	115 x 45 x 6.4 x 1.6

Abrasive Wheels

Abrasive wheels of various constructions for marine use in machine working and reconditioning parts. These wheels are generally used for cutting, deburring, blending and cleaning operations, and for surfacing finished hard steel, stainless steel, aluminium, carbon and brass. Abrasive wheels, regardless of the type, are constructed by organic or inorganic bonding methods.

1. Organic Bonded Wheels (Resinoid Bonded Wheel) Organic wheels are wheels which are bonded by means of an organic material such as resin, rubber, shellac or other similar bonding agents.
2. Inorganic Bonded Wheels (Vitrified Bonded Wheels) Inorganic wheels are wheels which are bonded by means of an inorganic material such as clay, glass, porcelain, sodium silicate, magnesium oxychloride, or metal. Wheels bonded with clay, glass, porcelain, or related ceramic materials are characterized as "vitrified bonded wheels."





Grinding Wheel Speed

Note of Caution when ordering grinding wheels :

Surface meter per minutes (SMPM) is the distance in meters that any one abrasive grain on the peripheral surface of a grinding wheel travels in 1 minute.

Smpm = 3.1416 x Diameter in Meter x rpm

The speed at which a grinding wheel works is important because use at too slow a speed wastes abrasive without getting much useful work in return, where as an excessive speed may result in hard grinding action and may introduce the danger of breakage. The grits, grade and structures recommended for specific grinding operations are usually based on the assumption that approximately the recommended speeds will be employed. If for some reason they can not be, then the grade at least must usually be changed to suit the particular condition.

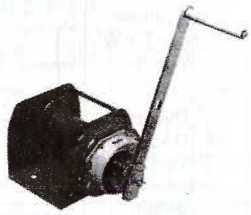
35. Winches/Chain Hoists

Portable Hand Winches

Portable hand winches for light lifting, lowering, or hoisting. Complete with an automatic safety brake. Made of a strong steel frame with a solid center drum. Can be used in any position. Available in a non-geared type or with ratchet gears.



Unit Per Set

CODE	Lifting Capacity kgs	Reeling Up Length mtr	Applicable Rope Diam mm	Weight kgs
	Non-geared Type

Link Chain Hand-Lever Hoists

This lightweight, extremely durable portable chain hoist is easy to operate in pulling, hoisting, and hauling jobs on deck or when moving machinery parts in the engine room. The ratchet action enables you to hoist easily with short handle strokes and the load is constantly supported while lifting by a braking mechanism. The handle is operated in the same way when lowering the load. The hoist is steadily lowered and the ratchet system again assures that the handle will not spring loose and injure the operator. All hoists are tested at weights 50 % over the mentioned capacity for safety reasons.

Unit Per Set

CODE	Capacity Tons	Standard Chain Mtr	Min. Distance Between Hooks	Weight kgs
61 50 01	3/4	1.5	295 mm	6.9
02	1-1/2	1.5	325	9.7
03	3	1.5	395	16.3
04	6	1.5	590	26.7

Spur-Gear Chain Hoists

Specially heat-treated and proof tested steel chain hoists equipped with a safety guard. These hoists can be operated at any angle and are equipped with a slip steel bolt which allows easy replacement of the load chains. The load wheel operates on precision ball bearings which are sealed with lubrication inside to eliminate the adverse effect of particles and dust on the moving parts. The top, bottom hooks and the crosshead are drop forged and the bottom hook is swivel type to allow easy turning of the load. These hoists have superior working capacities.

Unit Per Set

CODE	Capacity In Tons	Standard Lift mtr	Minimum Distance Between Hooks	Required Hand Power kgs	Weight kgs

Trolleys

Plain Trolley

Geard Trolley

Plain and geared type trolleys are available. They are adaptable running rails of 9 varieties in width and are easy to set up even on running rails with a rugged surface. Equipped with closed type high grade bearings. Running wheels are suitable for both I-Beam and H-Beam running rails.

36. Gear Pullers / Bearing Pullers

Gear & Wheel Pullers

2-Arm

Designed for moving hard to pull gears, bearings or pulleys which are stuck from rust or over friction. Easy to set up and operate, just hook over the gears or wheel and tighten the screw. Will pull anything that is within arms reach and the maximum weight capacity. The arms and yokes are made of forged steel and the steel forcing screw is hardened to avoid flaring or thread damage.

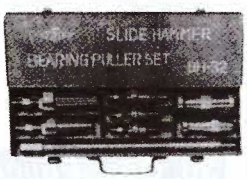
Bearing Puller Sets

for Inner Ring



The slide hammer bearing puller set has been designed for removing "hard-to-pull" bearings without damaging the bearing housing. Expansion grippers are available from No. 00 to 06. These numbers 00 to 06 are indicating the last two numbers of the bearing number. When ordering, please make sure to indicate the last two bearing figures to get the right tools for your work. The expansion grippers are drop forged from vanadium alloy steel, heat-treated and chrome plated.
Remarks : Sold by set only.

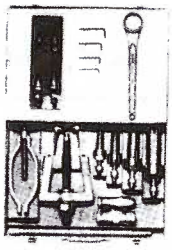
Components

1 Sliding hammer	5 Grippers, no. 00-06
1 Steel case	

61 50 81	Bearing puller set for inner ring 5 grippers no. 00-06 in steel case	Set

Bearing Puller Kits

for Inner & Outer Ring



This bearing puller kit has been designed to remove the inner and outer bearing rings from bearings mounted to various fittings, shafts, etc. Made of drop forged, heat-treated vanadium alloy steel. This bearing kit is available from No. 00 to 12. These 2 figures indicate the last two numbers of the bearing. For example : Bearing series No. 6004 to be ordered : No. 04.

Components

1 Sliding hammer	8 Grippers, no. 00-12
1 Standard puller	1 Opening stopper
1 One end ring spanner	1 Hexagon wrench
1 Steel case	

61 50 82	Bearing puller kit for inner & outer ring, 8 grippers no. 00-12 in steel case	Set

Hydraulic Bearing Pullers

Designed for the removal of frozen bearings, wheels and other gears of various sizes without hammering or heating. 2 and 3 arm coupling pullers are available in a capacity from 10 to 20 and 50 tons. They are light in weight and of a compact design. Any hand or motor pump with a sufficient oil capacity may be connected to the puller.

Puller, bearing, hydraulic 2 arm.

Hydraulic Pumps for Bearing Puller

The hydraulic pumps listed below are the most suitable types for use with the above mentioned hydraulic bearing pullers.

Unit Per Pc.

CODE	Capacity up to	Max. Required Pressure	Tank Oil Capacity
61 50 95	20 ton	700 kgf/cm²	700 cc
97	50 ton		1,500 cc

High Pressure Rubber Hose for Hydraulic Bearing Puller

High pressure hydraulic hose for use with the above mentioned hydraulic bearing pullers. Their specifications are as follows.

Unit Per Pc.

CODE	Hose Size x Length	Coupling	Max. Working Pressure
61 51 01	6 mm x 2 mtr	PT 3/8	700 kgf/cm²
02	6 mm x 4 mtr	PT 3/8	
03	6 mm x 6 mtr	PT 3/8	

37. Hydraulic Jacks

Portable Hydraulic Jacks

Made with a forged steel base, tool steel pump piston, and a high quality pump cup packing. A bronze guide bearing is used at the bottom of the precision ground ram. The ram cap is steel forged. Fixed with a hardened release, lowering valve. The handle is a knurled, interlocking type.

Unit Per Set

CODE	Capacity Tons	Height		Weight kgs
		Closed	Extended

Unit Per Set

Hydraulic Jacks

Useful for operating a variety of hydraulic tools. It is most suitable as a hydraulic opener for ships hatch covers but is also used for a variety of purposes at shipyard construction and factory job sites.

Lifting and lowering tests are executed at 100 % rated capacity. Horizontal capacity is guaranteed at up to 1/20 of the total rated capacity. The cylinder and piston are made of heat-treated, reinforced chromemolybdenum steel and the inner linings of the cylinder piston and the rod are plated with hard chrome. The couplings and screws for attachments are interchangeable. A wide variety of series and models are available. Please specify lifting capacity tons and stroke mm when ordering.

Returning System by Spring Force

1. Available for horizontal extending or inverse operation (like press).
2. Requires only one piece of connecting rubber hose.

How to order : CODE

Hydraulic Pumps for Hydraulic Jack

A wide range of hydraulic pumps are available, the two most common types which are applicable to the Jacks described in the former chapter are as follows:

Hand-Operated Pumps for Spring Return Jack

Widely used as the hydraulic source for the 720 kgf/cm² hydraulic jack group. The main body is of forged special steel, has long durability, with safety valve recessed. Pumps are classified according to effective oil volumes into 5 categories (0.3, 0.7, 0.9, 1.3, 2.3 litres respectively). Oil volumes are the base for pump selection. Applicable to spring return system jacks.

How to order : CODE

Hydraulic pump for spring return jack, OIL VOLUME ltr

Unit Per Set

CODE	Usable Oil Volume ltr	Max. Working Pressure kgf/cm²		Output Volume per Stroke cc		Connection Thread PT	Weight kgs
		Low	High	Low	High		
61 51 56	0.3	30	720	5	1.0		3.5
57	0.7	30	720	11	2.0		7.2
58	0.9	30	720	11	2.0	3/8	7.9
59	1.3	30	720	11	2.0		9.1
60	2.3	30	720	24	2.0		13.8

Hand-Operated Pumps for Hydraulic Return Jack

To be used as the hydraulic source for the hydraulic return jack of 720 kgf/cm² series. Has a high and low automatic control-valve, the low pressure pump operates up to the loading of 30 kgf/cm². This means larger output volume and higher speed without loss of capacity. As the safety-valve is recessed inside, operation is assured. Applicable to hydraulic spring return jacks.

How to order : CODE

Hydraulic pump for hydraulic return jack, OIL VOLUME ltr

Unit Per Set

CODE	Usable Oil Volume ltr	Max. Working Pressure kgf/cm²		Output Volume per Stroke cc		Connection Thread PT	Weight kgs
		Low	High	Low	High

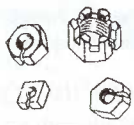
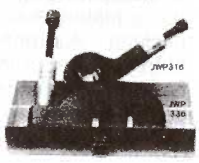
71	11 "	720	40	PT 1/2 x PT 1/2

38. Nut Splitters / Flange Jacks

Hydraulic Nut Splitters



Splits frozen or rusted nuts without damage to the bolt. It is conveniently sized to work in hard to reach places. Made of the finest steel, heat-treated and forged for long service. To operate, just use a regular hand wrench and turn the power screw which has a hydraulic pump built inside multiplying the power exerted upon it.



A set is composed of two models :
No. 316 size up to 1/2" BSW (Across Flat 20 mm)
No. 336 size up to 7/8" BSW (Across Flat 33 mm)
Sold in sets only.

61 51 80	Nut splitter, hydraulic size up to 1/2" and 7/8" BSW, 2 pcs/set	Set

Heating Loosener
for Stuck Bolt & Nut

This extremely handy tool uses induction to precisely heat a nut, steering knuckle, bearing or any other object made of magnetizable metal. In less than a minute this can heat steel to 300 till 600 degrees Celsius, and since heat causes it to expand you can remove it in a snap.

The heat generated through induction technology can be applied to parts of all different sizes: stuck nuts, bolts, steering knuckles, nipples, bearings and so forth. It generates no open fire, so it's safe to use.

To establish the right interaction between the "iDuctor" and the object to be heated, the tool is accompanied by a set of nine coils in metric sizes M8, M10, M12, M16, M20, M24, and M30. It also comes with a flexible 'wrappable'

coil measuring 110 cm long. The coils are easily changed by hand.

The "iDuctor" is also usable for other specific purposes in addition to heating stuck parts, such as heating and removing coating layers from steel. Special tools are available for this specific application.

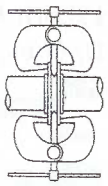
Time and power are easily adjustable. Power source : AC 220 V. The "iDuctor" is CE certified.

61 51 81	Heating Loosener for stuck bolt & nut "iDuctor" AC 220V	Set

Name of Mfr. : TK Tools Industrial Equipment

Flange Jacks

The jacks exert tremendous pressure smoothly and evenly. The flanges are parted quickly and held in perfect alignment without damage to flange faces. Sold in 2 pcs/set only.



Unit Per Set

CODE	No.	For Pipe Size mm				Weight Per Pair kgs
		5 kgf/cm² Cast Iron	10 kgf/cm² Cast Iron	16 kgf/cm² Cast Iron	20 kgf/cm² Cast Iron	
61 51 84	20	50 - 500	50 - 500	25 - 300	20 - 300	6
85	30	400 - 1,200	450 - 600	300 - 600	300 - 600	12

39. Pipe Cleaners

Plumber's Snake Wire Pipe Cleaners

(Sani Snakes)

Used for unclogging pipes and drains. The flexible coil of non-corrosive spring steel will remove most obstructions. The wire spring is available in diameters from 6 mm to 13 mm.

Unit Per Pc.

CODE	Dimensions Diam. x Length	For Pipe Inner Diam.
61 52 01	6 mm x 5 mtr	20 - 32 mm
02	6 mm x 7.5 mtr	20 - 32 mm
03	6 mm x 10 mtr	20 - 32 mm
61 52 04	10 mm x 10 mtr	38 - 75 mm
05	10 mm x 15 mtr	38 - 75 mm
61 52 06	13 mm x 10 mtr	75 - 100 mm
07	13 mm x 15 mtr	75 - 100 mm

Kinetic Rim Guns

for Cleaning Clogged Pipes and Tubes

These "rim guns" are specially designed for clearing clogged drains by means of a compressed air "shot" which suddenly strikes the water on top of the clogged part inside the pipe or drain. The result of this "air shot" is a wave of kinetic energy striking the resistance point vertically with high pressure and clearing the waste and clogged parts away. (Remarks : The pressure against the side walls of the pipe is only a small percentage, avoiding any damage.)

Effective Range

The clearing effect depends on the pipe diameter and the distance between the clogged part and the pipe entrance.

Pipe Diam mm	Effective Range MTR	Pipe Diam mm	Effective Range MTR
12.5	100	100	35
25	90	125	35
50	70	130	30
75	45		

How to use

Model H

Designed for multi-purpose use. (To be used for condenser tubes, pipes, toilets, etc.) By using the hand pump, an air pressure of 10 kgf/cm² can be built up. In addition to this, a valve has been fitted to a kinetic rim gun enabling the fitting of this model to an air compressor.
Note: Spare parts are available on request.

61 52 15	"Three bond" Kinetic rim gun, Model H	Set

40. Rivets / Riveters

Hand Rivets

These simple and easy-to-use rivets fasten products together easily and effectively...no complicated installations, expensive equipment or skilled operators are needed. Just drill a hole, insert and set a rivet from the same side....and high fastening connections are achieved quickly. High strength, precision-made hollow rivets are assembled on a solid mandrel. They are specially useful for blind fastening....where no access to the reverse side is available.

Hand Riveter Tools

Designed to set all standard size of blind rivets.

Plier Type

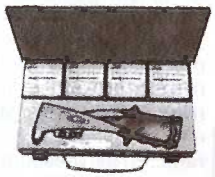
Bellow Type

Unit Per Pr.

CODE	Type	Overall Length mm	Capacity Rivet Diam. mm
61 52 30	Plier	260	2.4, 3.2, 4.0, 4.8
31	Bellow	325 - 900	2.4, 3.2, 4.0, 4.8

Hand Riveter Kits

Contains a plier type hand riveter tool and two different diameter rivets, sized 3.2 mm and 4.0 mm each in two different lengths. Furnished in a steel carrying case.



61 52 33	Hand riveter kit in steel case	Set

Blind Rivets for Riveter

High strength, precision-made hollow rivets assembled on a solid mandrel. They are specially useful for "blind" fastening where no access to the reverse side is available. Rivets are made in various sizes with head styles in aluminium, steel, monel, copper and stainless steel. Two types of standard rivets, open and closed, are available but the most common open type is described below.

Standard Open Type

Standard open type rivet is a hollow rivet, pre-assembled on to a headed pin or mandrel. The mandrel is designed to fracture at a pre-determined point during the setting operation, when the lamination forming the structure being fastened, have been drawn closely together and the whole join is tight. Normally on the vessel the rivet of aluminium alloy body and steel mandrel are used. Unless otherwise specified the aluminium alloy body and steel mandrel type will be supplied. Please specify diameter and length in mm when ordering.

Pneumatic Riveters

Designed to set all standard sizes of blind rivets and works by compressed air to set rivets securely and quietly for large jobs. The pneumatic type works smoothly with little impact, creates no noise and assures that the rivets stay loaded in the nozzle. Can rivet aluminium, stainless steel or any material with light operation and required air pressure 6.0 kgf/cm².

61 52 51	Pneumatic riveter, rivet diam 2.4 - 4.8 mm	Set

41. Stainless Steel Tools

Stainless Steel Tools

Various stainless steel tools are available and they show the following characteristics.

1) Resistant to corrosion and avoid steel material from corrosion in use.
2) Retain heat, and heat is difficult to be transmitted.
3) Higher rigidity than steel material
4) Difficult to conduct electricity compared to copper.
5) Simple cleaning.

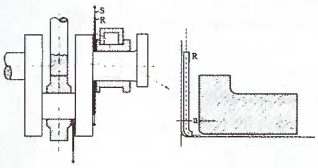
Bearing Feeler Gauge

Used for measuring main bearing clearance of marine engine.

When the rod "S" has been pressed through the pipe "R", the pipe "R" can be pushed away fro the brass by further pressing on the rod "S" and when a distance "a" is obtained it is easy to feel the fit of the feeler in the clearance.

Obs. Keep "R" against the journal as long as the feeler is in the bearing.



Unit Per Set.

Heavy Duty Wad Punch

Wad Punches are heavy-duty tools designed to cut discs of gasket materials.
They are most commonly used to create washers by first cutting a disc with a larger sized wad punch and the centre hole with a smaller sized punch.

Compact Gas Torches

Lightweight, compact torch for soldering or fusing wax, paint, etc. Be careful not to open the cartridge when there is still some propane remaining inside. Specify whether the full set or the spare cartridge only is required when ordering. Size : 90 mm outside diameter and 180 mm in height.

61 70 16	Complete Set with Burner	Set
17	Spare Gas Cartridge	Pc.

Refrigerant Gas Leak Detectors

Used to quickly and accurately isolate leaks in all commercial, industrial and automotive air conditioning and refrigeration systems. It detects all HFC, CFC and HCFC refrigerants including R134A, R12 as well as blends such as R404A, R408A, R409A, R410A, and others.

Fully automatic and requires very little power to operate by using state of the art microprocessor controlled technologies.

A spare sensor housed in the battery compartment, also insures no down time when sensors are damaged or need replacing.

Features:
- Simple, one button operation.
- Two sensitivity modes, enabling quick and easy location of large and small leaks.
- Both visual and audible leak detection signal.
- Low battery indicator.
- Automatic power-off to conserve battery life.

Unit Per Pc.

Weight grm	190

Name of Mfr.: Core Enterprises Inc.

Leak Detectors "Gupoflex"

"Gupoflex" is a CO_2 spray which will safely and effectively detect all kinds of gas or air leaks in seals, valves, cylinders, pipes, tanks, etc. The container is extremely compact and lightweight, can be carried easily and used anywhere. When sprayed on the surface where a leak exists the spray will foam. It is a very sensitive spray and will even detect low pressure leaks. The CO_2 is not harmful to one's health and it has no effect upon the surface which it is sprayed. Leak detective capacity up to 1 x 10^{-4}/sec, 345 grm/tin.

61 70 24	Leak detector "Gupoflex" spray 345 grm	Tin

Leak Detectors "Super Colour Check"

This set is for dye checking cracks for leaks. It consists of six different aerosol liquids to be used as penetrant, developer and remover. Each aerosol can contains 300 cc (10 oz).

61 70 26	Leak detector, Super colour check, 300 cc, 6' s/set	Set

46. Ladders

Aluminium Alloy Ladders

Straight Ladders

A common general purpose ladder made of aluminium alloy available up to 6.0 meters length. Non-slip round rungs and non-slip rubber guide shoes at the bottom. Has 35 cm (13-3/4") stepping space.

Unit Per Set

CODE	Length mtrs	Safety Load at 75° Lean kgs.	Weight kgs.

23	12.6	5.2	150	45.9
24	14.7	5.8	150	52.0

Aluminium Alloy Step Ladders

A strong framed step ladder for use indoors or outdoors when cleaning, painting, or doing repair work. Each step is flat with non-slip gridding and there are non-slip rubber guide shoes at the bottom of the support legs. This ladder will safely support up to 100 kgs of weight for up to 0.6 mtr height, and up to 160 kgs of weight for 0.9 mtr height and more.

Unit Per Set

CODE	Height mtrs	Nos. of Steps	Weight kgs
61 71 25	0.3	2	1.6
35	0.6	2	2.3

32	2.7	9	12.6
33	3.0	10	14
61 71 34	3.6	12	17

Aluminium Alloy Folding Ladders

Can be used as an extended-straight-folded-or step ladder. Non-slip round steps and non-slip rubber shoes at the bottom ends. Please specify the extended length when ordering.

Unit Per Set

CODE	Length		Weight kgs.
	Extended mtrs	Folded mtrs	
61 71 36	2.0	0.9	6.2
37	2.7	1.2	7.6
38	3.4	1.5	9.3
39	4.1	1.9	11.2
40	4.8	2.2	13.2

Aluminium Alloy Extension Ladders

A compact storage size W:480 x D:83 x H:860 mm, and suitable for working at high place by extending to max length 3,800 mm. Max. withstand load : 100 kgs. Weight: 10 kgs.

61 71 41	Ladder, extension, aluminium alloy Max length 3,800 mm	Pc.

Aluminium Alloy Foldable Working Benches

A foldable working bench made of aluminium alloy. Easy to carry and place it at your favorable working place. Please make sure to lock the foot holding stoppers before stepping on.

Outer size : W410 x D1,100 x H500 mm, Stage size : 300 x 680 mm. Max. withstand load : 100 kgs. Weight : 3.5 kgs.

61 71 42	Bench, working, foldable, Aluminium alloy, W410 x D1,100 x H500 mm	Pc.

47. Trucks / Carriers

Wheelbarrows

A small hand-propelled vehicle with one or two wheels.

Unit Per Pc.

CODE	**61 71 45**	**61 71 46**
Wheel	One	Two

Spare Wheels for Wheelbarrow

Unit Per Pc.

CODE	For	Type	Size
61 71 47 48	One-wheel	Air inflated Puncture-less	13" x 3"
61 71 49	Two-wheels	Solid	26" x 2-1/2"

Platform Trucks

With One Handle

For moving and handling all sorts of goods easily from on deck to storage facilities or accommodations. The cart has a steel platform and handle with solid cushion wheels. There are two swivel wheels located at the front and two straight wheels at the rear.

Unit Per Pc.

CODE	Platform mm	Loading kgs.	CODE	Platform mm	Loading kgs.
61 71 51	500 x 750	200	**61 71 54**	750 x 1,200	500
52	600 x 900	300	**55**	900 x 1,500	750
53	710 x 1,000	320			

With Two Handles

Steel plate platform and handles. Has two swivel solid cushion wheels on one side and two rigid on the other. Platform sizes larger than those listed below can be supplied but require some delivery time.

Unit Per Pc.

CODE	Platform mm	Loading kgs.	CODE	Platform mm	Loading kgs.
61 71 58	500 x 750	200	**61 71 61**	750 x 1,200	500

Shovel Nose Hand Trucks

Wood

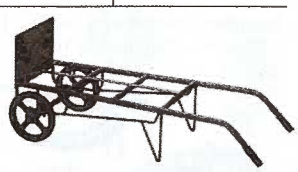
For use in handling cartons, boxes, bags or crates of stores. Made of wood and iron reinforced. Has two solid cushion tires. Platform size is 450 mm in width and 1,750 mm overall length.

Unit Per Pc.

CODE	Wheel	Load Capacity
61 71 84	Rubber cushion solid tires	500 kgs
85	Steel wheels	

Steel

For use in handling cartons, bags, etc. Has a steel frame and rubber solid cushion tires.



Unit Per Pc.

CODE	Size H x W x L mm	Load Capacity kgs
61 71 86	1,180 x 500 x 500	120
87	1,180 x 480 x 480	180
88	1,780 x 630 x 530	500

Carriers

Gas Cylinder Carriers

For carrying acetylene oxygen and other gas cylinders. Made from strong steel frames with rubber solid cushion tires. One or two cylinder carriers are available.

Unit Per Pc.

CODE	For Gas Cylinder	Size H x W x L mm
61 71 90	Oxygen x 1	1,300 x 460 x 670
91	Oxygen x 1 / Acetylene x 1	1,200 x 830 x 600
92	Propane x 1	1,600 x 400 x 400

Drum Carriers

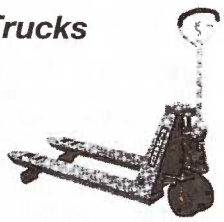
Made of sturdy steel frames and designed for the easy lifting and carrying of drums. Available with air cushioned tires or solid rubber tires. The width is 450 mm and the overall length including the handle is 1,550 mm.

Unit Per Pc.

CODE	Description
61 71 93	With two solid rubber tires
94	With two air cushion rubber tires

Hydraulic Hand Pallet Trucks

Hydraulic powered, hand fork-lift truck. Recommended for handling heavy materials and crates in warehouses and freight terminals. When ordering, please specify the capacity required.



Unit Per Set

CODE	Capacity	Fork Length	Weight
61 71 96	1.5 ton	1,070 mm	77 kgs
97	2.5 ton	1,070 "	99 "

48. Roller Conveyors / Mesh Box Pallets

Aluminium Roller Conveyor Units

Lightweight aluminium conveyor belts which are easy to maneuver and convenient for moving or loading large amounts of stores or moving frozen and fresh provisions to refrigerated storage lockers. Any package with a smooth surface will roll easily on this conveyor. Please specify the length of the conveyor required when ordering.

61 72 01 ~ 03 61 72 04

Unit Per Pc.

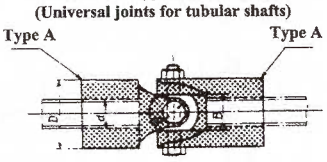
49. Universal Joints

Marine Universal Joints

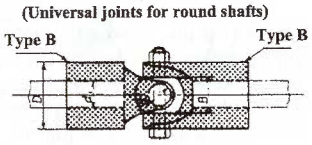
(Ref. JIS F-7452-1978)

These universal joints are used for such operating gears as water sliding doors, sky lights, valves for ventilation, valves for piping, main engine revolution indicators, or transmission gears in ships. They are classified into 4 main types according to the shape of the coupling applicable to the transmission shaft and fixing method of the shaft as shown below.

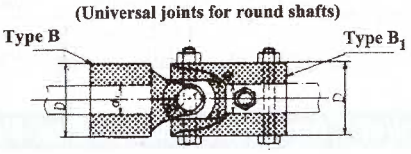
Type AA
(Universal joints for tubular shafts)



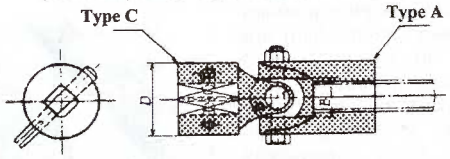
Type BB
(Universal joints for round shafts)



Type BB_1
(Universal joints for round shafts)



Type AC
(Universal joints for square and tubular shafts)



Type of Yoke	Shape of Coupling	Applicable Transmission Shaft	Fixing Method
A	Round Hole	Tubular Shaft	Welding
B	"	Round "	"
B_1	"	" "	Bolt
C	Square Hole	" "	Pin

And also classified into four types, AA, BB, BB_1 and AC by combining the above types. See illustrations above.

Shaft Size Table

Unit : mm

Nominal Size	Dia. of Applicable Trans. Shaft		Type A	Type B, B_1	Type C

50. Lubricators / Grease Pumps

A pump unit for all types of lubricants which is easy to handle and maneuver making it suitable for work on ships as well as industrial plants or repair shops. The lubricant container is easy to open and refill. When ordering, please specify whether the lubricator you require is for oil or grease use.

Grease Pumps

Air Operated

Air operated grease pump for use with 16 kgs to 220 kgs pail can. A set consists of a pump, drum cover, follow plate, and grease hose. Air inlet size is 1/4" G (PF).

Drum Cover

Follow Plate

Dispense Meters and Control Valves

Complete meter and valve product line for dispensing oil, grease, coolant and anti-freeze fluids. Higher pressure options for longer plumbing runs. New features to improve your productivity. Unmatched reliability and durability.

SD Series Electronic Meters

Fluid inlet options (1/2" and 3/4" npt) meets standard and high-low flow requirements. Large LCD display and simple operator controls – Adjusts for easy reading in all lighting conditions, - Calibration easily adjusts from keypad. Solid construction to stand up to harsh environments and provide years of trouble-free performance – Durable cast trigger guard prevents accidental triggering. Flush-mount nozzle valve design prevents leaks and contamination. Designed for no leak performance.

Technical Specification

Flow Range	0.1 to 14 gpm (0.4 to 53 lpm)
Max. Working Pressure	1,500 psi (103.4 bar)
Units of Measure	Quarts, pints, gallons, liters
Inlet	3/4" – 14 npt or 1/2" – 14 npt
Outlet	3/4" – 16 straight thread O-ring boss
Maximum Totalizer	999,999 gallons or liters
Max. Recorded Dispense	999.9 units
Accuracy	±0.5%
Battery	4 AA alkaline or 4 AA lithium
Dimensions (w/o extension)	13" L x 3.75" W x 5.75" H (33 cm x 9.5 cm x 14.6 cm)
Weight	5 lbs (2.3 kgs)

Displacement In^3 per cycle	0.300	
Pump Construction	Carbon Steel	

Name of Mfr.: Ingersoll-Rand

Foot Operated Grease Pumps FB-8

Hands-free, waste free and mess free greasing. Greatly reduces effort & allows high pressure greasing with highest comfort. All the pressure in the hose is released into the bucket by hooking up the foot pedal. Pump delivers app. 2.7 ml of grease per stroke and develops 69 MPa (703 kgf/cm^2).

Unit Per Pc.

CODE	**61 75 86**

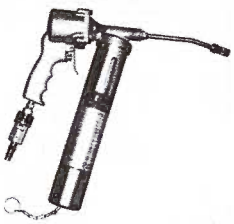
Air Powered Grease Lubricators



Works with compressed air for easy speed greasing by just pulling the trigger. Pressure is maintained constantly and the lubrication level is consistent. Works with a replaceable grease cartridge which is easy to attach and keeps dust and dirt out of the grease.

Grease level inside the cartridge can be checked at a glance so the grease will not run out unexpectedly.

Unit Per Set

CODE	61 76 91
Model	AMG-400N
Max Discharge Pressure	32 MPa
Output	310 ml/min.
Capacity	420 ml with use of the cartridge
Standard Accessory	Hydraulic Adaptor CNP-2 Quick Coupler PS-20PM Air Regulator
Size	387 x 438 x 66 mm
Weight	1.8 kgs

Lever Type Hand Grease Guns

These spring primed grease guns are designed for maximum efficiency and easy operation. These rugged lubricators are available in high pressure, medium pressure and volume delivery models to cover the complete range of pressure gun applications.

Standard Type

Suction Filling Type

Unit Per Pc.

Heavy Duty Pump Oilers

Heavy duty industrial type angled pump oiler. Two types of spout, flexible and solid are available.

Flexible Spout Type | Solid Spout Type

Unit Per Pc.

CODE	Spout Type	Capacity cc	Wt. gms.
61 77 36	Flexible	175	145
37	"	350	290
38	Solid	125	135
39	"	250	250

Oil Jugs

Made of plastic or copperrite (tin copper plated). So called Engineer's filler.

Unit Per Pc.

Copperrite		Plastic	
CODE	Capacity	CODE	Capacity
61 77 41	1 ltr	**61 77 45**	1 ltr
42	2 "	**46**	2 "
		47	3 "

Straight Shank Twist Drills

High Speed Steel

(Ref. JIS B 4301 – 88)

The drills are of the correctional two-flute design with helix angles, flute and point shapes selected for general purpose applications. They may be used very successfully in cast iron, steel forging and other materials.

Hand Reamers

High Speed Steel

(Ref. JIS B 4405 – 90)

These reamers are driven by hand to finish the inside walls of drilled holes. To achieve an improved starting performance, the cutting edge is slightly chamfered. The flutes are normally straight and helical. Spiral flutes are recommended for operations involving an interruption to the cut, such as a keyway.

Hand Taper Pin Reamers 1/48

Straight Flute, American Standard

High Speed Steel

1/48 Taper pins according to U.S. Standard have a taper of 6.35 mm per 25.4 mm. These reamers are designed in nominal numbers but since the standards are not unified, there are minor differences in tip diameter and small end diameter.

Unit Per Pc.

Morse Taper Reamers

High Speed Steel

(Ref. JIS B 4401 – 87)

Used for finishing Morse taper holes, these reamers come in finishing and rough-cutting grades. The rough cutting reamer has a helical arrangement of chip breakers at the cutting edges which fragment the chips for easy removal.

Metric Coarse Thread Hand Taps 3's/Set

Carbon Steel or High Speed Steel

(Ref. JIS B 4430 – 87)

The hand taps most commonly employed today are used in conjunction with a machine, e.g. a tapping machine, rather than by hand. Thus, it is more common to employ a tap with a cutter shape most suitable for the conditions of use than using in sequence, three taps, i.e. the taper tap, plug tap and bottoming tap. Two kinds of materials of Carbon Steel and High Speed Steel are available. When ordering, please specify which one.

Round Dies, Adjustable

These round adjustable dies are used in either hand stock holders or machine holders. These dies can be adjusted by turning a small set screw which will change the nominal size of the dies giving them a tight or loose fit to the threads. Most commonly made of carbon steel, but high speed steel threads are also available.

Screw Plate Sets
(Stocks & Dies)

These sets are designed for cutting threads of a variety of sizes, easily, and all with one set. Suitable for jobs involving a wide range of on site threading work. There are single tap or three tap sets available in the same thread cutting range. When ordering, please specify the set number, thread cutting range, and thread type, (whitworth, metric, etc.), by indicating the exact code number.

For Metric Coarse Threading
with One Tap & One Round Split Die for each size

Drill Chucks with Key

These drill chucks are offered for light-duty and heavy-duty portable, bench, or floor type power tools in a wide range of capacities for either threaded or tapered mounting spindles.

Unit Per Pc.

Keyless Drill Chucks

The keyless drill chuck is usually used on precision drilling machinery where close tolerance drilling is essential. Designed for both toolroom and production machinery where accuracy, gripping power and keyless features are desired.

Size mm Capacity	Dimensions mm		Taper No.
	Diam.	Length	
13	50	103	JT No.6 or (JT No.25)

63 23 46	Keyless drill chuck 13 mm	Pc.

Drill Sleeves

Designed for drilling with Morse taper shanks. The smaller Morse taper number is for the hole size of the drill insertion and the larger Morse taper number for the outside socket fitting.

Unit Per Pc.

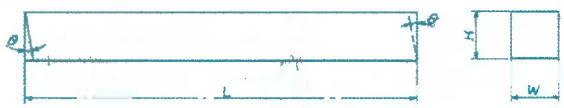
High Speed Steel Tool Bits

(Ref. JIS B 4151 – 87)

For use in cutting hard materials like heat-treated alloy steels, die steels, bronze, stainless steels, etc. Ground on all 4 sides. Cut to standard tool holder lengths with a standard bevel on each end. Bits require grinding only to make them ready for use in tool holders.

Square Tool Bits



For turning, boring, threading tool holders.

Unit Per Pc.

Single Point Tools

with Cemented Carbide Tip

(Ref. JIS B 4105 – 91)

For square shank holders. The carbide tips are finely ground to be ready for use and are covered with an easy to remove cellulose sheath. Choose the cutter most suitable for the work you are doing from the examples below. Please specify whether you require left or right hand tips.

Cemented Carbide Throw-away Inserts

(Ref. JIS B 4120 – B 4123-85)

When ordering, cemented carbide throw-away inserts, please specify the following points.

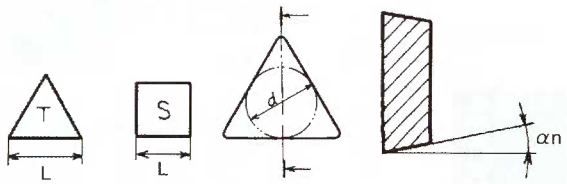
1. Shape

Shape	Included Angle	Figure
Regular Hexgon	120°	
Regular Octagon	135°	
Regular Pentagon	108°	
Square	90°	
Equilateral Triangle	60°	
Rhombus	80° 55° 75° 50° 86° 35°	
Rhombic Hexagon	80°	

(to be continued)

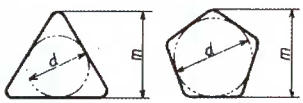
Shape	Included Angle	Figure
Rectangle	90°	
Parallerogram	85° 82° 55°	
Circle	-	

2. Basic size (L)
3. Basic inscribed circle (d)
4. Normal clearance angle (αn)

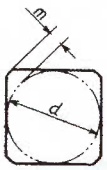


5. Height of corner (m)

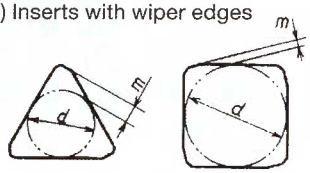
a) Inserts with odd number of sides and corners



b) Inserts with even number



c) Inserts with wiper edges



6. Thickness of the insert (s)

7. With or without hole
8. With or without chip breaker

Hole	Chip breaker	Shape
Without	Without	
	One side	
	Both side	
With	Without	
	One side	
	Both side	

How to order : 63 - 29 - 71

High Speed Steel Tip Welded Tool Bits

(Ref. JIS B 4152 – 88)

These tool bits are supplied in a variety of shapes and sizes depending upon the type of work they are used for. The tips are made of hardened high speed steel welded to the shanks and covered in cellulose for protection. Please specify the model number you require and whether the bits should be for left or right hand use from the information provided below.

Knurling Tool Holders

Self centering knuckle or joint has ample bearings to resist the severe strains of both end and side thrust. Two types, A & B are available. Please specify which type is required when ordering.

1. Type - A

Fitted with 1 pair of knurls for fine, medium, or coarse work.

Unit Per Pc.

CODE	No.	Holder Size mm	Knurl Size mm
63 32 41	A-1	9.5 x 22 x 140	16 diam.
42	A-2	13 x 29 x 165	19 "
43	A-3	16 x 35 x 191	19 "

2. Type - B

Carries three pairs of knurls for fine, medium and coarse work.

Unit Per Pc.

CODE	No.	Holder Size mm	Knurl Size mm
63 32 44	B-1	9.5 x 22 x 140	16 diam.
45	B-2	13 x 29 x 165	19 "
46	B-3	16 x 35 x 191	19 "

Knurls for Knurling Holders

Individually hob-cut from extra high carbon tool steel, heat treated, tempered and tested to obtain sharp, perfectly formed teeth in every knurl. Can be furnished in coarse, medium or fine grade and in either straight line or diamond pattern.

Thread Restorers

(File Type)

A square bar type restorer with 8 different lands. Where a die cannot be used, a few easy passes with the appropriate land of the restorer over the damaged face of a bolt or a pipe will restore the thread without reducing the diameter. As only the displaced metal is removed, the original fit is preserved.

Unit Per Pc.

CODE	Thread	Thread Size on Each Restorer
63 33 01	Metric	0.75, 1.00, 1.25, 1.50, 1.75, 2.00, 2.50, 3.00

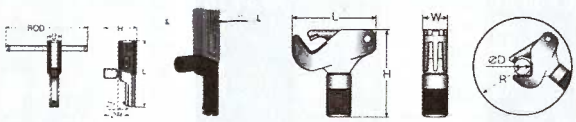
04	BSW, BSF	11, 12 14, 16, 18, 20 22, 26

Universal Thread Repair Tools

Thread repair tools automatically adjust to any thread diameter and pitch, can be used on left hand or right hand threads, both inch and metric and need no prior measurement of the thread. Often the thread of a component is damaged at the end of the thread eliminating the use of taps or dies for carrying out the repair. These thread restorers have the capability to enter below the damaged area and work outwards to complete the repair. The blades are made of high quality hardened tool steel. The blades are guided by the existing undamaged section of thread, in order to regroove the damaged section.



For Internal Thread — For External Thread

Internal Thread Repair

1	2	3
Turn knurled knob K to fully retract the blade B into the housing H. Insert Internal tool into the threaded hole or bore to be repaired.	Turn knurled knob K to extend blade B into a thread groove on an undamaged section and tighten by hand only.	Rotate the Internal tool by the cross-rod, as shown, in the desired direction.

External Thread Repair

1 Open	2 Close	3 Turn
Turn handle (A) to raise floating blades (B). Place the External tool over thread to be repaired.	Turn handle (A) to lower floating blades into grooves of thread and tighten by hand only.	Turn the External tool in direction of the arrow.

(to be continued)

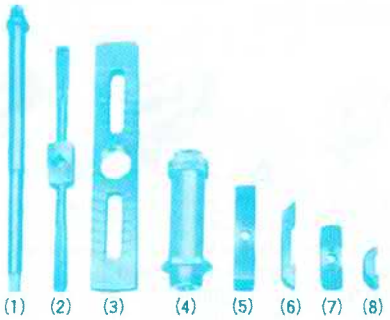
Valve Seat Cutters

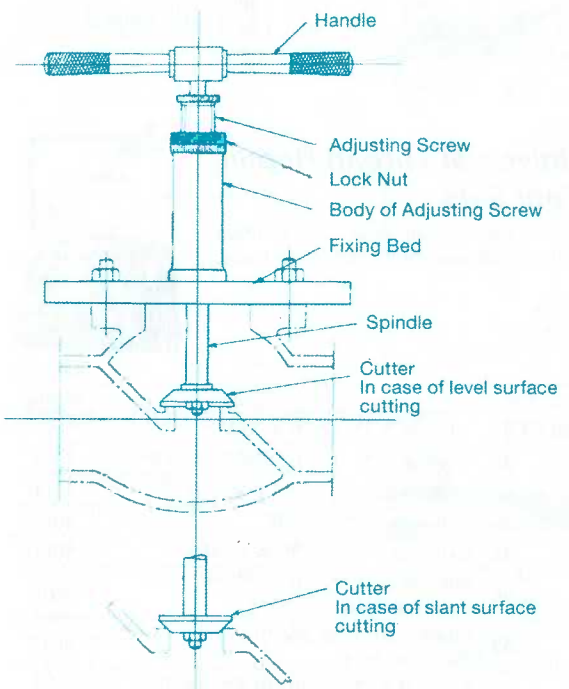
A set is comprised as follows:

(1) Spindle
(2) Handle
(3) Fixing Bed
(4) Lock Nut & Adjusting Screw
(5) 4" cutter
(6) 3" cutter
(7) 2" cutter
(8) 1" cutter



These valve seat cutting tools are easier than ordinary type cutters in assembly and handling for precision cutting work. Remove the valve cap or flange and fit the suitable cutter to the spindle. Then, set the fixing bed using a tightening bolt for the cap or flange. Check that the cutter fits horizontally with the valve seat and is in the center position. At this point you set the adjustable screw to find the best position of the cutter. After adjustment, begin the cutting operation by turning the handle clockwise. In case of slant surface cutting, please refer to the following drawing.

A standard set contains 1", 2", 3", and 4" cutters, but other sized cutters, 1/2", 3/4", 1-1/4", 1-1/2", 2-1/2", 5", and 6" are also available upon request.



63 34 51	Valve seat cutter, 1"-4" complete	Set

Hole Saws

Made of a selected high speed steel or tungsten carbide tipped for cutting smooth and accurate hole. Available cutting depth is 5 mm for standard type hole saw and 36 mm for deep cut type hole saw.

Outside Calipers

For the easy measurement of the outer diameter of pipes and other round objects. Made of hardened steel with tips of tempered steel.

Unit Per Pr.

CODE	Size mm	CODE	Size mm
65 01 01	100	**65 01 07**	350
02	125	**08**	400

05	250	**11**	750
06	300	**12**	1,000

Spring Outside Calipers

For the outside measurement of threads. The tips are specially shaped to fit suitably to the threads.

Unit Per Pr.

CODE	Size mm	CODE	Size mm
65 01 21	100	**65 01 24**	200
22	125	**25**	250
23	150	**26**	300

Lock-Joint Transfer Outside Calipers

For measuring the outer diameter of pipes or cables which may have rims or other obstructive shapes which would be difficult to measure with regular calipers.

Unit Per Pr.

CODE	Size mm	CODE	Size mm
65 01 31	100	**65 01 34**	200
32	125	**35**	250
33	150	**36**	300

Inside Calipers

For measuring the inside diameter of pipes, fittings, etc. Made of hardened steel with points of tempered steel to prevent wear.

Unit Per Pr.

CODE	Size mm	CODE	Size mm
65 01 51	100	**65 01 57**	350

Outside Micrometers
with Counter

A numeral counter indicates sizes simulaneously as the measurements are being taken. The display is very easy to read. Graduated in 0.01 mm increments from 25 mm to 500 mm on the standard size micrometer but micrometers up to 1,000 mm are also available upon request.

Unit Per Pc.

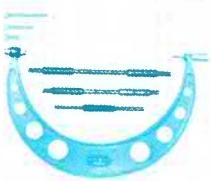
Outside Micrometers
with Interchangeable Anvils



Each micrometer is equipped with a series of interchangeable anvils. Each anvil is marked to show its capacity and is fitted with an adjustable collar to prevent wear. Graduated in 0.01 mm increments.

Unit Per Set

CODE	Range mm	No. of Anvils	CODE	Range mm	No. of Anvils

85	400 - 500	4	90	900 - 1,000	4

Tubular Type Inside Micrometers

A single rod type micrometer made from strong but light tubing. The measuring anvils are ground to a radius to be used on either flat or curved surfaces. Graduated in 0.01 mm increments. Micrometers with counter displays are also available upon request.

Unit Per Pc.

CODE	Range mm	CODE	Range mm

10	250 - 275		

Jointed Inside Micrometers

Each set of the anvils for the jointed inside micrometers is adjusted to suit the particular micrometer. Each is given a mark and must not be used on any other micrometer. When assembling, clean the joining faces perfectly. Graduated in 0.01 mm increments.

Unit Per Set

CODE	Range mm	No. of Rods	CODE	Range mm	No. of Rods
65 04 41	50 - 150	3	65 04 44	50 - 1,000	8

Internal Groove Micrometers
(Inside Micrometer Calipers)

This caliper type jaw facilitates quick reading for internal grooves of all types including "O" rings, seals, oil grooves, washer grooves as well as bores and recesses. Graduated in 0.01 mm increments in sizes from 25 mm to 150 mm. Micrometers up to 50 mm in size with counters are also available.

Unit Per Pc.

55	100 - 125		
56	125 - 150		

Depth Micrometers

Measures the depth of holes, projections, etc. Provided with a hardened tip and threaded ground screw, adjustable for wear. The face of the base is hardened and planed to maintain a level surface. Graduated in increments of 0.01 mm.

How to order : CODE

Depth micrometer, RANGE mm, BASE SIZE mm

Unit Per Pc.

CODE	Range mm	Base Size mm
65 04 71	0 - 25	65.3 x 16
72	0 - 25	101.6 x 16

Depth Micrometers
with Slidable Rod

Basically the same instrument as the depth micrometer but with a graduated sliding rod. The base length for all micrometers is 120 mm. Graduated in increments of 0.01 mm. The diameter of the rod is 6 mm.

Unit Per Pc.

CODE	Range mm	CODE	Range mm

Digital Calipers

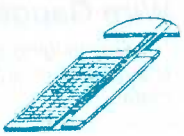
A compact, easy to use caliper graduated in 0.01 mm increments. All measurements are shown on a digital display making it easier to take quick, precise measurements. The graphic display will indicate whether the tool is set for the measurement of inside or outside diameters.

Specifications

Length	150 mm
Graduation	0.01 mm
Display	5 Digit LCD
Max. Response Speed	1,000 mm/sec.
Power Source	Dry Battery SR44 One Year Life Time
Weight	170 grm

65 05 21	Digital caliper, 150 mm	Pc.

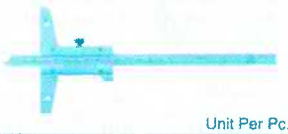
Rope Gauges



Made of wood or brass. Ideal for determining the correct diameter of ropes and wires. Available in metric system only. Measures ropes of up to 90 mm diameter.

65 05 31	Rope gauge, brass, up to 90 mm	Pc.
32	Rope gauge, wood, up to 90 mm	"

Vernier Depth Gauges



Made of hardened stainless steel. Graduated in increments of 0.05 mm in metric sizes only.

Unit Per Pc.

Thickness Gauges
(Feeler Gauges)

Particularly popular with machinists and tool makers for gauging narrow slots as well as for adjusting the air gaps of valves on motors. The leaves are made of tempered steel and have the thickness marked on them. The gauges listed below are classified as A Type because they have straight leaves. Type B gauges with tapered leaves are also available upon request.

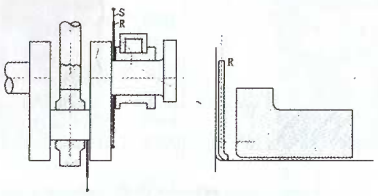
Bearing Feeler Gauges

Used for measuring main bearing clearance of marine engine.

When the rod "S" has been pressed through the pipe "R", the pipe "R" can be pushed away from the brass by further pressing on the rod "S" and when a distance "a" is obtained it is easy to feel the fit of the feeler in the clearance.



Obs. Keep "R" against the journal as long as the feeler is in the bearing.

Involute Gear Tooth Gauges

Designed to indicate the gear pitch by simply using the leaves on the gear teeth. Every leaf is 50 mm long and 19 mm wide.

Unit Per Pc.

CODE	Type	Leaves	No. of Leaves
65 06 11	DP (S)	6 ~ 80 thread per inch	14
12	DP (L)	2 ~ 5 thread "	7
13	MP (S)	0.5 ~ 5 mm pitch	13
14	MP (L)	6.0 ~ 12.0 mm "	7

Screw Cutting Gauges
(Acme Screw Thread Gauges)

A very useful gauge to determine the correct thread angle of various tools after the cutting operation. Available in 29° or 30° in round or square type respectively.

Unit Per Pc.

CODE	Description
65 06 21	Round type, 29° 1-10 Threads
22	Round type, 30° 3-10 mm Pitch
65 06 23	Square type, 29° 1-10 Threads
24	Square type, 30° 3-10 mm Pitch

Center Gauges

A handy gauge used for inspecting the center angles of the lathe and the angles of screw making tools. Available in 55° and 60°. Made of hardened steel.

Unit Per Pc.

CODE	Degree	Description
65 06 31	55°	Whitworth Standard
32	60°	U.S. or American National Standard
33	60°	Metric Standard

Wire Gauges

For gauging steel wires, drill rods, sheets, plates, and wires of non-ferrous metal.

Unit Per Pc.

CODE	ABR.	Description
65 06 41	B.W.G.	U.K. Bermingham wire gauge, Nos.1-36
42	S.W.G.	U.K. Imperial Std. wire gauge, Nos.1-36
43	B.S.W.G.	U.S. BS Std. wire gauge, Nos.0-36
44	JIS	Japanese Ind. Std. 0.1-12 mm

Drill Gauges

For measuring the diameter of drills.

Unit Per Pc.

CODE	Range	Intervals
65 06 51	0.3 - 1.0 mm	0.05 mm
52	1.0 - 6.0 mm	0.1 mm
53	1.0 - 13.0 mm	0.5 mm
54	6.0 - 13.0 mm	0.1 mm
55	1/16 - 1/2 inch	1/64 inch

Measuring Cups

Stainless steel or plastic made cup for measuring liquid volume. Graduated in liters only.

Unit Per Pc.

Plastic		Stainless Steel

Palm Tally Counters

Metal body mechanism four digits counter for counting inventories, etc. with actuating push button and reset button. Handy and suitable to fit in your palm.

65 18 55	Tally counter, Palm, 4 - digits	Pc.

Water Finding Paste
(Water Ribbons or Marking Blue)

A paste for use with oil gauging tape. The colour of the paste will change from yellow to red upon contact with water.

65 08 90	Water finding paste, 75 grm	Tube

Gasoline and Oil Finding Paste

A chemical paste used with oil gauging tape for measuring the presence of various types of oils. The colour of the paste will generally change from light blue to red upon contact with oil. This paste will detect almost any kind of oil including mineral oil, vegetable oil, and animal oil, and solvents such as benzol, alcohol, acrylic solution, alkaline solution, and spirits.

65 08 91	Gasoline and oil finding paste, 75 grm	Tube

Steel Straight Edges

Precision made of fine tool steel to industrial standards. The surface is ground and planed to a smooth surface. Perfect for use as a straight edge or as a level to check if surfaces are flat. The types shown above, the standard (rectangular) and beveled edge types without graduation are most common.

Other types such as a fold out or I-beam straight edge with graduations are also available upon request.

Precision Try Squares with Base

Recommended for use where extreme accuracy is required. Base and blades are hardened, ground and lapped to insure that the square has a straight, parallel setup. 1st and 2nd grades are available according to their tolerance. Non graduated types are most commonly used but graduated types are also available upon request.

Unit Per Pc.

Combination Square Sets

Combination sets are useful for all types of mechanical jobs. The set is comprised of a straight rule protractor, a square head, and a center head. The protractor is graduated to read from zero to 180° in both directions. The rule is made of stainless steel and is graduated in both 0.5 mm and 1 mm increments. The square head has a level and a scriber point. The protractor head, center head, and square head are all made of cast iron.

Unit Per Pc.

Vee Blocks
(V-Blocks)

Machine finished and made of cast iron. Two types available, the A type which is composed of three 90° v-shaped indentations of various depths and the B type which has one 90° v-shaped indentation. A set of two pieces can be used in mechanical processing and inspection as a holding table for marking off round rods and right angle bodies, or to hold round marks. An A type block equipped with a clip is also available upon request.

Hand Tachometers
Horn Type

This tachometer indicates speed instantaneously and therefore enables speed fluctuations to be read off the dial. A circumference disc is provided to measure the circumference speed. 10 revolutions of this disc is equal to 1 mtr. So by dividing the number indicated on the gauge by 10, you can determine the number of revolutions per minute. When ordering, indicate the RPM capacity from the list below.

Unit Per Set

CODE	Range (R.P.M.)	Speed	Speed Range (R.P.M.)

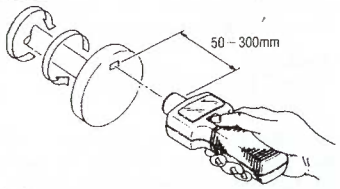
Hand Tachometers

Digital Type

A light and compact battery operated tachometer for measuring revolution with high accuracy.

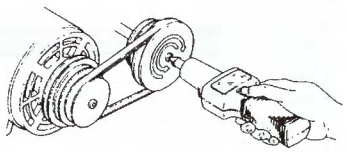
Non Contact Measurement

Revolution speed is easily read by directing the probe to the revolving shaft end to which a reflection tape is attached.



Contact Measurement

With optional contact adaptor the R.P.M. and surface speed can be easily read by pressing the head lightly against the revolution shaft.



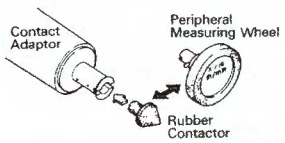
Specifications

Measuring Range	30 - 30,000 rpm
Resolution	0.1 rpm
Accuracy	0.01 %, ±1 digit
Sampling Time	1.0 - 2.0 sec.
Display	6 digit LCD
Data Hold	3 minutes
Measuring Distance	300 mm (contactless use)
Power Source	4 x R6P, 1.5 volt (AA size)

65 13 10	Hand tachometer, digital type measuring range 30 - 30,000 rpm	Set

Note: Contact adaptor is ordered separately.

Contact Adaptors for Digital Type Hand Tachometer



Unit Per Set

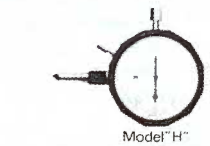
CODE	Measuring Unit	Contents
65 13 13	1/10 mtr/min.	1 surface speed wheel and 3 rubber tips
14	1/10 yard/min.	

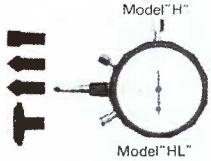
Hand Tachometers

Hasler Type

A clockwork type interior instrument, automatically engages the indicating mechanism when the instrument is started and releases after three seconds.

The tachometer is non magnetic and can therefore be used in electric power stations, etc.





Unit Per Pc.

Electronic Stethoscopes

Electronic stethoscope enables you to check symptoms in machinery, before they become a problem. Machine noise or vibrations are picked up by the stethoscope's probe and a transducer converts the vibrations to an electronic signal.

Start by pressing the probe against the machine body and adjust the sound level. When the probe is moved to a new position it should be easy to establish whether the probe is now nearer to or further away from the source of the noise.

The condition of the machine can be checked based upon one's own personal experience with the sound of the machinery or by comparing the sound to a reference signal of a healthy machine.

Specifications

Frequency Range	30 Hz - 15 KHz
Output Volume	Adjustable
Battery	9 V alkaline (IEC 6LR61)
Battery Lifetime	Approx. 20 hours

65 13 31	Electronic stethoscope	Set

Ultrasonic Bearing Indicators

It can aid in identification of mechanically deteriorated bearings and bearings with inadequate/contaminated lubricant. It does this by detecting high frequency (acoustic emissions) stress waves associated with friction and other faults with machinery in poor condition (impacts etc.). It can be used to monitor bearings in motors, pumps, fans, gearboxes and other rotating machinery applications. It has two outputs – a decibel (dB) reading and a Distress® level which are both measured and displayed simultaneously by the Portamonitor™.

OPERATION

* The instrument listens for frictions and impacts caused by poor lubrication or bearing damage.
* Sound is generated by bearings and this propagates through the machine.
* By using a sensor that sends a signal, the user can detect this noise and by using signal processing, the user can determine the condition of the bearing.

The distress signal is a useful indicator of whether the bearing is damaged, poorly lubricated or malfunctioning, and therefore in need of maintenance. This is useful as it is automatically calculated and displayed by the Portamonitor™ so requires minimum input from the user and gives a reliable and instant indication of the state of the bearing.

Unit Per Set

CODE	65 13 32		
Model	Portamonitor™		
Sensor ;			
Sensing Element	Resonant piezoelectric at 100 kHz		
Calibration	Factory set		
Signal Measurement :		Range	Resolution
Distress® (dst)	Fault indicating parameter	0 to 40	1 unit
dB Level (dB)	Logarithmically scaled mean signal level	10 to 80 dB	1 dB
Features ;			
Display	LCD, 2 lines by 8 characters		
Distress® Display	Numeric or Text ("OK" if < 10, "Suspect" if between 10 & 15, "Poor" if > 15)		
Reading in progress	Flashing LED indicator (in addition to LCD display Massage)		
Internal Batteries	NiMH rechargeable battery via micro USB port – Typically over 1,000 measurements between charges		
Overall Dimensions	98 mm (3.86 in) x 62 mm (2.44 in) x 34 mm (1.34 in)		
Weight	225 grm (7.94 ounce)		

Accessories included ;
*Carrying case
*Operating instructions
*Protective case
*Portamonitor™ bearing indicator main unit
*USB cable

Name of Mfr. : Coltraco Ultrasonics

Sound Scopes

Binaural Receiver Type

Stethoscope type sound inspection instrument for detecting worn out parts, cracks of engines, motors, missing gear box, compressors, dynamos, etc. Furthermore useful for tracing irregularities in pipe-lines of gas, water, oil and electrical equipment.

65 13 33	Sound scope, binaural receiver type	Pc.

Seawater Hydrometers

A glass instrument for measuring the density and saturation of salt in seawater. A ballasted float carrying a scale that indicates density as related to fresh water. Zero is 1,000; the density of seawater is about 1,026, but varies, in different areas between 1,000 and about 1,040.

How to order : CODE

Hydrometer, seawater, GRADUATION, LENGTH

Unit Per Pc.

CODE	Graduation	Length	CODE	Graduation	Length

42	" - "	250 "	44	" - "	250 "

Salinity Refractometers

For measuring the salinity and specific gravity of seawater, and utilizes a new material that is durable against salty samples. The salinity of seawater is displayed in parts per mill (‰). This refractometer requires no battery due to optical device.

Features
- Easy to read display.
- Screen shading.

With the same measurement range as MASTER-S/Mill M, MASTER-S/Millα is an Automatic Temperature Compensation (ATC) model with water resistant properties (IP65).

Unit Per Pc.

CODE	65 13 45	65 13 46

Scale Range	Salinity : 0 to 100 ‰ Specific gravity : 1.000 to 1.070	
Minimum Scale	Salinity : 1 ‰ Specific Gravity : 0.001	
Accuracy	-	Salinity : ±2 ‰ Specific gravity : ±0.001 (10°C to 30°C)
Functions	Calibration with water	Calibration with water & Automatic Temperature Compensation
Size	3.2 x 3.4 x 20.7 cm	
Weight	110 grm	

Name of Mfr. Atago

Seawater Specific Gravity Refractometers, Digital Type

Designed to measure the salinity specific gravity of a solution of seawater and water only. Fully digital, surprisingly compact size (pocket size) allows you to easily carry it around and use it outdoors or inside factories.

Features
- Just 2-3 drops of sample.
- Easy and quick measuring.
- Measurement displayed in just 3 seconds.
- Hot or cold samples can be measured.
- ATC - measurements are shown as if measured at 20°C.
- Zero setting (calibration) can be done with distilled or tap water!
- Class IP65 - Dust-tight and Protected against water jets. Rinse clean under running water.

Unit Per Pc.

CODE	65 13 47
Model	PAL-07S
Measuring Range	Sea water (S.G.) : 1.000 to 1.070 Temperature : 10.0 to 40.0°C
Resolution	Sea water (S.G.) : 0.001 Temperature : 0.1°C
Measurement Accuracy	Sea water (S.G.) : ±0.002 Temperature : ±1°C
Temperature Compensation Range	10 to 40°C (Automatic Temperature Compensation)
Ambient Temperature	10 to 40°C

(to be continued)

Sample Volume	0.3 ml
Measurement Time	3 seconds
Power Supply	2 x AAA batteries
International Protection Class	IP 65 Dust-tight and protected against water jets
Dimensions mm	55 (W) x 31 (D) x 109 (H)
Weight	100 grm

Ethylene Glycol Refractometers

Digital Type

Anti-freezing solution (coolant) which main ingredient is ethylene glycol is widely used as mixed in cooling water of car's radiator, as cooling medium for central air - conditioning system, freezer/ refrigerator, cooling coil, cooling fixture, and so on.

The "Pocket" coolant refractometer can easily measure the coolant in brine and other agents of Ethylene Glycol. Measured value displayed digitally. The freezing point of the sample can also be measured and displayed.

Unit Per Pc

CODE	65 13 48
Model	PAL-91S
Measuring Range	Ethylene glycol : 0.0 to 90.0% (V/V) (Main scale) Freezing point of Ethylene glycol : 0 to -50°C (Secondary scale) Temperature : 10.0 to 40.0°C
Resolution	Ethylene glycol : 0.2% (V/V) (Main scale) Freezing point of Ethylene glycol : 1°C (Secondary scale) Temperature : 0.1°C
Measurement Accuracy	Ethylene glycol : ±0.4% (V/V) (Main scale) Freezing point of Ethylene glycol : ±1°C (Secondary scale) Temperature : ±1°C
Temperature Compensation Range	10 to 40°C (Automatic Temperature Compensation)
Sample Volume	0.3 ml
Measurement Time	3 seconds
Power Supply	2 x AAA batteries
International Protection Class	IP 65 Dust-tight and protected against water jet
Dimensions mm	55 (W) x 31 (D) x 109 (H)
Weight	100 grm

Refractometers

for Urea Concentration of Diesel Exhaust Fluid

Digital Type

The PAL-Urea is specifically designed to measure the Urea concentration of DEF(Diesel Exhaust Fluid), also known as AdBlue* in Europe. The PAL-Urea is light & compact, with no moving parts to break. Simply place a few drops of DEF on the prism, press "Start" and the precise Urea concentration is displayed digitally in 3 seconds.

Unit Per Pc.

Fuel Drip Bunker Samplers

Designed for obtaining good representative fuel samples during bunkering operation. A representative oil sample will provide an accurate representation of the contaminants, additives, oxidation particulates and wear condition.

* Lightweight and very easy to install - obtaining a representative bunker fuel sample quick and easy.
* Complete with bunker fuel sampler joint rings.
* GL & Lloyds Register approved with certificate numbers etched on the flange, GL Certified for MARPOL compliance.
* IMO MARPOL 73/78 Annex VI compliant - helps you stay within the legal requirements for bunker fuel sampling.

The sample is collected in a cubitainer, a consumable item of typically 5 litre capacity which is attached to the needle valve. The tube should always be installed with the holes facing the fluid direction. Adjust the needle valve to give a slow and steady drip. Time the fill rate to estimate that it will provide for sufficient sample over the expected delivery period.

It is recommended that four representative samples are obtained from the delivery.
The distribution of the samples being:
1. Supplier's sample;
2. Vessel's sample for on-board retention;
3. On-board analysis sample;
4. Sample for independent analysis.

Material: Stainless steel 304/316
Nominal Flange Thickness: 25 / 26 mm
Total Thickness (including gaskets): 31 / 32 mm

Cubitainers for Sampling Flange Device

Drip samplers use disposable 'Cubitainers'. These hold the oil sample before mixing and transfer to the sample bottles. They also keep out all external contamination. Supplied in 5 litre size, and packs of 24, with numbered, tamper-evident caps, pourer carton and spout

65 13 39	Cubitainer for sampling flange device, 5 ltr capacity, 24's/case	C/S

Fuel Oil Sample Bottles and Labels

750ml HDPE (High Density Polyethylene) fuel oil sample bottle packs and mailer kits complete with numbered tamper evident caps, labels and mailing cartons used for storage and safe transportation of the samples. Sample bottles have been tested and approved for transportation of fuel oil samples by air freight or courier service. All consumables are available either as convenient individual packs, or supplied in bulk to refineries and bunker barge operations.

65 13 40	Bottle, HDPE for fuel oil sample, 750 ml, with seals and IATA* approved mailing cartons, 36's	Kit

*IATA - International Air Transport Association

Sampling Bottles
(Samplers)

Designed for sampling petroleum products in tanks or seawater. Made of brass and stainless steel. Available in 500 cc and 1,000 cc sampling capacity.

1. Mouth Collecting Type Sampler

Top lid can be opened at any intermediate level inside tanks and other containers. Sample can be easily collected from any pre-determined depth inside the tank.

2. Bottom Collecting Type Sampler : (Bottom Penetrate Type)

Sample can be collected from bottom (Bottom Collecting Type) at any intermediate level of tanks and other containers, or at any pre-determined depth inside the tanks.

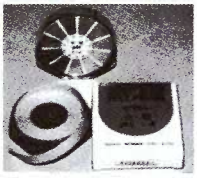
pH Test Paper
(Litmus Paper)



For measuring acidity and alkalinity (hydrogen ion concentration) based on a scale of 0 to 14 where 7 represents the value for pure water at 25°C or neutrality. Values less than 7 represent increasing hydrogen-ion concentration or increasing acidity, and a value greater than 7 represents decreasing hydrogen-ion concentration or increasing alkalinity.

65 13 90	pH test paper pH, 0 ~ 14	Pc.

Compact pH Meters

Pocket-size pH meter for small sample measurement with waterproof construction.

It provides several measuring methods, immersion measurement, scoop measurement or flat measurement.

Specifications

Measurement Range	pH2 - pH12
Accuracy	±0.1 pH
Readout	3-1/2 digit LCD
Principle	Glass electrode
Sample Temperature	5-40°C
Power Source	3V lithium batteries (CR-2032) x 2 pcs
Size	165 x 29 x 19 mm
Weight	53 grm

65 13 93	Compact pH meter, pH 2-12	Pc.

Digital pH Meters

Compact, pocket size meter with one touch calibration and temperature compensation.

Meters with a probe in a sealed case and sealed connections to keep out moisture. Operation is simple with one touch, automatic calibration.

Simply dip the probe in standard solution and the microprocessor automatically distinguishes between standard solutions of pH 4, 7, or 9.

The microprocessor will also perform the temperature compensation of the pH and display a diagnostic message. Has a long battery life of approximately 600 hours and will automatically switch off to reserve power if left on for over 30 minutes.

Specifications

Measurement Range	pH	0 to 14
	Temperature	0 to 80°C
Display	Liquid crystal display	
Item Displayed	Displays both pH value and liquid temperature	
Power Supply	1 x 6F22 (S - 006P) dry cell	

65 13 95	Digital pH meter, 0 - 14 pH	Set

Standard Dial Gauges
(Dial Indicators)

This standard dial gauge is simple, reliable, easy to read, very sensitive and shock proof. The bezel is rotated for zero setting. The most common types are listed below.

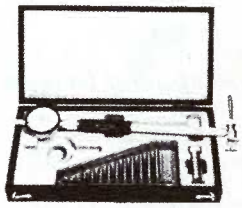
How to order : CODE

Dial gauge, standard, TOTAL RANGE, NON-WATER PROOF or WATER PROOF

Unit Per Pc.

CODE	Total Range	Graduation	Remark
65 14 01	5 mm	0.01 mm	Non-Water Proof
02	"	"	Water Proof
65 14 03	10 mm	"	Non-Water Proof
04	"	"	Water Proof

Cylinder Gauges
(Bore Gauges)



This range of gauges is designed mainly for the measurement of cylinder bores but the ovality, taper, wear and other bore conditions may be measured with equal ease. Furnished without a dial gauge. When ordering, please indicate if the dial gauge is required.

Dial Gauges not included

(to be continued)

Unit Per Set

Pressure Gauges, Bourdon Tube Type (Manometers)

This category contains the following popular gauges.

Pressure Gauges

Service as a gauge for air, water, steam, oil or sea water and any liquid or gases which are not corrosive to brass. Brass case, friction fit beaded ring and phosphor bronze Bourdon tube.

Compound Gauges

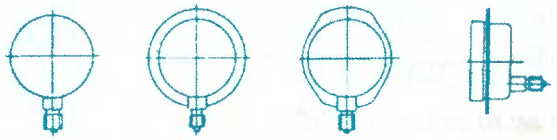
For installations where it is necessary to read both pressure and vacuum on one side. Brass case and friction fit beaded ring. Phosphor bronze Bourdon tube.

Vacuum Gauges

For vacuum reading. Brass case, friction fit beaded ring and phosphor bronze Bourdon tube.

Due to the great variety of casing, fitting connections, etc. in above gauges, please refer to the following illustrations and the "Guide of how to order" when ordering. The thread connection is the same as pipe straight threads (PF) which are of the "B.S.P." (British Standard Pipe Threads).

Type of Casing



A-Type (Rimless Type) B-Type (Round Rim Type) C-Type (Cut Rim Type) D-Type (Buried Type)

Type of Fitting Connection

U-Type (Round Cornered) Shank T-Type (Square) Shank S-Type (Hexagonal) Nut Attached

Range and Applications

Symbol	Type	Surrounding Temperature Range of the Gauges
-	Ordinary Type	-5 C ~ 40°C
M	Ordinary Type for Steam	10°C ~ 50°C
H	Heat-Resistant Type	-5°C ~ 80°C
V	Vibration-Resistant Type	-5°C ~ 40°C
MH	Heat-Resistant Type for Steam	10°C ~ 50°C
HV	Heat and Vibration Resistant Type	-5°C ~ 80°C

Ammonia Compound Gauges

Designed for use with ammonia and equipped with a heavy-duty stainless steel bushed rotary movement, a micrometer pointer, alloy steel Bourdon spring, and steel socket with a male connection.

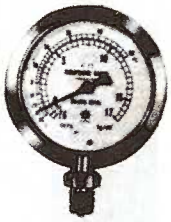
Guide of How to Order

CODE..... 65 - 15 - 06

Name ..... Ammonia compound gauge
Type of Casing ..... Round rim case
Purpose Where Used .....
Type of Fitting Connection .. Hexagonal nut attached
Connection Size ..... PF1/4"
Diameter of Gauge ..... 100 mm
Pressure Range ..... 0 ~ 100 kgf/cm²

Refrigerant Compound Gauges

Designed for use with refrigerants that are not corrosive to bronze. Equipped with a plain rotary, non-rust movement and a brass seamless Bourdon spring. Brass case, self-finish colour with brass ring.



Guide of How to Order

CODE..... 65 - 15 - 11

Name..... Refrigerant compound gauge
Type of Casing ..... Rimless
Kind of Refrigerant..... R-22
Type of Fitting Connection ... Hexagonal nut attached
Connection Size..... PF1/4"
Diameter of Gauge..... 100 mm
Pressure Range ..... 0 - 17 kgf/cm²

Glycerine Filled Pressure Gauges

Vibration – Resistant

The internal mechanism for the pointer operation is filled with glycerine to protect the accuracy of the gauge from mechanical vibration and to extend the working life of the gauge.

Guide of How to Order

CODE..... 65 - 15 - 16

Name..... Pressure gauge, glycerine filled
Type of Casing ..... Round rim case
Purpose Where Used..... Vibration service
Type of Fitting Connection ... Square shank
Connection Size..... PF1/2"
Diameter of Gauge..... 75 mm
Pressure range..... 0 - 15 kgf/cm²

Pressure Gauges

Filled with Glycerine

These gauges can be used for any gaseous media or low viscous fluid that does not corrode the brass parts. Their special mechanical design and case filling provide best properties for the use in marine applications.

Gauge-Pointer Pullers

A handy tool for taking off gauge pointers without damaging the gauge reading surface. Useful for almost all pressure, vacuum, and compound gauges or any other pointer types.

65 15 51	Gauge pointer puller	Pc.

Performance Testing Kits

for Pressure Switches and Pressure Gauges

A kit specifically designed to test the performance reliability of pressure switches or pressure gauges. The unit works by applying regulated amounts of air or oil pressure upon the switch or gauge to check the level of accuracy with which the switch or gauge reacts. This unit is easy to operate, compact, and lightweight making it suitable for use in a variety of situations.

Depending upon the model type for this machine either the oil pressure gauges or oil and air pressure gauges can be tested.

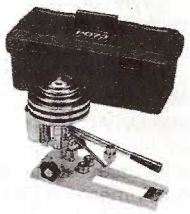
Dead-Weight Testers

Portable Type



Used as the standard pressure gauge for testing and calibration of other pressure gauges, and also as the standard pressure generator for devices used in research and production applications. Can be measured pressure simply and rapidly at any place.

A closely adjusting valve allows easy minute pressure change. A standard pressure gauge can be installed instead of a dead weight for pressure measurements.

Recalibration Sets

for Temperature and Pressure Calibrator

With dry block temperature calibrator and the pressure calibrator, the vessel have necessary calibrated test equipment according to SOLAS and DNV on board. According to these regulations the test equipment for temperature and pressure must be recalibrated. This set includes a temperature hand held instrument, a temperature reference sensor and a pressure reference. The temperature hand held instrument have 2 different models : MH 3710 for standard calibration requirements or MH 3750 for highest accuracy requirements.

With the temperature reference sensor TF 650-6-300, you can measure the actual accuracy of the dry block calibrator, and the pressure reference type D2, you can measure precision pressure.

Recalibration of temperature calibrators is done with recalibration instrument type MH 3710 or MH 3750 and temperature sensor type TF 650-6-300. Recalibration of pressure calibrators is done with recalibration instrument type D2.

Crew can make the recalibration on their own. Checking the recalibration set is very easy because only the small case has to be returned to manufacturer once a year.

Specifications

Temperature hand held instrument MH in combination with Temperature reference sensor TF

Measuring input	Pt100
Measuring range	-50.00...650.0 °C
Resolution up to	0.1 °C
Miscellaneous	Min. / max.-memory, hold function, auto-off
MH 3710 (Standard-Set)	Accuracy 0.3 % full scale
MH 3750 (Premium-Set)	Integrated alarm and data logger function • User-specific characteristic curve of sensor • Real-time clock with day, month and year • Measured value memory 16384 • Accuracy < ±0.2 °C
Temperature reference sensor TF 650-6-300	
Measuring range	-50...650 °C
Sensor	Stainless steel Tube D = 6 mm, L = 300 mm
Cable / Handle	Silicone cable (1 m) with 4-pin Mini-DIN-plug
Pressure reference type D2	
Functionality	• µC based with internal EEPROM • DMS pressure cell • Pressure- and temperature tested • Min. / max.-memory, hold function, auto-off
Pressure ranges	-1....40 bar / 0.01, -1....60 bar / 0.01, 0...400 bar / 0.1, 0...700 bar / 0.1, 0...1,000 bar / 0.1
Accuracy	< ±0.1 % full scale
Temperature range	0...50 °C
Degree of protection	IP67

Digital Pressure Meters PM205/DMT-1

Digital pressure meter is a micro-processor controlled, accurate and versatile digital pressure measuring and calibration instrument with integrated fast peak-, max. -and min. – function. The instrument is used in two modes:

MANO Mode : The pressure is measured twice per second and displayed. The top display indicates the actual pressure, the bottom display shows the MAX, - or MIN.- pressure since the last RESET.

PEAK Mode : The pressure is measured 5,000 times per second and is brought to the display twice per second.

A ZERO function allows the user to set any value as a new zero reference. Barometric pressure variations can thus be compensated.

The digital pressure meter is supplied with an internal battery with 1,000 hours continuous operation in MANO-Mode, guaranteed by the AUTO SWITCH-OFF function, which activates if no key inputs are detected within the previous 15 minutes.

Supplied with all relevant certificates.

Unit Per Pc.

CODE	**65 15 21**
Model	PM205/DMT-1
Pressure Range (R)	3 - 30 - 60 - 300 - 700 - 1,000 bar
Readings per Second	5,000 (PEAK mode)
Accuracy	± 0.2% FS
Zero Function	Yes
Peak Function	Max. or Min.
Display	LCD
Selectable Read out	bar. mbar/hPa, kPa, MPa, PSI, kp/cm²
Standard Process Coupling	1/4" BSP male
Power Supply	Lithium battery 3.0V size CR2430
Battery Life	1,000 hours continuous operation in MANO-Mode 150 hours continuous operation in PEAK-Mode
Protection Class (EN 60529)	IP65
Dimensions H x D x W	118 mm x 42 mm x 76 dia mm
Weight	0.21 kgs

Pressure Calibrators

PM305/310L/310H, Ex models

PM305 is a self-contained portable pressure meter for commissioning, service, calibration and maintenance. PM305 is supplied with integral pressure sensor, signal-conditioning electronics, graphic display and internal battery. This can be supplied in ranges up to 1,200 bar with internal or external sensor. The optional PreCal Windows® based software will enable automatic calibration and generate test reports which will comply with ISO 9000 requirements.

PM310L - for low pressure calibration
Using PM305 together with a small hand pump it works as a complete, portable, one-hand operated pressure calibrator named PM310L. The hand pump mounted directly on the pressure inlet of PM305 makes it possible to generate pressures from 0 to 40/60 bar (G) using dry air as pressure medium. PM310L is supplied in a case with a complete kit of test hose and fittings.

PM310H – for high pressure calibration
Using PM305 together with a hydraulic pump a unique handheld high pressure calibrator named PM310H. Originally designed for use on North sea platforms, the PM310H is extremely rugged and is made for field use. Using oil or water as a pressure medium, the PM310H generates pressure up to 700 bar (G) with accuracy of 0.03% FS. PM310H is supplied ready to use in carrying case complete with test hose and fittings.

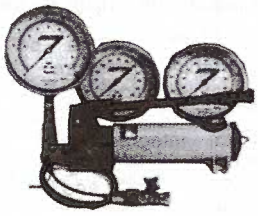
Marine Gauge Calibrators

Model JF MGC



The MGC series is using quality mechanical gauges as pressure reference. Connect the reference gauge and the unit-under-test to the hydraulic pump and calibrate.

The MGC-LOW consists of 2 or 3 dual-scaled precision pressure gauges with ±1% F.S. accuracy and a hydraulic handpump fitted with hose, valve, and couplings.

The MGC-HIGH consists of 3 or 4 dual-scaled precision pressure gauges with ±0.6% F.S. accuracy and a hydraulic jack pump fitted with hose, valve and couplings. The gauges provide a clear indication of pressure for comparison to the unit-under-test. The operator can then identify the extent of any error and adjust or replace faulty pressure indicators.

Major Feature :

- Accuracy to ±0.6% F.S. of connected gauge.
- Pressure range 0 to 300 bar.
- 2 different models.
- Pressure units bar and kg/cm², dual scale.
- Dual scale and easy-to-read gauges.
- Hydraulic pumps.

Portable Load Weighing Shackle Kits

LS-3200-PLW

A portable load weighing kit for accurate weighing and force measurements. Compact and rugged construction, Eex ia intrinsically safe system. Shackle type, range from 12 to 120 tons. Supplied with a handheld reader for readout and storage of data and with traceable certificate so it can be used as a reference for verification or test of lifting equipment, dead-end anchor and deck machinery.

Applications

Hoisting and cranes security / Hoisting gear, elevators and winches / Stationary weighing / General industry (harsh environment) / Offshore / Marine and harbour environments

Marine Calibration Kits

The "All-in-one" marine calibration test case will meet any application for temperature-, pressure-, and electrical calibration onboard equip the case according to your needs and budget, and have necessary calibrated test equipment required by IMO/SOLAS ready when needed.
A completely family of the tools for maintenance of the following control instrumentations ; Main and auxiliary engines, Propulsion, Main and auxiliary boilers, Hydraulic plant, Sea water cooling, Refrigeration plant, Fresh water systems, Heads and bathrooms, Ballast and bilge pumps, Cargo holds, and so on.

Test Equipment Components

Certificates	All calibrators and test-instruments are supplied with traceable certificates. The marine test case is approved by DNV Class.
Temperature Calibrators	Select either the low temperature (-40°C below ambient to 150°C) or the high temperature (30°C to 650°C) unit for your vessel.
Pressure Calibrators	Compact, rugged and easy to use. Pressure ranges from vacuum to high pressure (1,000 bar) with different levels of accuracy (0.25% to 0.03% FS) available. Also, intrinsically safe (Ex) models for LNG/LPG vessels is available on request.
Electrical Calibrators and Test Instruments	Digital multimeters, current clamps, insulation testers, infrared (IR) thermometers and signal simulators are among the most common instruments used.
Pressure Pumps, Test Hose and Adapters	Three different models are available to cover the range of vacuum to 1,000 bar. The case is equipped with test hose, connectors and adapters (BSP and NPT) according to the selected pressure range.

How to order : 65 - 16 - 21

Marine calibration kit, Scan Sense, with following information (set);
1) Temperature calibrators
- Low temperature (-40°C to 150°C).
Or:
- High temperature (30°C to 650°C).
2) Pressure calibrators
- Level of accuracy from 0.25% to 0.03% FS.
- Specify accuracy, range and if intrinsically model is required.

Pressure Calibrators

Series PM

Reference pressures of -1 up to 1,000 bar can be generated in a fast and simple way by these pressure calibrators with high accuracy of measurement and compact type of construction. Exact adjustment of the desired pressure is carried out by a precision adjustment valve. The reference pressure is indicated via an analogue precision pressure gauge or a digital LCD.

The instruments under test are connected to the pressure output of the calibrators by a pressure hose and an adapter. Power is supplied by batteries or rechargeable accumulators. The automatic measuring range switch of the PM series grants an optimal resolution with any application. Different measurement units can be selected by pressing a function key.

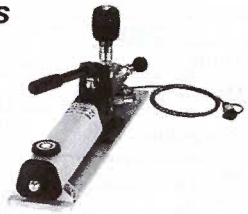
Table Top Test Pumps



The latest generation of comparison test pumps combines precision - also with high pressures - and high manufacturing quality. Hydraulic fluid is used as the test medium.

Although it is compactly built, it provides a big nylon tank with a usable tank volume of 327 cm³. In combination with a delivery volume of 0.9 cm³ per piston stroke, it provides the opportunity of testing multiple test samples in parallel. They are installed directly on the delivered pressure hose or via a separate distributor block therefore saving time and making your test tasks very efficient. The integrated check valve within the pressure vessel very quickly leads to stable pressure states. The integrated safety valve protects from overloading.

Unit Per Pc.

CODE	65 16 45
Type	P 700T
Pressure Range	With hydraulic fluid : 0 – 700 bar
OEM version	
Dimensions Weight	500 x 110 x 160 mm 5.6 kgs

Cabin Thermometers

For measuring temperature in a range of -30°C to +50°C. The overall length of the thermometer is 250 mm and it is graduated in 10° increments.

65 17 01	Cabin thermometer -30° to 50°C 250 mm	Pc.

Maximum–Minimum Thermometers

U-shaped thermometer tube. Magnifying lens tubes have special metal indices for registering the highest and lowest readings. These are reset by a small magnet. Temperature range -20°C to +50°C and approx. 350 mm in overall length.

65 17 06	Thermometer, maximum - minimum, U-shape with magnet -20° to + 50°C	Set

Seawater Thermometers

Copper Cased

Alcohol thermometer with a copper protection case and a ring for the line attachment and seawater sampler. The temperature range is -20°C to 50°C. The overall length of the thermometer is 300 mm.

65 17 10	Thermometer, seawater, copper cased -20° to + 50°C	Pc.

Thermometers for Refrigerator Use

Metal Cased with Ring

S.S. Backing with Magnet

A wide variety of types are available. The most common types are listed below.

Unit Per Pc.

CODE	65 17 15	65 17 16	65 17 17
Type	Metal Cased with Ring	S.Steel Backing with Magnet	Wooden Plate Backing
Range	-20° to 50°C	-30° to 50°C	-30° to 50°C
Graduation	1°C	1°C	1°C

Meat Thermometers

Dial bimetallic thermometer for measuring the internal temperature of meat or fish.

Range -70°C to +50°C graduated in 2°C intervals. Dial size 65 mmø. Stem 8 mmø x 230 mm pointed end waterproof.

65 17 20	Meat thermometer, dial, -70° to + 50°C	Pc.

Meat Thermometers

Digital Type

Compact and can be easily used with one hand to measure the internal temperature of fruits, vegetables, beef, processed foods, and various kinds of frozen of cooked food products. Useful in checking the condition of perishable cargo. This unit is easy to carry along when doing several samplings in refrigerated storage holds.

Specifications

Measuring Range	-50°C - +199.9°C
Increments	0.1°C
Accuracy	+/- (0.5% of rdg. +0.5°C)
Display Screen	LED screen
Sampling Time	About 3 times/second
Power Source	4 x LR6 (AM-3) alkali batteries / continuous use for 60 hrs.
Size	374 (H) x 50 (W) x 36 (D) mm
Weight	260 grm including batteries

65 17 22	Meat thermometer, digital, -50° to 199.9°C	Pc.

Test Thermometers

in Brass Case

Standard, laboratory grade, round white glass thermometer backed in enamel and filled with mercury or alcohol. The thermometer length is 300 mm or 450 mm and they are furnished in a chromed brass case.

Unit Per Set

CODE	Range	Length
65 17 23 24	Centigrade 0 - 500°C	300 mm 450 mm
65 17 25	Centigrade 0 - 100°C	300 mm
65 17 26	Fahrenheit 32 - 212°F	300 mm

Spare Glass Thermometers

Spare glass thermometers for the above brass cased test thermometers.

Unit Per Pc.

CODE	Range	Length
65 17 27	Centigrade 0 - 100°C	300 mm
65 17 28	Fahrenheit 32 - 212°F	300 mm
65 17 29 30	Centigrade 0 - 500°C	300 mm 450 mm

Pocket Test Thermometers

Graduation -20°C to +50°C, 150 mm in length. Furnished in a carrying case with a pocket clip. Thermometer is securely attached to the cap by screws.

65 17 32	Thermometer, test, pocket type, -20° to + 50°C, 150 mm	Pc.

Pocket Bimetal Dial Thermometers

Ideal for spot checking by inspectors in various industries. Furnished with a hard rubber carrying case with a pocket dip attached. The dial is made of stainless steel with a diameter of 25 mm. Furnished in a 3.8 mm diameter, 125 mm long hard rubber case.

Unit Per Pc.

Range	-30° to 50°C	0° to 100°C	0° to 150°C	0° to 200°C
Graduation	1°C	2°C	2°C	5°C

Tank Thermometers

in Brass Case with Sampler

Glass made thermometer scale with brass case. Range is -10°C to +100°C and 14° to 212°F. Provided with a sampler at the lower end of the brass casing which will keep the liquid preserved for the most accurate reading. Overall length 265 mm.

65 17 42	Tank thermometer in brass case with sampler -10° to + 100°C, 265 mm	Pc.

Digital Thermometers

A handy, economical, compact thermometer which consistently provides high precision and accuracy regardless of environmental conditions. Designed to work effectively without much power and will work continuously.

An assortment of temperature probes are available to accommodate different applications. Most commonly used to monitor bearings, pumps, electrical motors and other heat generating machinery.

Unit Per Pc.

CODE	65 17 53
Model	TMDT2
Measuring Range	-200 to 1,350°C
Resolution	0.1°C (-100° ...1,000°) 1°C (≦ -100°, ≧1,000°)
Accuracy	0.5°C / 0.9°F
Battery	9V alkaline IEC 6LR61 (AM-3)
Size	165 x 75 x 22 mm
Weight	200 grm
Name of Mfr	SKF

Thermosensors

for Digital Thermometer

Various types of thermosensors designed for use with the above mentioned thermometers are listed below with their respective specifications.

*** For TMDT2 (65 17 53)**

Unit Per Pc.

CODE	Measurement	Application	Temp. Range
65 17 71	Standard Surface	For hard surfaces such as bearings, engine blocks, etc.	900°C
65 17 72	Magnetic Surface	For hard, magnetic surface.	240°C
65 17 73	Insulated Surface	For hard surfaces where electrical wiring might cause short circuiting.	200°C
65 17 74	Right Angle Surface	For hard surface in heavy duty applications.	450°C
65 17 75	Gas and Liquid	For liquids such as oils, acids, etc. 3 mm shank.	1,100°C
65 17 76	Gas and Liquid	Same as above, but 1.5 mm shank.	900°C
65 17 77	Pipe Clamp	For pipes, cables, etc.	200°C
65 17 78	High Temp. Wire	Thin, light weight, very fast response, ceramic insulation	1,350°C
65 17 79	Rotating	For moving or rotating, smooth surfaces/ roller bearings	200°C
65 17 80	Nonferrous Foundry	Holder incl. dip-element for molten, non-ferrous metals.	1,260°C

Infrared Thermometers

Handheld type non-contact thermometer of the range -50 to 500°C by the most efficient thermometry technology, especially where contact thermometry is impractical. The twin laser beam helps to exactly pinpoint the diameter of the field of view and performs accurate temperature measurement in °C or °F with fast response in 0.8 second.

Mode and setting ;

* Emissivity adjustment :
Press MODE key to enter ε (Emissivity) adjustment mode and adjust emissivity with ▲/▼keys. (0.10~1.00, 0.01 increment)

* Peak hold : Maximum or minimum of in-measurement temperature is displayed respectively in MAX, MIN mode.

Unit Per Pc.

Coating Tapes and Sprays
for Infrared Thermometer Measurement

Most objects have an emissivity of 0.85 ~ 0.95 which is adequate for infrared thermometry, while emissivity of highly polished metal surface is poor. For the measurement of such glossy objects, it is recommended to make a thin film (coating) with black tape or spray to obtain better measurement results.

CODE	Description	Size	Thermal Resistance	Emissivity	Unit
65 17 93	Black tape, TA410-8T	W25 mm x L10 mtr	250°C	0.95	Rol
94	Black tape, TA410-8TB	W50 mm x L10 mtr			Rol
65 17 95	Black spray, TA410KS	300 ml	500°C	0.94	Tin

Measuring Devices
for Temperature

The handy and reliable instruments used for measurement and recording of temperature. Very flexible and suitable for both simple measurements and special applications. High performance sensors with electronic linearization of the characteristic provide high accuracy during signal recognition and processing. Matching sensors are available for extensive measurement jobs. Please specify type of sensors matching to your required measurement jobs when ordering.

Electronic Digital Thermometers

SolarTemp Marine Type 850 with Mounting Plate

The microprocessor controlled industrial thermometer works with a Pt-1000 sensor. Fully electronically, and without the need for auxiliary power, the SolarTemp guarantee high precision with long-term stability at detailed registration of measuring values for the full range of the projected lifetime. The measurement elements are free of wear by doing away mechanical components.

Possible measuring ranges reach from 0°C up to 650°C, with optimal adaptation for any measuring range. The SolarTemp has as it's energy source a photovoltaic cell (illumination level starting from 50 lx).

With the SolarTemp it was possible for the first time to realize rational local displays or distance thermometers with an electronic thermometer, which combines consistent measurement accuracy and complete maintenance freedom for the entire life time of the product.

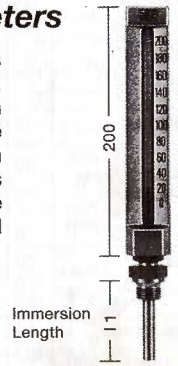
SIKA Industrial Thermometers

A wide variety of SIKA thermometers are available. The most widely carried, standard types are listed below with their respective specifications. The thermometer casings are finished in anodized gold colour. Standard models have the graduated readings listed on the right hand side and the surface is coated for protection from outside elements.



Straight Thermometers
Type 271B, 291B, 174B

Threaded sockets with a solid hexagonal nut. Adjustable to any desired viewing position and locked by brass nut, spanner size 22 mm. Thermometers with a measuring range from -60°C to +250°C have a blue fluid indicator and thermometers with ranges above 250°C work with mercury indicators.

Immersion Tubes, pockets

Standard: brass for temperatures up to 250°C, for temperatures above 250°C steel.

Type	Casing Size (L x W) mm	Thread	Immersion (Stem) Tube Diam. mm
271 B	200 x 36	PT (R) 1/2" (or 3/4")	10
291 B	150 x 36		
174 B	110 x 30		

When ordering, specify thread size as well as type, range and immersion stem length, or SIKA's catalogue number. As to thread sizes of the socket the most common PT (R) 1/2" is applied to the following coded items.

Legal notice :
According to regulation no. 847/2012 of European Union, thermometers with mercury filling are only bound for export outside the EU. Placing them on the market inside the EU after April 10th, 2014 is prohibited. Concerned are industrial thermometers and glass inserts with display ranges 0...300°C and higher, only. In this case, we are recommending the use of our dial or digital thermometers.

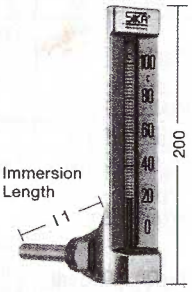
Note: Besides the above coded items
B) Long immersion of 250 mm and 400 mm are available.
C) PT (R) 3/4" thread of the sockets are also available.

90° Angle Thermometers

Type 272B, 292B, 175B

Back-90° angle type thermometers with same specifications as the above specified straight thermometers.



Type	Casing Size (L x W) mm	Thread	Immersion (Stem) Tube Diam. mm
272 B	200 x 36	PT (R) 1/2" (or 3/4")	10
292 B	150 x 36		
175 B	110 x 30		

How to order : CODE

Thermometer, 90° angle, SIKA, TYPE, RANGE, IMMERSION LENGTH, CATALOGUE NO

Example ;

65 20 01 Thermometer, 90° angle, SIKA 272B, casing size 200 x 36 mm, immersion length 63 mm, catalogue No.2722-351106321

Thread Size PT(R) 1/2"

Legal notice :
According to regulation no. 847/2012 of European Union, thermometers with mercury filling are only bound for export outside the EU. Placing them on the market inside the EU after April 10th, 2014 is prohibited. Concerned are industrial thermometers and glass inserts with display ranges 0...300°C and higher, only. In this case, we are recommending the use of our dial or digital thermometers.

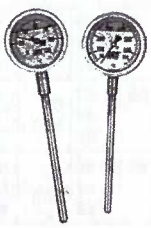
Note: 1) Up to 200°C, blue filling inserts are coded.
2) When ordering, inserts for 135° angle thermometer catalogue number has to be changed as follows:
From 271 to 273
From 291 to 293
From 174 to 176

Exhaust Gas Thermometers

Direct Mounting



The exhaust gas thermometer which eliminates the difficulty to read the exhaust temperature caused by engine vibration. This thermometer can be mounted directly on the exhaust duct and contains a shock absorbing liquid of high viscosity, which eliminates wear of the internal moving parts made sensitive by vibration. At the same time, lubrication of moving parts is taken care by the liquid, thus obviating corrosion.

Approved by German Lloyd Certificate No.12 026-98 HH

Low Temperature Dial Thermometers

Local reading - Type 301 - 302 for measuring ranges -200...100 °C

For monitoring temperature critical cooling applications and are suitable for the use on liquid gas transport ships. Protection of the measuring system by a vibration absorbing case filling, and stable, durable housing design made of stainless steel.

Typical Applications

- Gas transport for LNG, CNG, LPG, etc.
- Cooling ships and other cooling vehicles

Technical Data

Display Range	-200...100 °C / -150...100 °C -50...10 °C / -100...50 °C
Nominal Size, Material	63, 80 or 100 mm, stainless steel 1.4301
Dial	Silver coloured, black markings
System	Nitrogen filled system
Immersion Tube	Stainless steel
Standard Immersion Tube Lengths (l1)	100, 135, 160, 200, 250, 300, 400 mm
Thread Connection	Adjustable compression fitting
Thread Size	G1/2, G3/4

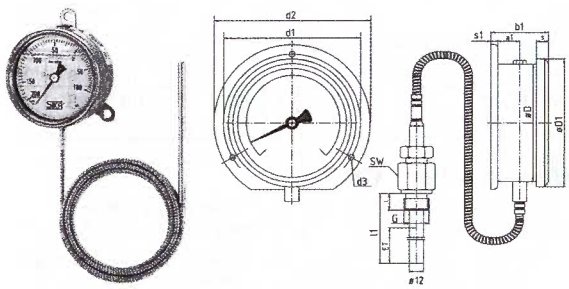
Remote reading - Type 320 for measuring ranges -200...100 °C

For monitoring temperature critical cooling applications, and suitable for the use in various cooling applications.

Remote reading low temperature dial thermometers

were specifically developed for measuring points which are not directly accessible. The capillary of these measuring devices is protected by a stainless steel spiral tube and therefore always adapted to the demanding operating conditions on the high seas. Protection of the measuring system by a vibration absorbing case filling, and stable, durable housing design made of stainless steel.

Typical Applications
- Gas transport for LNG, CNG, LPG, etc.
- Cooling ships and other cooling vehicles.



with Rear Mounting Flange

Exhaust Gas Thermometers

Remote Reading

Based on the same system as the direct mounting exhaust thermometers. The case is filled with a shock absorbing liquid of high viscosity. 3 types of case configuration are available; wall bracket, rear flange or U-clamp for panel mounting.

Approved by German Lloyd Certificate No.12 027-98 HH.

When ordering, please specify the capillary length according to the customers needs, in addition to 6 digit IMPA code number.

Diesel Engine Dial Thermometers

with Integrated Temperature Sensor KombiTemp K8312

An ideal solution for combined temperature measurement of exhaust gas on large diesel engines. The dial thermometer displays the temperature locally whereas the integrated sensor provides the basis for the corresponding electrical signal to be transmitted to the engine control room.

Measuring in the same measuring point saves cost and ensures matching temperature values both at the local display as well as in the vessel's electronic system.

Two different versions for common diesel engine types: version 1 for 4-stroke engines and version two for 2-stroke engines.

Performance features :

- Two in one measuring point temperature measurement.
- Matching indicator values of dial thermometer and temperature sensor.
- With thermocouple type K.

7TH 65

Technical Data	
Case	Bayonet ring case, st. steel 1.4301
Nominal Size	80 mm
Case Filling	Silicone oil
Dial	White coloured, black markings
Display Range	50...650 °C
System/ Accuracy	Gas-filled dial thermometer acc. 1,0, DIN EN 13190, Thermocouple type K (NiCr-Ni), class 2.0
Electrical Connection	Cable output with 9 m cable length (version 1) 2 pole MIL connector, without cable (version 2)
Degree of Protection	Dial thermometer IP65 Electrical sensor IP56
Connection Position	Bottom connection
Immersion Tube Length/Material	l1 = 115 x Ø 13 mm (version 1), st. steel 1.4571 l1 = 220 x Ø 13 mm (version 2), st. steel 1.4571
Connection Thread/Material	Union Nut, G 3/4, brass

Temperature Calibrators

Exact temperature measurement and monitoring are "musts" in applications crucial to operational safety of machinery and industrial installations. In 2002, this was applied to all ships by the Safety of Life at Sea (SOLAS), Chapter IX and the ISM (the International Safety Management) Code as mandatory regulation. Regular inspection of the temperature sensors used in these applications is essential for economic and technical safety reasons and is already prescribed as obligatory in many sectors.

This calibrator contains an electrically controlled metal block with a bore for the insertion of the test piece. Adaptor sleeves are used for test pieces with smaller diameter. The block is mounted in a heat insulated housing.

The complete electronic is located in the front of the calibrator. The required temperature is easily set on the digital controller. The current temperature will automatically be adjusted to the set value. The current temperature and set temperature are constantly shown on the 2-line, 4-digit, 7-segment LED display.

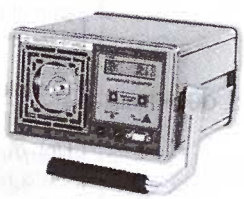
Temperature Calibrators

Supplied in a robust carrying case with low weight and compact design make the calibrators ideal for "on site" calibration. The calibrators will fulfill requirements in connection with quality assurance program as well as requirements from classification societies.



* Temperature Calibration

The metal block principle excludes the use of oil or other liquids. Interchangeable insertion tubes with various diameters ensure thermal contact to the sensor being tested.

Simply place the sensor to be calibrated in the calibrator. Set the temperature. From the dual line display both true and set temperature can be read. When stabilisation occurs simply read the true temperature from the calibrator and recalibrate the sensor or system accordingly.

Unit Per Set

CODE	**65 25 11**
Model	TC600M

Well Depth	155 mm
Well Dia.	1"
Thermostat Test	Yes
Power Supply	115/220 volt
Weight	7.3 kgs
Name of Mfr.	ScanSense

Temperature Calibrators TC15M/TC65M

Designed to maintain high accuracy and stability under the most severe conditions, and will fulfill requirements in connection with quality assurance programs as well as requirements from classification societies.

True Calibration - no simulation. The calibrator generates true temperature reference.

Calibration standard - each calibrator is calibrated against precision equipment, which is traceable to national standards, and calibration certificates are supplied with each unit.

Portable - low weight and compact design make the calibrators ideal for "on site" calibration.

Portable Infrared Temperature Calibrators

Used for calibrating long distance infrared thermometer, which are designed with light weight as handhold and small calibrators.

It is easily certify IR pyrometers to 600°C with large 2.25" (57 mm) blackbody target. Resistance thermometer detectors reference well for high precision whether you're using in-line or handheld infrared pyrometers. For even higher precision, a contact calibration well is located directly behind the blackbody surface. Using an optional digital RTD (Resistance Temperature Detector) thermometer and calibrated secondary probe, accuracies of ±0.1°C can be achieved.

Unit Per Set

CODE	65 25 38
Model	DR600P
Temperature Range	50°C to 600°C / 122°F to 1,112°F
Resolution	0.1°C / °F

High Temperature Calibrators
Model WY1200

Ideal for steel, glass, metallurgical industries, cement plants, refineries, fertilizer plants, thermal power stations, marine & offshore etc. It is stable with high temperature source up to 1,200°C for calibration of multiple sensors at high temperature.

Calibration software "485" shall be supplied by optional request.

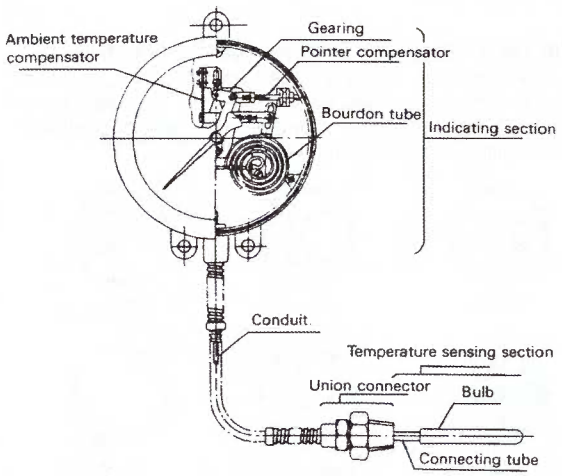
Stability	±0.2°C/15 min.
Block Temperature Control	Digital PID controller, Auto-tune
Well Depth x Diameter	150 mm x 29 mm
Power Supply	90 to 240 VAC, 50/60 Hz
Power Consumption	1,200 W
Dimension	180 x 300 x 370 mm
Weight	9.5 kgs

Name of Mfr. : Clip-on

Mercury Actuated Dial Thermometers

Mercury actuated dial thermometers measure the temperature of an object regardless of the exterior temperature of environment. There are two types: a remote reading type and a rigid stem type. These temperatures are compensated for ambient temperature. The section from the bulb to the Bourdon tube of the thermometer is filled with mercury that is under pressure. Any temperature change around the bulb will cause the Bourdon tube to move thereby creating a change in the indicator needle.

These thermometers are sturdily constructed to precision specifications and thoroughly inspected before packing. Resistant to shocks and vibrations.

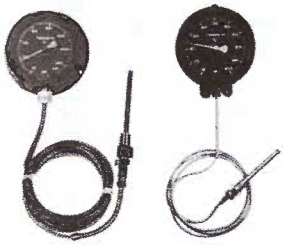


General Specifications

1. Type	Wall (surface) mounting type	
	Flush mounting type available for both "round flange" and "square flange"	
	Straight stem type	
	Electric contact feature, also available with microswitch if requested.	
2. Materials	Case & cover	Cast aluminium
	Flexible tube	Stainless steel (SUS304)
	Union connector	C3602 or SUS304
	Capillary	Copper plated iron
	Angle Stem	SUS304 or FCMB
	Stem	SUS304 or SUS316
	Flange	SUS304
3. Outer Finish	Scale plate	Anti corrosive painted in black
	Flexible tube	Stainless steel available for vinyl cover on tube, if requested.
	Union cone and flange	Stainless steel
	Stem	Stainless steel finish

(to be continued)

1. Dial Thermometer for remote reading



Standard Specifications

Optional Temperature Range	-50°C - +500°C	
Dial Outside Diameter	100 mm	150 mm
Capillary Length with Spiral Standard Option	 3 meters Up to 30 meters	
Bulb Thread & Size	PT(PF) 1/2, 3/4	

When ordering above, please specify
1. Temperature range.
2. Dial diameter.
3. Length of capillary with spiral.
4. Bulb thread and size.
5. Bulb length.

65 25 16 (Example)	Remote reading dial thermometer, dial diam 100 mm. 150°C, 2 meters, 100 mm bulb PT 1/2	Pc.

2. Dial Thermometer of stem type for ship's engine use

Straight Vertical Connection

Straight Horizontal Connection

Standard Specifications

Connection Type	Straight vertical connection	Straight horizontal connection
Measuring Range	Optional temperature ranges within 50 ~ 650°C & °F	
Dial Diameter	100 mm	
Stem Length " Diam.	300 mm 12 mm	
Connection	PT(PS) 1/2, 3/4	
Use	Fits directly into the diesel engine exhaust pipe	

When ordering above, please specify
1. Temperature range.
2. Connection type.
3. Measuring range.
4. Dial diameter.
5. Stem length and diameter.
6. Connection type size thread.

65 25 17 (Example)	Stem type dial thermometer, 650°C vertical connection dial diam. 100 mm stem 300 mm x 12 mm PT 3/4 connection	Pc.

Temperature Sensors

For measuring the temperature difference between two points by pairs of dissimilar metal wires, and used in many appliances like indicators and controllers. There are various types of sensors for different applications. Please refer some temperature sensors as listed for major applications for your guidance.

Temperature Sensors
for Exhaust Gas Temperature Measurement

Technical features
- Very high vibration resistance.
- One-piece protection tube.
- Available with optional instrument transformer.
- Customer-specific fitting lengths and fixing thread on request.

Specification

Accuracy Class	:	Resistance thermometer class B Thermocouple class 1
Measuring insert is demountable		
Diameter (acc. immersion tube length)		
	:	14/17 mm conical up to 150 mm
	:	17/23 mm conical up to 150 mm 20/23 mm conical from 200 mm
Degree of Protection	:	IP 54
Max. Temperature	:	Depending on immersion tube material
Process Connection	:	Fix connecting thread
Electric Connection	:	Head form B made of aluminium die casting, silver finish, max. temperature : 200°C
Approvals	:	DNV GL type approval

How to order :

Manual Temperature Monitors of Bulk Cargo

Cargo Temp Roller

A manual mobile temperature monitoring device of bulk cargo. Easy to handle, cable with depth indication, large integrated LC display and comes in a sturdy plastic suitcase.

As a basic principle, all goods falling under the IMDG Code, chapter 2.4 class 4.2, should be temperature monitored, in order to detect the incipient self-heating process in time. Many products are self-heating and/or self-igniting as bulk cargo. This autonomous process may lead to the cargo destroying itself, if measures to counteract are not taken in time.

Unit Per Set

CODE	**65 25 20**
SIKA Code	ETCTP000350004
Measurement Input	Pt1000 / 2-wire
Cable Length	35 mtr
Cable Design	Temperature proofed, braided FEP cable, with 6 marks every 5 meters for depth indication, Tension = 50 N
Measuring Probe	Length = 100 mm, ø = 20 mm, weight = 200 grm
Measuring Input	Pt1000 / 2-wire
Measuring Range	-40.0 to 150.0°C
Resolution	0.1°C
Accuracy	±0.5% FS ±1 digit
Display	3 1/2 digit LCD, 18 mm high
Measuring Rate	3 sec.
Power Supply	Maintenance-free battery
Battery Life Time	Approx. 10 years
Degree of Protection	IP40
Housing Size	ø approx. 210 mm, depth 95 mm, handle 45 mm
Weight	2 kgs incl. case
Accessories	Portable ABS-plastic case with foam inlay case Dimensions 394 x 294 x 106 mm

Name of Mfr.: SIKA

Marine Approved Advanced Temperature Calibrators

JOFRA ATC Series

The ATC series offers a wide temperature calibration range (-90 to 650°C) and improved stability (+ 0.01°C for most models) for marine calibration. It utilizes innovative dual-zone heating technology for precision calibration of sensors. Independent heating control allows the lower zone to ensure optimum heat dissipation throughout the entire calibration zone, while the upper zone compensates for heat loss from the sensor-under-test and the open top. This design also eliminates the need for insulation of the sensors-under-test and allows calibration of liquid-filled and other mechanical sensors.

Major Features:

- 12-month accuracy to ±0.04°C / 0.07°F.
- Temperature range -90° to 650°C / -130° to 1,202°F.
- Stability to ±0.01°C / 0.018°F.
- 14 different models.
- MVI stability circuitry.
- 100% automatic calibration.
- RS232 interface and JOFRACAL calibration software.
- Input for external reference sensor and sensor-under-test.
- Timesaving auto-stepping and temperature switch test functions.
- Interchangeable inserts including multi-hole designs.
- Active dual-zone.

See more details about the models in ATC series in the following table, and order referring to ordering information.

Marine Temperature Calibrators

JF MTC Series

Probably the most popular marine temperature calibrator in the world! The MTC series facilitates the unique JOFRA MVI system, which ensures full stability, even if the mains supply is ±20 VAC! A true timesaver. Large inserts make these calibrators suitable for even large exhaust sensors, and liquid filled temperature switches. The MTC series features a large easy-to-read backlit display that provides icons and information regarding the status of the MTC and the calibration in progress. The MTC series also features an auto-stepping function, which makes it possible to stay in the control room or on the bridge to monitor the temperature reading while the calibrator, located in the engine room by the sensor, automatically steps through a number of pre-programmed temperatures thus performing a full loop calibration.

Major Features :
- 12-month accuracy to ±0.4°C / 0.7°F.
- Temperature ranges -17 to 650°C / -1 to 1202°F.
- 3 different models.
- RS232 interface and JOFRACAL calibration software.
- Stability indicator.
- Timesaving auto-stepping and switch test functions.
- MVI stability circuitry.
- Interchangeable inserts including multiholes.

See more details about the models in MTC series in the following table, and order referring to ordering information.

Advanced Signal Calibrators

Model ASC300

The growing amount of various electrical sensors in marine electronics makes instruments like JOFRA ASC300 more and more useful. Quick and easy measurement and simulation make it ideal for maintenance and calibration. The JOFRA ASC300 combines a full numerical keypad with a series of function keys and a graphical user interface, which makes it easy to perform various tasks in a short time. The two channels provide the user with an isolated read-back circuit. The JOFRA ASC300 has full fuseless protection to 240 VAC, which is an important feature as most failures in signal calibrators derive from over-voltage conditions. As the instrument is compatible with JOFRA APM pressure modules, it offers a true multi-function operability.

Major Features :

- Accuracy to ±0.2°C / 0.36°F.
- Simultaneous input and output.
- Input and output: TCs (13 types), RTDs (14 types), 0-20 VDC, 0-24 mA, 5-4,000Ω, 0-10 kHz, and pulse trains.
- Isolated read-back circuit with 24 VDC loop power.
- APM pressure module input for pressure applications.

FP Temperature Sensors

1800 series

Marine sensors type approved for marine applications such as measuring exhaust gases and cooling water in diesel engines as well as product and room temperatures in refrigeration stores. The temperature sensors are specially designed with high resistance against vibration according to IEC 68-2-6. Approved by Lloyds Register of Shipping and Det Norske Veritas.

The 1800 – 1812 series of temperature sensors is typically used within the following fields of applications:

- Marine sector
- Diesel engines for generators
- Generators
- Big ship engines
- Containers
- Refrigeration industry

Unit Per Set

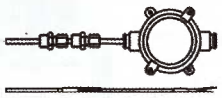
65 25 51	
1801 – Type UST 1 Thermocouple assembly for exhaust gases 	Measurement of exhaust temperature in ships and stationary diesel engines. The operating range is up to 800°C in gaseous media.
65 25 52	
1802 – UST 2 Thermocouple assembly for exhaust gasses with interchangeable insert 	Measurement of exhaust temperature in ships and stationary diesel engines. The operating range is up to 800°C in gaseous media with high flow velocity.
65 25 53	
1803 – Type UST 3 Thermocouple assembly UST 3 for exhaust gasses with interchangeable insert 	Measurement of exhaust temperature in ships and stationary diesel engines. The operating range is up to 800°C in gaseous media with high flow velocity.
65 25 54	
1804 – Type RM 2 Resistance Thermometer, room sensor for ships 	Measurement of temperature in rooms e.g. refrigeration, freeze and cargo stores, specially onboard ships. The operating range is from -40 to 80°C.
65 25 55	
1805 – Type IM Resistance thermometer, insertion sensor 	Measurement of temperature in e.g. meat and fruit during transportation specially onboard ships. The operating range is from -40 to 70°C.
65 25 56	
1806 – Type GM Resistance Thermometer GM, vulcanized with rubber 	Measurement of temperature in cold and wet areas e.g. in cargo rooms, in refrigeration and fishing ships, reservoirs and containers. The operating range is from -40 to 70°C.

(to be continued)

65 25 57

1807 – Type ST

Thermocouple assembly, stern tube

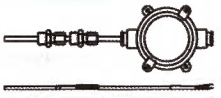


For measurement and surveillance of bearing temperature in stern tubes on ships in order to avoid damages and breakdown of costly equipment. The operating range is up to 800°C.

65 25 58

1808 – Type SM

Resistance Thermometer, stern tube

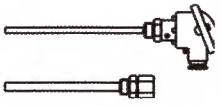


For measurement and surveillance of bearing temperature in stern tubes on ships in order to avoid damages and breakdown of costly equipment. The operating range is up to 400°C.

65 25 59

1809 – Type BFM

Resistance Thermometer, screw-in type with fixed insert. Classified.

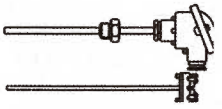


Measurement of temperature in gasses, vapours and fluids in pipes and cooling systems. Threaded connection to the process directly or with separate screw-in pocket. The operating range is up to 250°C, max. 50 bar and flow velocity is up to 25 m/sec (air).

65 25 60

1810 – Type BM

Resistance Thermometer, screw-in type with interchangeable insert



Measurement of temperature in pipes and containers with gaseous and liquids media, such as air, vapour, gasses, water and oil. The operating range is up to 600°C, max. 50 bar and flow velocity is up to 25 m/sec (air).

65 25 61

1812 – HLM

Resistance Thermometer HLM for bearing and surface temperature measurement

For measurement and surveillance of bearing temperature on ship engines and machine constructions. Can be used on surfaces up to 180°C.

Name of mfr. : Ametek Calibration Instruments

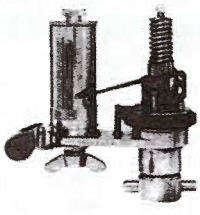
The above listed items are the most common types, but high speed, high pressure types are also available.

Engine Indicators



The engine indicators are the pressure measuring instruments for reciprocating engines. They record the pressure change in the cylinders of internal combustion engines, reciprocating steam engines and gas or air compressors. The results are used for checking uniform and efficient performance of each cylinder, thus to assess the engine characteristics and to calculate the generated horse-power.

Planimeters

for Engine Indicator

Used to determine the average effective pressure from the indicator diagram of the engine indicator easily and accurately. Also capable of, similarly to ordinary planimeters, measuring the area of intricate plane figures.

Clip the figure to be measured on the plate to move the stylus along the closed figure. The difference between readings on the graduated ring before and after the stylus trip will provide the movement area of the figure in cm².

* Range of the stylus ..... within 65 x 130 mm
* One graduation on the ring .... 1 cm²
* Accurate reading ..... up to 0.1 cm²

65 26 21	Planimeter for engine indicator	Set

Engine Peak Indicators
(Peak Pressure Gauges)

For easy and quick measurement of the maximum peak pressure of engines. Consists of three major components: a check valve, a pressure gauge and an exhaust valve. The maximum peak pressure is directly read on the dial when the indication has settled. There is no need for diagram acquisition, area measurement with a planimeter, or length measurement with a scale. Oil-filled pressure gauges are used as indicators to provide outstanding vibration-resistant and heat-resistant characteristics. The internal pressure is released to zero by opening the exhaust valve after measurement.

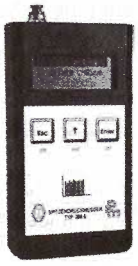
Electronic Peak Pressure Gauges
Type 300 E



The instrument, suitable for any type of combustion engine, is characterised by a very easy to handle 3-key, menu guided operation. Peak pressure and automatically calculated rotational speed for up to 64 cylinders can be stored into the gauge. The results are shown as column chart and as numerical values. The extended version stores, in addition, date and time of the measurement. All data may be transferred to a PC, for evaluation and archiving.

Technical Data

Measurement Range	0 - 300 bar
Sensitivity	5 - 99 pC/bar
Tolerance	≤ 1% FS
Revolution	30 - 3,000 rpm
Store Capacity	64 cylinder (20 cylinder/engine)
Number of Measured Cycles	5 40
LC-display	120 x 32 pixel
Switch off Automatic	After 5 minutes without any action
Power Supply	Internal NiMH-accumulated 3.6V, Life time without charging 20 hours.
Charge	Input: 220 or 110V, output 7.5V
Input	3 keys foil pad
Size	84 x 133 x 30 mm

Electronic Indicator Systems
Type HLV 2005 MK

A microprocessor controlled portable instrument for quick and simple recording of combustion pressure cycles in combustion engines. The evaluation of the data is carried out with a PC-system. The data recorded by this indicator are transmitted via serial interface to a PC.

- Graphic display of recorded values for each cylinder.

- Computation of mean indicated pressures.
- Computation of the power of each cylinder, as well as for the whole engine.
- Graphic display of indicator graph (p-V graph).
- Zoom and shift function for detailed display of any portion of the graph.
- Output of any graph to a PC printer.
- Saving of all recorded and engine data on mediums or hard disk.
- Export of data in ACS II format, for further processing on any standard software, e.g. Excel.

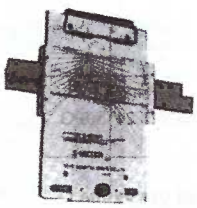
∑ (Sigma) – Meters



Is a scale with which you can calculate the effective average pressure of the ships main diesel engine with the indicator card easily and accurately. The addition of P1 + P2 .... P10 on the indicator card can be read more quickly and precisely by simply sliding the transparent 3 slides on the indicator card. The size of the scale plate is 130 x 200 mm. This unit is made of plastic and is light, compact, and easy to handle.

65 26 51	Sigma meter, 130 x 200 mm	Pc.

Indicator Paper

Recording paper for use with an engine pressure indicator.

Can be furnished in white or red for the sizes listed below. Provided in pads of 50 sheets.

Unit Per Pad

CODE	Type	Size
65 26 54	M-2L Metalic White	65 x 181 mm
65 26 55	M-2 Metalic White	66 x 146 mm
56	M-2 Red	66 x 146 mm

65 26 59	W-3 Metalic White	35 x 113 mm

Indicator Cord

With wire center cord for use with an engine pressure indicator.

65 26 60	Indicator cord	Mtr

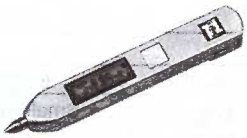
Crankshaft Distortion Dial Gauges

An inside gauge for checking the distortion of webs on crankshafts. With these gauges it is possible to check bearing alignments or deflections of the shaft without having to dismantle the engine.

Usable on diesel engine shafts as well as center crankshafts of engines or compressors. Can also be applied as a strain gauge on engine frames while the engine is in operation. Indicator is graduated in increments of 0.01 mm with a reading of 0 - 50 - 0 one turn equals 1 mm. 6 rods and one extension are included providing a range of sizes from 100 to 500 mm.

65 26 70	Crankshaft distortion dial gauge, in 0.01 mm graduation, 100 to 500 mm	Set

Pen Type Vibration Testers



For fast failure detecting of motor, electric fan, pump, air compressor, machine tools and so on, and for prompt testing of vibration on the workshop machines as well as for quick checking of unbalance and misalignment of bearings and gears. Holding tested value for 40 seconds, and automatic switch off after 40 seconds.

Unit Per Pc.

CODE	**65 26 71**
Model	TA415EB
Velocity Range	0.01 mm/s – 199.9 mm/s (RMS)
Frequency	10Hz ~ 1,000Hz
Accuracy	±5% ±2 digits
Display	3 ^ 1/2 digital LCD
Power Source	LR44 x 2 pcs
Size	150 x 22 x 18 mm
Weight	55 grm

Name of Mfr. : ICHINEN TASCO Co., Ltd.

Inspection Mirrors

Designed for inspection of the rear as well as inaccessible areas of precision machinery. All models have an insulated handle except 65 27 01.

The angle of the mirror head on these units is adjustable.

65 27 01 ... For use in tight and narrow place

65 27 02 ... With plastic handle

65 27 03 ... 2 Extension Shaft

65 27 04... Flexible Tube Shaft

Concave magnifying mirrors (38 mmø, 50 mmø) are available for 65 27 02 – 04 and also plain square mirrors (50 x 100 mm) for 65 27 02 and 03 available upon request.

Unit Per Pc.

CODE	Mirror Size	Type	Overall Length	Weight grm

20 Times Microscope Probe Tubes

A microscopic probe that magnifies images up to 20 times their original size. Fitted with a light making it suitable for the internal inspection of diesel engine fuel nozzles. The inspection tube is 4.8 mm in diameter, furnished with two spare lamps, 2 pieces of dry batteries R20P (UM-1) and a 45° reflector for side inspection.

Supplied with a carrying case. A 70 mm long table is also available upon request.

Unit Per Set

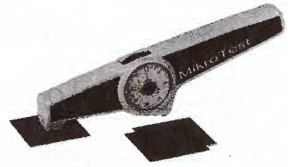
Magnetic Coating Thickness Gauges



Non-destructive thickness measurement of non-magnetic coatings, e.g.: zinc, copper, chrome, cadmium, etc. Also paint enamel, plastic, etc. on iron and steel. The measurement of film thickness depends on the degree of magnetic attraction to a surface. The attraction depends on the distance of a permanent magnet from a steel surface. This distance represents the thickness of a non-magnetic coating. No power supply or calibration necessary.

Ambient temperature: -20°C...100°C, · Dimensions: Gauge 215 mm x 55 mm x 29 mm, · Plastic carrying case 235 mm x 185 mm x 46 mm, · Weight: Case incl. gauge approx. 560 g.

Type	Application
Standard version	
5/6 G	Electroplating and paint coatings on steel**

Ultrasonic Thickness Indicators

Applicable for measuring the wall thickness and state of corrosion of tanks, pipings, hull plates of ships, and structures. Extremely compact and light weight, simple to measure the thickness by attaching the probe.

Quick display update with last reading retained on the display. Display symbols alert user to poor coupling and low battery conditions. Automatically shut down when not in use for 3 minutes.

General Specifications

Measurable Materials	Steels, cast iron, stainless steel, other metals, glass, hard plastics, ceramics
Measuring Method	Ultrasonic pulse echo method
Display	Liquid crystal device with illumination light button
Power Supply	LR6 (SUM-3) alkaline battery x 1
Test Piece for Calibration	5 mm thick test piece installed on the main frame
Velocity Range	1,000 m/s to 12,000 m/s
Dimensions	W69 x D144 x H29.5 mm
Weight	150 grm (main frame), 50 grm (probe)

Cable Break Position Locators

Works by sending a fixed signal between two conductors and measuring the capacity of the returning signals and indicating them on the recombination meter. Suitable for pinpointing broken wires on all types of 2-wire cables and coaxial cables, measuring the length of cable, and checking poor circuits.

Specifications

Measuring Range	1 m - 1,000 m x 1 m x 10 m x 100 m } 3-range change over system
Power Source	R6P (UM-3) x 4 pcs, 6V
Current Consumption	Approx. 15 mA
Dimensions	163 x 100 x 47 mm
Weight	Approx. 300 g

65 27 50	Cable break position locator	Set

Thermal Imagers

Ideal for maintenance engineers and can be used to quickly find faults and identify failing components to save money.

Electrical Safety :
- Identifies overloaded circuits, loose / corroded connections and failing breakers in electrical panels.
- Identifies blown fuses, overloads, phase imbalance, and harmonics problems.
- Identifies hot spots from high resistance connections.

Preventive Maintenance :
- Identifies equipment efficiencies / inefficiencies.
- Application include motors, pumps, boilers, radiators, heaters, chillers and transformers.

Energy Efficiency
- Identifies inefficient heating and cooling transfer.
- Identifies draft sources from missing insulation in rafters / walls / floors.
- Identification of problem areas helps reduce heat gain / loss and carbon footprint.

Features :
- One Navigator Key Operation.
- 16,384 pixels thermal image after interpolation.
- True D/S 30:1 with precise laser indication.
- Bright flashlight with 5 white LEDs.
- Ergonomically designed pistol grip housing with excellent industrial design.
- Quick response time (<300 ms).

Intrinsically Safe Thermal Imaging Cameras

Draeger UCF® 7000

Valuable tools for orientation when fire, smoke and darkness make navigation difficult. Designed to maintain your orientation to see where you are going as well as for finding persons or hotspots. The camera provides a clear plus when it comes to safety and reliability, ease of use and decision making assistance for demanding firefighting jobs.

One of three additional operating modes is quickly selected just by pressing a button:
- Fire (firefighting)
- Persons (search and rescue)
- ThermalScan (searching for hotspots)

The "snapshot"-function is used to provide a temporary freeze-frame of thermal image, which can then be viewed on the display. This allows personnel to examine and check out even difficult to access areas quickly and safely.

The integrated laser pointer significantly simplifies pointing out the position of hazards – such as hotspots – to other team members and clearly defines the path of attack.

The camera is supplied with USB 2.0 interface by default, which makes it possible to configure the camera (e.g. setting an individual start image) and transfer the thermal image directly to a PC. Recorded images and video sequences used for documentation purposes can also be transferred to a PC.

The camera is intrinsically safe (ATEX zone 1) and offers the maximum level of safety and reliability in potentially explosive atmospheres.

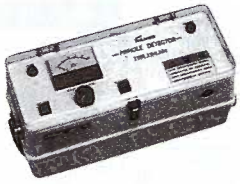
Pinhole and Holiday Detectors



An instrument for detecting and indicating the locations of pinholes and fractures in non-conductive coatings (paints, linings, films, porcelain, enamel, coal tar, asphalt, etc.) that are applied to a metal surface. Completely transistorized, low frequency electrical pulse generator assures efficient detections with no harm to the coatings. They also permit indirect grounding. Output voltages are variable as desired and readable on built-in meters. Units are housed in portable dust and moisture proof PVC sturdy cases.

(to be continued)

General Specifications	
Principle	Low frequency, high voltage, pulse discharge
Test Voltage	Variable peak voltage with a direct reading meter
Power Source	Built-in NiMH battery(AC100V rechargeable)
Probe	Joint type for 540 - 870 mm, PVC made with brush holder and cord 5 mtr
Accessories	Joint type probe, grounding cable 5 mtr, switching lead cord, power source cord and flat type brush electrode 30 x 300 mm 2 pcs

Portable Ultrasonic Liquid Level Indicators

Designed to inspect the liquid level of Fire Suppression System Cylinders by Ultrasonic Waves. The unique Extension Rod allows the operator to test effectively for multi-bunked Cylinders, reaches 2nd, 3rd and 4th rows deep to make the measurement as quick as possible. The equipment is proven accurate to +/- 1.5 mm and significantly safer and quicker solution when compared to weighing as a means of identifying cylinder content. RINA Classification Society Approved. UL-approved. NATO-approved.

Portalevel™ Max Marine

Portamarine™

Portalevel™ Max Marine

Designed for testing CO_2, FM-200™, NOVEC 1230™, FE-13, FE-25, NAF S III, CEA410, Halons and a range of other extinguishing agents. With a Mini-Marine Extension Rod enabling the sensor to take measurements of the ships 2nd, 3rd, and 4th banked cylinder rows.

Portamarine™

Designed specifically for testing multi-banked CO_2 Cylinder in ships Fire Suppression System. It can be also used on FM200™, NOVEC 1230™, and variety of other clean agent systems. Carrying strap enables hands free operation for quick inspection.

*Available in two variants Extension Rod.

Standard marine Extension Rod – 20 mm – ideal for the vast majority of applications and Standard spacing between cylinders.

Mini-Extension Rod – 12 mm – The compact, lightweight variant at only 14 mm wide, able to work on even the most tightly packaged cylinder system.

Portable Ultrasonic Watertight Integrity Test Indicators

Designed for inspecting almost any watertight, gas-tight or weather-tight seal for areas of weak seal compression or leak sites, by using ultrasonic technology. Primarily for testing the seal integrity of watertight compartment doors, hatch covers, and multiple cable transit areas, and also for hatches, storage tanks, bulkheads and other watertight compartments. Pin-point accuracy to 0.06 mm with a tolerance of +/-0.02 mm, quicker, cleaner and more efficient watertight integrity testing, ideal to replace high pressure hoses testing or chalk testing. It comes complete in a protective carrying case including receiver, standard generator, extension rod "Wand", headphones, and operating instructions. RINA Society approved. NATO-approved.

Portable Tank Condition Detecting Systems

A measuring unit to note all important tank conditions for compliance with SOLAS and MARPOL regulations.

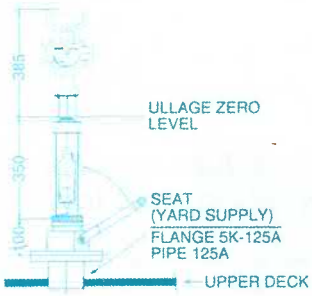
This device will measure tank conditions such as the cargo level, the oil – water interface level, the temperature, and a dry check to determine the level of water at the tank bottom.

The gauge is explosion proof and portable weighing only 4.3 kgs. It has a measuring range of 0 – 30/35 mtr for ullage and a 0 – 100°C temperature range. It is powered with a 2.4 V rechargeable battery and can be provided with optional gas and oil sampling units.

Equipped with a vapor seal valve necessary for compliance with USCG regulations for Marine Vapor Control. Allows you to take samples from tanks that are closed and pressurized.

Accessories included :
- Carrying bag
- Sink weight
- Dry check adaptor
- D.C. charger

Optional equipment :
- Digital thermometer
- Gas sampling unit
- Oil sampling unit



65 27 81	Portable tank condition detecting system	Set

Viscosity Meters

Suitable for one-point viscosity measurement of oil, fat, paint, medicine, etc. Due to handy and high durability compact mechanism, it requires only 10 seconds for measurement. The instrument can measure a wide range of viscosity by changing rotors. When ordering, please specify kinds of fluid to be measured, atmospheric temperature, flow characteristics (Newtonian or Non-Newtonian), etc.

Specifications

Measuring Range	50 - 2,000 mPa•s(cP) (Standard rotors) 10 - 200,000 mPa•s(cP) (Optional rotors)
Accuracy	±4%
Rotor rpm	20 rpm
Power Source	R14P (UM-2) battery x 4 pcs
Weight	1.3 kgs
Accessories	1 pc Rotor No.1, 50 - 500 mPa•s (cP) 1 pc Rotor No.2, 200 - 2,000 mPa•s (cP)

Titra-Lube TBN Test Kits

A unique system for determining the base number in both petroleum based and synthetic based oil. The kit brings accurate and reliable total base number analysis, and requires no calibration or instrumentation and uses no dangerous solvents or chemicals. TBN (Total Base Number) is the measure of reserve alkalinity (base) added to lubricating oils to protect the engine from the corrosive effects of acids formed during the combustion of fuels containing sulfur.

The kit comes with a preset fixed volume disposable sampling syringe that is used to take the oil sample for testing, and the test provides a colorimetric determination of TBN between 0 and 20 mg KOH per gram of sample, showing the TBN number of the side of the burette. The kit comes in 20 tests (individually packaged) per carton.

65 28 21	Titra-Lube TBN test kit, individually packaged, 20 packags/carton	C/T

Name of Mfr: Dexsil Corporation

Lube Oil Test Kits
for 5 Different Tests

Specifically designed for conducting advanced test analyses of lubricating oil condition directly on-site. The portable test devices offer easy, quick and accurate measurements of five important oil parameters: water-in-oil content, base number, oil viscosity comparison, salt water and soot contamination. Regular assessment of these parameters gives direct and comprehensive information to ship operators, engineers and users about any occurring changes in the oil condition. Trend monitoring with the LUBE OIL CHECK 5 might help to reduce maintenance expenses as well as to prolong the operating time of the engine system components.

Specifications

	Water-in-Oil	BN	Viscosity Comparison	Salt Water Test	Spot Test (Soot Contamination)
Measuring range	0 - 1.0 vol. % H_2O	0 - 100 BN	max. lube oil	go / no go	all lube oils
Measuring time	up to 20 min. (maximum total reaction time)		about 3 min.	about 10 min.	about 1 min.
Accuracy	+/- 3 %	+/-1 BN			

Items included in the test kit: TWIN Check test unit; WA-SOL® - water-in-oil reagent composition kit (WA-SOL® Basic and WA-SOL® Activator); ALCA Solution for BN test; VISCOSITY COMPARATOR with 2 syringes of 5 ml; Solution W, indicator pads and other accessories for salt water determination; Spot Test paper A4 and glass rod; cleaning spray Test Kit Cleaner, 4 syringes 10 ml, plastic beaker and safety gloves (set of 5 pairs)

65 28 22	Lube Oil Test Kit, for 5 Different Tests, LUBE OIL CHECK 5	Set

Name of Mfr.: Martechnic GmbH

Marine Portable Water Test Kits

From the issue of MLC2006, every ship has been required to examine and record the quality of drinking water. Check items are mainly referred to the guideline by WHO, specific directions for items and the frequency of the examination are depends upon discretion of each nation administration.

Marine portable water test kit contains everything needed to monitor the drinking water onboard in compliance to WHO guidelines, ILO 178 (2009), MLC (Maritime Labour Convention, 2006) and IHR (International Health Regulations, 2005) requirements.

Application ; One sample should be directly from the tank and one sample at the furthest point of the distribution system. The tank sample gives information about the quality of the water supply on board, while the bridge sample gives information about the quality of the water for the consumer. It is recommended that Microbial Load be monitored at representative taps. Records of readings must be documented, and should be maintained for 12 months and should be available.

Test Kit Contents;

Test	Range	Comments
pH	6.8 – 8.4	Ideal pH depends on the materials used. A pH above 8.0 does not allow effective water disinfection with chlorine and should be assessed further.
Free chlorine (DPD 1)	0.01 – 5.00 mg/l	For effective disinfection, there should be a residual concentration of free Chlorine of at least 0.5 mg/l.
Total chlorine (DPD 1 & 3)	0.01 – 5.00 mg/l	Complemental / confirmational to free Chlorine.
Cyanuric acid	2 – 200 mg/l	Cyanuric Acid protects Chlorine from the sun. No traces should be detected.
HPC (at 20 °C) HPC (at 37°C)	Growth of colonies	Heterotrophic Plate Count. No abnormal deviations should be observed. Do not consume water in case of rapid growth of the colonies on any side of the test pad.
Total coliforms	Growth of colonies	No abnormal deviations should be observed. Do not consume water in case of rapid growth of the salmon / red colonies on the test pad.
Entero-bacteria	Growth of colonies	No abnormal deviations should be observed. Do not consume water in case of rapid growth of the colonies on any side of the test pad.
E. coil	Growth of colonies	Escherichia coli, should be 0 cfu / 100 ml. Do not consume water if blue / violet colonies are formed on the test pad.
Refill pack	As above	Includes all chemical & microbial load monitoring reagents
Items included in the kit	Instrument, Carrying case, Instructions, 4 Crushing rods, Test tube brush, 4 Photometer tubes, and all tests mentioned in this table.	

Note: Instructions are based on literature and are meant only as a guide since circumstances and Flag Administration Requirements vary. They are not intended to interfere with the judgment of the vessel's responsible personnel.

65 28 25	Test kit, water, marine portable	Set

Karl Fischer Moisture Titrators

Up to 4 titrators , Automatic potentiometric titrator (AT-710B) or Coulometric (MKC-710B) or additional Volumetric (MKV-710B) Karl Fischer moisture titrator can be connected and simultaneous measurement is possible.

Titrant Information is stored in an IC chip in the burette unit (Smart burette). The main control unit and a titrator are separately located by wireless (Bluetooth(R)). Large color TFT-LCD with a touch panel (8.4-inch). Two different user levels and permissions. Measurement results are converted to PDF and can be stored in a USB flash drive. When using a patented scan mode (ADP-611) automatically determines the optimal evaporation temperature. End point detection by compensating liquid resistance is adopted. Can resume titration automatically after interruption. Automatic solvent change unit is included.

For Volumetric Moisture Titration

Model	MKV-710M
Product configuration	MCU-710M+MKV-710+IDP-100+ Automatic Solvent Change unit
Measuring Range	Water content: 0.1 – 500 mgH_2O (depends on KF reagent factor) Concentration: 10 ppm – 100%H_2O
Burette Precision	Capacity: 10 mL burette Discharge precision: ±0.015 mL Reproductibility: ±0.005 mL
EP Detection Method	By polarized potential level detected with a twin platinum electrode
EP Sense Method	Detection of potential level maintained during preset end time. End time range : 1 to 99 sec

(to be continued)

(to be continued)

Unit Per Set

CODE	65 28 31
Titration Form	Normal titration / Back titration (Option additional burette required)
Required Solvent	30 to 100 mL (in S-type titration vessel)
Display	8.4-inch colour LCD 800 x 600 dots Language: English/ Japanese / Mandarin Chinese / Korean / Russian / Spanish / German / French Simultaneous 4-channel display (Can also display Automatic Potentiometric Titrator simultaneously)
Calculation	Concentration of water content , statistics data processing (mean , SD and RSD) and automatic averaging of blank value and factor value
Data Storage	500 samples
Power Source	AC100 to 240 V +/- 10% 50/60 Hz
Dimensions	Touch panel controller : 225(W) x 190(D) x 42(H) mm Titration unit : 141(W) x 292(D) x 367(H) mm (not incl. tubing) Stirrer : 107(W) x 206(D) x 322(H) mm (not incl. Solvent Change unit) Solvent Change Unit : 240(W) x 140(D) x 400(H) mm (not incl. tubing) Printer : 106(W) x 180(D) x 88(H) mm
Weight	Touch panel controller : Approx. 1.5 kgs Titration unit : Approx. 4.0 kgs Stirrer : Approx. 2.0 kgs Solvent Change Unit : Aprox. 0.6 kgs Printer : Aprox. 0.4 kgs
Conformity Standard	CE marking EMC : EN61326-1 LVD : EN61010-1 RE Directive Burette unit EBU FCC Part15 SubpartC FCC ID : 2ABSVEBU01

Name of Mfr. : Kyoto Electronics Manufacturing Co., Ltd.

For Coulometric Titration

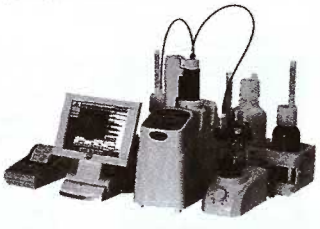
Reduction of power consumption by 30% compared with the conventional product. With a unique mechanism, the ceramic diaphragm of the optional titration cell unit can be replaced. Manual solvent change unit is included.

Unit Per Set

CODE	65 28 33
Model	MKC-710M
Product configuration	MCU-710M+MKC-710+IDP-100+ Automatic Solvent Change unit
Measuring Range	Water content / Bromine index : 10 ug to 300 mg (depends on reagent)
Measurement cell	2-Component or 1-Component
Precision	Relative standard deviation : less than 0.3% (n=10) *Per KEM standard measurement conditions and standard liquids
Control method	Constant current pulse time control
EP Detection Method	Alternate current polarization method with a twin platinum electrode
EP Sense Method	Selective drift stability or limit measurement time
Required Solvent	2-Component cell : Anolyte 100 mL, Catholyte 5 mL 1-Component cell : Anolyte 150 mL
Display	8.4-inch colour LCD 800 x 600 dots Language: English/ Japanese / Mandarin Chinese / Korean / Russian / Spanish / German / French Simultaneous 4-channel display (Can also display Automatic Potentiometric Titrator simultaneously)
Calculation	Concentration of water content , statistics data processing (mean, SD and RSD) and automatic averaging of blank value and factor value
Data Storage	500 samples
Power Source	AC100 to 240 V +/- 10% 50/60 Hz
Dimensions	Touch-on panel controller : 225(W) x 190(D) x 42(H) mm Titration unit : 141(W) x 292(D) x 244(H) mm Stirrer : 107(W) x 206(D) x 340(H) mm (not incl. Solvent Change unit) Solvent Change Unit : 240(W) x 140(D) x 405(H) mm (not incl. tubing) Printer : 106(W) x 180(D) x 88(H) mm
Weight	Touch-on panel controller : Approx. 1.5 kgs Titration unit : Approx. 3.0 kgs Stirrer : Approx. 2.0 kgs Solvent Change Unit : Aprox. 0.6 kgs Printer : Aprox. 0.4 kgs
Conformity Standard	CE marking EMC : EN61326-1 LVD : EN61010-1

Name of Mfr. : Kyoto Electronics Manufacturing Co., Ltd.

Hybrid Moisture Titrators



MKH-700

Equipped such as high-speed & high-precision measurement by "Hybrid titration method" which uses both "Volumetric titration method" and "Coulometric titration method", and "Electrolytic Factor Measurement System" which does not require pure water for factor determination.

"Hybrid titration method" automatically switches between the parallel measurement by "Volumetric titration method" and "Coulometric titration method" by monitoring moisture content in titration cell with high-speed & high-precision measurement, therefore can measure without adjusting the sample amount.

With just pressing one button, the "Electrolytic Factor Measurement System" automatically performs the factor determination of Karl Fischer reagent, and save the time & work without using pure water.

To make the inner burette and diaphragm separate, although after measuring such as petroleum samples, it is easy to clean the diaphragm inner burette.

It is possible to select one method from "Volumetric titration method", "Coulometric titration method", and "Hybrid titration method".

It is possible to store the measurement result, method and manage the data as an electronic record.

Application

Standards	Number	Details
ASTM	D1533	Standard test method for water in insulating liquids by coulometric Karl Fischer titration

(to be continued)

(to be continued)

ASTM	D1744	Standard test method for determination of water in liquid petroleum products by Karl Fischer reagent
	D4928	Standard test method for water In crude oils by coulometric Karl Fischer titration
	D6304	Standard test method for determination of water in petroleum products, lubricating oils, and additives by coulometric Karl Fischer titration
	E203	Test method for water using volumetric Karl Fischer titration
ISO	760	Determination of water – Karl Fischer method (General method)

Unit Per Set

CODE	**65 28 34**
Model	MKH-700
Coulometric Titration	
Measuring Range	Water content : 10 µg - 300 mg H_2O
Precision	RSD : less than 0.3% (n=10) Display resolution : 0.1 µg
Volumetric Titration	
Measuring Range	Water content : 100 µg - 500 mg H_2O (depends on KF reagent factor) Concentration : 1 ppm - 100% H_2O
Burette Precision	Volume : 10 mL Resolution : 1/20,000 Discharge precision : ±0.015 mL Repeatability : ±0.005 mL
Hybrid Titration	
Measuring Range	Water content : 10 µg - 500 mg H_2O
Precision	RSD : less than 0.3% (n=10) (Karl Fischer reagent factor 3 mg/mL) Display resolution : 0.1 µg
Factor Measurement of Reagent by Electrolysis	
Measuring Range	KF reagent : Reagent factor from 1 to 5 (With the provisions of dose volume)
Precision	RSD : less than 1.0% (n=3) (Dose volume 0.5 mL, Reagent factor 3 mg/mL)
Number of Methods	Coulometric/ Volumetric Hybrid : Up to 50
	Factor measurement : 1
Data Storage	On-board memory : 300 data
	External memory : Memory card (Compact Flash), USB flash
GLP Conformance	Yes
External I/O (Measuring Unit)	RS-232C : 1ch (for Multiple sample changer/ Evaporator)
	K-NET : 1ch (for Main control unit)
External I/O (Main Control Unit)	COM1/COM2 : 2ch (for dot matrix printer, electronic balance, PC)
	CF card : 1ch (Compact Flash)
	USB : 1ch (USB flash)
	K-NET : 2ch (Measuring unit)
Main Control Unit	8-inch LCD (163.2 x 122.4 mm)
	256 colors 800 x 600 dots
Language	English / Japanese

(to be continued)

Power Supply	Measuring unit : DC24V 5A (Main unit) AC100-240V ±10% 50-60Hz 2A (Comes with AC Adapter)
	Main control unit : DC12V 3A (Main unit) AC100-240V ±10% 50-60Hz (Comes with AC Adapter)
Dimensions	Measuring unit : 141 (W) x 296 (D) x 367 (H) mm (not incl. tubing)
	Main control unit : 230 (W) x 285 (D) x 255 (H) mm
	Stirrer/Cell : 110 (W) x 230 (D) x 350 (H) mm
	Dispenser : 240 (W) x 170 (D) x 110 (H) mm (not incl. tubing)
Weight	Measuring unit : Approx. 4.5 kgs
	Main control unit : Approx. 2.0 kgs
	Stirrer/Cell : Approx. 1.4 kgs
	Dispenser : Approx. 0.6 kgs
CE Marking	Conforming to EN61326, EN61010-1 RoHS compliant

Name of Mfr. : Kyoto Electronics Manufacturing Co., Ltd.

Sound Level Meters

Light weight and handheld type meter for noise level with 3.5 digits on a liquid crystal display and MAX hold function. As provided with Over and Under scale indication, the meter will determine if noise is over or under the maximum or minimum scale range. Conforms with JIS C-1502 and IEC Standard Pub. 60651 Type Ⅱ.

Specifications

Model	1067
Dynamic Range	30-70, 60-100, 80-120 dB, Changeable by 3 steps and 40 dB width.
Measurable Range	30-120 dB
Frequency Range	20-8,000 Hz
Weighting Network	A, and C
Microphone	1/2 inch electret condenser microphone
Detection Method	True r.m.s.
Display	3.5 digits LCD, 0.1 dB resolution
Auxiliary Displaying	*Over scale ; "OVER" mark is displayed when the measurement value gets upper than maximum scale range by 4 dB. *Under scale ; " - " mark is displayed when the measurement value gets lower than minimum scale range by 4 dB. * Battery voltage ; "BATT" is displayed when the voltage of the batteries droops down less than 2 volts.
Power Supply	R-6P (UM-3) battery x 2 pcs
Dimensions	W72 x H240 x T24 mm

(to be continued)

Specifications	
Model	1067
Weight	210 grm
Accessories	* 1 pc Windscreen for microphone * 1 pc Hand strap * 1 pc Screwdriver (for calibration) * 2 pcs Batteries * 1 pc Carring case

Name of Mfr. : SOTEC Ltd

Emissions Analysers
for marine applications

RASI 901-MK

The RASI901-MK Portable Emissions Analyser Marine Kit provides a reliable and accurate measurements for O_2, CO, CO_2, True NOx ($NO + NO_2$), Low SO_2, and CxHy hydrocarbons to help ships achieve and confirm compliance with MARPOL Annex VI and the NOx Technical Code.

The KIT is equipped with:
- O_2, Low CO, Low NO, Low NO_2, SO_2 electrochemical sensors.
- Special NDIR bench for CO_2 % and CH_4 ppm.
- Heated sampling line to provide accurate NO_2 and SO_2 readings.

65 29 02	Analyser, emission, portable, RASI 901-MK for marine application	Set

Name of Mfr. : Atlas Marine Services Pte Ltd.

Carbon Tool Steel Rounds

Water hardened carbon tool steel, SK3 (content ratio of carbon, 1 - 1.1 %), for taps, dies, chisels, etc.

SK5 type (content ratio of carbon, 0.8 - 0.9 %) tool steel is for stamping plates for letters and figures or as saw blades. Annealed and processed for the easiest machinability.

Supplied in the following standard lengths:

Europe : 3 M
Japan : 5.5 M
U.S. : 12 ft.
Singapore : 6 M

If you require a length other than the standard mentioned, please specify when ordering.

Razor Wire

A concertina configured galvanized steel wire used for outer boundary fencing on ship's deck to defend ships from the vandals, like pirates. The razor wire prevent any intruders from penetrating by piercing or gripping them. Two patterns of loop are available ; Single Loop or Crossed Loop, and also standard diameter are available from 400 mm to 900 mm. Standard coil length when extended is 15 mtr, and they can be lengthen by connecting clips.

Single Loop

Crossed Loop

Unit Per Mtr.

CODE	Diameter	Standard Extended Length	CODE	Diameter	Standard Extended Length

Flat Wrap Razor Wire

A flat wrap razor wire is suitable for installations where a neat appearance is required. Due to its flat construction, it does not overhanging into neighboring property and will therefore not harm innocent bystanders. The flat wrap razor wire can be used to upgrade any existing fence or wall, by adding directly to a wire mesh fence, or adding it on top of a brick or pre-cast wall to instantly upgrade your security.

Unit Per Lgh.

CODE	Diam.	Length

Brass Shims
(Brass Strips)

A solid shim stock of precision laminated brass. These strips can be easily cut by a power saw or hacksaw and can be punched, bored, or milled by ordinary machinery. The thin stock can be cut easily with metal shears. Supplied in the following standard sizes :

1) 125 mm x 5 mtr
2) 150 mm x 5 mtr
3) 175 mm x 5 mtr

Please specify if you require sizes other than those listed above.

Naval Brass Rounds

Used for shafting or similar parts processing. Resists corrosion from salt water.

Supplied in the following standard lengths:

Europe : 3 M U. S. : 12 ft.
Japan : 4 M Singapore : 4 M

Please specify if you need to have the bar cut to a required length.

How to order : CODE

Zinc Plates

These zinc plates (anodes) are specially designed for use in the cathodic protection of a ships hull, propeller, ballast tanks, cylinder liner, seawater pipes, etc. The plates are also used for the protection of equipment carrying seawater such as heat exchangers, condensers, and salt water evaporators.

How to order : CODE

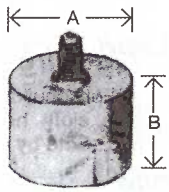
Zinc Anode Replacement Elements



An easily replaceable zinc element for use in pipes which are continuously exposed to seawater. Serves to protect heat exchangers, piping, tanks, pumps, and other hydraulic equipment from corrosion. The anode supplies a continuous protective current to eliminate the corrosion current flowing from a metal surface. Has the same components as the MIL-A-18001-H U. S. A.

Unit Per Pc.

Adhesive Anticorrosive Zinc Tapes

Highly effective anticorrosive tape developed with a base film of adhesive molten galvanized zinc.

Zinc coated layer will not be infiltrated by water, gas, etc. and will not age from ultraviolet rays, so corrosion does not develop from the inner layer.

As the zinc layer of this tape is thick and uniform, it lasts longer than a molten galvanized coating. It can be easily applied and will prevent corrosion at jointed steel parts or pipes.

Unit Per Rol.

CODE	Width	Thick	Length

Name of Mfr. : Mitsui-Kinzoku Co., Ltd.

Metal Anodes

For protection of hulls of ships, tugs, barges, etc. against sea water corrosion. Corrosion of steel in sea water is an electro chemical process. Metals (zinc, aluminium,

magnesium), when suitably connected to steel in the presence of sea water, will generate an electrical current. This current flows from the anode through the sea water to the structure to be protected. The current generated by the metal anode – steel couple is of sufficient magnitude to mitigate corrosion of the steel. Consequently, the metal anode sacrificially corrodes and the steel is protected.

Zinc Anodes

Zinc Anodes have the following characteristics :

1. No sparking problem.
2. Excellent self regulating property, low generation of hydrogen gas.
3. Zn compounds formed react as corrosion inhibitors.
4. Free from troubles caused by electrolytic products.
5. Low anodic polarization and stable protective current.
6. Highest current efficiency.

Note : Other types of Zinc Anode are available on request.

Guide of How to order

When ordering, please specify the following points :

CODE..... 67 - 35 - 51
Name ..... Zinc anode
Used for ..... For hull of ships
Type 3FB
Size ..... 20 × 100 × 200 mm
Type of installation ..... Bolt-on

Aluminium Anodes

This is a new aluminium anode, with the composition of Al-Zn-In. It has been used by ship builders and harbour constructors as the most advanced and ideal galvanic anode for corrosion prevention. It has the following characteristics:

1. Lightweight.
2. Highest current capacity.
3. Lowest cost per ampere year.
4. Extremely small anodic polarization tendency.
5. Stabilized current output throughout anode life.
6. Optimum driving voltage without over-protection.
7. Uniform anode consumption.
8. Excellent, self-regulating property.
9. Low hydrogen generation.

590KA - 3.0	25 - 30	270 x 275 x 2,930	595.0

Guide of How to order

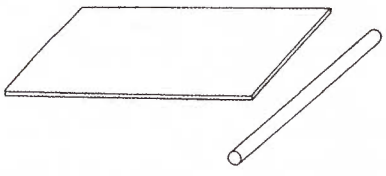
When ordering, please specify the following points :

CODE..... 67 - 36 - 01

Name..... Aluminium anode
Used for..... For drilling rigs
Type of Welding Bar..... With perpendicular steel welding bar
Type..... 54KA-2.5
Size..... 70 x 96 x 1,500 mm

Soft Magnetic Irons

Also called Pure Iron or Swedish Iron. For use in cathodic protection, also for electrical application such as cores, yokes, armatures, etc. Bar type and strip type available.



1. Soft Magnetic Iron Bars

Standard Size

Diameter (mm)	Standard Length
6, 6.5, 7, 8, 9, 9.5, 10, 11.1, 12, 15, 16	3 Mtrs

Characteristics

Class	Symbol	Magnetic characteristic					Hardness	
		Magnetic flux density T				Coercive force A/m	HRB	HV
		B_2	B_3	B_5	B_{25}	H_c		
Class 0	SUYB 0	1.1 min.	1.25 min.	1.35 min.	1.55 min.	63.2 max.	60 to 90	110 to 195
Class 1	SUYB 1	1 min.	1.2 min.	1.35 min.	1.55 min.	79.1 max.		
Class 2	SUYB 2	0.75 min.	1.1 min.	1.3 min.	1.55 min.	103 max.		
Class 3	SUYB 3	0.4 min.	0.8 min.	1.1 min.	1.5 min.	142 max.		

Remarks: 1. B_2, B_3, B_5 and B_{25} mean the symbols denoting the magnetic flux densities at the magnetic field intensity of 159.2 A/m, 238.8 A/m, 398 A/m and 1,990 A/m, respectively.
2. Coercive force (Hc) shall be the values for the magnetic flux density of 1.5 T.

How to order : 67 - 37 - 01

Soft magnetic iron bar, class x diameter (kgs)

2. Soft Magnetic Iron Plates

Standard Size

Thickness (mm)	Standard W x L mm Approx.
0.6, 0.8, 1, 1.2, 1.3, 1.5, 1.6, 1.75, 1.8, 2, 2.1, 2.3, 2.4, 2.8, 2.85, 3.2, 3.5, 4, 4.5	200 x 300, 400 mm

Characteristics

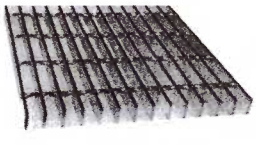
Class	Symbol	Magnetic characteristic					Hardness	
		Magnetic flux density T				Coercive force A/m	HRB	HV
		B_1	B_2	B_3	B_5	B_{25}	H_c		
Class 0	SUYP 0	0.8 min.	1.1 min.	1.25 min.	1.35 min.	1.55 min.	63.2 max.	45 to 75	85 to 140
Class 1	SUYP 1	0.5 min.	1 min.	1.2 min.	1.35 min.	1.55 min.	79.1 max.		
Class 2	SUYP 2	0.2 min.	0.75 min.	1.1 min.	1.3 min.	1.55 min.	103 max.		
Class 3	SUYP 3	0.1 min.	0.4 min.	0.8 min.	1.1 min.	1.5 min.	142 max.		

Remarks: 1. B1, B2, B3, B5 and B25 mean the symbols denoting the magnetic flux densities at the magnetic field intensity of 79.6 A/m, 159.2 A/m, 238.8 A/m, 398 A/m and 1,990 A/m, respectively.
2. Coercive force (Hc) shall be the values for the magnetic flux density of 1.5 T.

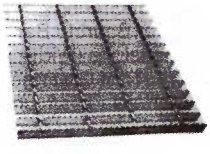
Plain Style Gratings

Ideal for use in ships' flooring, stair tread of gangway, catway, pump room, engine room, etc.

Plain style grating consists of twisted square cross bars and plain bearing bars. Bearing bars are laid parallel to each other at 1-3/16" pitch, and cross bars are arranged in 4" pitch vertically to the bearing bars. The contact points of bearing bars and cross bars are electro forged by welding.



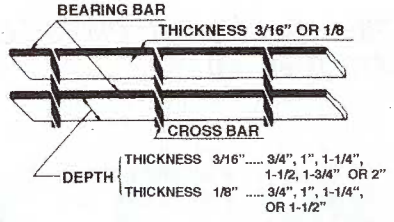
Plain Style



Serrated Style

1. Bearing Bars

Load carrying members which run between the supports and rest directly on them and which are parallel to each other.

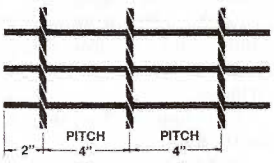


2. Cross Bars

Connecting members which run across bearing bars in a perpendicular direction. Twisted 1/4" x 1/4" square bars are used as cross bars in all types of plain style grating.

3. Pitch of Cross Bars

Pitch means the distance center to center of each cross bar. The pitch is 4" for every type. The distance from the outer end of the bearing bar to the next cross bar is 2".



4. Pitch of Bearing Bars

The pitch is the distance from center to center of each bearing bar. The pitch is 1-3/16" whether the thickness of the bearing bar is 3/16" or 1/8".

5. Width & Length of the Gratings

No matter what size of grating it may be, the direction in which the bearing bars run is referred to as the length, and direction in which the cross bars run is referred to as the width.

Most common plain style sizes are as follows and are available as ready made stock.

How to order : CODE

Grating, plain style, galvanized iron, SIZE, PITCH of bearing bar and cross bar

Unit Per Sht.

CODE	Size	Bearing Bar			Cross Bar		Finish
		Thickness	Depth	Pitch	Twist	Pitch	
67 38 01	2' × 20'	1/8"	1"	1-3/16"	1/4" × 1/4"	4"	Galvanized Iron
02	2' × 24'						
03	3' × 20'						
04	3' × 24'						

Besides the above sizes, a wide variety of sizes are available. **When ordering, please specify the following points to avoid errors and delays.**

1. Type of Grating
2. Size of Bearing Bar
3. Dimensions (Width x Length)
4. Number of Gratings
5. Standard Finish (unpainted, grey primary coated, black primary coated or galvanized)

Fiber Reinforced Plastic Gratings (FRP Gratings)

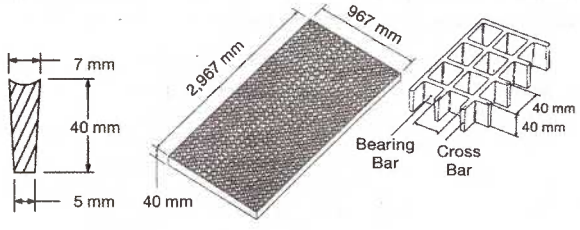
Designed to meet the standards of harsh marine environments and suitable for varied applications such as electrical control flooring, platforms, catwalks, bilges, and drain troughs.

Made of a non-wear synthetic polyester resin which is resistant to salt water corrosion and will withstand contact with acid or industrial chemicals. Although FRP grating is much lighter and easier to handle than metal gratings (18.5), when compared with iron and aluminium on a scale of strength, iron is about 5.4, aluminium is 7, and FRP is 15. This grating is very easy to work with and install wherever it is required, whether in the engine room, on staircases, or on walkways on deck. FRP is indispensable on tankers because it is a non spark, inflammable surface which can be used in situations where it undergoes continual friction with metal surfaces.

FRP has no magnetic properties and will not conduct electricity.

Will be supplied in grey unless otherwise specified.

Square Mesh



How to order : CODE

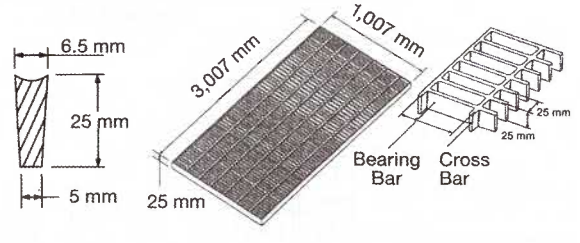
Grating, square mesh, W 2,967 x L 967 x H 40 mm, MATERIAL, FEATURE

Unit Per Sht.

CODE	Material	Features	Weight	
			kgs/sht	kg/m²
67 38 11	Synthetic Polyester Resin	Fire Resistant Chemical resistant/ Sparkless	53	18.5
67 38 12	Synthetic Polyester Resin	Chemical resistant/ Sparkless	53	18.5
67 38 13	Epoxy Acrylate Resin	Chemical resistant/ Sparkless/Acid, Alkali resistant	53	18.5

When ordering, please specify the material and size you require. If no specific size is necessary, it is suggested that you order the grating by sheet.

Rectangle Mesh



How to order : CODE

Grating, rectangle mesh, W 3,007 x L 1,007 x H 25 mm, MATERIAL, FEATURE

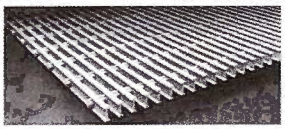
Unit Per Sht.

CODE	Material	Features	Weight	
			kgs/sht	kg/m²
67 38 15	Synthetic Polyester Resin	Fire Resistant Chemical resistant/ Sparkless	35	11.5
67 38 16	Synthetic Polyester Resin	Chemical resistant/ Sparkless	35	11.5
67 38 17	Epoxy Acrylate Resin	Chemical resistant/ Sparkless/Acid, Alkali resistant	35	11.5

When ordering, please specify the material and size you require. If no specific size is necessary, it is suggested that you order the grating by sheet.

Phenolic Fiberglass Gratings

DURAGRID®



A high strength, light weight, and easy to install fire integrity composite grating for ships and vessels, offering a "Fit it and Forget it" solution to walkway grating.

DURAGRID® Phenolic's corrosion- and fire- resistance has made this product a champion in the Marine and Offshore Oil and Gas industries for decades.

Features :

- Higher strength than equivalent steel grating.
- No Rust – typically outlasts the ship's lifespan (can be transferred).
- Dependable anti-skid surface for safety and comfort.
- Light weight - up to 75% lighter than comparable steel grating.
- Safe and easy to install – no welding or hot works.

Regulatory Information and Approvals* :

- ASTM: First composite grating to meet ASTM F3059-15 standard, an enhancement to and expected replacement of USCG PFM2-98.
- USCG: 164.040/16/0 (38 mm and 45 mm (1-½" - 1-¾")).
- IMO: Meets requirements for Safe Access to Tanker Bows (Resolution MSC.62(67)) (SC 253 Dec 2011 Rev 1 May 2016).
- Numerous Class Approvals such as ABS, DNV, and LR.

* For a current and complete list of these approvals, please contact Strongwell directly.

Typical Ship Applications :

- Center passage walkway grating
- Oil spill tank grating
- Winch stand grating
- Manifold grating
- Various stage areas (Monkey, Wheel House, etc.)

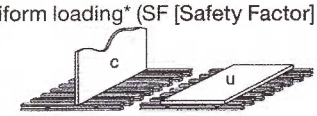
Availability* & Panel Sizes :

- Factory: I-6000 in 3' x 20', 4' x 20', 1M x 6M (38 mm (1-1/2") or 45 mm (1.75") thickness)
- Rotterdam or Factory: 1M x 6M (38 mm (1.5") thickness)
- Weight: 38 mm thickness - 16.8 kg/M² (3.4 lb/ft²)
  45 mm thickness – 19.0 kg/M² (3.9 lb/ft²)

*Strongwell can also drop ship to a specific location or port.

Performance (I-6000 38 mm) :

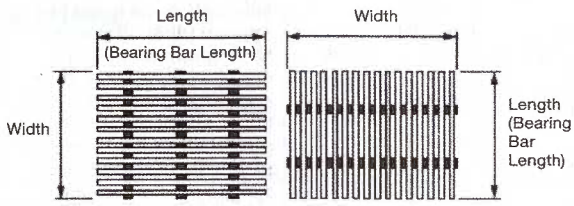
- 16.8 kN/m² (350 lb/ft²) uniform loading* (SF [Safety Factor] + 6:1)
- 11.7 kN/m (11.7 lb/ft) concentrated loading* (SF + 5:1)



* Based on a midspan deflection of 6.35 mm (.25") on qualified span of 1,120 mm (44")

Installation :

DURAGRID® Phenolic installs similar to how steel grating is installed. The bearing bar (BB) is the load carrying member which runs between supports. This is the panel length and is typically designated with a (BB) after the dimension to avoid confusion. DURAGRID® Phenolic does not require any banding after cutting. Loads are effectively transferred by a series of cross-rods spaced every 6" (150 mm) (sometimes referred to as "cross-rod pitch").



Panel Sizes are Specified: Width × Length

Installation is easy; the grating can be cut using simple hand tools such as a circular saw (diamond or masonry blades suggested) or a jig saw (carbide grit blades suggested). Panels are lightweight – single panels are typically moved by hand.

How to order : 67 - 38 - 21

Grating, Phenolic Fiberglass, DURAGRID,.....

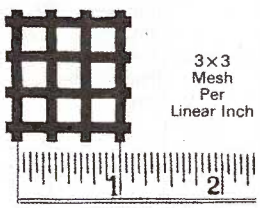
When ordering, please specify:

- *Square Foot (SF) or Square Meter (M²) Measurements of the areas that needs grating*
- *Hardware (Part # 744 clip & 797 bolt set) – 4 clips per panel or 4 clips per M²*

Gauze Wire

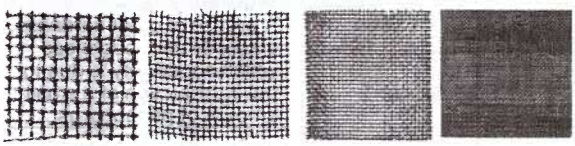
Available :

1) Galvanized Iron
2) Brass – Copper
3) Nylon
4) Plastic Coated Iron
5) Bronze
6) Stainless Steel



Mesh denotes the number of openings horizontally and vertically per linear inch. It is measured from center to center of the parallel wires, as illustrated above.

Actual Square Meshes



10 x 10 20 x 20 30 x 30 60 x 60

When in doubt about the correct wire size and mesh, the safest and surest way is to send a cut sample of the gauze cloth required and indicate its proposed use in advance. The standard width of stainless steel gauze wire is 1,000 mm and for other materials the width is 910 mm, all supplied in varying lengths.

How to order : 67 - 39 - 01

Gauze wire, for PROPOSED USE, MATERIAL – MESH – WIDTH and LENGTH

Copper Alloy Approx. Constituent

Name	Approx. main constituent	Descriptions
Brass	Copper 70% or 60% Zinc 30 or 40 Others * *	Brass is generally an alloy of copper and zinc, although some brasses may contain other elements. Most commercial brass contains about 60 - 70% copper and 40 - 30% zinc. Other alloys are frequently added so as to change its physical characteristics.
Munz Metal	Copper 60% Zinc 40 Others *	An alloy of copper zinc and lead patented by C. F. Muntze, an English-man, about 1833, when rolled and annealed it becomes strong and malleable. Used mainly for ship construction, particularly as sheathing, bolts and rivets which are exposed to sea water.
Admiralty Brass	Copper 71% Zinc 28 Tin 1	An alloy resistant to corrosion from salt water. Used chiefly in the manufacture of condenser tubes.
Naval Brass	Copper 60% Zinc 39 Tin 1	Brass composed usually of 60% copper, 39% zinc, 1% tin and used for bolts or other parts which are submerged under water.
Bronze	Copper 99-75% Tin 1-25 Zinc * Phosphor * Tin *	Bronze is the general name for alloys of copper and tin. Frequently, other alloys such as zinc, lead, manganese, nickel, phosphorus and aluminium, are added to create desired characteristics.
Gunmetal	Copper 88% Tin 10 Others 2 Zinc *	An alloy of copper, tin and zinc, iron and lead. Used in the manufacture of sleeves for rubber stocks and propeller shafts, pump manifolds, bolts and nuts, ship's bell, gland and gland bushings and many other uses where strength is required.
Phosphor Bronze	Copper 89% Tin 10 Phosphor 1	A bronze of great hardness, elasticity and toughness which superiority is due to the introduction of a small amount of phosphorus.
Monel Metal	Nickel 67% Copper 28 Others 5	Trademark – used for an alloy of approximately 67% nickel, 28% copper and 5% other elements that is made by direction from ore in which the constituent metals occur in these properties.
Babbit Metal	Tin 93-77% Antimony 5-15 Copper 2-8	A very soft alloy, variable in its composition of tin, copper and antimony. It is used as linings for bearings and to reduce friction.

* – denotes very little constituent.

Bolts & Nuts

Generally speaking items such as bolts and nuts have so many types, materials, thread types, and especially sizes, it is impossible to provide order codes for them all. For this reason, the items described below are standard types and only a few of them are provided with codes.

Thread Information

As metric threads are now most common, all the items below are described by metric standards. However, Whitworth and unified threads are also available upon request. The following thread tables are illustrated for your reference. You can easily find the type of threads you require from this table.

Metric Thread

Stainless Steel

How to order : CODE

Bolt, hex head, stainless steel, half threaded,
DIAM x LENGTH mm
or
Bolt with nut, hex head, stainless steel, half threaded,
DIAM x LENGTH mm

If you require WHOLE THREADED, please specify.

Heli-Serts

Made of stainless steel or bronze.

Instead of building up a thread hole by welding worn out threads or using bushes for rethreading, you just have to clean the hole with a tap and insert these heli-serts.

Tightening procedure is the same as with the original thread.

The proper length of the heli-sert should usually be 1 – 2 times the length of the standard bolts being used.

Kind of Thread		Nominal Size
Metric	Coarse	M2.2 - M36
	Fine	M8 - M30
Whitworth Coarse		W1/4 - W1-1/2
Unity	Coarse	U No. 2 - U1-1/2
	Fine	U No. 6 - U1-1/2
Parallel Pipe Thread		3/8, 3/4

Please don't confuse following (1) (2) (3) (4) screws when ordering.

1. Hexagon Head Set Screw

2. Hexagon Socket Set Screw

3. Hexagon Socket Head Cap Screw

4. Hexagon Head Cap Screw-U.S.A. (Hexagon Head Bolt)

ISO (Metric) Bolt Designations on Hex Head Bolt

Common Strength Classes: 4.8, 8.8, 10.9 and 12.9

For example: 4.8 denotes 4 x 100 MPa tensile strength (= 400 N/mm²), and 0.8 x 1200 MPa yield strength (= 960 N/mm²)
12.9 denotes 12 x 100 MPa tensile strength (=1,200 N/mm²), and 0.9 x 1200 MPa yield strength (= 1,080 N/mm²)

Please specify STLENGTH CLASS in addition to size and material if such specific bolts are necessary.

Carbon Steel Pipes for Ordinary Piping
Galvanized

Standard length: 5.5 mtrs.

Ref. JIS-G-3452 (SGP) standard industrial quality. SGP denotes Steel Gas Piping.

Equal to ASTM A53, BS1387, and DIN1615, and ISO65 quality. For general purpose use such as in steam lines, water and gas piping, etc.

SGP

Carbon Steel Pipes
for Pressure Services

Standard length: 5.5 mtrs.

Ref. JIS-G-3454 (STPG-370) standard industrial quality. STPG denotes Steel Tube Piping General.

Equal quality to ASTM A135/A53 or DIN1626/1629 and ISO2604. Both ends are plain ends. Available in black only. Two types of electric resistant welding (ERW) and seamless pipes are available. Most common schedule (Wall Thickness) Number 40 and 80 are listed below.

Carbon Steel Pipes
for High Pressure Service

Standard length: 5.5 mtrs.

Ref. JIS-G-3455 (STS-370) quality. STS denotes Steel Tube Special.

Equal quality to BS778, DIN1630, ISO2604. Plain both ends. Available in black only. Most common schedule (Wall Thickness) number 40, 80 and 160 are listed below. They are used for temperatures less than 350°C.

Carbon Steel Pipes
for High Temperature Service

Standard length: 5.5 mtrs.

Ref. JIS-G-3456 (STPT-370) standard industrial quality. STPT denotes Steel Tube Piping Temperature. Equal quality to ASTM A106, DIN17175, BS3602 and ISO2604. Available in black only. Most common schedule (Wall Thickness) number 40, 80 and 160 are listed below. They are used for temperatures over 350°C.

Carbon Steel Precision Tubes
for Hydraulic Line Service

The carbon steel precision tubes for hydraulic line service are classed according to the working pressure, appropriate standard and manufacturing process. The most common classes of line service items are abstracted and listed below.

Name	Class of Working Pressure	Symbol of Standard	Manufacturing Process
Precision carbon steel tubes for hydraulic line service	Under 210 kgf/cm^2	OST 2	SC
	Under 100 kgf/cm^2	OST 1	S-C E-C

Standard length of pipe is 4 mtrs. and sold by weight.
When ordering, please specify the following points.
1. Working pressure 2. Outside diameter 3. Thickness

How to order: CODE

Pipe, carbon steel, OST - 2, OUTSIDE DIAM mm, THICKNESS mm, LENGTH mtr

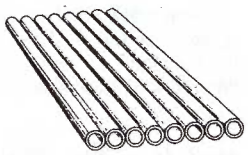
Aluminium Brass Tubes
for Condensers and Heat Exchangers
(Ref. JIS H 3300 C6872T)



Newly developed high corrosion resistant aluminium brass material for use in condenser and heat exchanger tubes.

"ALUMIBRASS" added Ni to the ordinary contents of the so-called standard alumi brass. These tubes are used most often for various equipment in marine service including not only condensers, various heat exchangers and the heating coils, but also seawater conduits. In the case of ships, as seawater is used for cooling water, most tubes are made of alumi brass because of the very good results.

The standard sizes of the tubes are shown below. Specify size when ordering. These tubes are sold by weight.

Maximum Length & Weight

Class	Outside Diameter			
	< 20ø	20 - 60ø	60.1 -90ø	> 90ø
Length	40 m Max	25 m Max	10 m Max	6 m Max
Weight	60 kgs "	60 kgs "	50 kgs "	80 kgs "

PIPE & TUBE FITTINGS

Malleable Cast Iron Pipe Fittings P. 73-1 ~ 3	Steel Butt-Welding Pipe Fittings for Ordinary Pipe (FSGP)  P. 73-3 ~ 5	Steel Butt-Welding Pipe Fittings for Pressure Service and High Pressure Service (Schedule)  P. 73-5 ~ 6
Steel High Pressure Pipe Fittings Threaded Type P. 73-7 ~ 8	Brass Pipe Fittings Threaded Type P. 73-8 ~ 10	Stainless Steel Pipe Fittings Threaded Type P. 73-10 ~ 11
PVC Plastic Pipe Fittings for Drain P. 73-11 ~ 12	PVC Plastic Pipe Fittings for Water Supply  P. 73-12 ~ 14	Steel Compression Tube Fittings for High Pressure Service  P. 73-14 ~ 17
Brass Flared Tube Fittings P. 73-17 ~ 19	Brass Flareless Compression Tube Fittings P. 73-19 ~ 21	Stainless Steel Flareless Tube Fittings P. 73-21 ~ 22
Ermeto High Pressure Steel Couplings  P. 73-22 ~ 23	Flanges  P. 73-23 ~ 29	Flexible Pipe Couplings P. 73-29 ~ 33

Screwed Type Malleable
Cast Iron Pipe Fittings

Standard malleable cast iron fittings used for low pressure water, oil, steam, air and gas line fabrication.

Pressure Rating

Fluid Condition	Maximum Working Pressure
Steam, air, gas, and oil of 300°C or less	1.0 MPa (10.2 kgf/cm²)
Steam, air, gas, oil and pulsation water of 220°C or less	1.4 MPa (14.3 kgf/cm²)
Non shock water of 120°C or less	1.0 MPa (20.4 kgf/cm²)

The screw thread for these fittings conforms to the Taper Pipe Threads of JIS B 0203 equal to the ISO 7/1 (Pipe Thread where pressure tight joints are made on the threads), details are shown in the following table.

Screw Thread Table

Nominal Pipe Size		Nominal Thread Size	Threads Per 25.4 mm	Pitch	Male Thread O.D.	Applicable Carbon Steel Pipe

Steel Butt-Welding Pipe Fittings
For Ordinary Use

Butt-Welding Pipe Fittings used for the fabrication of ordinary carbon steel pipe (SGP) of comparatively low pressure steam, water, oil, gas and air. Ends are machine faced and bevelled.

Available in galvanized or black (ungalvanized) but usually black ones are supplied unless otherwise specified. Their maximum working pressure is 2.5 MPa (25 kgf/cm²).

General Specification of Fittings (FSGP)

Nominal Size A	Nominal Size B	Outside Diam. mm	Inside Diam. mm	Wall Thickness mm
15A	1/2	21.7	16.1	2.8
20A	3/4	27.2	21.6	2.8
25A	1	34	27.6	3.2
32A	1-1/4	42.7	35.7	3.5
40A	1-1/2	48.6	41.6	3.5
50A	2	60.5	52.9	3.8
65A	2-1/2	76.3	67.9	4.2
80A	3	89.1	80.7	4.2
90A	3-1/2	101.6	93.2	4.2
100A	4	114.3	105.3	4.5

(to be continued)

Nominal Size A	Nominal Size B	Outside Diam. mm	Inside Diam. mm	Wall Thickness mm
125A	5	139.8	130.8	4.5
150A	6	165.2	155.2	5
200A	8	216.3	204.7	5.8
250A	10	267.4	254.2	6.6
300A	12	318.5	304.7	6.9

Specified sizes are up to 300A but larger sizes are also available on request.

Steel Butt-Welding Pipe Fittings

For Pressure Service & High Pressure Service

Steel Butt-Welding ungalvanized (Black) Pipe Fittings used for the fabrication of

1. Carbon Steel Pipe for Pressure Service (STPG).
2. Carbon Steel Pipe for High Pressure Service (STS).
3. Carbon Steel Pipe for High Temperature Service (STPT).
4. Steel Pipe for Low Temperature Service (STPL).

* Besides the above enumerated fittings, the following items are also available: Return Bends, Cap, Concentric Reducer, Eccentric Reducer, Reducing Tee, etc. Please specify separately what kind of part you require along with the necessary nominal size.

Steel High Pressure Pipe Fittings
Threaded Type

High pressure, drop forged steel, ungalvanized (black) pipe fittings with a pressure rating of 210 kgf/cm² at 120°C.

Threads conform to the Taper Pipe Threads standards of JIS B 0203 and the ISO 7/1. Larger sizes and types of fittings not listed below are also available.

Steel Threaded Elbows, 45°
for High Pressure Pipe Fitting

Unit Per Pc.

Stainless Steel Pipe Fittings
Threaded Type

Stainless steel SUS 304 conforms to a working pressure of 10 kgf/cm² in saturated steam. These fittings have high corrosion and thermal resistance and are mainly used in the petroleum refinery, petrochemical, thermal and nuclear power industries. They are all threaded for use in general service lines.

The threads for these fittings are Taper Pipe Thread Standards (JIS B 0203) compliant with ISO 7/1 standards. Other types of fittings, and sizes larger than those listed below are also available upon request.

Steel Compression Tube Fittings
For High Pressure Service
250 kgf/cm² – 400 kgf/cm²

These fittings are used for pneumatic, chemical and most other fluids without flaring-welding.

Threads of these pipe fittings conform to the Taper Pipe Threads of JIS B 0203 and ISO 7/1 standards.

Types with a rated pressure of 100 kgf/cm² are also available upon request.

Stainless Steel Flareless Tube Fittings

These stainless steel flareless tube fittings have the following characteristics and specifications.

1. Applicable for extreme high and low temperatures.
2. Applicable for high pressure.
3. May be used for vacuum lines.
4. May be used for gas analyzer lines when high accuracy is required.

How to assemble

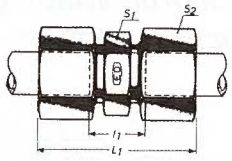
Ermeto High Pressure Steel Couplings

Ermeto high pressure steel couplings are available in steel, stainless steel, and brass with working temperature ranges varying based upon the material of the cast. When ordering, specify the type of material the coupling should be supplied in. Unless specified otherwise, steel couplings will be provided.

Steel Unions

How to order: CODE

Ermeto steel union, NOMINAL PRESSURE, TUBE O.D., PART NO.



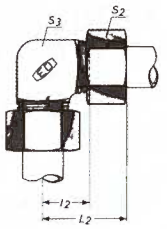
Unit Per Pc.

CODE	Tube O.D.	Pressure Rating	Part No.	Length L1
Nominal Pressure: 100 kgf/cm²				
73 44 51	4 mm	PN 100	G4 - LL	31 mm
52	6		G6 - LL	32
53	8		G8 - LL	35
54	10		G10 - LL	35
55	12		G12 - LL	35
Nominal Pressure: 315 kgf/cm²				
73 44 56	6 mm	PN 315	G6 - PL	39 mm
57	8		G8 - PL	40
58	10		G10 - PL	42
59	12		G12 - PL	43
60	15		G15 - PL	46
61	18		G18 - PL	48

Steel Elbows

How to order: CODE

Ermeto steel elbow, NOMINAL PRESSURE, TUBE O.D., PART NO.



Unit Per Pc.

CODE	Tube O.D.	Pressure Rating	Part No.	Length L2
Nominal Pressure : 100 kgf/cm²				
73 44 65	4 mm	PN 100	W4 - LL	21 mm
66	6		W6 - LL	21
67	8		W8 - LL	23
68	10		W10 - LL	24
69	12		W12 - LL	25
Nominal Pressure : 315 kgf/cm²				
73 44 71	6 mm	PN 315	W6 - PL	27 mm
72	8		W8 - PL	29

Flanges

Many types of flanges are produced according to various standards. The most common types are listed below.

DIN 2531 / 2532 / 2533 – Cast Iron Flanges

Nominal Pressure	DIN No.	Raised Face Type (Nominal size)
6.0 kgf/cm²	DIN 2531	10 - 3,600 mm
10.0 kgf/cm²	DIN 2532	10 - 3,000 mm
16.0 kgf/cm²	DIN 2533	10 - 1,000 mm

JIS B 2220 (1990) – Steel Welding Pipe Flanges

Nominal Pressure		Slip on Welding Type Flange		
		Plate Flange	Hub Flange	
		Flat Face	Without Groove on Hub Side	
			Flat Face	Large Raised Face
5 kgf/cm²		10 -400 mm	450-1,000 mm	-
10 kgf/cm²	Thin Type	10 -350 mm	400 mm	-
	Ordinary Type	10 -225 mm	250-1,000 mm	-
16 kgf/cm²		-	10- 600 mm	600-1,200mm

ANSI B16.5

Nominal Pressure	Flange Type	
	Slip on	Socket welding
Class 150	1/2 - 24"	1/2 - 24"
Class 300	1/2 - 24"	1/2 - 24"

Stainless Steel Flanges

Made of forged stainless steel SUS 304 with high corrosion and thermal resistance. Mainly used in petroleum, petro-chemical, thermal and nuclear power industries.

Many types of flanges are produced according to various standards. The most common types are listed below.

Slip-on Welding Square Pipe Flanges

21 MPa for Hydraulic Use

Square flanges suitable for hydraulic use welding pipe. Made of carbon steel.

Model	Bolt	Groove for O ring

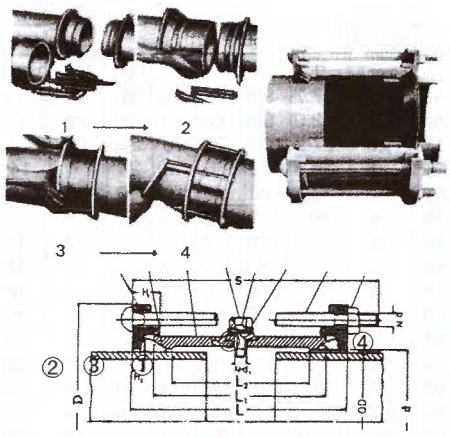
Flexible Pipe Couplings

Coupling joints, because of their greater flexibility and economy, are steadily replacing flanged pipe joints in today's plant and marine applications. Unlike flanged joints, couplings not only eliminate the need for costly welding but also compensate for extreme degrees of pipe linear expansion, vibration, and laying deflection. From chemical plants to mammoth tankers, these couplings are utilized extensively throughout plant and marine piping.

As a wide range of models is available, the most common models have been selected and described below.

General Construction & Features



No.	Parts Name	Pcs	Materials
1	Middle Ring	1	Hot Rolled Steel(SS41) or Ductile Iron(FCD45)
2	Follower	2	Hot Rolled Steel(SS41) or Ductile Iron(FCD45)
3	Gasket	2	NBR, CR, Viton, etc.
4	Bolt & Nut	2 and Over	Steel Galvanized (SS41)
5	Stop Bolt	2	Stainless Steel (SUS304)

1. Construction

As illustrated above, the most common models consist of a middle ring (1), two followers (2), two wedge gaskets (3), four bolts & nuts (4), and two stop bolts (5). Both the middle ring and the followers are made of hot rolled steel, and the wedge gaskets are made of natural or synthetic rubber.

When the bolts are tightened, the followers press the gaskets against the spherical surface of the pipes and the tapered surface of the middle rings providing a leak-tight connection.

When the expansion force of the pipes exceeds the wedging force, the pipes slide and deflect within the gaps between the outer surface of the pipes and the inner surface of the middle ring and followers.

2. Features

The structural design of these flexible pipe couplings offers easy and economical pipe jointing. Pipes can be jointed easily with the use of a spanner. Centering of the pipes and finish-grinding of the pipe sections is not required.

Compared with flanged pipe joints, these pipe couplings assure economical pipe jointing without the need for costly welding or any other additional procedures.

Usually absorbs 65 – 135 mm of pipe linear expansion (specially available models absorb more than 200 mm of linear expansion) and a considerable degree of pipe vibration as well. Also, they allow for joint deflection up to 6 degrees and can join pipes of different material and/or diameter.

3. How to order

When ordering, please specify the following points.

1. Kind of pipes to be connected (steel, cast iron, vinyl, etc).
2. Pipe outside diameter.....mm.
3. Working pressure.....kgf/cm².
4. Kind of liquid or gas of the line content. (desired gasket material)
5. Rust preventive treatments (paint).

Flexible Pipe Couplings for Plain End Pipes

1. Hot Rolled Steel Middle Ring & Follower

These products are all formed from special section steel. As it is designed and built to withstand severe operating conditions on board, no special care is necessary for any applications.

Specifications

Amount of Expansion & Contraction	L=134/160/180/210
Angular Deflection	1° - 8°
Working Pressure	20 - 50 kgf/cm²
Working Temperature	- 70° - 100°C - Standard - 100° - 350°C - Special
Manufacturing Dimensions	Nominal Diam, 40 - 4,000 mm
Applications	Piping for ships, water and gas supply, plant etc.

Name of Mfr.: Daido Kinzoku Kogyo k.k.

Couplings of sizes other than those listed above are also available upon request.

Seawater resistant couplings made of a special alloy steel are also available upon request. The seawater couplings have the same dimensions and shape as those listed above.

When ordering, please specify the nominal size.

2. Ductile Cast Iron Middle Ring & Follower

These couplings are mainly used for oil loading pipes, ballast pipes, digester pipes and other conduits on board. These couplings are made of ductile cast iron. Couplings made of cast steel are also available upon request.

Specifications

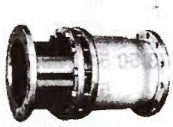
Slide (Sleeve) Type Expansion Joints for Flanged Pipes



These expansion joints are designed to absorb quick expansion and contraction of pipes resulting from the high temperature of fluids such as exhaust gas, high-temperature water, etc.

A variety of packing materials can be used based upon the temperature and the materials contained in the pipes.

Specifications

Working Pressure	Max. 30 kgf/cm²
Working Temperature	Max. 450°C
Manufacturing Dimensions	Nominal Diam. 40 - 350 mm
Material	Sleeve: Stainless Steel SUS 304 Body: Grey Iron Casting FC20, Carbon Steel Casing SC46, or Ductile Cast Iron FCD45
Am't of Expansion-Contraction	120 - 160 mm

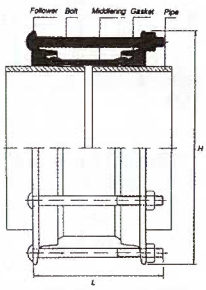
Guide of how to order

CODE	**73 50 31**
Name	Slide type expansion joint
Material of Sleeve and Body	Sleeve: Stainless Steel Body: Grey iron casting
Size	40 mm
Working Pressure	30 kgf/cm²

Anti-corrosive Coated Flexible Pipe Couplings

These couplings are also resistant, and will not be changed by mechanical vibration of the pipes.

Suitable for low and high pressure, and can be used on steel or PVC pipe materials that can withstand the gasket pressure. Couplings suitable for ductile iron pipes are also available if required.



For Steel or PVC Pipes

Gaskets for Flexible Pipe Coupling

When ordering spare gaskets for the flexible pipe couplings, please specify the manufacturer's name, model and the size of the flexible coupling currently in use, along with the name, temperature, and pressure of the line content, etc.

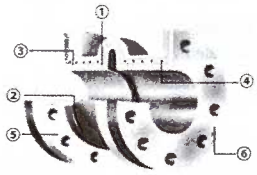
How to order : 73 - 50 - 36

Gasket for flexible pipe coupling, NAME, MODEL, SIZE of the flexible coupling, NAME, TEMPERATURE, PRESSURE of the line content

Rubber Expansion Joints

Single Arch Spool Type

Double Arch Spool Type



1. Inner Lining Rubber
   Acid and Chemical Proof Rubber (NR of Synthetic)
2. Outside Rubber
   Oil Abrasion Heat Proof Rubber of Chloroplene Rubber
3. Insertion Cloth for Reinforcement
4. Iron Wire for Reinforcement
5. Retaining Ring
6. Flange

Rubber Bellow Expansion Joints with DIN Flanges

Flexible expansion joints for absorbing thermal expansion, the reduction of vibrations and preventing stress in pipe systems. The expansion joints have a type approval from Det Norske Veritas, Germanischer Lloyds and ABS. Bellows are optional from the following materials listed in the material information table.

Material Information

Model	DN	L	Below Material		Max.Temp. Deg. C	Color Code
	mm		Inernal	External		
5570	25-600	130-200	Nitrile	Chloroprene	90	Yellow
5571			EPDM	EPDM	90	Red
5572			Hypalon	Chloroprene	90	Green
5573			White nitrile	Chloroprene	90	White
5574			SBR	Chloroprene	90	Blue
5575			EPDM	EPDM	130	Double red

Remark: EPDM denotes Ethylene Propylene Diene Monomer, SBR denotes Styrene-butadiene Rubber.

Max. Operating Pressure and Temperature

DN	Max. Pressure and Temperature		Model
25 thru 300	16 bar at 70 deg. C	10 bar at 90 deg. C	5570, 5571, 5572, 5573 and 5574
350 thru 600	10 bar at 70 deg. C	8 bar at 90 deg. C	
25 thru150	16 bar at 100 deg. C	10 bar at 130 deg. C	5575
200 thru 600	10 bar at 100 deg. C	6 bar at 130 deg. C	

Among the various types of bellow materials, we introduce the specifications of the most standard type Model 5570 for your ordering guidance as follows.

Model 5570

Bellow Material:
Internal – Nitrile,
External – Chloroprene

JIS Valves

Application Table for JIS Valves

The tables below are provided to help determine the valves and cocks which are suitable for use under the material, pressure, and temperature conditions of the pipes listed below.

1. In steam piping and boiler circulating water piping

Globe valves and angle valves
Nominal diameter 15 – 40 mm

Max. Working Pressure	Max. Working Temperature	Applicable JIS F Valve No.
1.57 MPa (16 kgf/cm²)	205°C	F-7301,F-7302, F-7303,F-7304, F-7346,F-7347, F-7348,F-7349, F-7351,F-7352, F-7411,F-7412, F-7413,F-7414
3.04 MPa (31 kgf/cm²)	400°C	F-7313,F-7314, F-7421,F-7422, F-7473,F-7474
5.59 MPa (57 kgf/cm²)	425°C	F-7317,F-7318, F-7320,F-7330

Nominal diameter 50 – 200 mm

0.49 MPa (5 kgf/cm²)	205°C	F-7301, F-7302, F-7305, F-7306, F-7353, F-7354
0.98 MPa (10 kgf/cm²)		F-7307, F-7308, F-7375, F-7376
1.57 MPa (16 kgf/cm²)		F-7309, F-7310, F-7377, F-7378
1.18 MPa (12 kgf/cm²)	300°C	F-7319, F-7320, F-7471, F-7472
3.04 MPa (31 kgf/cm²)	400°C	F-7313, F-7314, F-7473, F-7474
4.22 MPa (43 kgf/cm²)	425°C	F-7317, F-7318, F-7315, F-7316
5.59 MPa (57 kgf/cm²)		F-7317, F-7318

Nominal diameter 250 – 400 mm

0.49 MPa (5 kgf/cm²)	100°C	F-7307, F-7308
1.18 MPa (12 kgf/cm²)	300°C	F-7319, F-7320
3.04 MPa (31 kgf/cm²)	400°C	F-7313, F-7314, F-7473, F-7474

2. In feed water piping general non-shock sea water, bilge and ballast sea water piping

Globe valves and angle valves

Max. Working Pressure	Nominal Diameter mm	Applicable JIS F Valve No.
0.49 MPa (5 kgf/cm²)	450 • 500	F-7354
0.60 MPa (6 kgf/cm²)	300 - 400	F-7305, F-7306, F-7354
0.69 MPa (7 kgf/cm²)	15 - 40	F-7301, F-7302, F-7346, F-7347, F-7351, F-7352, F-7356, F-7411, F-7412, F-7415, F-7416
	50 - 150	F-7305, F-7306, F-7353, F-7354, F-7358, F-7359
	200 • 250	F-7305, F-7306, F-7353, F-7354
0.98 MPa (10 kgf/cm²)	250 • 300	F-7307, F-7308
	350 • 400	F-7308
1.37 MPa (14 kgf/cm²)	50 - 200	F-7307, F-7308, F-7375, F-7376
2.16 MPa (22 kgf/cm²)	15 - 40	F-7307, F-7304, F-7348, F-7349, F-7413, F-7414, F-7417, F-7418
	50 - 150	F-7309, F-7310, F-7377, F-7378
	200	F-7309, F-7310
2.75 MPa (28 kgf/cm²)	6 • 10	F-7388, F-7389
3.33 MPa (34 kgf/cm²)	6 - 25	F-7421, F-7422
	32 - 250	F-7313, F-7314, F-7473, F-7474
4.51 MPa (46 kgf/cm²)	100 - 150	F-7315, F-7316
6.08 MPa (62 kgf/cm²)	6 - 25	F-7329, F-7330
	32 - 150	F-7317, F-7318

3. In feed water piping for non-shock water at temperatures 120°C or less, general non-shock sea waterpiping, bilge and ballast sea water piping

Gate valves

Max. Working Pressure	Nominal Diameter mm	Applicable JIS F Valve No.
0.69 MPa (7 kgf/cm²)	15 - 40	F-7367
	50 - 400	F-7363
1.37 MPa (14 kgf/cm²)	15 - 40	F-7368
	50 - 400	F-7364
1.57 MPa (16 kgf/cm²)	300 - 400	F-7369

Swing check valves

Max. Working Pressure	Nominal Diameter mm	Applicable JIS F Valve No.
0.69 MPa (7 kgf/cm²)	25 - 40	F-7371
	50 - 250	F-7372
1.37 MPa (14 kgf/cm²)	50 - 200	F-7373

4. Cocks in feed water piping for non-shock water at temperature 120°C or less

Max. Working Pressure	Nominal Diameter mm	Applicable JIS F Valve No.
0.49 MPa (5 kgf/cm²)	25 - 65	F-7381

Max. Working Pressure	Nominal Diameter mm	Applicable JIS F Valve No.
1.57 MPa (16 kgf/cm²)	6 - 20	F-7387

5. In pulsating water piping, fuel oil piping, lubricating oil piping and cargo oil piping

Globe and angle valves

Max. Working Pressure	Nominal Diameter mm	Applicable JIS F Valve No.
0.49 MPa (5 kgf/cm²)	15 - 40	F-7301, F-7302, F-7346, F-7347 F-7351, F-7352, F-7356, F-7411 F-7412, F-7415, F-7416
	50 - 150	F-7305, F-7306, F-7353, F-7354, F-7358, F-7359
	200 • 250	F-7305, F-7306, F-7353, F-7354
	300 - 400	F-7305, F-7306
0.98 MPa (10 kgf/cm²)	50 - 200	F-7307, F-7308, F-7375, F-7376
	250 • 300	F-7307, F-7308
	350 • 400	F-7308
1.57 MPa (16 kgf/cm²)	15 - 40	F-7303, F-7304, F-7348, F-7349 F-7413, F-7414, F-7417, F-7418
	50 - 150	F-7309, F-7310, F-7377, F-7378
	200	F-7309, F-7310
1.96 MPa (20 kgf/cm²)	6 • 10	F-7388, F-7389
2.94 MPa (31 kgf/cm²)	6 - 25	F-7421, F-7422
	32 - 250	F-7313, F-7314, F-7373
4.51 MPa (46 kgf/cm²)	100 - 150	F-7315, F-7316
6.08 MPa (62 kgf/cm²)	6 - 25	F-7329, F-7330,
	32 - 150	F-7317, F-7318

Gate valves

Max. Working Pressure	Nominal Diameter mm	Applicable JIS F Valve No.
0.49 MPa (5 kgf/cm²)	15 - 40	F-7367
	50 - 600	F-7363
0.98 MPa (10 kgf/cm²)	15 - 40	F-7368
	50 - 600	F-7364
1.57 MPa (16 kgf/cm²)	300 - 400	F-7369

Swing check valves

Max. Working Pressure	Nominal Diameter mm	Applicable JIS F Valve No.
0.49 MPa (5 kgf/cm²)	25 - 40	F-7371
	50 - 250	F-7372
0.98 MPa (10 kgf/cm²)	50 - 200	F-7373

Cocks

Max. Working Pressure	Nominal Diameter mm	Applicable JIS F Valve No.
0.49 MPa (5 kgf/cm²)	25 - 65	F-7381
1.27 MPa (13 kgf/cm²)	6 - 20	F-7387

6. In compressed air piping and control air piping

Globe and angle valves

Max. Working Pressure	Nominal Diameter mm	Applicable JIS F Valve No.
0.49 MPa (5 kgf/cm²)	15 - 40	F-7301, F-7302, F-7346, F-7347, F-7351, F-7352 F-7411, F-7412,
	50 - 200	F-7305, F-7306, F-7353, F-7354,
0.98 MPa (10 kgf/cm²)	50 - 200	F-7307, F-7308, F-7375, F-7376
1.57 MPa (16 kgf/cm²)	15 - 40	F-7303, F-7304, F-7348, F-7349, F-7413, F-7414
	50 - 150	F-7309, F-7310, F-7377, F-7378
	200	F-7309, F-7310
1.96 MPa (20 kgf/cm²)	6 • 10	F-7388, F-7389
3.04 MPa (31 kgf/cm²)	6 - 25	F-7421, F-7422 F-7336, F-7337
	32 - 150	F-7313, F-7314, F-7340, F-7473 F-7474, F-7475
	200	F-7313, F-7314 F-7473, F-7474 F-7475
4.51 MPa (46 kgf/cm²)	6 - 25	F-7336, F-7337
	32 - 150	F-7340, F-7475
	200	F-7475

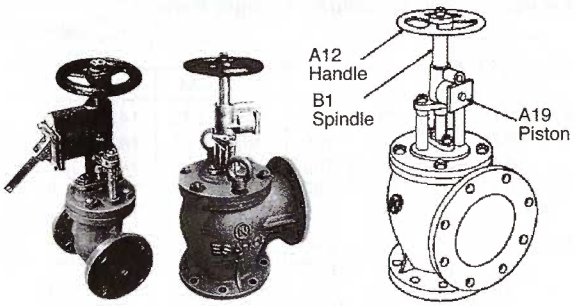
Emergency Shut-off Valves

Emergency Shut-off Valves

For marine use on tanks containing oil fuel, lub. oil and other flammable oil which are required to have valves closed from safe positions outside the space concerned.

Made of cast iron and available two types of style: Globe type and Angle type, and also available two types of operation: Pneumatic Control type and Wire Rope Pull type as shown below.



Shut-off Operation;

The Pneumatic Control Type:

Only open the compressed air supply valve connected from air reservoir. Air reservoir should be kept certain pressure between 0.39 MPa and 0.89 MPa.

The Wire Rope Pull Type:

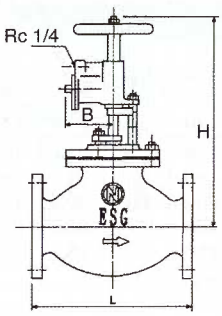
Only pull the lever connected with wire rope. For manual shut, these valves are able to close with handle wheel by rotating in clockwise direction.

Reset after Shut-off

1 Rotate clockwise until a head of piston is set in the grooving on spindle, and then rotate counterclockwise the handle to set valve in full open condition.
2 For small size valves (Max. 3") under the low level of liquid in tank (max. 5 mtr height), the valves can be reset with one touch by lifting the handle upward.

* Regarding Pneumatic Control Type, 1 or 2 should be applied after air supply valve is closed.

JIS 5 kgf/cm² Flanged End Globe Type



* Shut-off Operation: Pneumatic Control Type

Quick-Closing Valves (DIN)

Ductile Cast Iron for Marine Service
Pressure Rating PN 16

A quick closing valves for mechanical, hydraulic or pneumatic transmission. A reliable safety valve, providing for a remote shut-off from an accessible location. These valves comply with the requirements of the classification societies. Valves are mainly used on board ships and are suitable for fuel, oil etc.

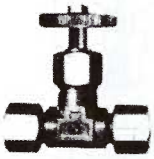
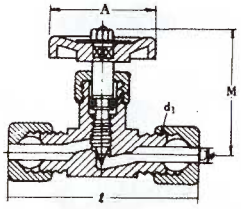
Needle Valves

Brass Needle Valves
with Ring Joint & Nut
For Copper Tubing

For controlling flow of liquids or gases requiring close regulating. Made of brass rods and brass except for the gland of "O" rings. Applicable temperature will be –20°C to 100°C and the maximum pressure will be 3.43 MPa [35 kgf/cm2]. Recommended for use at less than 80% of maximum load pressure at temperatures between 80°C and 100°C.

Brass Needle Straight Valves
with Ring Joint Nut Both Ends





Unit Per Pc.

Brass Needle Valves
with Corrugated Hose Ends

For controlling flow of liquids or gases requiring close regulating. Brass rod material made body and bonnet except for the gland "O" rings. The applicable temperature will be –20°C to 100°C and the maximum pressure will be 1.47 MPa[15 kgf/cm²]. Recommended for use at less than 80% of maximum load pressure at temperatures between 80°C to 100°C.

Brass Needle Valves
Threaded

For controlling flow of liquids or gases requiring close regulating. Brass rod material made body and bonnet with nitrile "O" rings and heat-resist plastic handles. The applicable temperature is –20°C to 100°C and the maximum pressure is 5.88 MPa [60 kgf/cm²] at 80°C.

Butterfly Valves

Butterfly Valves

Compared with conventional gate and globe valves, butterfly valves achieve high performance near to perfection with its pressure resistance and durability.

Especially in vessels, the Butterfly Valves enjoy high reliability and when compared with the conventional valves, the Butterfly Valves are excellent in the following aspects: (1) light and compact, (2) maintenance is easy, (3) labour-saving ease of operation, and (4) low cost.

7TH 75

Model 700G/705G

Standard Specifications

Nominal Size	40 to 300 mm	350 to 600mm
Applicable Flange Standard	JIS 5K/10K, ANSI 125/150 lb, DIN NP10/16, BS 4504 PN10/16, BS 10"E" *Model 700G: only JIS 5K/10K is available from 350-600 mm	
Face to Face Dimensions	JIS B2002 (46 series)/ ISO 5752 wafer butterfly valve(short)
